At the proper time, Delaware will give favorable consideration to the development of reciprocal agreements with other states. Also, the lead agency will forward copies of reciprocal agreements entered into with other states to EPA for inclusion in its State plan. Other regulatory activities listed in the plan which will supplement Delaware's certification program provide for the stop sale and removal of non-registered pesticides, routine surveillance activities conducted by regulatory field inspectors and the label review of pesticide products to protect against misbranding.

Pesticide field agents assigned full time to pesticide use and application activities will provide adequate assurance that certified applicators comply with standards.

The Delaware State Plan mentions that various short courses, seminars, special training sessions, etc., will be provided by the Delaware CES and by various trade association groups. Assurances are provided in the proposed pesticide law that certified applicators continue to meet requirements of changing technology.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed plan for the State of Delaware to the Chief, Pesticides Branch, Region III, Environmental Protection Agency, 6th and Walnut Streets, Room 3323, Philadelphia, Pennsylvania 19106. The comments must be received on or before September 19, 1976, and should bear the identifying notation OPP-42028. All written comments filed pursuant to this notice will be available for public inspection at the above mentioned locatons from 8:30 to 3:30 p.m. Monday thru Friday.

Dated: July 19, 1976.

DANIEL J. SNYDER, III,
Regional Administrator,
Region III.

NEVADA

Approval of State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), and the implementing regulations of 40 CFR Part 171 require each state desiring to certify applicators to submit a plan for its certification program. Any state certification program under this section shall be maintained in accordance with the state plan approved under this section.

On May 12, 1976, a notice was published in the FEDERAL REGISTER (41 FR 19374-19375) of the intent of the Regional Administrator, EPA, Region IX, to approve, on a contingency basis, the Nevada Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides (Nevada State Plan). Contingency approval was requested by the State of Nevada pending promulgation of additional regulations implementing the legislation. Complete copies of the Nevada plan were made available for public inspection at the Nevada Department of Agriculture, Reno, Nevada; EPA, Region IX Office, San Francisco, California; and the Office of Pesticide Programs, EPA, Washington, D.C.

No comments were received; therefore, the plan as it appeared in the FEDERAL REGISTER, May 12, 1976, will go unchanged.

It has been determined that the Nevada plan will satisfy the requirements of section 4(a)(2) of the amended FIFRA and of 40 CFR Part 171, if the regulations described in the plan are promulgated by the Nevada Department of Agriculture. Accordingly, the Nevada plan is approved contingent upon this.

This contingency approval shall expire 12 months from its effective date, if these terms and conditions are not satisfied by that time. On or before the expiration of the period of contingency approval, a notice shall be published in the FEDERAL REGISTER concerning the extent to which these terms and conditions have been satisfied and the approval status of the Nevada plan as a result thereof.

Effective date. Pursuant to section 4(d) of the Administrative Procedure Act, 5 U.S.C. 553(d), the Agency finds that there is good cause for providing that the 12 months contingency approval granted herein to the Nevada plan shall be effective immediately. Neither the Nevada plan itself nor this Agency's contingency approval of the plan creates any direct or immediate obligations on pesticide applicators or other persons in the State of Nevada. Delays in starting the work necessary to implement the plan, such as may be occasioned by providing some later effective date for this contingency approval, are inconsistent with the public interest. Accordingly, this contingency approval shall become effective immediately.

Dated: July 22, 1976.

PAUL DEFALCO, Jr.,
Regional Administrator,
EPA Region IX.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

PRIVACY ACT OF 1974

Additional Routine Use

Notice is hereby given that, pursuant to 5 U.S.C. §§ 301 and 552a and 42 U.S.C. 2000e-12(a), the Equal Employment Opportunity Commission hereby adopts a new routine use for all of its Privacy Act systems of records except EEOC-3, Charge of Discrimination Case Files.

At 41 FR 27112 (July 1, 1976), the Commission published notice that it proposed to adopt the following routine use:

Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

In that notice, the Commission stated that comments on it received no later than July 31, 1976, would be considered. The Commission received no comments on said routine use and therefore adopts said use for systems EEOC-1, -2, and 4-13.

Also at 41 FR 27112, the Commission notice a proposed routine use for system EEOC-3, Charge of Discrimination Case Files. The proposed routine use for that system read as follows:

The Commission has established in Section 83 of its Compliance Manual (Vol. 1), policies with respect to the disclosure to charging parties of information contained in this system of records. Disclosure which is consistent with these policies may be made to a Congressional office from the charge of discrimination case file of a charging party in response to an inquiry from the Congressional office made at the request of that charging party.

As a result of comments received thereon, the Commission is considering an amendment to that proposed routine use. Therefore, the Commission is not at this time adopting said routine use.

Signed at Washington, D.C. this 11th day of August, 1976.

ETHEL BENT WALSH,
Vice-Chairman.

FEDERAL COMMUNICATIONS COMMISSION

FM BROADCASTING

Applications Ready and Available for Processing

Notice is hereby given, pursuant to section 1.573(d) of the Commission's rules, that on October 4, 1976, the FM broadcast applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to section 1.227(b)(1) and section 1.591(b) of the Commission's rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on October 1, 1976, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., by the close of business on October 1, 1976. The attention of prospective applicants is directed to the fact that **some contemplated proposals** may not be eligible for consideration with an application appearing in the attached Appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to section 1.573(d) of the Commission's rules.

The attention of any party in interest desiring to file pleadings concerning any **pending FM broadcast applications**, pursuant to section 309(d)(1) of the Communications Act of 1934, as amended, is directed to section 1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

Adopted: Aug. 10, 1976.

Released: Aug. 17, 1976.

Federal Communications Commission.
VINCENT J. MULLINS,
Secretary.

FAR EAST CONFERENCE, ET AL.

Agreement Filed

Notice is hereby given that the following agreement, accompanied by a statement of justification, has been filed with the Commission for approval pursuant to Section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement and the statement of justification at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement and the statement of justification at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before September 6, 1976. Any person desiring a hearing on the proposed agree-

V41I160 AUG 17 76 UMI

ment shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Edward D. Ransom, Esq.,
Lillick McHose & Charles,
Two Embarcadero Center, 26th Floor,
San Francisco, California 94111.

Agreement No. 10135 is a policy level discussion agreement between the member lines of the Far East Conference (Agreement No. 17) and the Pacific Westbound Conference (Agreement No. 57) which permits the member lines of each to discuss various, enumerated, matters of mutual concern in the trades served by each with the object of drafting appropriate recommendations for referral to either or both Conferences for consideration and, if acceptable, for implementation. This arrangement is scheduled to expire on October 8, 1976 "• • • or sixty (60) days following Commission decision in Docket 74-41 should decision result in disapproval of Agreement 8200 [a rate-making agreement, essentially, between the Far East and Pacific Westbound Conferences] • • • whichever shall occur earlier." No decision in Docket 74-41 has been reached by the Commission.

The effect of Agreement No. 10135-2, here, is to accord the basic agreement an unlimited approval or "• • • until the sixtieth (60th) day after a notice of termination subscribed by three or more parties shall have been mailed to each of the other parties • • •" and to the Commission.

Dated: August 12, 1976.

By Order of the Federal Maritime Commission.

FRANCIS HURNEY,
Secretary.

LYKES BROS. STEAMSHIP CO., INC. AND STRACHAN SHIPPING CO.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 6, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

R. J. Finnan, Pricing Analyst, Lykes Bros. Steamship Company, Inc., 300 Poydras Street, New Orleans, Louisiana 70130.

Agreement No. 10257 between Lykes Bros. Steamship Company, Inc. (Lykes) and Strachan Shipping Company (Strachan) is an agency agreement whereby Lykes appoints Strachan as its agent in the ports of Port Canaveral, Port of Palm Beach, and Key West, Florida, on the terms and conditions and to the extent set forth therein.

By Order of the Federal Maritime Commission.

Dated: August 12, 1976.

FEDERAL POWER COMMISSION

[Docket No. E-9563]

BONNEVILLE POWER ADMINISTRATION

Filing of Transmission Rate Schedules and Provisions

AUGUST 11, 1976.

Take notice that on July 30, 1976, the Secretary of the Interior, upon behalf of Bonneville Power Administration (BPA), pursuant to Section 9 of the Federal Columbia River Transmission System Act (93 Stat. 454) filed with the Federal Power Commission a request for confirmation and approval of proposed transmission rate schedules and General Transmission Rate Schedule Provisions for the transmission (wheeling) of power by BPA.

The BPA submittal, which comprises three rate schedules, includes:

1. *Schedule FPT-1.* Available for the firm transmission of electric power and energy for another entity over Federal electric transmission system facilities. The rate is designed for transmitting power from non-Federal hydro and existing thermal plants to load centers over Federal facilities where the specific facilities used may not be readily determined.

2. *Schedule UFT-1.* Available for the transmission of electric power and energy for another entity over specified Federal transmission system facilities. The basic monthly charge shall be one-twelfth of the sum of the products of the annual cost of each element of the specific facilities per kilowatt of capacity rating and the transmission demand.

3. *Schedule ET-1.* This schedule is available for the incidental transmission of electric energy for another entity using excess capacity of the Federal transmission system.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 10, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-832]

CENTRAL HUDSON GAS & ELECTRIC CORP.

Rate Filing

AUGUST 10, 1976.

Take notice the Central Hudson Gas & Electric Corporation (Central Hudson), on August 2, 1976, tendered for filing as a rate schedule an executed agreement dated May 17, 1976 between Central Hudson and New York State Electric & Gas Corporation (NYSEG). The proposed rate schedule provides for the sale of firm capability and associated energy by Central Hudson.

The rate schedule provides for a capability charge of $100 per megawatt per day of operating capability made available by Central Hudson and an energy charge equal to Central Hudson's average system steam electric generation costs, which includes fuel and operation and maintenance costs, plus $.0005 per kilowatt-hour.

Central Hudson requests waiver of the notice requirements of Section 35.3 of the Commission's Regulations so that the proposed rate schedule can be made effective on May 18, 1976 in accordance with the terms thereof. Central Hudson states that it will be uncompensated for costs already incurred pursuant to the terms of the proposed rate schedule, if the waiver is not granted.

Central Hudson states that a copy of its filing was served on NYSEG.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this

[Project No. 2284]

CENTRAL MAINE POWER CO.

Application for Easement Over Project Lands

AUGUST 10, 1976.

Public notice is hereby given that an application was filed on July 6, 1976, under the Federal Power Act (16 U.S.C. 791a–825r) by the Central Maine Power Company (correspondence to: Mr. Jon S. Readnour, Counsel, Central Maine Power Company, 9 Green Street, Augusta, Maine 04330) for approval of an easement over lands of Brunswick-Topsham Project No. 2284, located on the Androscoggin River, in Cumberland and Sagadahoc Counties, Maine.

The Company requests Commission approval for the granting of a 25-foot wide permanent easement approximately 640 feet long to the Topsham Sewer District (District), which would accommodate a 10-inch interceptor pipe as part of the District's proposed interceptor sewer system. The pipe would not discharge into project waters.

The District received a Corps of Engineers Permit (ME–BATH–73–290) for a river crossing not on project lands but part of the total sewer project. Also, approvals were received from the Environmental Protection Agency (EPA), Southern Mid Coast Regional Planning Commission, State of Maine—State Planning Office, Maine Department of Transportation and the Maine Department of Environmental Protection.

Public notices have been published in connection with applications for approval with EPA, Maine Department of Environmental Protection, and the Town of Topsham Shoreland Zoning Commission. After public notice and hearings, all approvals were granted by the appropriate agencies.

The Company has requested the earliest possible Commission action and the use of the shortened procedures pursuant to Section 1.32(b) of the Commission Rules.

Any person desiring to be heard or to make any protest with reference to said application should, on or before September 27, 1976, file with the Federal Power Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 C.F.R. § 1.8 or § 1.10 (1975). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and conferred upon the Federal Power Commission by Sections 308 and 309 of the Federal Power Act, 16 U.S.C. §§ 825g and 825h, and the Commission's Rules of Practice and Procedure, specifically § 1.32(b), a hearing on this application may be held before the Commission without further notice if no issue of substance is raised by any request to be heard, protest, or petition filed subsequent to this notice within the time required herein. If an issue of substance is so raised, further notice of hearing will be given.

Under the shortened procedure herein provided for, unless otherwise advised, it will not be necessary for the Company to appear or be represented at the hearing before the Commission.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24014 Filed 8-16-76;8:45 am]

[Docket No. ER76-709]

CINCINNATI GAS & ELECTRIC CO.

Order Denying Requested Relief

AUGUST 3, 1976.

On July 2, 1976, the Village of Georgetown, Ohio, intervenor herein, filed a motion requesting that the Commission order The Cincinnati Gas & Electric Company (CG&E) to commence billing Georgetown on CG&E's presently effective FPC Rate Schedule No. 36. For the reasons hereinafter stated, we shall deny Georgetown's motion.

Docket No. ER76–709 was initiated by CG&E's filing on May 25, 1976, of a proposed rate increase to Georgetown and The Union Light, Heat and Power Company (Union Light), a wholly-owned subsidiary of CG&E. One of the stated purposes of the proposed rate change was to place Georgetown and Union Light under the same rate schedule. By order issued June 23, 1976, the Commission accepted for filing and suspended for two months the proposed tariff changes, established hearing procedures, and granted the petitions of Georgetown and Union Light to intervene.

In the instant pleading, Georgetown contends that pursuant to a settlement agreement dated May 14, 1975, in Docket Nos. E–8885 and E–8546 and approved by Commission order issued September 5, 1975, CG&E granted Georgetown's request for the same rate as Union Light and agreed to file a rate schedule which would be applicable to both Georgetown and Union Light. Georgetown states that to date, it has received no benefit from the lower rate within Rate Schedule No. 36 that is presently applicable to only Union Light, which rate will be superseded on August 25, 1976, by the increased rate filed in Docket No. ER76–709. Georgetown requests that CG&E be ordered to bill Georgetown under Rate Schedule No. 36 so that Georgetown may receive the prospective advantages of such lower rate prior to its August 25 cancellation.

On July 14, 1976, CG&E filed an answer to Georgetown's motion contending that (1) the motion seeks interlocutory relief that cannot be granted, and (2) the terms of the settlement agreement do not entitle Georgetown to the relief requested.

Upon review of the May 14, 1975 settlement agreement we find no support for the relief requested by Georgetown. Article 8 of the settlement agreement provides in pertinent part:

> 8. Since Georgetown requests the same rate as the Union Light, Heat and Power Company, CG&E shall file, pursuant to § 205(d) of the Federal Power Act, at some time subsequent to termination of these consolidated cases a notice of revised rate schedule for wholesale electric service to both Georgetown and The Union Light, Heat and Power Company. Such revised rate schedule shall be designed to contain a single demand step and a single energy step. Such filing will contain two cost of service studies. One will utilize twelve month average coincidental peak for allocation purposes and the other will be premised upon a single annual coincidental peak for such allocation, with testimony in support of the latter allocation approach.

The above language clearly indicates that CG&E would file a rate change applicable to both Georgetown and Union Light so as to place them on the same rate. We find no basis for granting Georgetown's request to be placed on the present rate applicable to Union Light (Rate Schedule No. 36).

The Commission finds: Good cause does not exist to grant the relief requested by Georgetown in its July 2, 1976 motion.

The Commission orders: (A) The relief requested by Georgetown in its July 2, 1976 motion is hereby denied.

(B) The Secretary shall cause the prompt publication of this order in the Federal Register.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24003 Filed 8-16-76;8:45 am]

[Docket No. CP76-454]

COLUMBIA GAS TRANSMISSION CORP. AND COLUMBIA GULF TRANSMISSION CO.

Application

AUGUST 3, 1976.

Take notice that on July 22, 1976, Columbia Gas Transmission Corporation (Columbia Gas), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and Columbia Gulf Transmission Company (Columbia Gulf), 3805 West Alabama Avenue, Houston, Texas 77027, filed in Docket No. CP76–454 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Columbia Gas to construct and operate certain facilities and to transport up to 2,500 Mcf of natural gas per day for the City of Somerset, Kentucky (Somerset), and authorizing a new delivery point from Columbia Gulf to Columbia Gas and the construction and operation of certain natural gas facilities related thereto, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Columbia Gas proposes to construct and operate a measuring and regulating facility and approximately 0.1 mile of 6-inch pipeline to connect said facility to Columbia Gas' existing Line KA–1, which services the City of Manchester, Clay County, Kentucky. It is said that these facilities are required to receive volumes of gas to be transported for Somerset and would also be used to receive volumes of gas purchased by Columbia Gas from Somerset and Patrick Petroleum Corporation (Patrick). The application shows the estimated cost of Columbia Gas' proposed facilities is $45,600, which cost would be generated from internal sources.

Columbia Gulf proposes to establish an additional point of delivery to Columbia Gas and construct and operate a measuring and regulating facility related thereto. It is said that the proposed point of delivery and related facilities would be used to deliver volumes of gas to Somerset for the account of Columbia Gas and would be located on existing and intersecting rights-of-way of Columbia Gulf and Somerset in Casey County, Kentucky. The application shows the estimated cost of these facilities to be $41,200, which cost would be reimbursed to Columbia Gulf by Somerset.

The application indicates that the transportation and redelivery of gas is pursuant to an effort by Somerset to supplement its supply of natural gas for the benefit of all of the industrial customers of Somerset Gas Service, which is Somerset's gas utility business. It is further incidated that Somerset is in the process of constructing an 8-inch gas pipeline from Hyden, Leslie County, Kentucky, to Manchester to move production volumes from the Hyden field to market and that not less than 50 percent of the volumes dedicated to Somerset would be sold by Somerset to Columbia Gas. It is asserted that Somerset's remaining 50 percent, nôt to exceed 2,500 Mcf per day, is to be transported under the requested authorization, for which transportation service Somerset would pay Columbia Gas 20.0 cents per Mcf. It is further asserted that all capacity in the Hyden to Manchester 8-inch line above 5,000 Mcf per day is dedicated and reserved for Columbia Gas' exclusive use without charge for transportation and that Columbia Gas would pay Somerset $300,000 as a contribution in aid of construction after the completion of and the placing in service of the Hyden-to-Manchester line.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 26, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter find that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24004 Filed 8-16-76;8:45 am]

[Docket Nos. E-8769, E-8770, E-9119, ER76-218 and ER76-219]

FLORIDA POWER AND LIGHT CO.

Further Extension of Time

AUGUST 11, 1976.

On July 26, 1976, the Commisison Staff Counsel filed a motion to extend the procedural dates fixed by order issued July 3, 1975, as most recently modified by notice issued July 16, 1976, in the above-designated proceeding. The motion states that Florida Power and Light Company supports the proposed schedule.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Company Testimony, October 15, 1976.
Service of Staff Testimony, October 29, 1976.
Service of Intervenor Testimony, November 12, 1976.
Service of Company Rebuttal, November 29, 1976.
Hearing, December 14, 1976.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24021 Filed 8-16-76;8:45 am]

[Docket No. ER76-837]

ILLINOIS POWER CO.

Filing Amendment No. 8 to Interconnection Agreement

AUGUST 10, 1976.

Take notice that Illinois Power Company (Illinois Power) on August 2, 1976, tendered for filing Amendment No. 8 to the Interconnection Agreement dated March 1, 1964 between Commonwealth Edison Company (Commonwealth Edison) and Illinois Power. The Commission has previously designated the March 1, 1964 Agreement as Illinois Power Rate Schedule FPC No. 11 and Commonwealth Edison Rate Schedule FPC No. 5.

The parties state that Amendment No. 8 to the Agreement provides for an increase in the minimum energy charges for Emergency Service from 17.5 mills to 30 mills per kilowatthour, proposed to become effective September 1, 1976. The parties also state that since the use of Emergency Service under the proposed minimum charge cannot be accurately determined or estimated, it is impossible to determine or estimate the increase in revenues resulting from Amendment No. 8.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 or 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNEETH F. PLUMB,
Secretary.

[FR Doc.76-24015 Filed 8-16-76;8:45 am]

[Docket No. ER76-823]

IOWA SOUTHERN UTILITIES CO.

Proposed Rate Change

AUGUST 10, 1976.

On July 30, 1976, Iowa Southern Utilities Company, ("Iowa Southern" or "Company") submitted for filing proposed changes in its rates under which wholesale electric service for retail is provided to Albia Light and Railway and to the following Iowa cities: Seymour, Afton, Eldon, Orient, Danville, and New London. Presently effective rate schedules 91 and 96 would be withdrawn and a single Rate 92 would be applicable to service to all seven customers. The proposed change set forth in that filing would increase revenues from jurisdictional sales by $202,720, based on the twelve months ended December 31, 1975.

Iowa Southern states that the cost of service study for the test year 1975 as submitted in the filing demonstrates the need for the increase in revenue to provide a reasonable return on the investment dedicated to providing electrical service to these wholesale customers.

Iowa Southern requests that the Commission waive the notice requirements of Section 35.13(b)(4)(i) and 35.13(b)(5)(i) of the regulations and accept the

V41160 AUG 17 76 UMI

proposed rate schedule for filing with an effective date of August 31, 1976, or, in lieu thereof, order a suspension period of not more than one day.

Copies of this filing have been served by personal delivery to Albia Light and Railway and to the cities of Seymour, Afton, Eldon, Orient, Danville, and New London. A copy of the filing has also been mailed to the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24016 Filed 8-16-76;8:45 am]

[Docket No. ER76-838]

MISSOURI PUBLIC SERVICE CO.

Filing of Notice of Cancellation

AUGUST 10, 1976.

Take notice that on July 14, 1976, Missouri Public Service Company (MPS) filed a Notice of Cancellation of Service Schedule E, Supplement No. 1 to its FPC Rate Schedule No. 18. MPS states that Service Schedule E terminated by its own terms on May 31, 1973.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 24, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24018 Filed 8-16-76;8:45 am]

[Docket No. E-9473]

MISSOURI UTILITIES CO.

Tender of Tariff Sheets

AUGUST 9, 1976.

Take notice that on July 20, 1976, Missouri Utilities Company (MU) tendered for filing the following tariff sheets as part of its FPC Electric Tariff, Original Volume No. 1:

1st Revised Sheet No. 3, superseding Interim, 1st Revised Sheet No. 3.
1st Revised Sheet No. 4, superseding Interim, 1st Revised Sheet No. 4.
1st Revised Sheet No. 5, superseding Interim, 1st Revised Sheet No. 5.
Original Sheet No. 5A, superseding Interim, Original Sheet No. 5A.

MU states that the tariff sheets are tendered pursuant to the Commission's order issued December 5, 1975, in Docket No. E-9473 and represent MU's proposed final settlement of that docket. MU states that the tendered SFR-1 rate schedule reduces the per kW billing demand charge to reflect the settlement in Union Electric Company, Docket No. E-9496. MU states that there are no refunds due to the City of Kennett in Docket No. E-9473 since it incurred no billing demand responsibility, but that it is necessary to lower the per kW billing demand charge in case billing demand responsibility is incurred in the future.

MU requests waiver of the 30-day notice requirement to permit an effective date of August 1, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23995 Filed 8-16-76;8:45 am]

[Docket No. ER76-801]

MISSOURI UTILITIES CO.

Tariff Sheet Correction

AUGUST 10, 1976.

Take notice that on July 16, 1976, Missouri Utilities Company (MU) tendered for filing tariff sheet, Interim Original Sheet No. 5A, superseding Interim Original Sheet No. 6 in its FPC Electric Tariff, Original Volume No. 1. MU states that Interim Original Sheet No. 6 was accepted by Commission order dated December 5, 1975, to become effective November 17, 1975, in Docket No. E-9473, but that the designation was improper because an Original Sheet No. 6 had previously been filed. MU states that the tender herein corrects the tariff sheet numbering. MU requests waiver of the 30 day notice requirement to permit an effective date of July 31, 1976, for the tendered tariff sheet.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24017 Filed 8-16-76;8:45 am]

[Docket No. ER76-831]

MONONGAHELA POWER CO. AND WEST PENN POWER CO.

Changes in Rates and Charges

AUGUST 10, 1976.

Take notice that Allegheny Power Service Corporation (APSC) on July 30, 1976 tendered for filing on behalf of Monongahela Power Company (Monongahela) and West Penn Power Company (West Penn), two of the electric utilities which make up the integrated Allegheny Power System, Amendment No. 4 dated July 21, 1976 to the Interchange Agreement dated October 17, 1968 between Monongahela, West Penn and the Ohio Edison Company and Pennsylvania Power Company (Ohio Edison) designated Monongahela Rate Schedule FPC No. 29 and West Penn Rate Schedule FPC No. 27.

APSC states that Amendment No. 4 provides for an increase in the demand charge for short-term power from $0.45 to $0.50 per kilowatt week to become effective September 1, 1976. Applicants state that since short-term power transactions are scheduled from time to time as load capacity conditions on the systems of the parties dictate, it is impossible to estimate the increase in revenues which would result from Amendment No. 4.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this

filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24019 Filed 8-16-76;8:45 am]

[Docket Nos. RI76-132; RI76-133; RI76-135]

NORTHERN MICHIGAN EXPLORATION CO. ET AL.

Order Consolidating Proceedings and Granting Intervention

AUGUST 4, 1976.

On June 14, 24, and 29, 1976, Northern Michigan Exploration Company (NOMECO) Clark Oil Producing Co. (Clark), and Diamond Shamrock Corporation (Diamond Shamrock), respectively, filed petitions for special relief pursuant to Sections 1.7 and 2.56(a)(g)(2) from the rate established in Section 2.56(a)(1) of the Commission's General Policy and Interpretations.[1] On July 8, 1976, the Michigan Public Service Commission filed a Notice of Intervention and on July 15, 1976, Consumers Power Company filed a petition to intervene both in Docket No. RI76-132.

NOMECO requests a base rate of $1.-7456 per Mcf with annual escalations of 4 percent per annum for the sale of natural gas from its 12.5 percent working interest in production from West Cameron Block 639, Offshore Louisiana, to Trunkline Gas Company (Trunkline) and Consumers Power Company (Consumers). NOMECO is currently making emergency deliveries to Trunkline from West Cameron Block 639 pursuant to Section 157.29 of the Commission's Rules of Practice and Procedure. However, on July 9, 1976, the Commission approved NOMECO's application for a limited term sale of this gas in Docket No. CI76-524 pending the issuance of a permanent certificate in Michigan Gas Storage Company, Docket No. CP74-322. In the latter proceeding, NOMECO proposes to sell gas to its parent, Consumers Power Company. The July 9 order made clear that any rate relief would apply only to its proposed permanent sales to Consumer and not to the limited term sale.

Additionally, NOMECO requests that, pursuant to Section 1.32(b) of the Commission's Rules, the intermediate decision procedure be omitted inasmuch as NOMECO will begin to incur losses if it does not receive the requested relief of July 6, 1976. Further, NOMECO requests, pursuant to Section 1.20(b) of the Rules of Practice and Procedure, that its petition be consolidated with those petitions for special relief of Sun Oil Company (Sun) and Anadarko Production Company (Anadarko) contained in Docket Nos. RI76-117 and RI76-119 insofar as its petition presents issues of law and fact common to those of Sun and Anadarko.

Clark requests a base rate of $2.0418 per Mcf with annual escalations of 4 percent per annum for the sale of natural gas from its 15 percent working interest in production from West Cameron Block 639, Offshore Louisiana, to Trunkline. Clark is currently making deliveries pursuant to its small producer certificate issued in Docket No. CS71-447.

Diamond Shamrock requests a base rate of $1.8272 per Mcf with annual escalations of 4 percent per annum for the sale of natural gas from its 13.34 percent working interest in production from West Cameron Block 639, Offshore Louisiana, to Trunkline. Diamond Shamrock curently receives 52.5 cents per Mcf plus BTU adjustment for gas deliveries pursuant to FPC Gas Rate Schedule No. 67 excepting 10 percent of its 13.34 percent working interest in such reserves. On April 29, 1976, Diamond Shamrock and Trunkline amended their existing agreement to include the 10 percent portion previously reserved for its own use and to provide for an increased base rate of $1.8272 per Mcf with annual escalations of 4 percent per annum, authority for which in the form of special relief is to be considered herein.[2]

Petitioners together with Sun and Anadarko are owners of 100 percent of the working interest in West Cameron Block 639, Offshore Louisiana. As do Sun and Anadarko, petitioners asert that the total costs associated with West Cameron Block 63. exceed the rate established in Section 2.56a(a)(1) and petition for special relief pursuant to Section 2.56a(g)(2) which refers to relief available in cases where wells are located in water depths greater than 250 feet. As do Sun and Anadarko, petitioners state that these sales will be made from wells located in water depth of 365 feet.

The Commission finds: (1) The public convenience warrants the consolidation of Docket Nos. RI76-132, RI76-133, and RI76-135 with previously consolidated Docket Nos. RI76-117 and RI76-119.

(2) No good cause exists for granting the request for waiver and omission of the intermediate decision.

(3) Good cause exists to grant the petition to intervene of Consumers Power Company.

The Commission orders: (A) The petitions for special relief filed herein in Docket Nos. RI76-132, RI76-133, and RI 76-135 are hereby consolidated with Docket Nos. RI76-117 (Sun) and RI76-119 (Anadarko) which were set for hearing with pre-hearing conference by our order dated July 9, 1976.

(B) Accordingly, pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5, 7, 14, and 16 thereof, the Commission's Rules of Practice and Procedure and the Regulations under the Natural Gas Act (18 CFR Chapter 1), a public hearing shall be held in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, to determine the lawfulness of Petitioners' proposed rate increases.

(C) Petitioners and any intervenor supporting the foregoing shall file their direct testimony and evidence on or before August 17, 1976, in conformance with our July 9 order. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, the Commission Staff, and all parties to this proceeding.

(D) The Presiding Administrative Law Judge shall preside at a pre-hearing conference to be held on September 9, 1976, at 9:30 A.M. EDT, in a hearing room at the address noted in Ordering Paragraph (B).

(E) The Secretary shall cause prompt publication of this order to made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24010 Filed 8-16-76;8:45 am]

[Docket No. CP76-456]

NORTHERN NATURAL GAS CO.

Application

AUGUST 3, 1976.

Take notice that on July 26, 1976, Northern Natural Gas Company, operating as Peoples Natural Gas Division (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP 76-456 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the operation of facilities and the exchange with and sale to Colorado Interstate Gas Company (CIG) of natural gas in interstate commerce, all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that Applicant and CIG have executed an agreement dated April 20, 1976, for the sale and exchange of natural gas under control of Applicant in the Kendall Field area of Kearny and Hamilton Counties, Kansas. It is stated in the agreement that it supersedes the agreement between Applicant and CIG dated June 1, 1972, pursuant to which the application states service is authorized in Docket Nos. CP 72-275 and CP72-291. Applicant states that several new wells have been drilled in the Kendall area which are dedicated to Applicant; and, as a result, Applicant is again experiencing underage of its production takes which it cannot make up by utilizing existing facilities or by means of the currently authorized exchange. Accordingly, Applicant proposes to exchange and sell gas under the agreement of April 20, 1976.

Under the agreement of April 20, 1976, Applicant would deliver gas to CIG at

[1] Notice of NOMECO's petition was issued on June 22, 1976, and appeared in the FEDERAL REGISTER on July 28, 1976, at 41 FR 26613. Notices of Clark's and Diamond Shamrock's petitions were issued on July 9, 1976.

[2] Concurrently Diamond Shamrock filed on June 29, 1976, an application to amend its certificate in Docket No. CI75-13 with a copy of the amendatory agreement to be filed as a supplement to its FPC Gas Rate Schedule No. 67 so as to include 10 percent of its 13.34 working interest ownership previously reserved for its own use at a rate of $1.8272 per Mcf with annual escalations of 4 percent as requested in this petition for special relief.

V41160
AUG 17 76
UMI

two points of interconnection on CIG's gathering system in Kearny County, Kansas, at aggregate delivery rates of not less than 3,000 Mcf on an average day and not more than 7,500 Mcf on any day. CIG would have a continuing option to purchase 25 percent of the gas delivered by Applicant which might be in excess of 37,500 Mcf per month. Applicant would charge CIG for the sale gas the average price Applicant pays for gas it purchases in the area from wells contracted for and connected on or after January 1, 1973, which rate is said initially to be 63.75 cents per Mcf subject to Btu adjustment. In addition Applicant would charge an amount for gathering and transporting such gas, which rate is said initially to be 6.32 cents per Mcf. The application states that minimum sales would be 161,250 Mcf annually.

CIG would redeliver to Applicant, from April 1 through October 15, thermally equivalent volumes of gas, less volumes purchased from Applicant. For all gas deliveries by Applicant to CIG which would be in excess of 37,500 Mcf per month and not purchased by CIG, Applicant would pay CIG an initial rate of 4.5 cents per Mcf for compression and transportation. Redeliveries would be made at one point in Moore County, Texas, at one point in Bent County, Colorado, and at three points in Baca County, Colorado.

Applicant states that in order to effect delivery of gas to CIG in Section 31, T. 24 S., R. 34 W., Kearny County, Kansas, it requests authorization to operate an existing measuring station located in proximity of the point of interconnection.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 27, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24005 Filed 8-16-76;8:45 am]

[Docket No. CP76-457]

NORTHERN NATURAL GAS CO.

Application

AUGUST 3, 1976.

Take notice that on July 26, 1976, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP76-457 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas in interstate commerce for Iowa Electric Light and Power Company (Iowa Electric) and the construction and operation of facilities for the delivery of gas to Iowa Electric, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to deliver from March 27 through October 26 of each year (summer season) up to 2,000 Mcf of summer maximum daily volume of gas to Iowa Power and Light Company (Iowa Power) at Iowa Power's Des Moines Town Border Station No. 1 in Polk County, Iowa, for the account of Iowa Electric for liquefaction. On days not within the summer season gas might be delivered under the same circumstances, the application states.

The application states that each day during the summer season Iowa Electric would designate by individual billing group the specific volume it wishes Applicant to deliver to Iowa Power and that the volume designated for any billing group would not exceed the summer maximum daily volume then currently in effect for such billing group as set forth below. It is stated further that the gas delivered on any day would be that which could otherwise be delivered to Iowa Electric within its authorized entitlement for such day. The proposed summer maximum daily volumes are as follows:

Billing group	Rate zone	Volume (in thousand cubic feet)
B	2	8
	3	409
Total group B		417
C	2	673
	3	430
Total group C		1,103
D	3	428
	B	52
Total group D		480
Total summer		2,000

The gas delivered during the summer season would be considered as sold to Iowa Electric within the billing group from which the gas was diverted and would be billed to such billing group under Rate Schedule CD-1. The deliveries under the instant proposal would be considered to be the first volumes delivered to each designated billing group.

Applicant also proposes to transport by displacement to the various billing groups as designated by Iowa Electric volumes of vaporized LNG at a daily rate of up to 9,000 Mcf from October 27 through March 26 (winter season). It is stated that all volumes would be designated by individual billing group and would not exceed the winter maximum daily volume then in effect for such billing group as set forth below. The proposed winter maximum daily volumes[1] are as follows:

Billing group	Rate zone	Volume (in thousand cubic feet)
B	2	39
	3	1,840
Total group B		1,879
C	2	3,029
	3	1,939
Total group C		4,968
D	3	1,922
	B	231
Total group D		2,153
Total winter		9,000

The application states that the total daily volumes designated for transportation by Iowa Electric would be made available by Applicant's concurrent reduction of authorized deliveries to Iowa Power at Des Moines under Rate Schedule CD-1. Further, it is stated all gas transported for Iowa Electric under the instant proposal would be resold only to firm and small volume consumers.

For the proposed service Applicant would charge seasonal demand charges of $2.465 times the summer maximum daily volume and $5.239 times the winter maximum daily volume. In addition, there would be a commodity charge in the summer season for deliveries to Iowa Power of 0.16 cent per Mcf for Billing Group C and none for Billing Groups B and D. There would be commodity charges in the winter season for deliveries from Iowa Power of 4.204 cents per Mcf for Billing Group B, 0.841 cent per Mcf for Billing Group C, and 3.149 cents per Mcf for Billing Group D.

Applicant states that it has reviewed the capacity of each town border station through which Applicant effects delivery and sale of natural gas on a firm basis to Iowa Electric for distribution and resale in Iowa and that certain of the meter facilities of the town border stations have been found deficient with regard to measuring the respective firm gas volumes. Accordingly, Applicant proposes to changeout the measuring equipment at the following town border stations in order to assure accurate measurement:

Town Border Station	*Location on*
Central City No. 1	Linn County, Iowa
Delmar No. 1	Clinton County, Iowa
Huxley No. 1	Story County, Iowa
Kanawha No. 1	Hancock County, Iowa

The facilities are estimated to cost $9,330 which would be financed with cash on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 25, 1976 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24006 Filed 8-16-76;8:45 am]

[Project No. 108]

NORTHERN STATES POWER CO.

Issuance of Annual License(s)

AUGUST 9, 1976.

On February 24, 1970, Northern States Power Company, Licensee for Chippewa Reservoir Project No. 108, located in Sawyer County, Wisconsin, filed an application for a new license under the Federal Power Act and Commission regulations thereunder.

The license for Project No. 108 was issued effective August 8, 1921, for a period ending August 7, 1971. Since the original date of expiration, the project has been maintained and operated under annual licenses, the most recent of which will expire August 7, 1976. In order to authorize the continued operation and maintenance of the project pursuant to the Federal Power Act, pending Commission action on Licensee's application, it is appropriate and in the public interest to issue an annual license to the Northern States Power Company.

Take notice that an annual license is issued to Northern States Power Company under the Federal Power Act for the period August 8, 1976, to August 7, 1977, or until Federal takeover, or until the issuance of a new license for the project, whichever comes first, for the continued operation and maintenance of the Project No. 108, subject to the terms and conditions of its present license. Take further notice that if Federal takeover or issuance of a new license does not take place on or before August 7, 1977, a new annual license will be issued each year thereafter, effective August 8 of each year, until such time as a new license is issued, or Federal takeover takes place, without further notice being given by the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23996 Filed 8-16-76;8:45 am]

[Docket No. CP76-247]

NORTHERN NATURAL GAS CO. AND PANHANDLE EASTERN PIPE LINE CO.

Amendment to Application

AUGUST 9, 1976.

Take notice that on July 26, 1976, Northern Natural Gas Company (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, and Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP76-247 an amendment to their application filed in said docket pursuant to Section 7(c) of the Natural Gas Act requesting authorization to add certain wells to the gas exchange between Applicants proposed in said docket, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicants state that their application in the instant docket requests, among other things, authority to receive and deliver gas on a volume-for-volume basis, all in accordance with two Gas Exchange Agreements between Applicants both dated August 11, 1957. Applicants further state that subsequent to the filing of the application in this docket, they entered into an Amended Exhibit "A", dated June 17, 1976, and an Amended Exhibit "B", dated July 7, 1976, to the Gas Exchange Agreement Deep Gas providing for the addition of four deep gas wells as follows:

Well name, county, state	Producer	Docket No.	Interest committed to or owned by—
Lauck-Massey No. 1, Edwards, Kans.	D. R. Lauck	C871-166	Northern.
Elliott E., No. 1, Stevens, Kans.	Mobil Oil Corp.	G-7642	Do.
Ebell, G. W., No. 1, Stevens, Kans.	do.	G-7642	Do.
Calhoon No. 1 (Lower Morrow), Beaver, Okla.	Decalta International Corp.	C874-8	Panhandle.

It is indicated that Applicants have contracted for the purchase of gas from the wells set forth above and desire that such wells be included in the exchange between them. Applicants state that they have been depleting their dedicated reserves during the past several years at a rate faster than either has been able to acquire new reserves, thereby reducing the total reserves available to their respective systems. It is asserted that as a result, neither Applicant is able to supply the full requirements of its customers and that the addition of the wells to the gas exchange as herein proposed would assist in maintaining adequate and reliable service to Applicants' customers.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before August 30, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23997 Filed 8-16-76;8:45 am]

[Project No. 175]

PACIFIC GAS AND ELECTRIC CO.

Issuance of Annual License(s)

AUGUST 9, 1976.

On June 29, 1970, Pacific Gas and Electric Company, Licensee for Balch Project No. 175, located in Fresno County, near the city of Fresno in Sequoia and Sierra National Forests, filed an application for a new license under the Federal Power Act and Commission regulations thereunder.

The license for Project No. 175 was issued effective July 28, 1922, for a period ending July 27, 1972. Since the original date of expiration, the project has been

[1] The agreement among Applicant, Iowa Electric, and Iowa Power specifies delivery points within each rate zone.

V 41 160
AUG 17 76
UMI

maintained and operated under annual licenses, the most recent of which will expire on July 27, 1976. In order to authorize the continued operation and maintenance of the project pursuant to the Federal Power Act, pending Commission action on Licensee's application, it is appropriate and in the public interest to issue an annual license to Pacific Gas and Electric Company.

Take notice that an annual license is issued to Pacific Gas and Electric Company under the Federal Power Act for the period July 28, 1976, to July 27, 1977, or until Federal takeover, or until the issuance of a new license for the project, whichever comes first, for the continued operation and maintenance of the Balch Project No. 175, subject to the terms and conditions of its present license. Take further notice that if Federal takeover or issuance of a new license does not take place on or before July 27, 1977, a new annual license will be issued each year thereafter, effective July 28 of each year, until such time as Federal takeover or a new license is issued, without further notice being given by the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23998 Filed 8-16-76;8:45 am]

[Docket No. ER76-820]

PUBLIC SERVICE COMPANY OF OKLAHOMA

Tariff Change

AUGUST 10, 1976.

Take notice that the Public Service Company of Oklahoma (the "Company"), on July 30, 1976, tendered for filing proposed changes in its FPC Electrict Service Tariff No. 162. The proposed changes would increase revenues from sales and service to the Grand River Dam Authority ("GRDA") by $9,055,158 based on the 12 month period ending December 31, 1976. The filing is made as a complaint under Section 206(a) of the Federal Power Act.

The Company states that it is filing these proposed changes as a result of the large deficit it is incurring on operations related to serving GRDA. The Company alleges that there is a resulting adverse effect on the public interest in that, in the absence of a rate increase, the existing rate is confiscatory, the Company's ability to provide reliable and safe electric service to its retail and wholesale customers is jeopardized, the cost of financing the Company's construction program is increased such as to threaten the continuation of service to its customers at fair and reasonable rates, GRDA is the recipient of an unduly discriminatory and preferential rate, and waste of energy resources, principally natural gas, is encouraged.

The Company further states that copies of the filing were served upon the following parties:

The Grand River Dam Authority, P.O. Drawer 112, Vinita, Oklahoma 74301.
The Oklahoma Corporation Commission, Jim Thorpe Office Building, Oklahoma City, Oklahoma 73102.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Opinion No. 742-B; Docket No. R-393]

SMALL PRODUCER REGULATION

Opinion and Order Clarifying Opinion No. 742-A

AUGUST 2, 1976.

On July 27, 1976, the Commission issued Opinion No. 742-A, denying rehearing and reconsideration of Opinion No. 742. In its discussion in Opinion No. 742-A, the Commission, at mimeo p. 17, stated that small producers would receive the same rate as large producers for sales that qualified under Opinion No. 770, Opinion And Order Prescribing Uniform National Rate For Sales Of Natural Gas Dedicated To Interstate Commerce On Or After January 1, 1973, For The Period January 1, 1975 To December 31, 1976, Docket No. RM75-14, issued July 27, 1976.

Some confusion has arisen because of this statement in that the Commission in Opinion No. 770 set one rate for the period January 1, 1973 to December 31, 1974, and another for January 1, 1975 to December 31, 1976. The prior period is the same as that used by the Commission in its first nationwide new gas rate proceeding, Opinion Nos. 699, et seq., aff'd sub nom, National Rate Cases For New Gas (*Shell Oil Co.* v. *F.P.C.*, 520 F. 2d 1061 (5th Cir. 1975), cert. denied sub nom, *The California Co.* v. *F.P.C.*, ---- U.S. ----, ---- U.S.L.W. ---- (Docket No. 75-1289, June 14, 1976), and the action in Opinion No. 770 represented a re-evaluation of the just and reasonable rate authorized for the January 1, 1973 to December 31, 1974 sales.

The Commission does want to clarify that small producers are entitled to a differential for sales that meet the Opinion No. 699 criteria, as modified by Opinion No. 770. In Opinion No. 770, supra, pp. 104-108, the Commission adjusted the Opinion No. 699-H rate of 52¢ per Mcf to reflect changing factors, and found 101¢ to be a just and reasonable rate for the 1973-1974 vintage gas. Applying the 20% rate of return, adjusted to reflect incomes taxes, to the cost components for the 1973-74 vintage gas (Opinion No. 770, supra, Exhibit 24), yields a rate at or slightly in excess of 101¢ rate as modified by a 30% differential. Therefore, qualified small producers may charge 130% of the just and reasonable base rate of $1.01 per Mcf (at 14.73 psia) set forth in Opinion No. 70 for sales covered by that ceiling. Small producers may not charge the 130% differential for sales covered by the Opinion No. 770 base rate of $1.42 per Mcf (at 14.73 psia).

On July 28, 1976, the United States Court of Appeals for the District of Columbia Circuit stayed the effectiveness of Opinion No. 770 ". . . in order to afford [the] Court an opportunity more fully to consider the matter and responses thereto." Until Opinion No. 770 is permitted to become effective, small producers may not charge 130% of the ceiling rate of $1.01 per Mcf for the 1973-74 vintage, nor may small producers charge the Opinion No. 770 base rate of $1.42 per Mcf for the 1975-76 biennium.

The Commission orders: (A) Opinion No. 742-A is clarified consistent with this order.

(B) Ordering Paragraph (B) of Opinion No. 742-A is amended to add a new subsection (3), to read as follows:

All sales of natural gas by small producers for resale in interstate commerce that qualify for the base ceiling rate of $1.01 per Mcf set in Opinion No. 770 shall be made at a maximum rate of 130% of that ceiling rate.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24011 Filed 8-16-76;8:45 am]

[Docket No. CP71-264]

SOUTHERN ENERGY CO.

Petition To Amend

AUGUST 2, 1976.

Take notice that on July 26, 1976, Southern Energy Company (Petitioner), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP71-264 a petition to amend the Commission's Opinion No. 622 and order issued June 28, 1972, in said docket (47 FPC 1624), as modified on rehearing by Opinion No. 622-A and order (48 FPC 732), pursuant to Section 7(c) of the Natural Gas Act by permitting Petitioner to include in its tariff a 14 percent allowance on equity, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Applicant states that Opinion No. 622, as modified, authorized it to construct and operate facilities on Elba Island in the Savannah River, Chatham County, Georgia, for the receipt of liquefied natural gas (LNG) from the cryogenic tankers, for the storage of such LNG, for the regasification of such LNG, and for the sale of such regasified LNG. Applicant further states that the tariff approved by Opinion Nos. 622 and 622-A provides for an 11 percent allowance on equity but that since the time of filing of its application in the instant docket costs of capital have increased dramatically. Accordingly, Petitioner requests that it be permitted to include in its tariff a 14 percent allowance on equity.

Petitioner asserts that it is nearing completion of its facilities and must permanently finance the same in the near future. Petitioner submits that the equity allowance authorized to be included in Petitioner's tariff should accurately reflect the cost of equity capital to Petitioner and Petitioner further submits that the cost of its equity capital is at least 14 percent.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 25, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[Docket Nos. RP76-67-2; CP70-7; RP76-67-5]

SOUTHERN NATURAL GAS CO. ETC.

Order Consolidating Proceedings Denying Temporary Extraordinary Relief Providing for Hearing and Granting Interventions

AUGUST 3, 1976.

On Aril 12, 1976, South Carolina Electric and Gas Company (SCE&G) filed a petition in Docket No. RP76-67-2 for extraordinary relief. SCE&G requests that the Commission order Southern Natural Gas Company (Southern Natural) to deliver to SCE&G quantities of natural gas in Priority No. 2 which will be used for injection into SCE&G's LNG plant commencing June 1, 1976. The proposed volume is 6,200 Mcf. per day. SCE&G states that Southern Natural is presently serving gas to various customers in Priority No. 2 for LNG processing. SCE&G further states that to deny it the same classification for LNG processing would violate Section 4(b) of the Natural Gas Act which prohibits undue discrimination. In its petition for extraordinary relief, SCE&G states that the gas to be produced by this peak shaving facility will be for high priority uses as contemplated by Order No. 467-B and Opinion No. 747.

After due notice by publication in the FEDERAL REGISTER on May 11, 1976 (41 FR 20187), timely petitions to intervene were filed by the Alabama Municipal Distributors Group, (Municipal) Carolina Pipeline Company (Carolina), The Board of Water, Light and Sinking Fund Commissioners of the City of Dalton, Georgia (Dalton), Atlanta Gas Light Company (Atlanta), Alabama Gas Corporation (Alagasco) and the Georgia Industrial Group (Georgia). Carolina, Dalton and Georgia have requested a formal hearing. Carolina states that SCE&G continues to burn large volumes of natural gas for steam electric generation boiler fuel use while it seeks additional volumes of gas for its new LNG plant. Dalton states that to grant relief to SCE&G would require the consequent curtailment across Southern Natural's entire system. Georgia requests that SCE&G provide evidence indicating whether existing or new high priority requirements would be served pursuant to its request for relief.

On September 17, 1975, Southern Natural Gas Company filed in Docket No. CP70-7, pursuant to Section 7(c) of the Natural Gas Act, a petition to amend the Commission's Order issued October 29, 1969, in the instant docket. In its filing, Southern Natural requests authorization to reallocate deliveries of the contract demand of natural gas between the City of Trussville, Alabama (Trussville) delivery points, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

The Commission's October 29, 1969 order authorized Southern, interalia, to sell and deliver natural gas to Trussville under a service agreement providing for a total contract demand of 16,000 Mcf per day divided between the Huffman Delivery Point (13,600 Mcf per day) and the Trussville Delivery Point (2,400 Mcf per day).

Southern requests herein that said October 29, 1969, order be amended so as to reallocate the contract demand between Trussville's delivery points so that 6,000 Mcf per day will be delivered to the Huffman Delivery Point, and 10,000 Mcf to the Trussville Delivery Point. Southern states that the change is necessary because Trussville is installing a gas liquefaction, storage, and regasification complex LNG facility) which will utilize gas received at the Trussville area Delivery Point. Southern supports the proposed reallocation and states that only minor additional metering facilities will be required to effect the change. An effective date of April 1, 1976 was proposed for the revised exhibit A which sets forth the reallocation.

After due notice by publication in the FEDERAL REGISTER on October 9, 1975 (40 FR 47587) Alabama Gas Corporation (Alagasco) filed a timely petition to intervene. In support of its petition Alagasco states, inter alia, that Southern Natural is presently curtailing deliveries of natural gas to its customers and that the instant application fails to indicate where the LNG output is intended to be sold or what effect, if any, the grant of the instant petition to amend would have on allocations of gas to Southern's other customers, including Alagasco. Accordingly, Alagasco requests that a formal hearing be held as to the latter matter.

On July 12, 1976, Trussville filed in Docket No. RP76-67-5, a petition for permanent extraordinary relief which requests the Commission to direct or allow Southern to deliver to Trussville 5,000 Mcf per day of natural gas in Priority 2 for use in its LNG facility.

We believe that common issues of law and fact exist between Trussville's requests to reallocate delivery points and increase its Priority 2 requirements for the purpose of supplying an LNG facility and SCE&G's request for extraordinary relief to increase its Priority 2 requirements to inject volumes in its LNG facility. Furthermore, we believe that it is necessary to grant the requests for formal hearing requested by interveners in Docket Nos. RP76-67-2 and CP70-7. The consolidated proceeding should be docketed as RP76-67-2 et al. Although SCE-G and Trussville have not explicitly requested temporary relief, we can imply such a request. We do not believe that the facts warrant temporary relief.

We believe that the following issues, inter alia, should be developed by the parties to this proceeding:

(1) Southern should present evidence as to the level of curtailment during the 1975-76 heating season and the projected level of curtailment during the 1976-77 heating season, absent a grant of the relief requested.

(2) Southern should present evidence as to the effect of the relief on the projected level of curtailment during the 1976-77 heating season.

(3) Southern should state its position on the question of increasing Priority 2 to serve LNG injection requirements.

(4) Trussville and SCE&G should present specific evidence as to the end use proposed to be served by the LNG facilities. Trussville and SCE&G should state whether the respective LNG facilities will be used to serve new customers.

(5) Trussville and SCE&G should present their level of curtailment during the 1975-76 heating season and their projected level of curtailment during the 1976-77 heating season, absent the relief requested. In particular, Trussville and SCE&G should discuss their ability to serve existing high priority loads without the relief requested.

The Commission finds: (1) It is desirable and in the public interest to allow the above-named petitioners to intervene in the instant proceeding.

(2) The petition to amend filed by Southern Natural in Docket No. CP70-7 and the petitions for extraordinary relief filed by South Carolina Electric and Gas Company in Docket No. RP76-67-2 and the Utilities Board of the Town of Trussville, Alabama in Docket No. RP76-67-5 contain common issues of law and fact.

(3) It is necessary and proper that the filing by Southern Natural in Docket No. CP70-7 and the petitions for extraordinary relief filed by South Carolina

V 41 160
AUG 17 76
UMI

Electric and Gas Company in Docket No. RP76–67–2 and the Utilities Board of the Town of Trussville, Alabama in Docket No. RP76–67–5 be set for formal hearing.

(4) It is not in the public interest to grant temporary relief to South Carolina Gas and Electric and Trussville.

The Commission orders: (A) The above-mentioned interveners are permitted to intervene in the instant proceeding subject to the rules and regulations of the Commission; *Provided, however*, that participation of such interveners shall be limited to matters affecting asserted rights and interests as specifically set forth in the petitions to intervene; and *Provided, further*, that the admission of such interveners shall not be construed as recognition by the Commission that they might be aggrieved because of any order of the Commission entered in the proceeding.

(B) Based on § 1.20(a) of the Commission's Rules of Practice and Procedure, the filing by Southern Natural in Docket No. CP70–7 (City of Trussville) and the petitions for extraordinary relief filed by South Carolina Electric and Gas Company in Docket No. RP76–67–2 and the Utilities Board of the Town of Trussville, Alabama in Docket No. RP76–67–5 are herein consolidated as Docket No. RP76–67–2 et al.

(D) Pursuant to the authority of the Natural Gas Act, particularly Sections 7 and 15 thereof, as implemented by the Commission's Rules of Practice and Procedure and the Regulations thereunder, a public hearing shall be held commencing on August 31, 1976, at 10:00 a.m. in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, concerning the matters involved in and the issues presented by the instant filings.

(E) The direct cases of Southern Natural, Trussville, and South Carolina Electric and Gas shall be filed and served on all parties, the Presiding Administrative Judge, and Commission Staff on or before August 13, 1976.

(F) The request for temporary relief are denied.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76–24007 Filed 8–16–76;8:45 am]

[Docket No. E–6943]

SOUTHWESTERN POWER ADMINISTRATION

Order Confirming and Approving Rates

AUGUST 3, 1976.

Pursuant to Section 5 of the Flood Control Act of 1944 (58 Stat. 890), the Secretary of the Interior (Interior), acting on behalf of the Southwestern Power Administration (SWPA), filed a request on December 9, 1975, seeking Commission confirmation and approval of a new rate schedule for the sale of the entire electrical output of the Corps of Engineers' Narrows Dam Project (Project) to Tex-La Electric Power Cooperative, Inc. (Tex-La). Interior's filing proposes that the rate for the sale of power and energy from the Project be increased from $465,000 to $556,000 annually. Confirmation and approval of the new rate is sought for the period from September 30, 1975, through June 30, 1980.

PREVIOUS RATE ACTIONS

The power output from the Project, located on the Little Missouri River in Arkansas, has been marketed by SWPA as an isolated project. Generation at the Project began in May 1950 when two 8,500-kilowatt generating units began test operations. The hydroelectric energy generated from the initial operation of the Project until February 1951 was sold as dump energy to a predecessor of Southwestern Electric Power Company (SWEPCO) for an annual payment of $137,000. A contract (Ispa 396) between SWPA and SWEPCO became effective in February 1951 in which the total output of the two generating units was sold to SWEPCO for an annual payment of $207,000. Provisions in the contract allowed SWPA to withdraw 5,000 kilowatts and accompanying energy to serve preference customers beginning in January 1952.

The Commission, by order issued February 4, 1951, approved the rate prescribed in Contract Ispa 396 for the period ending February 13, 1953. In its order the Commission recognized that SWPA had used a 100-year period of amortization for the project but indicated that the test of the adequacy of rates should be consistently applied on the basis of a 50-year amortization period. Approval of the annual rate of $207,000 specified in Contract Ispa 396 was extended periodically to September 30, 1960.

A new contract (14–02–0001–921) was entered into on May 11, 1960, under which SWPA sold the entire output of the Project to Tex-La. The new contract became effective on September 30, 1960, and extends for a 25-year period. During the initial period of the contract Tex-La would pay SWPA $300,000 annually for the entire output of the two 8,500-kilowatt units. With completion of the third 8,500-kilowatt unit in October 1969, the annual payment would be increased to $367,992. In a separate contract between Tex-La and SWEPCO, Tex-La agreed to sell SWEPCO the entire output of the Project for the same price that it paid SWPA. Under this latter contract Tex-La also purchases wholesale load center firm power service from SWEPCO for its member cooperatives, delivered to their facilities.

By order issued September 23, 1960, the Commission approved the rates for the sale of the output of the Project to Tex-La under Contract 14–02–0001–921 for the period through June 30, 1965. By order issued August 26, 1965, the Commission approved the same rates for the period through June 30, 1970.

The Commission by order issued January 22, 1971, approved an increase in the rate for the sale of the output of the Project to Tex-La through June 30, 1975. The annual payment was increased from $367,992 to $465,000.

Following Commission approval of the new rate, Tex-La filed a petition for rehearing of the order confirming the rate. In its petition Tex-La maintained that the increase in rates proposed by Interior was in violation of law and in excess of statutory authority, and that the Commission's action in approving the proposed rate was unlawful. On April 29, 1971, the Commission issued an order denying rehearing, finding that the questions and contentions raised in the petition did not require any modification of the order approving the rate.

Beginning in June 1975, Interior has requested a series of extensions of the rate approved by the Commission order of January 22, 1971, to allow SWPA additional time to hold a hearing on a proposed new rate and complete a new rate and repayment study. The latest extension, through December 29, 1975, was approved by the Commission's order issued December 4, 1975. On December 30, 1975, Interior requested a further extension of the approved rates for a period not to exceed 90 days from December 31, 1975.

To support the proposed rate increase, Interior submitted an Average Rate and Repayment Study for Narrows Dam, dated May 1975. On July 24, and 25, 1975 SWPA conducted an on-the-record meeting with Tex-La to discuss the proposed rate increase for the sale of Project power and energy. Included with Interior's filing was a transcript of the meeting along with Exhibits 1 through 53 of the meeting record and a document prepared by SWPA entitled "Evaluation of Statements and Proposal by Interested Parties Resulting from Rate Hearing on Proposed Rate For Sale of Narrows Dam Power and Energy held July 24–25, 1975" (Evaluation).

ANALYSIS OF PRESENT RATE FILING

The proposed rate increase from $465,000 to $556,000 annually is $91,000, or 19.6%. This is equivalent to an annual rate of increase of about 3⅝% over the five-year period. The need for the increase is brought about mainly because the operation and maintenance expense of the Corps of Engineers has escalated rapidly in recent years. The estimated annual operating expense used for the 1975 repayment study, including SWPA's administration expense, is $77,000 greater than the similar figure used in the 1970 repayment study, an increase of 46%.

The increase in operating expense at the Project is not out of line with that experienced at other Corps' projects or with the trend of such expenses over the past five years. The remaining $14,000 of the increase is due to additional interest expense.

The 1975 repayment study continues the criterion used in the 1970 repayment study of repaying the original investment in the entire Project 50 years after the third unit became operational. In effect this means that the investment in the first two units is not fully recovered until 70 years after those units began operation. The Commission stated in its Order on Rehearing, issued April 29, 1971:

> In our January 22, 1971 order we determined that the currently scheduled amortization of the capital investment allocated to electric power at the Project over an 83 year period running from the date of installation of the Project's third generating unit, or 100 years from the date on which the Project commenced commercial operation, failed to comply with the Act's requirement of "a reasonable period of years" for such amortization. We determined further in our order of January 22, 1971 that the proposed amortization of the investment in electric facilities at the Project within 50 years after its third generating unit commenced commercial operation met the statutory payout test.

Consideration was given to the possible effect of now requiring that repayment of the investment in the first two units be accomplished within 50 years after those units began operation. If SWPA were required to recover the investment in the first two units within 50 years, the total annual revenue would have to be increased to about $630,000 based on a calculation by Commission Staff. Because of factors peculiar to the Project, the Commission's January 22, 1971 order extended the repayment period of the first two units until 50 years after the installation of the third unit. For the first 20 years of operation, the Project operated at a deficit. This can be attributed primarily to two factors: (1) With the full costs of the dam and reservoir included in the costs of the first two units the Project was marginally economic; and (2) because of isolation, the power generated at the Project had limited marketability. In light of these circumstances, a reasonable period to recover the full costs of the Project is 50 years after the installation of the third unit.

The Commission Staff noted some variations in the repayment procedure used by SWPA in 1975 from that used in 1970 or from those generally used by other Interior marketing agencies. These relate to (1) the way interest on replacements was handled, and (2) the effect of inflation on estimated replacement costs.

1. Interest on Replacements:

a. SWPA applied the net revenue each year of the projected payout period, first to pay off the existing deficit (unpaid interest) as of 1975 of $663,475; next to pay off by the year 2012 practically all of unamortized investment in the first two units (interest rate—2½%); then to pay off the accumulated investment in replacements made during the period 1975–2016 (interest rate—6⅛%) some of which accumulation includes the carrying of unamortized investments in replacements for periods exceeding their service lives; and then finally to pay off the investment in the third unit (interest rate—2⅞%) and the remainder of the investment in the first two units. In 1970, and for most other repayment studies, Interior's general practice has been to pay off the highest interest bearing investment first to the extent possible while still paying off each investment within 50 years, or within the service life for replacements. The procedure used by SWPA in 1975 resulted in an increase of about $8,500 in the proposed annual revenue.

b. In the 1975 repayment study, replacements made late in the repayment period were prorated so that only that portion of any replacement applicable to the remaining years of the repayment period was charged against the Project repayment. In so doing, SWPA failed to recognize that interest on the portion to be repaid subsequent to the end of the repayment period would still accrue and be due each year of the repayment period. This oversight of interest resulted in a decrease of about $6,000 in the proposed annual revenue.

The effects on the repayment study of points 1a. and 1b. substantially offset each other.

2. Escalation of estimated replacement costs:

In estimating costs for future replacements, SWPA used the original cost of the item; that is, for replacement items for units 1 and 2, the estimated cost of each item was that prevailing in 1951; for replacement items for unit 3, the estimated cost of each item was that prevailing in 1970. To bring these estimates up to 1975 prices, the costs of replacements for units 1 and 2 should be multiplied by a factor of approximately 3; those for unit 3 should be multiplied by a factor of about 1½. Using the original uninflated estimated replacement costs resulted in a decrease of about $25,000 in the proposed annual revenue.

It is noted with regard to item 2 above that although some replacements are scheduled for every 15 years and some every 20 years, there have not yet been any recorded expenditures for replacements during the first 25 years of the Project's life. It appears that, with improvements in technology and with the active and prudent maintenance program pursued by the Corps, the expected service lives now used may be underestimated. The problem of estimating and accounting for the costs of replacements is common to all Corps' projects and affects the repayment studies of many other projects or systems for which Interior's marketing agencies are responsible. This problem should be addressed by representatives from Interior, the Commission, the General Accounting Office, and the Corps of Engineers. However, if the need for replacements is not as great or as frequent as presently anticipated, this fact would tend to offset the effect of inflation on the replacement costs.

PUBLIC NOTICE

Public notice of Interior's filing of December 9, 1975, was issued on December 17, 1975, and published in the Federal Register on January 6, 1976. Comments or suggestions relative to the filing were requested to be submitted in writing on or before January 9, 1976.

TEX-LA'S PROTEST

On January 9, 1976, Tex-La filed "A Petition To Intervene" and a "Protest." Tex-La's enumerated 11 objections to SWPA's proposed rate increase. The following section lists Tex-La's objections and the Commission's response thereto.

1. Tex-La: SWPA's rate filing totally ignores the first two standards of Section 5 of the Flood Control Act of 1944, namely, (1) encouraging the most widespread use of the power, and (2) at the lowest possible rates consistent with sound business principles.

Commission response: The Commission is reasonably assured that the proposed rate is the lowest possible consistent with the sound business principles. In our appraisal, the requirements of Section 5 of the Flood Control Act of 1944 have been satisfied.

2. Tex-La: The rate filing improperly includes among the costs to be recovered from Tex-La an SWPA deficit of $753,671, plus interest thereon totalling $2,645,243.

Commisison response: The loss incurred during the early years of the Project's operation occurred because the power and energy apparently was not marketable at a price that would support the power investment. The Commission, in its order issued February 14, 1951, approving the rates for sale of Project power stated:

> It would appear that the Southwestern Gas and Electric Company is the only presently available outlet for the power produced at the Narrows Project, that the rates and charges contained in the contract are the most the Company is willing to pay under the circumstances, and the revenues represent more than SWPA is presently receiving under the month-to-month contract.

With the addition of the third unit and with increasing energy costs from alternate sources in later years, the rates charged could be increased to a level that would support the present Federal investment and still remain competitive with other electric power and energy sources. The deficit incurred with the Project's earlier operations are legitimate start-up expenses which should be capitalized and paid for along with the other Project investment. Deficits incurred under these circumstances should be recovered during the subsequent repayment period.

3. Tex-La: The rate filing is designed to recover Corps of Engineers' O&M costs which have not been verified by SWPA.

Commission response: Although SWPA informally reviews power costs and investments submitted by the Corps of Engineers it is not responsible for the audit of each individual cost assignment. The General Accounting Office periodically audits the financial records of the Southwestern Federal Power System which includes those of the Corps of Engineers and SWPA.

4. Tex-La: The proposed rate increase is designed to recover Corps' O&M costs which are not part of the "cost of producing the electric energy."

V 41 160 AUG 17 76 UMI

Commission response: From 1965 to 1973, the Corps of Engineers' Vicksburg District Office erroneously charged a percentage of project joint-use costs to recreation and fish and wildlife. In a 1972 audit, the General Accounting Office discovered this error and notified the Corps' Office of the Chief of Engineers (OCE). OCE then instructed its Vicksburg District Office to make the appropriate corrections. In the 1973 Form 1 report to the FPC, the Vicksburg District Office made an adjustment for prior years to power in the amount of $98,041.53. It also adjusted the 1973 accounts to include $41,773.58 of additional O&M costs to be allocated to power. The total of these amounts, $139,815.11, was then mistakenly characterized as recreation O&M costs which had been charged to power. In fact, that amount is a legitimate charge to power.

5. Tex-La: The rate filing is designed to recover SWPA overhead and administrative costs (O&A) which are estimated in an entirely arbitrary manner.

Commission response: SWPA has allocated its O&A costs to the Project on an investment ratio basis. This has been the method utilized by SWPA for all projects for which it markets power for several years. It results in percentages that approximate those obtained by using other methods but is easier to apply.

6. Tex-La: The rate filing is designed to recover purchased power costs and service charges incurred by SWPA in transactions not related to the Project.

Commission response: Pursuant to the terms of a contract between SWPA and SWEPO (Ispa-396), SWPA sold the entire output of the Project to SWEPCO. The contract was terminated in 1960 except for service to three cooperatives which continued through 1962. It allowed SWPA to withdraw up to 5,000 kilowatts with accompanying energy as required to serve the three cooperatives. SWEPCO charged SWPA for the withdrawn power and for the use of SWEPCO facilities in wheeling power and energy to the preference customers. SWPA billed the preference customers for power delivered under rates equivalent to standard system rates. For the years 1951 through 1962, the total purchased power and service charges from these sales exceeded the revenue received by SWPA by approximately $4,900. The sales to the preference customers not only failed to contribute to the amortization of the Project investment but also added to the $750,000 deficit on the books at the time Tex-La became the sole customer for the Project power.

7. Tex-La: The rate filing would recover $619,600 in unidentified future replacements.

Commission reseponse: The question of estimated replacement costs and how they are recovered is previously discussed at pp. 5–6 under "Analysis of Present Rate Filing."

8. Tex-La: The proposed rate improperly includes interest on projected replacement costs.

Commission response: As previously discussed under "Analysis of Present Rate Filing," the annual effects of possible adjustments on the interest charges are substantially offsetting.

9. Tex-La: The proposed rate is discriminatory.

Commission response: The rates charged for power and energy from the Project reflect the actual expeneses incurred in production. The Project is a separate element of SWPA's marketing responsibility. SWPA's system rates are based on the costs of the integrated system of projects. Those rates may be higher or lower than the Project rates which are based on Project costs.

10. Tex-La: The 50-year payout period on which the proposed rate is based violates both the Flood Control Act of 1944 and the SWPA/Tex-La contract of May 11, 1960.

Commission response: The amortization of the capital investment allocated to electric power at the Project over a period of 100 years is not a "reasonable period of years" within the meaning of the Flood Control Act of 1944 In our Order on Rehearing, issued on April 29, 1971 in this docket we said:

> We recognize that there may be circumstances clearly indicating that an amortization period in excess of 50 years would be necessary or appropriate for a certain period to correct or prevent various inequities. In those circumstances we would have no difficulty in finding such a period to be "reasonable" under the Act.

We find today, as we did in our order confirming the present rate, that a reasonable period of years to amortize the investment in electric facilities at the Project is 50 years after its third generating unit commenced commercial operation.

11. Tex-La: The rate-making procedures used by SWPA in the preparation of the proposed rate violates the Administrative Procedure Act.

Commission response: In its Evaluation, SWPA asserts that Tex-La has ignored the fact that the SWPA/Tex-La contract, in Article I, Section 4, provides for rate review and redetermination and the procedure to be followed. It additionally maintains that it followed this procedure explicitly.

If we assume *arguendo* that Tex-La's objection is meritorious, we do not have the authority to fashion a remedy. The Commission is not empowered to oversee SWAP's contractual relationships nor force its compliance with the Administrative Procedure Act. We exercise a special review function with respect to SWPA's filing under the Flood Control Act of 1944, which

> [c]an neither be analogized to an independent rate investigation or to the appellate function of the United States Courts of Appeals over Commission decisions under the Federal Power Act. It evolves from a unique relationship between the Department of the Interior, a part of the Executive Branch, with managerial and ratemaking expertise over its projects, and, the Federal Power Commission, and independent agency of the Congress with special expertise in ratemaking. In establishing this relationship Congress did not limit us to the function of assuring that the Secretary had complied with the bare legal requirements of the statute. It expected us to apply our independent expertise in evaluating the rates set by the Secretary . . . [and] confirm and approve . . . if we conclude, on the basis of our independent judgment, that it comports with the dual statutory standard of providing consumers with the benefits of power at the lowest possible price consistent with good business practices as well as protecting the interest of the United States in amortizing its investment in the projects within a reasonable period.[1]

The Commission has reviewed SWPA's filing and the materials submitted therewith in support of the proposed rate increase. We find that they are generally sound and consistent with the provisions of the Flood Control Act of 1944. There are some areas which SWPA should devote greater attention to with respect to future rate filings. For instance, in the present filing we have noted some problems with the manner in which interest on replacements was calculated and with the estimation of costs for future replacements. For reasons discussed previously under "Analysis of Present Rate Filing," these problems do not have an appreciable effect on the rate increase.

We have also given careful consideration to the issues raised by Tex-La in its Protest. We find that they do not provide sufficient justification for the Commission to withhold its approval of the proposed rate increase.

The Commission finds: The confirmation and approval of an annual rate of $556,000 for the sale of power and energy generated at Narrows Dam to Tex-La Power Cooperative, Inc. as hereinafter provided, will not be inconsistent with the provisions of the Flood Control Act of 1944.

The Commission orders: The confirmation and approval of an annual rate of $556,000 for the sale of power and energy generated at Narrows Dam to Tex-La Power Cooperative, Inc. for the period commencing with the issuance of this order and ending not later than June 30, 1980.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24009 Filed 8-16-76;8:45 am]

[Docket No. RM76-1]

SPECIFIED REASONABLE RATE OF RETURN AS PROVIDED IN HYDROELECTRIC PROJECT LICENSES

Order Denying Rehearing

AUGUST 3, 1976.

On July 26, 1976, an application for rehearing of Order No. 550,[2] issued June 24, 1976, was filed by The Electric Utility Company Group (Group). The Group complains that the use of the 10-year Government bond series plus four percentage points does not allow a high enough return for the common equity component. The Group also requests that the new specified reasonable rate of return be applied retroactively to January 1, 1970.

As to the first contention, the primary objection of the Group was that by our selection as the rate of return on common equity of the interest rate on 10-year Treasury bond series plus four percentage points, we improperly freeze large amounts of earnings on licensed projects that are clearly not in excess of a fair return. We do not agree that we acted improperly in selecting a rate that approximates but does not exceed the lower level of the recognized zone of reasonableness for a return upon common equity, nor do we anticipate that large amounts of earnings on licensed projects in excess of a fair return will be required to be set aside. By determining a reasonable specified rate of return in the manner that we did, we recognized that it will not necessarily produce a "fair rate of return" for each licensee, nor do we believe that it should. Congress did not provide that the earnings in excess of a "fair rate of return" should be the basis of the computation, but rather, earnings in excess of a "specified reasonable rate of return", which was required to be set forth in the license. Niagara Falls Power Co., 9 F.P.C. 228, 249 (1950).

Simply stated, it is better for the Commission, when setting uniform requirements for the unique purposes of amortization reserves, to err on the low side for most licensees than to err on the high side for some licensees. Ultimately a "fair return" test will be made in takeover proceedings, and if the recorded amounts in the amortization reserve account are found to be in excess of the need for net investment purposes, such excess reserves will be freed from the amortization reserve requirement. However, if we are overly generous when determining a specified reasonable rate of return, we may find upon takeover that there are insufficient amounts in the amortization reserves for net investment purposes if the licensee has had earnings in excess of a fair rate of return during the period of the license. Additionally, we have not been as niggardly with our specified reasonable rate of return requirements as the Group implies, since, consistent with past practices, we will require that only one half of the project's surplus earnings, if any, be set aside in a project amortization reserve.

In its second contention, the Group requests that the effective date of the new specified reasonable rate of return be January 1, 1970, as opposed to the provisions contained on page 4 of Order No. 550.[3] The Group states that the objectives of the Federal Power Act (Act) would be better served if the earlier date were adopted. The Group stated in its application for rehearing that the objective was to encourage the comprehensive development of our water resources. This objective is accomplished in Section 10(d) of the Act in that a licensee is allowed twenty years in the initial license before the amortization reserves are set up. The objective the Group expounds would not be affected by the retroactive application of the new specified reasonable rate of return, because licensees of the newly licensed unconstructed or proposed projects would have the new rate if they so desire when the amortization reserve period begins in the future. The Group's request would only affect those licensees that are past their 20th year of operation and, therefore, would not further the objective.

The Group claims that those licensees that have applied for rehearing are receiving retroactive treatment, while those applying for license amendment would not. In the case of the rehearings, the licensees did not accept the amortization reserve article, providing the six percent per annum, as required by Section 6 of the Act. In order that the license be complete for the entire term, the "new" amortization reserve article would have to have the same effective date as contained in the license. See, Pacific Gas and Electric Co., 45 FPC 28, 30 (1971). Therefore, we do not have, necessarily, retroactive application. As to those applying for an amendment of license, each licensee has an amortization reserve article that has been accepted and is in effect. There is, therefore, no void that has to be covered by the new article. We find no compelling reason in the application for rehearing to alter the effective dates of the new specified reasonable rate of return.

The Commission finds: The application for rehearing filed on July 26, 1976, by the Electric Utility Company Group presents no facts or legal principles which would warrant any change in or modification of Order No. 550.

The Commission orders: The application for rehearing of Order No. 550 is hereby denied.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24012 Filed 8-16-76;8:45 am]

---

[1] Opinion No. 482, United States Department of the Interior, Bonneville Power Administration, Docket Nos. E-6611, E-6905 and E-7242, issued December 14, 1965, 34 FPC 1465; see also Opinion No. 741, United States Department of the Interior, Bonneville Power Administration, Docket No. E-8978, issued August 21, 1975.

[2] Order No. 550 adopted a new specified reasonable rate of return for computing amortization reserves in hydroelectric project licenses.

[3] Order No. 550 provides that those licensees with applications for amendment of license pending would be issued an amendment to be effective as of the date of issuance of Order No. 550. The licenses with rehearings pending will have the new specified reasonable rate of return with the effective date that is contained in each license. As to those licensees seeking to amend their licenses, the amendment would be effective as of the date of receipt of their request.

[Docket No. RP76-17]

TEXAS GAS TRANSMISSION CORP.

Proposed Stipulation and Agreement

AUGUST 2, 1976.

Take notice that on July 23, 1976 Texas Gas Transmission Corporation (Texas Gas) tendered for filing a proposed stipulation and agreement in the referenced docket. Texas Gas states that the proposed Stipulation and Agreement resolves all problems and disputes with respect to its total cost of service, except for the item of book depreciation and the inclusion of amounts associated with the acquisition and retention of coal reserves to be used for gasification purposes. These two items are being litigated in Docket No. RP74-25. Texas Gas states that certain other matters are being resolved in Docket No. RP75-19 and the decision therein would govern the instant proceedings.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before September 3, 1976. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24002 Filed 8-16-76;8:45 am]

[Docket No. CP76-455]

TRANSCONTINENTAL GAS PIPE LINE CORP. AND FLORIDA GAS TRANSMISSION CO.

Application

AUGUST 3, 1976.

Take notice that on July 23, 1976, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, and Florida Gas Transmission Company (Florida Gas), P.O. Box 44, Winter Park, Florida 32789, filed in Docket No. CP76-455 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation as equal co-owners of a pepeline and appurtenant facilities from Vermilion Area Block 22, offshore Lousiana, to a point of connection with Transco' existing Central Lousiana Gathering System onshore in the Pecan Island Area, Vermilion Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that the proposed facilities, which would be constructed and operated by Transco, consist of approximately 13.84 miles of 24-inch pipeline, a purchase meter and regulator station and onshore separation facilities. The appli-

V 41160 AUG 17 76 UMI

cation shows the estimated cost of these facilities to be $12,084,000, which cost would be financed initially through revolving credit agreements, short-term loans, and available cash.

Applicants state that they have executed precedent agreements with attached gas purchase contracts with Shell Oil Company, a principal owner of reserves in Block 22, covering the percentages of that producer's interest to which Applicants are entitled in the block, and are currently executing similar precedent agreements with the remaining owners. It is indicated that overall Applicants are presently entitled to one-third of the total working interest reserves in Block 22. Applicants assert that the proposed facilities can be utilized to transport onshore the balance of the Block 22 gas as well as Applicants' gas and, in addition, gas which is expected to be developed in nearby blocks under lease.

Applicants state that it is imperative that they promptly attain, in the most economical manner possible, the Block 22 gas supplies to help alleviate the critical gas supply shortage on their systems and fulfill commitments to their customers. They assert that the proposed joint project would benefit them and their customers by the higher load factor utilization of Applicants' existing onshore pipeline systems and by avoiding the necessity of constructing costly duplicate facilities to attach the common source of supply in Vermilion Block 22.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-24008 Filed 8-16-76;8:45 am]

[Project No. 298]

SOUTHERN CALIFORNIA EDISON CO.

Issuance of Annual License(s)

AUGUST 9, 1976.

On May 2, 1975, Southern California Edison Company, Licensee for Kaweah Project No. 298, located on the Kaweah River in Sequoia National Park and Sequoia National Forest, Tulare County, California, filed an application for a new license under the Federal Power Act and Commission Regulations thereunder.

The license for Project No. 298 was issued effective August 7, 1924 for a period ending August 8, 1974. Since the original date of expiration, the project has been maintained and operated under annual licenses, the most recent of which will expire on August 7, 1976. In order to authorize the continued operation and maintenance of the project pursuant to the Federal Power Act, pending Commission action on licensee's application, it is appropriate and in the public interest to issue an annual license to Minnesota Power and Light Company.

Take notice that an annual license is issued to Southern California Edison Company under the Federal Power Act for the period August 8, 1976, to August 7, 1977, or until the issuance of a new license for the project, whichever comes first, for the continued operation and maintenance of the Kaweah Project No. 298, subject to the terms and conditions of the present license. Take further notice that if issuance of a new license does not take place on or before August 7, 1977, a new annual license will be issued each year thereafter, effective August 8 of each year, until a new license is issued without further notice being given by the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23999 Filed 8-16-76;8:45 am]

FEDERAL RESERVE SYSTEM

INTERNATIONAL BANCORPORATION

Order Approving Formation of Bank Holding Company

International Bancorporation, St. Paul, Minnesota, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of all of the voting shares (less directors' qualifying shares) of The First National Bank of International Falls, International Falls, Minnesota ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, a nonoperating corporation with no subsidiaries, was organized for the purpose of becoming a bank holding company through the acquisition of Bank. Bank (deposits of $17.8 million) is the largest of three banks operating in the relevant banking market[1] and controls approximately 46 percent of the total deposits in commercial banks in the market.[2] The second largest bank in the relevant market controls approximately 44 percent of total deposits therein. Upon acquisition of Bank, Applicant would control the 82nd largest banking organization in Minnesota, holding .12 percent of the total commercial bank deposits in the State. Inasmuch as the proposed transaction involves a transfer of control of Bank from its principal to a corporation controlled by the same individual, and since Applicant and its principal control no other bank, consummation of the proposal would not eliminate existing or potential competition, nor have any adverse effects on other banks in the relevant market. Therefore, competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, which are dependent upon those of Bank, are considered to be satisfactory. Although Applicant will assume a $2 million debt as a result of this proopsal, it appears that the income to be derived from Bank, by way of dividends, should provide Applicant with sufficient revenue to service the debt adequately without impairing the financial condition of Bank. Accordingly, considerations relating to the banking factors are consistent with approval of the application. Consummation of the transaction would have no immediate effect on the area's banking convenience and needs; however, considerations relating to the convenience and needs of the community to be served are regarded as being consistent with approval of the application. It is the Board's judgment that consummation of the proposed transaction would be consistent with the public interest and that the application should be approved.

In connection with the Board's consideration of this application, a question arose concerning the existence of a possible control relationship between Applicant, Bank, and another bank holding company. In order to alleviate this concern, Applicant's principal has agreed and committed to eliminate interlocking director relationships between Applicant and Bank, on the one hand, and the other bank holding company on the other. In concluding that the instant proposal is in the public interest, the Board has relied upon the aforementioned commitments and the Board's approval of this application is conditioned upon the fulfillment of those commitments.

[1] The relevant banking market is approximated by the northwestern half of Koochiching County.

[2] All banking data are as of December 31, 1975.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Minneapolis pursuant to delegated authority.

By order of the Board of Governors,[3] effective August 10, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[3] Voting for this action: Chairman Burns and Governors Wallich, Coldwell, Jackson, and Partee. Present and abstaining: Governor Lilly. Absent and not voting: Governor Gardner.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

ADVISORY COMMITTEE PUBLIC PROGRAMS PANEL

Meeting

AUGUST 9, 1976.

Pursuant to the provsions of the Federal Advisory Committee Act (Pub. L. 92-463) notice is hereby given that a meeting of the Public Programs Panel will meet at Washington, D.C., on September 9 and 10, 1976, commencing at 9:00 a.m., at 806 15th Street, N.W.

The purpose of the meeting is to review Humanities Museums and Historical Organizations grant proposals that have been submitted to the Endowment for possible grant funding.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, N.W., Washington, D.C. 20506, or call Area Code 202-382-2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

NSF-SPONSORED DEEP SEA DRILLING PROJECT RESULTS

Availability

As a result of research sponsored by the National Science Foundation under its Deep Sea Drilling Project at the Scripps Institution of Oceanography, La Jolla, California, the preliminary result of organic geochemical studies of ocean core sediments are available. Leg 44 of the Deep Sea Drilling Project included drilling at 5 sites in the western North Atlantic Ocean. Some of the sediments recovered may be of special interest because of the organic geochemical clues they contain regarding potential petroleum sources off the shore of the eastern United States. It is believed that making this preliminary data available to all interested parties will assist in determining the degree of exploration and exploitation of off-shore deposits in this area.

Persons interested in obtaining the "Preliminary Organic Geochemistry Report—Deep Sea Drilling Project, Leg 44", consisting of 90 pages, containing 9 locations in the western North Atlantic

V 41 160 AUG 17 76 UMI

Ocean, may inspect the preliminary report or request it by mail from: Science Services, Deep Sea Drilling Project, Scripps Institution of Oceanography, La Jolla, California 92093.

SMALL BUSINESS ADMINISTRATION

[License Application No. 01/01-5281]

CHINESE AMERICAN INVESTMENT CORP.

Application for License as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.), has been filed by Chinese American Investment Corporation (applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1976).

The officers, directors, and stockholders of the applicant are as follows:

Yu-Sing Jung, Chairman of the Board, 8 percent stockholder. 21 Benvenue Street, Wellesley, Massachusetts 02181.

Thomas K. Liu, Vice Chairman of the Board, 8 percent stockholder. 16 Audubon Road, Lexington, Massachusetts, 02173.

George S. Pan, President, Treasurer, Director, 52 percent stockholder. 30 Indian Hill Road, Medfield, Massachusetts 02052.

Raymond T. Lee, Vice President, Controller, Director, 8 percent stockholder. 4 Ivy Circle, Winchester, Massachusetts 01890.

Jeffrey T. Pan, Vice President—Marketing, Director, 8 percent stockholder. 1734 Cy Court, Vienna, Virginia 22180.

Frank F. Chin, Vice President—Finance, Director, 8 percent stockholder. 26 Lexington Road, Wellesley, Massachusetts 02181.

Jeffrey C. Tang, Vice President—Planning, Director, 8 percent stockholder. 14 Olympic Street, Framingham, Massachusetts 01701.

Barry C. Abelson, Secretary, 48 Wheeler Circle, Stoughton, Massachusetts 02072.

The applicant, a Massachusetts corporation, with its principal business located at 45 Diatuo Drive, Randolph, Massachusetts 02368, will begin operations with $500,000 of paid-in capital and paid-in surplus, derived from the sale of 5,000 shares of common stock. The applicant will initially conduct its operations in the Greater Boston Metropolitan area and the New England area.

The applicant intends to invest only in concerns whose activities are related to businesses in which the applicant has the managerial and technical know-how at the time of commitment. However, applicant intends to provide assistance to all qualified socially or economically disadvantaged small business concerns.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBAs consideration of the applicant include the general business reputation and character of the proposed management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and SBA rules and regulations.

Any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Randolph, Massachusetts.

(Catalog of Federal Domestic Assistance Program No. 59.011 Small Business Investment Companies.)

Dated: August 10, 1976.

DANIEL SCHLESINGER,
Acting Deputy Associate Administrator for Investment.

[License No. 06/10-0015]

FIRST BUSINESS INVESTMENT CORP.

Small Business Investment Company; Approval of Transfer of Control

On June 16, 1976, a notice was published in the FEDERAL REGISTER (41 F.R. 24469) stating that First Business Investment Corporation, Suite 301 Zidell Building, 7007 Preston Road, Dallas, Texas 75205, had filed an application with the Small Business Administration (SBA), pursuant to Section 107.701 of the Rules and Regulations governing small business investment companies (13 C.F.R. Section 107.701 (1976)), for the transfer of control of this company to Mr. Albert J. Prevot.

Interested parties were given to the close of business July 1, 1976, to submit their written comments to SBA.

There has been an amendment to the original proposal. Mrs. Millicent McCoy and Mr. Walter M. Collie at the present time are officers and directors of the corporation but they will resign these positions. The only changes in the structure of management will be Mr. Prevot replacing Mr. John M. McCoy as president and Mr. John M. McCoy becoming secretary-treasurer of the corporation and remain a director. SBA has no objections to these changes.

Notice is hereby given that, having considered the application and all other pertinent information, SBA approved this application for transfer of control effective August 6, 1976.

VETERANS ADMINISTRATION

MEDICAL RESEARCH SERVICE MERIT REVIEW BOARDS

Meetings

The Veterans Administration gives notice pursuant to Public Law 92-463 of meetings of the following Merit Review Boards.

Merit review board	Date	Time	Location
Gastroenterology	Sept. 17, 1976	8:30 a.m. to 4:30 p.m.	Room A35, VACO.[1]
Respiration	Sept. 22, 1976	do	Room 817, VACO.
Cardiovascular studies	Oct. 1, 1976	do	Room 139, VACO.
Endocrinology	do	do	Room A35, VACO.
Hematology	do	do	Room 815B, VACO.
Immunology	Oct. 5, 1976	7 p.m. to 11 p.m.	Parlor B, Burlington Hotel.[2]
Do	Oct. 6, 1976	8:30 a.m. to 4:30 p.m.	Room 817, VACO.
Alcoholism and drug dependence (clinical pharmacology).	Oct. 8, 1976	do	Room A35, VACO.
Nephrology	Oct. 13, 1976	do	Room 817, VACO.
Surgery	Oct. 14, 1976	8:30 a.m. to 10 p.m.	Ivy Room, Blackstone Hotel.[3]
Oncology	Oct. 15, 1976	8:30 a.m. to 4:30 p.m.	Room 139, VACO.
Neurobiology	Oct. 18, 1976	7 p.m. to 11 p.m.	Conference room, Holiday Inn.[4]
Do	Oct. 19, 1976	8:30 a.m. to 4:30 p.m.	Room 817, VACO.
Behavioral sciences	Oct. 21, 1976	7 p.m. to 11 p.m.	Presidential Room, Holiday Inn.
Do	Oct. 22, 1976	8:30 a.m. to 4:30 p.m.	Room 139, VACO.
Infectious diseases	Oct. 26, 1976	do	Lake Erie Room, Conrad Hilton.[5]
Basic sciences	Oct. 28, 1976	7 p.m. to 11 p.m.	Parlor 511, Statler Hilton.[6]
Do	Oct. 29, 1976	8:30 a.m. to 4:30 p.m.	Room 139, VACO.

[1] Veterans Administration Central Office, 810 Vermont Ave. NW., Washington, D.C. 20420.
[2] Burlington Hotel, 1120 Vermont Ave. NW., Washington, D.C. 20005.
[3] Blackstone Hotel, 636 South Michigan Ave., Chicago, Ill. 60605.
[4] Holiday Inn, 1501 Rhode Island Ave. NW., Washington, D.C. 20005.
[5] Conrad Hilton, 720 South Michigan Ave., Chicago, Ill. 60605.
[6] Statler Hilton, 16th and K Sts. NW., Washington, D.C. 20036.

These meetings will be for the purpose of evaluating the scientific merit of research conducted in each specialty by Veterans Administration investigators working in Veterans Administration hospitals and clinics.

The meetings will be open to the public up to the seating capacity of the rooms at the start of each meeting to discuss the general status of the program. In accordance with the provision set forth in section 552(b)(5), title 5, United States Code, all of the Merit Review Board meetings will be closed to the public after approximately one-half hour from the start, for the review, discussion and evaluation of initial, and renewal research projects.

The closed portion of the meetings involve: discussion, examination, reference to, and oral review of site visits, staff and consultant critiques of research protocols, and similar documents which are exempt from disclosure under the interagency memoranda exemption (exemption (5)) to section 552(b) of title 5, United States Code. The portion of the meeting which necessitates examination of these documents will be closed to prevent inadvertent disclosure of these exempt records.

Because of the limited seating capacity of the rooms, those who plan to attend should contact Howard M. Berman, Acting Chief, Program Development and Review Division, Medical Research Service, Veterans Administration, Washington, DC, (202) 389-5065 at least five days prior to each meeting. Minutes of the meeting and rosters of the members of the Boards may be obtained from this source.

Dated: August 10, 1976.

R. L. ROUDEBUSH,
Administrator.

MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKER PROGRAMS

Submission of Preapplication for Federal Assistance for Fiscal Year 1977

Correction

In FR Doc. 76-23405, appearing at page 33591 in the issue of Tuesday, August 10, 1976, the first line should read as follows:

"Pursuant to 29 CFR 97.211, the Em- . . ."

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

IOWA STANDARDS

Notice of Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrators for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On July 20, 1973, notice was published in the Federal Register (38 FR 19368) of the approval of the Iowa plan and the adoption of Subpart J to Part 1952 containing the decision.

The Iowa plan provides for the adoption of Federal Standards as State standards (by reference after comments and public hearing). Section 1952.163 of Subpart J sets forth the State's schedule for the adoption of Federal standards. By letter dated July 2, 1976 from Jerry L. Addy, Commissioner of Labor to Vernon A. Strahm, Regional Administrator for Occupational Safety & Health Administration and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR 1928.57 (41 FR 10195, March 9, 1976); 1928.57 (41 FR 11022, March 16, 1976); 1910.1001(l)(1) (41 FR 11504, March 19, 1976); 1910.184 (f)(6)(41 FR 13352, March 30, 1976). These standards, which are contained in Chapter 88 of the Code of Iowa (1975), were promulgated after public comment requested on May 1, 1976, hearings held on June 1, 1976 and resolution adopted by the Iowa Bureau of Labor on June 21, 1976 pursuant to Chapter 17a of the Code. The standards will be effective on August 20, 1976 and notice of their adoption was published by the State on June 14, 1976.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the Federal standards.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Associate Assistant Secretary for Regional Programs, OSHA, Room N3608, 200 Constitution Avenue, N.W., Washington, D.C. 20210; Technical Data Center, OSHA, Room N3620, 200 Constitution Avenue, N.W., Washington, D.C. 20210; Office of the Regional Administrator, OSHA, Room 3000 Federal Office Building, 911 Walnut Street, Kansas City, Missouri 64106; and Iowa Bureau of Labor, East Seventh and Court Avenue, Fourth Floor, Des Moines, Iowa 50319.

4. *Public participation.* Under § 1953.2 (c) of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Iowa State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards and are therefore deemed to be at least as effective.

2. The standards were adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective August 17, 1976.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Kansas City, Missouri this 14th of July 1976.

VERNON A. STRAHM,
Regional Administrator.

WASHINGTON STATE STANDARDS

Notice of Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrators for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18 (c) of the Act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER (38 FR 2421) of the approval of the Washington plan and the adoption of Subpart F to Part 1952 containing the decision.

The Washington plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act.

Section 1952.123 of Subpart F sets forth the State's schedule for the adoption of at least as effective State standards. By letter dated February 26, 1976 from John E. Hillier, Assistant Director, Department of Labor and Industries, to James W. Lake, Regional Administrator, U.S. Department of Labor, and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR Part 1910, Subpart F, Powered Platforms, Manlifts and Vehicle-mounted Work Platforms. These standards, which are contained in WAC 296–24–870, WAC 296–24–885, and WAC 296–24–900 of the General Safety and Health Standards, were promulgated by the State following hearings held in Olympia, Washington, February 19, 1976 pursuant to 34.04 RCW and of the Open Public Meetings Act of 1971, chapter 42.30 RCW.

This subpart as proposed in the original State plan submission was initially approved as part of the Washington State Plan and a notice of approval appeared in the FEDERAL REGISTER (38 FR 2421) of January 26, 1973. Subsequently, changes were introduced during the State's adoption process which resulted in a less effective standard. The State has now amended the standard and thereby corrected the deficiencies. The State has also adopted standards corresponding to 29 CFR 1910.67, Vehicle-mounted Elevating and Rotating Work Platforms promulgated by OSHA in the FEDERAL REGISTER Vol. 40, No. 59, dated March 26, 1975.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards and accordingly should be approved. It is noted that § 1910.67(b)(4) requires specified clearances between aerial lifts and power lines. However, 1910.67(b)(4)(i)(c)(1) provides an exemption for this requirement in the case of insulated aerial lifts. The State chooses not to avail itself of this exemption and the State standard is therefore more effective.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6048, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Department of Labor and Industries, General Administrative Building, Olympia, Washington 98504; and the Technical Data Center, Room N3620, 200 Constitution Avenue, Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c) the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Washington plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason.

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective August 17, 1976.

(Sec. 18. Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Washington this 28th day of May, 1976.

JAMES W. LAKE,
Regional Administrator, OSHA.

[FR Doc.76–24060 Filed 8–16–76;8:45 am]

WASHINGTON STATE STANDARDS

Notice of Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrators for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18 (c) of the Act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER (38 FR 2421) of the approval of the Washington plan and the adoption of Subpart F to Part 1952 containing the decision.

The Washington plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act.

Section 1952.123 of Subpart F sets forth the State's schedule for the adoption of at least as effective State standards. By letter dated February 26, 1976 from John E. Hillier, Assistant Director, Department of Labor and Industries, to James W. Lake, Regional Administrator, U.S. Department of Labor and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR Parts 1915, 1916, and 1917. These standards, which are contained in chapter 296–304 WAC, Ship Repairing, Shipbuilding, and Shipbreaking, were promulgated after due notice and a public hearing held at Olympia, Washington on April 26, 1974 pursuant to 34.04 RCW and of the Open Public Meetings Act of 1971, chapter 42.30 RCW.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards and accordingly should be approved. The Region's review and evaluation indicates that the State standards are more effective than the Federal standards in that the State has combined the requirements of 29 CFR Parts 1915, 1916, and 1917 under one scope statement, thereby covering similar hazards wherever they occur in shipbuilding, shipbreaking, and ship repair.

3. Location of *supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6048, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Department of Labor and Industries, General Administrative Building, Olympia, Washington 98504; and the Technical Data Center, Room N3620, 200 Constitution Avenue, Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c) the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Washington plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason.

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective August 17, 1976.

Office of the Secretary

[TA–W–1,013]

A. JACOBS AND SONS, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On August 6, 1976 the Department of Labor received a petition dated July 28, 1976 which was filed under Section 221 (a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of A. Jacobs and Sons, Inc., Lynn, Massachusetts (TA–W–1,013).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with athletic shoes produced by A. Jacobs and Sons, Incorporated or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 6th day of August 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.76–24063 Filed 8–16–76;8:45 am]

[TA–W–800]

ADVANCE MANUFACTURING CORP., CLEVELAND, OHIO

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA–W–800: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 16, 1976 in response to a worker petition received on April 16, 1976 which was filed by the United Automobile, Aerospace and Agricultural Implement Workers of America on behalf of workers and former workers producing tools, dies, jigs and fixtures at the Advance Manufacturing Corporation, Cleveland, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on May 14, 1976 (41 FR 20040). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Advance Manufacturing Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

V 41 160
AUG 17 76
UMI

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all the criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at Advance Manufacturing Corporation declined 37 percent in 1975 compared to 1974 and declined 22 percent in the first quarter of 1976 compared to the same period of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of tools, dies, jigs, and fixtures at Advance Manufacturing declined 16 percent in 1975 compared to 1974 and declined 42 percent in the first quarter of 1976 compared to the same period in 1975.

INCREASED IMPORTS

When compared with each preceding year imports of tools, dies, jigs and fixtures increased in terms of value in 1972, 1973 and 1974 and decreased in 1975. The ratios of imports to domestic production increased from 1.18 percent in 1974 to 1.69 percent in 1975, surpassing the 1971–1974 average of .81 percent.

CONTRIBUTED IMPORTANTLY

The Department's investigation indicated that customers of Advance Manufacturing Corporation, Cleveland, Ohio have shifted their purchases of tools, dies, jigs and fixtures from Advance to off-shore manufacturers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with tools, dies, jigs and fixtures produced by Advance Manufacturing Corporation, Cleveland, Ohio contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provision of the Act, I make the following certification:

All workers engaged in employment at the Cleveland, Ohio plant of Advance Manufacturing Corporation who became totally or partially separated from employment on or after April 7, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 4th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-731]

CHICOPEE COAT CO., CHICOPEE, MASS.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-731: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 26, 1976 in response to a worker petition received on March 26, 1976 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing women's outerwear at Chicopee Coat Company, Chicopee, Massachusetts, a wholly-owned subsidiary of Davis Sportswear, Lawrence, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on April 13, 1976 (41 FR 15486). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Chicopee Coat Company, Davis Sportswear, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation reveals that although the first two criteria have been met, the third and fourth criteria have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of workers at Chicopee Coat increased 1.1 percent from 1973 to 1974 and then declined 14.6 percent from 1974 to 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales data for Chicopee Coat were not available. All sales were made by Davis Sportswear which maintains sales data on a consolidated basis for all subsidiaries.

Production at Chicopee declined 2.5 percent from 1973 to 1974 and then declined 12 percent from 1974 to 1975.

INCREASED IMPORTS

Imports of women's coats declined 18.8 percent in absolute terms from 1974 to 1975. The ratios of imports to domestic production and consumption declined from 7.8 percent and 7.2 percent, respectively, in 1974 to 5.4 percent and 5.1 percent, respectively, in 1975. In the first four months of 1976, imports increased 32.6 percent in absolute terms when compared to the same period in 1975. The ratios of imports to domestic production and consumption increased from 6.9 percent and 6.5 percent, respectively, in the first four months of 1975 to 7.3 percent and 6.8 percent, respectively, in the first four months of 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that customers of Davis Sportswear which sells all women's coats produced by Chicopee Coat did not switch to imports. A representative sample of all customers reduced purchases of women's coats from Davis Sportswear from 1974 to 1975 and shifted purchases to other domestic suppliers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's coats produced at the Chicopee, Massachusetts plant of Chicopee Coat Company did not contribute importantly to the total or partial separation of the workers at such plant.

Signed at Washington, D.C. this 5th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-1,014]

ELECTRO-MECHANICAL PRODUCTS

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On August 6, 1976 the Department of Labor received a petition dated July 27, 1976 which was filed under Section 221 (a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of Oglesby, Ill. plant of the Indiana General Division of Electro-Mechanical Products, a division of Electronic Memories & Magnetics Corp., Los Angeles, Calif. (TA-W-1,014). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221 (a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with office and technical services provided by Electro-Mechanical Products or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90–13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW, Washington, D.C. 20210.

Signed at Washington, D.C. this 6th day of August 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-732]

LAWRENCE GARMENT CO., LAWRENCE, MASS.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-732: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 26, 1976 in response to a worker petition received on March 26, 1976 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing women's outerwear at Lawrence Garment Company, Lawrence, Massachusetts, a wholly-owned subsidiary of Davis Sportswear, Lawrence, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on April 13, 1976, (41 FR 15490). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Lawrence Garment Company, Davis Sportswear, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the first two criteria have been met, the third and fourth criteria have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of workers at Lawrence Garment Co. remained unchanged from 1973 to 1974 and then declined 10.6 percent from 1974 to 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales data for Lawrence Garment were not available. All sales were made by Davis Sportswear which maintains sales data on a consolidated basis for all subsidiaries.

Production at Lawrence Garment declined 6.7 percent from 1973 to 1974 and declined 8.3 percent from 1974 to 1975.

INCREASED IMPORTS

Imports of women's coats declined 18.8 percent in absolute terms from 1974 to 1975. The ratios of imports to domestic production and consumption declined from 7.8 percent and 7.2 percent, respectively, in 1974 to 5.4 percent and 5.1 percent, respectively, in 1975. In the first four months of 1976, imports increased 32.6 percent in absolute terms when compared to the same period in 1975. The ratios of imports to domestic production and consumption increased from 6.9 percent and 6.5 percent, respectively, in the first four months of 1975 to 7.3 percent and 6.8 percent respectively, in the first four months of 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that customers of Davis Sportswear which sells all women's coats produced by Lawrence Garment did not switch to imports. A representative sample of all customers reduced purchases of women's coats from Davis Sportswear from 1974 to 1975 and shifted purchases to other domestic suppliers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's coats produced at the Lawrence, Massachusetts plant of Lawrence Garment Company did not contribute importantly to the total or partial separation of the workers at such plant.

Signed at Washington, D.C. this 5th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-1,011]

MARLBORO FOOTWEAR CORP.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On August 6, 1976 the Department of Labor received a petition dated June 11, 1976 which was filed under Section 221 (a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of Marlboro Footwear Corporation, Marlboro, Massachusetts (TA-W-1,011). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with footwear for women produced by Marlboro Footwear Corporation or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Sec-

V 41 160 AUG 17 76 UMI

tion 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 6th day of August 1976.

[TA-W-851]

MASSILLON SPRING AND RIVET CORP., MASSILLON, OHIO

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-851; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 30, 1976 in response to a worker petition received April 30, 1976 which was filed by the United Steelworkers of America AFL-CIO on behalf of workers and former workers producing specialty U bolts at the Massillon, Ohio plant of Massillon Spring and Rivet Corporation, Massillon, Ohio.

The notice of investigation was published in the Federal Register (41 FR 20954) on May 21, 1976. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Massillon Spring and Rivet Corporation, its customers, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard as to whether or not the other criteria have been met, the third criterion has not been met.

Since its founding approximately forty years ago, Massillon Spring and Rivet Company has made a wide variety of products. Since 1971, the only product of the company has been U bolts. The firm operates one plant in Massillon, Ohio which is equipped with cutting machines, heat treating furnaces, and machines for producing both cut threads and rolled threads. All of the U bolts produced at Massillon Spring and Rivet Company are built to the customer's specifications.

There are no separately identifiable import statistics on U-bolts in the Tariff Schedules of the United States (TSUSA). Such products produced by Massillon are commonly classified as specialty fasteners. However, specially fasteners also are not identifiable in the import statistics under the TSUSA classification system. The evidence developed by the Department in the course of the investigation reveals that almost all firms producing specially fasteners, including U-bolts, do not believe their business is subject to any import influence. Foreign trade in specialty fasteners is inhibited by user requirements of on-site quality control, speed of delivery and order scheduling flexibility. Further inhibiting foreign trade in specialty fasteners is the limited market for a single specialized product such as U-bolts.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with specialty U-bolts produced at Massillon, Ohio plant of Massillon Spring and Rivet Corporation did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 5th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-24069 Filed 8-16-76;8:45 am]

[TA-W-744]

SAN-TORO MANUFACTURING CO., FALL RIVER, MASS.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-744: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 26, 1976 in response to a worker petition received on March 26, 1976 which was filed by the Amalgamated Clothing Workers Union on behalf of workers and former workers producing men's suits and sportcoats at the Fall River, Massachusetts plant of San-Toro Manufacturing Company.

The notice of investigation was published in the FEDERAL REGISTER on April 16, 1976 (41 FR 16235). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the San-Toro Manufacturing Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although criteria one, two and three have been met, criterion four has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATION

Employment at the Fall River, Massachusetts plant of San-Toro Manufacturing increased 6.2 percent from 1973 to 1974 and then decreased 3.4 percent from 1974 to 1975. In the first three quarters of 1975, employment declined 7 percent from the same quarters of the previous year. The average number of hours worked decreased 4.9 percent from 1973 to 1974 and 16.5 percent from 1974 to 1975. In the first three quarters of 1975, average hours worked declined 21 percent from the same period of the previous year. Labor turnover data for San Toro indicated that layoffs occurred in the first and second quarters of 1975.

SALES OR PRODUCTION OR BOTH

Sales of sportcoats, suitcoats and leisure jackets by San-Toro Manufacturing decreased 2.6 percent from 1973 to 1974 and 31.8 percent from 1974 to 1975. Sales decreased in each quarter of 1975 compared to the same quarter of the previous year.

Since production at San-Toro is based upon orders received, production is equivalent to sales.

INCREASED IMPORTS

Imports of men's and boys' tailored dress coats and sportcoats increased both absolutely and relatively in each year from 1971 to 1973 and then increased relatively from 1973 to 1974. Imports of men's and boys' tailored dress coats and sportcoats increased both absolutely and relatively from 1974 to 1975. The ratio of imports to domestic production and consumption increased from 21.2 percent and 17.5 percent, respectively, in 1974 to 28.2 percent and 22.0 percent, respectively, in 1975.

Imports of men's and boys' tailored suits increased absolutely and relatively from 1971 through 1975. Imports increased 26.9 percent from 1974 to 1975. Domestic production of men's and boys' suits declined 9.3 percent during the same period. The ratio of imports to domestic production and consumption increased from 12.2 percent and 10.9 percent, respectively, in 1974 to 17.2 percent and 14.6 percent, respectively, in 1975.

CONTRIBUTED IMPORTANTLY

Evidence developed during the Department's investigation indicated that customers of San-Toro did not switch to imports. Customers which reduced purchases did so because of decreased consumer demand resulting from the recession.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's sportcoats, suitcoats and leisure jackets produced at the Fall River, Massachusetts plant of San-Toro Manufacturing did not contribute importantly to the total or partial separations of the workers at the plant.

Signed at Washington, D.C. this 6th day of August 1976.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.76-24070 Filed 8-16-76;8:45 am]

[TA-W-730]

STAFFORD CLOTHING MANUFACTURING CO., FALL RIVER, MASS.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-730: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 26, 1976, in response to a worker petition received on March 26, 1976 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing women's outerwear at Stafford Clothing Manufacting Company, Fall River, Massachusetts, a wholly-owned subsidiary of Davis Sportswear, Lawrence, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on April 13, 1976 (41 FR 15493). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Stafford Clothing Manufacturing Company, Davis Sportswear, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivisions have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the first two criteria have been met, the third and fourth criteria have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of workers at Stafford Clothing increased 32.5 percent in 1974 compared to 1973 and then declined 7.5 percent from 1974 to 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales data for Stafford Clothing were not available. All sales were made by Davis Sportswear which maintains sales data on a consolidated basis for all subsidiaries.

Production at Stafford Clothing increased 18.3 percent in 1974 compared to 1973 and then declined 21.1 percent from 1974 to 1975.

INCREASED IMPORTS

Imports of women's coats declined 18.8 percent in absolute terms from 1974 to 1975. The ratios of imports to domestic production and consumption declined from 7.8 percent and 7.2 percent, respectively, in 1974 to 5.4 percent and 5.1 percent, respectively, in 1975. In the first four months of 1976, imports increased 32.6 percent in absolute terms when compared to the same period in 1975. The ratios of imports to domestic production and consumption increased from 6.9 percent and 6.5 percent, respectively, in the first four months of 1975 to 7.3 percent and 6.8 percent, respectively, in the first four months of 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that customers of Davis Sportswear which sells all women's coats produced by Stafford Clothing did not switch to imports. A representative sample of all customers reduced purchases of women's coats from Davis Sportswear from 1974 to 1975 and shifted purchases to other domestic suppliers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's coats produced at the Fall River, Massachusetts plant of Stafford Clothing Manufacturing Company did not contribute importantly to the total or partial separation of the workers at such plant.

Signed at Washington, D.C. this 5th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-717]

STYLECRAFT CLOTHING CO., WEST ORANGE, N.J.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-717: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 26, 1976 in response to a worker

V41160 AUG 17 76 UMI

petition received on March 26, 1976 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's leisure suits, for Stylecraft Clothing Co., in West Orange, New Jersey.

The notice of investigation was published in the FEDERAL REGISTER on April 13, 1976 (41 FR 15494). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Stylecraft Clothing Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales, production or both, of the firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separation, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation reveals that all the above criteria have been met for men's leisure suits, but that the second, third and fourth criteria have not been met for military uniforms.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment was not separately identifiable as to hourly and salaried workers. The average number of weekly workers at Stylecraft declined 26 percent from 1973 to 1974, and declined 15 percent from 1974 to 1975. Beginning in the second quarter of 1975 and continuing through the first quarter of 1976, employment declined in each quarter compared to the same quarter of the previous year. Labor turnover data was not available.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales and production at Stylecraft are the same, since the clothing is produced to order on a contract basis. Men's leisure suits comprised 91 percent of total sales in 1974 and 84 percent of total sales in 1975. Sales of men's leisure suits declined 41 percent in value from 1973 to 1974, and declined 21 percent in value from 1974 to 1975. Sales declined 20 percent in value in the first quarter of 1976 compared to the first quarter of 1975. Sales of leisure suits ceased in the beginning of April, 1976, when Stylecraft's manufacturer terminated the contract.

Sales of military uniforms comprised 9 percent of total sales in 1975. Sales of military uniforms increased 58 percent in value from 1973 to 1974 and increased 53 percent from 1974 to 1975. Sales increased 245 percent in the first quarter of 1976 from the first quarter of 1975.

INCREASED IMPORTS

Imports of men's and boys' tailored suits increased absolutely and relatively in each year from 1971 to 1975. The ratios of imports of men's and boys' tailored suits to domestic production and consumption increased from 12.2 percent and 10.9 percent, respectively, in 1974 to 17.2 percent and 14.6 percent, respectively, in 1975.

Military and security type uniforms are not imported due to the "Buy American Act," which requires that in the procurement of supplies and services, only domestic sources and products shall be used and acquired for public use. Another consideration is the time factor involved in delivery and the customized tailoring-to-individual size specfications.

CONTRIBUTED IMPORTANTLY

The evidence developed by the Department's investigation indicated that retail customers of the manufacturer for whom Stylecraft produced leisure suits reduced domestic purchases of leisure suits from 1974 to 1975 and increased purchases of imports in the same period.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's leisure suits produced at Stylecraft Clothing Company, West Orange, New Jersey contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provision of the Act, I make the following certification:

All workers at Stylecraft Clothing Company, West Orange, New Jersey who became totally or partially separated from employment related to the production of men's leisure suits on or after March 22, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All workers related to the production of military uniforms are denied certification.

Signed at Washington, D.C. this 5th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-661]

TARRA HALL CLOTHES, INC., NEW YORK, N.Y.

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-661; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 12, 1976 in response to a worker petition received on March 12, 1976 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's suits at Tarra Hall Clothes, Inc., New York, New York. The Department's investigation revealed that Tarra Hall was made up of three divisions: Tarra Hall, Arreta Hall and American Sportswear. An investigation regarding eligibility to apply for adjustment assistance for workers of American Sportswear was terminated on May 21, 1976 (41 FR 20972).

The notice of investigation was published in the FEDERAL REGISTER on March 26, 1976 (41 FR 12754). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Tarra Hall Clothes, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met for the Tarra Hall division. However for the Arreta Hall Division Criterion two has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at the Tarra Hall Division declined 14.0 percent from 1973 to 1974 and 32.4 percent from 1974 to 1975. Employment declined in the first three quarters of 1975 compared to the same quarter of 1974.

The average number of production workers at Arreta Hall increased 15.2 percent from 1974 to 1975. No employment figures were available for 1973.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at Tarra Hall Division declined 13.1 percent in 1974 compared to 1973 and 15.1 percent in 1975 compared to 1974. Production declined in each quarter of 1975 compared to the corresponding quarters in 1974.

Production at Arreta Hall decreased 20.7 percent in 1974 compared to 1973 and increased 63.5 percent in 1975 compared to 1974. Production increased in each quarter of 1975 compared to the corresponding quarter in 1974.

INCREASED IMPORTS

Imports of men's and boys' suits increased absolutely and relative to domestic production in each year from 1971 through 1975. Absolute imports increased 26.9 percent from 1974 to 1975. The ratios of imports to domestic production and consumption increased from 12.2 percent and 10.9 percent, respectively in 1974 to 17.2 percent and 14.6 percent, respectively, in 1975.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that customers of Tarra Hall Clothes, Inc. decreased their purchases of men's suits from Tarra Hall relative to purchases of lower priced imported men's suits. This had a direct impact on the production and employment at the Tarra Hall Division.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits produced at the New York, New York plant of the Tarra Hall Division of Tarra Hall Clothes, Inc., have contributed importantly to the total or partial separation of the workers of the plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of men's suits at the New York, New York plant of the Tarra Hall Division of Tarra Hall Clothes, Inc., who became totally or partially separated from employment on or after March 12, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that neither sales nor production has decreased absolutely at Arreta Hall. Therefore workers at the Arreta Hall Division of Tarra Hall Clothes, Inc., are denied certification.

Signed at Washington, D.C. this 6th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-24073 Filed 8-16-76;8:45 am]

[TA-W-880]

TELEDYNE PITTSBURGH TOOL STEEL, MONACA, PA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-880: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on May 19, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing tool steel at the Monaca, Pennsylvania plant of Teledyne Pittsburgh Tool Steel.

The notice of investigation was published in the Federal Register on June 11, 1976 (41 FR 23821). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Teledyne Pittsburgh Tool Steel, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers declined 9.2 percent in 1975 compared to 1974 and 11.9 percent in the second quarter of 1975 compared to the like quarter in 1974.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Plant sales, in quantity, declined 26.9 percent in 1975 compared to 1974 and 39.6 percent in the sceond quarter of 1975 compared to the like quarter in 1974. Plant production, in quantity, declined 25.2 percent in 1975 compared to 1974 and 38.1 percent in the second quarter of 1975 compared to the like quarter in 1974.

INCREASED IMPORTS

Imports of alloy tool steel increased in each year from 12,700 net tons in 1971 to 21,700 net tons in 1973 before declining to 13,700 net tons in 1974. Imports then increased to 19,100 net tons in 1975. The ratios of imports of alloy tool steel to domestic shipments and consumption increased from 12.1 percent and 11.6 percent, respectively, in 1974 to 27.7 percent and 23.4 percent, respectively in 1975.

CONTRIBUTED IMPORTANTLY

The Department's investigation indicated that the major customers of tool produced at the Monaca, Pennsylvania plant of Teledyne Pittsburgh Tool Steel are increasing their purchases of tool steel from foreign sources due to price competition.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the tool steel produced at the Monaca, Pennsylvania plant of Teledyne Pittsburgh Tool Steel contributed importantly to the total or partial separation of the workers at the Monaca, Pennsylvania plant. In accordance with the provisions of the Act, I make the following certification:

"All employees of Teledyne Pittsburgh Tool Steel, Monaca, Pennsylvania who become totally or partially separated from employment on or after April 15, 1975 are eligible to apply for adjustment assistance benefits under Title II, Chapter 2 of the Trade Act of 1974."

Signed at Washington, D.C. this 6th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary

[FR Doc.76-24074 Filed 8-16-76;8:45 am]

[TA-W-887]

WASHBURN WIRE CO., INC., NEW YORK, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-887: investigation regarding certification of eligibility to apply for worker adjustment assistance prescribed in Section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on May 19, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing quality spring steel at the Washburn Wire Company, New York, New York.

The notice of investigation was published in the Federal Register on June 15, 1976 (41 FR 24236). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Washburn Wire Company, its customers, the United Steelworkers of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment as-

V41160 AUG 17 76 UMI

sistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation reveals that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of production workers declined 33.8 percent in 1975 compared to 1974 and declined 40.9 percent in the second quarter of 1975 compared to the second quarter of 1974.

SALES, PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Plant sales declined 44.8 percent in quantity in 1975 compared to 1974 and declined 65.7 percent in the second quarter of 1975 compared to the like 1974 quarter.

INCREASED IMPORTS

The ratio of imports of stainless steel wire and wire products to domestic shipments and consumption increased in quantity in each year from 26.3 percent and 21.1 percent, respectively, in 1973 to 43.9 percent and 31.7 percent, respectively, in 1975.

CONTRIBUTED IMPORTANTLY

The evidence developed during the Department's investigation indicates that imports of quality spring steel have increased in recent years.

Customers of the Washington Wire Company have increased purchases of imported quality spring steel and have reduced purchases from the Washburn Wire Company.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of quality spring steel have contributed importantly to the total or partial separation of workers at the Washburn Wire Company, New York, New York. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All employees at the Washburn Wire Company, Inc., New York, New York who became totally or partially separated from employment on or after April 30, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974

Signed at Washington, D.C. this 4th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-879]

WESCO INDUSTRIES CORP., PLAINVIEW, N.Y.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-879: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on that date which was filed on behalf of workers and former workers producing stop motion devices for circular knitting machines at WESCO Industries Corporation, Plainview, New York.

The notice of investigation was published in the Federal Register on June 11, 1976 (41 FR 23822). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of WESCO Industries Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (3) has not been met.

WESCO Industries Corporation was established in 1907 and became a subsidiary of the Ingersoll Rand Company in 1972. The firm produces stop motion devices which are filament sensing devices and cloth sensing devices for circular knitting machines.

The evidence developed in the Department's investigation reveals that there are no separately identifiable imports of stop motion devices. The product is not listed as a separate item of any U.S. Tariff Schedule grouping. In addition, industry spokesmen indicated that there are no imports of this item.

Imports of circular knitting machines which incorporate stop motion devices of the same origin are not like or directly competitive with stop motion devices produced by WESCO Industries.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that articles like or directly competitive with those produced by WESCO Industries Corporation are not being imported in increasing quantities, either actual or relative to domestic production, as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 5th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-24076 Filed 8-16-76;8:45 am]

[TA-W-788]

WHITE PINE COPPER CO., WHITE PINE, MICH.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-788; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initated on April 9, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing refined copper at the White Pine Copper Company, White Pine, Michigan, a subsidiary of the Copper Range Company.

The notice of investigation was published in the Federal Register on April 23, 1976 (41 FR 17036). No public hearing was requested, and none was held.

The information upon which the determination was made was obtained principally from the White Pine Copper Company, its customers, the U.S. Department of the Interior, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Total employment of hourly and salaried workers at White Pine decreased four percent from 1974 to 1975 and dropped 44 percent in January-April 1976 compared to the same period in 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Dollar sales of refined copper by White Pine decreased 25 percent from 1974 to 1975 and dropped 41 percent in January-April 1976 compared to the like period in 1975. Sales of copper in pounds increased nine percent from 1974 to 1975 and declined 44 percent in January-April 1976 compared to the like period in 1975.

INCREASED IMPORTS

Imports of refined copper increased absolutely and relatively in each year from 1971 through 1974. Copper imports decreased from 314 thousand short tons in 1974 to 147 thousand short tons in 1975. Imports rose from 33 thousand short tons in January-April 1975 to 130 thousand short tons in January-April 1976. The ratio of imports to domestic production declined from 14.6 percent in 1974 to 8.2 percent in 1975 and increased from 5.1 percent in January-April 1975 to 21.3 percent in the same period of 1976.

CONTRIBUTED IMPORTANTLY

In May 1974, when U.S. Government price controls expired on refined copper, White Pine adopted a new pricing policy under which all its domestic copper sales would be based on prevailing COMEX (New York Commodity Exchange) prices. Using the COMEX price quotes also allowed White Pine to expand its market for refined copper beyond its regular customers.

From 1974 to 1975, when both domestic production and imports were declining, White Pine's unit production and unit sales increased. COMEX prices dropped sharply throughout 1975 from 1974 levels, reflecting the transition in the world copper market from a period of shortage to a recessionary period of low demand and excess copper supply.

Although the company was able to sell all the copper it could produce because COMEX prices in 1975 were substantially below U.S. producer prices, White Pine also realized COMEX prices were below production costs. Faced with continued losses and uncertain prospects for price recovery, White Pine decided on January 5, 1976, to cut costs by curtailing its mining operations by about 76 percent and by laying off approximately 70 percent of its hourly and salaried workers. The depressed state of COMEX prices throughout the second half of 1975 was a reflection of increased world copper stocks. In February 1976, White Pine decided to set copper prices at the U.S. producer price to avoid the volatile fluctuations in the speculative COMEX and LME markets.

Sales and production declined 41 percent and 44 percent, respectively, in January-April 1976 compared to the same period in 1975. The decline is attributable to furnace repair and cost reduction policies undertaken by White Pine and to the loss of COMEX sales.

Customers of White Pine reported a relative increase in purchases of imported refined copper in the first half of 1976 compared to the like period in 1975.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the refined copper produced at the White Pine Copper Company, White Pine, Michigan contributed importantly to the total or partial separations of the workers at such plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the White Pine Copper Company, White Pine, Michigan who became totally or partially separated from employment on or after January 1, 1976 are certified eligible to apply for worker adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 6th day of August 1976.

JAMES F. TAYLOR,
Director,
Planning and Evaluation Staff.

[TA-W-1,012]

WILLIAMS MANUFACTURING CO.

Investigetion Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On August 6, 1976 the Department of Labor received a petition dated July 31, 1976 which was filed under Section 221 (a) of the Trade Act of 1974 ("the Act") by the Boot and Shoe Workers' Union on behalf of the workers and former workers of Williams Manufacturinfl Company, Portsmouth, Ohio (TA-W-1,012).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with women's and children's shoes produced by Williams Manufacturing Company or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 27, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 6th day of August 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[Notice No. 11]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30-days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-76668 filed July 22, 1976. Transferee: DON H. FREYMILLER, RALPH HUNTINGTON, and THOMAS F. McARDLE, a partnership, doing business as F. H. & M. TRUCKING CO., INC., P.O. Box 98, Shullsburg, Wisconsin, 53586. Transferor: A & W Trucking Co., Inc., P.O. Box 129, Mosinee, Wisconsin, 54455. Applicants' representative: Carl E. Munson, 469 Fischer Building, Dubuque, Iowa, 52001. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate Nos. MC-113535 (Sub-No. 8); MC-113535 (Sub-No. 15); MC-113535 (Sub-No. 18); MC-113535 (Sub-No. 19); and MC-113535 (Sub-No. 23) issued June 23, 1969, March 4, 1971, October 26, 1971, April 17, 1972, and May 8, 1973, as follows: Sub-8—*Feed*, from Chicago and Forest Park, Ill., to Colesburg, Iowa, and points in Iowa within 12 miles of Colesburg; *Horses*, from points in Delaware and Clayton Counties, Iowa, to points in Wisconsin; *Farm machinery and parts, tractors and parts, and agricultural implements and parts*, from Chicago, Sandwich, Rock Falls, Canton Rock Island, Moline, and East Moline, Ill., to points in Perry, Ox Creek, Volga, Jefferson, Cass, Lodomillo, Elk, Mallory, Millville, and Buena Vista Townships, Clayton County, Iowa, and points in that part of Delaware County, Iowa, on and north of U.S. Highway 20; *Livestock*, From New Vienna, Iowa, and points within 20 miles of New Vienna, to Chicago, Ill.; *Washing machines*, From Newton, Iowa, to points in Columbia, Crawford, Dane, Grant, Green, Iowa, Lafayette, Richland, Rock, Sauk and Vernon Counties, Wis.; *Cocoa, chocolate, and paper boxes* From Milwaukee, Wis., to Dubuque, Iowa; *Canned goods*, From Cassville and Prairie du Chien, Wis., to points in that part of Iowa (except Dubuque) on and east of U.S. Highway 69, and points in that part of Illinois on and North of U.S. Highway 36.

From points in that part of Wisconsin (except points in a described part of Wisconsin) on and south of U.S. Highway 10, to Dubuque, Iowa; *Machinery and machinery parts*, From Rock Island, Rock Falls, Canton, Moline, Dixon, and Rochelle, Ill., and Waterloo, Davenport, Newton, Charles City, Mason City, and Cedar Rapids, Iowa, to Bloomington, Cassville, Potosi, and Prairie du Chien, Wis.; *Paper and paper products*, From Mosinee, Green Bay, Nekoosa, Port Edwards, Appleton, and Menasha, Wis., to Dubuque, Iowa; *Plumbing and heating supplies*, From Kohler, Wis., to Dubuque, Iowa; *Such merchandise as is dealt in by retail grocery and food business houses*, From Dubuque, Iowa, to points in that part of Wisconsin (except points in a described part of Wisconsin) south and west of a line beginning at La Crosse, Wis., and extending along Wisconsin Highway 33 to Portage, Wis., thence along U.S. Highway 51 to Madison, Wis., and thence along Wisconsin Highway 69 to the Wisconsin-Illinois State Line, including points on the indicated portions of the highways specified; *Butter and cheese*, From points in the towns of Millville, Woodman, Marion, Watterstown, Hickory Grove, Castle Rock, Wingville, Clifton, and Lima, Grant County, Wis., points in the towns of Clyde, Eden, Mifflin, Pulaski, and Wyoming, Iowa County, Wis., and points in the towns of Benton, Kendall, Seymour, Shullsburg, White Oak Springs, and Willow Springs, Lafayett County, Wis., to Dubuque, Iowa; and *empty butter tubs*, and *empty cheese boxes*, From Dubuque, Iowa, to point of origin in the Wisconsin towns specified immediately above; *Cheese*, From Dubuque, Iowa, to Dixon, Ill., and Plymouth, Wis.; and *empty cheese boxes*, from Dixon, Ill., and Plymouth, Wis., to Dubuque, Iowa; *Butter, and butter tubs and containers*, Between Dubuque, Iowa, on the one hand, and, on the other, points in a described portion of the State of Wisconsin; *Malt beverages*, and *carbonated beverages*, From Chicago, Ill., to McGregor, Iowa; and *Empty containers* for malt and carbonated beverages, From McGregor, Iowa, to Chicago, Ill.; *Beer, empty beer containers*, and *brewery supplies*, Between Cassville, and Potosi, Wis., on the one hand, and, on the other, Sioux City and Council Bluffs, Iowa, Preston, Austin, Spring Valley, and Winona, Minn., points in that part of Iowa (except Dubuque) on and East of U.S. Highway 69, and points in that part of Illinois on and North of U.S. Highway 36.

Sub-15—*Meats, meat products and meat by-products*, and *articles, distributed by meat packinghouses*, as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides, skins, and pieces thereof), From Dubuque, Iowa, to Milwaukee, Wis.; Sub-18—*Meats, meat products, and meat by-products*, and *articles distributed by meat packinghouses*, as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), From Dubuque, Iowa, to points in Wisconsin (except Milwaukee, Wis., and points in the Milwaukee, Wis., Commercial Zone as defined by the Commission). Restriction: The authority is restricted to the transportation of traffic originating at *by-products*, and *articles distributed by meat packinghouses*, as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates;* 61 M.C.C. 209 and 766 (except hides and commodities in bulk), From the plant sites and storage facilities of Dubuque Packing Company, at or near Dubuque, Iowa, to points in Indiana and Illinois, Restriction: The authority is restricted to the transportation of shipments originating at the above-named origins and destined to the named destinations; Sub-23—*Meats, meat products, meat by-products, articles distributed by meat packinghouses, and such commodities as are used by meat packers* in the conduct of their business when destined to and for use by meat packers as described in Sections A, C, and D of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), Between the plant and warehouse facilities of the Dubuque Packing Company at or near Dubuque, Iowa, and Duluth, Minn., restricted to the transportation of shipments originating at or destined to the above origin and destination points; From points in Wisconsin to Dubuque, Iowa, restricted to the transportation of shipments destined to Dubuque, Iowa. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-76669 filed July 20, 1976. Transferee: SANTO CONTINO and JAMES GUARIGLIA, a partnership, 433 Murray Hill Parkway, East Rutherford, New Jersey, 07073. Transferor: Daleo Trucking Co., Inc., 71 Warren Street, Paterson, New Jersey, 07524. Applicants' Representative: John M. Zachara, P.O. Box Z, Paterson, New Jersey 07509. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-129737, issued December 16, 1970, as follows: General commodities, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment and those injurious or contaminating to other lading, Between New York, N.Y., on the one hand, and, on the other, Paterson and Passaic, N.J.

Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

[Notice No. 10]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

AUGUST 17, 1976.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 C.F.R. Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before August 30, 1976.

Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-75836. By order of July 1, 1976, the Commission, Division 3, acting as an Appellate Division, approved the transfer to C & E Trucking Co., Inc., Paramount, Calif., of that portion of Certificate No. MC-108398 Sub-33 issued by the Commission, March 15, 1965, to Ringsby-Pacific Ltd., Littleton, Colo., authorizing the transportation of machinery, materials, supplies, and equipment incidental to, or used in, mining, milling, building construction, and highway building and maintenance, requiring special equipment, between points in California south of a specified line on the one hand, and, on the other, north of said line; machinery, materials, supplies, and equipment incidental to, or used in, mining, milling, building construction, and highway building and maintenance, between points in a described area in California on the one hand, and, on the other, points in California outside said area; between points in California on the one hand, and, on the other, points in Nevada, and between points in Nevada; and structural steel, between San Francisco, Calif., and points within 20 miles of San Francisco on the one hand, and, on the other, points in Nevada; and all of the above-described authority is subject to specified restrictions.

Jerry Solomon Berger, Esquire, 9454 Wilshire Boulevard, Beverly Hills, Calif. 90212.

No. MC-FC-76121. By order of July 11, 1976, the Motor Carrier Board approved the transfer of Mosaic Trucking Company, Inc., Avanel, N.J., of the operating rights in Certificate No. MC-134962 issued January 8, 1971, to Fred Tamasco, doing business as Fred's Delivery Service, Irvington, N.J., authorizing the transportation of general commodities, with exceptions, between points is Essex County, N.J., on the one hand, and, on the other, New York, N.Y.

Edward L. Nehez, 744 Broad St., Newark, N.J., 07102, representative for transferee.

Robert B. Pepper, 168 Woodbridge Ave., Highland Park, N.J. 08904, representative for transferor.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Ex Parte No. MC-43]

RINGBY-PACIFIC LTD.

Lease and Interchange of Vehicles by Motor Carriers

AUGUST 12, 1976.

At a Session of the Interstate Commerce Commission, Motor Carrier Leasing Board, held at its office in Washington, D.C., on the 29th day of July, 1976.

It appearing, That a petition has been filed by Ringsby-Pacific Ltd. (MC 108398 and various subs), and Arizona-Pacific Tank Line (MC 109584 and numerous subs), under common control, for waiver of paragraph (c) of Section 1057.4 of the Lease and Interchange of Vehicles Regulations (49 CFR 1057), concerning equipment leased between petitioners;

It further appearing, That petitioners maintain a jointly supervised program applying the same standards of inspection and maintenance to equipment in accordance with the motor carrier safety regulations of the U.S. Department of Transportation;

It further appearing, That the Department offers no objection to granting the petition;

It is ordered, That waiver of paragraph (c) of Section 1057.4, be, and, it is hereby granted provided that the equipment is inspected on the day it is to be leased and found to meet the requirements of the motor carrier safety regulations of the U.S. Department of Transportation and that petitioners remain in satisfactory compliance with those regulations and under common control.

By the Commission, Motor Carrier Leasing Board, Members Teeple and Sibbald.

ROBERT L. OSWALD,
Secretary.

[FR Doc.76-2405 Filed 8-16-76;8:45 am]

[AB 122]

TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS

Abandonment of Operation

AUGUST 4, 1976.

The Interstate Commerce Commission hereby gives notice that its Environmental Affairs Staff has concluded that the proposed abandonment by the Terminal Railroad Association of St. Louis of St.

V 41 160 AUG 17 76 UMI

Louis Union Station in St. Louis, Mo., if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the proposed abandonment, coupled with relocation of Amtrak passenger service to an alternate facility still to be constructed, will have a negligible impact on the environment since there will be no diversion to less efficient transport modes and the number of rail miles traveled will remain essentially unchanged.

Although Union Station, a site listed on the National Register of Historic Places, will be converted into a multifunctional commercial complex, current plans contemplate retention of the station's exterior essentially without change and renovation of the building's interior in a manner conforming with the original design. In light of these plans, there should not be an adverse effect on the station's historical attributes.

Commercial development of the station property is expected to have a beneficial impact on community development because it will encourage tourism and create new jobs.

This conclusion is continued in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–275–7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before September 15, 1976.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

[SEAL] ROBERT L. OSWALD,
Secretary.

TRANSPORTATION OF "WASTE" PRODUCTS FOR REUSE OR RECYCLING

Special Certificate Letter Notice(s)

The following letter notices request participation in a Special Certificate of Public Convenience and Necessity for the transportation of "waste" products for reuse or recycyling in furtherance of a recognized pollution control program under the Commission's regulations (49 CFR 1062) promulgated in "Waste" Products, Ex Parte No. MC–85, 124 MCC 583 (1976).

An original and one copy of protests against applicant's participation may be filed with the Interstate Commerce Commission within 20 days from the date of this publication. A copy must also be served upon applicant or its representative. Protests against the applicant's participation will not operate to stay commencement of the proposed operation.

If the applicant is not otherwise informed by the Commission, operations may commence September 16, 1976, subject to its tariff publication effective date.

P–5–76 (Special Certificate—Waste Products), filed August 8, 1976. Applicant: DANNY HERMAN TRUCKING, INC., 15626 Old Valley Blvd., City of Industry, Calif. 91744. Authority sought to operate pursuant to a certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *waste products for recycling or reuse*, between points in the United States (including Alaska, but excluding Hawaii), in furtherance of a recognized pollution control program sponsored by Industrial Silver Company of Fontana, Calif., for the purpose of recovery of waste products containing silver for recycling.

By the Commission.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

NEW ANIMAL DRUG APPLICATIONS

Proposals, Withdrawal of Proposals and Opportunities for Hearings

V41I160 AUG 17 76 UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 510, 526, 540, 556 and 558]

[Docket Nos. 76N—0173, 0228, 0229, 0230]

FURAZOLIDONE, NIHYDRAZONE, FURALTADONE, NITROFURAZONE

Withdrawal of Proposals and Notice of Proposed Rule Making

Elsewhere in this issue of the FEDERAL REGISTER, the Director of the Bureau of Veterinary Medicine of the Food and Drug Administration (FDA) is issuing notices of opportunity for hearing on proposals to withdraw approval of new animal drug applications (NADA's) Nos. 12–738 and 14–283 (formerly FDC–D–283; now Doc. No. 76N–0229), and NADA No. 65–059 for the use of furaltadone (NF–260); NADA Nos. 13–195 and 13–200 (formerly FDC–D–282; now Doc. No. 76N–0228) for the use of nihydrazone (NF–64); and NADA Nos. 6–395, 6–475, 6–649, 7–801, 8–129, 8–142, 8–324, 8–410, 8–529, 8–784, 9–013, 9–415, 10–741 and 11–154 (formerly FDC–D–280; now Doc. No. 76N–0230), for the use of nitrofurazone (NF–7) in food-producing animals in accordance with section 512(e)(1)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 306b(e)(1)(B)) on the grounds that new evidence not available to him when the applications were approved, evaluated together with the evidence available to him at the time of the approval, shows that those drugs are not shown to be safe for use under either the approved or currently labeled conditions of use. These notices, in addition to that published in the FEDERAL REGISTER of May 13, 1976 (41 FR 19907), regarding furazolidone, constitute due notice that furazolidone, furaltadone, nihydrazone and nitrofurazone are new animal drugs pursuant to section 201(w)(1) of the act (21 U.S.C. 321(w)(1)).

Consistent with this action, the Director is hereby withdrawing the proposal on furaltadone published in the FEDERAL REGISTER of August 4, 1971 (36 FR 14335), and those covering nihydrazone and nitrofurazone published in the FEDERAL REGISTER of March 31, 1971 (36 FR 5918) and is reproposing to revoke the regulations on which these drugs rely as a condition of their approval. Interested persons may submit comments on or before September 16, 1976.

The Director has reviewed the potential environmental impact of the proposal to withdraw approval of NADA's for furaltadone (NF–260); for nitrofurazone (NF–7) and nihydrazone (NF–64) which are subjects of companion notices published elsewhere in this issue of the FEDERAL REGISTER; and for furazolidone (NF–180) which was the subject of notices published in the FEDERAL REGISTER of May 13, 1976 (41 FR 19906 and 19907). He has concluded that the proposed action against these four drugs would not significantly affect the quality of the human environment. An environmental impact analysis report and assessment is on file at the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852.

The Director has carefully considered the inflation impact of the proposed action against the four nitrofuran drugs. Since furazolidone (NF–180) accounts for approximately 97 percent of the usage of nitrofuran compounds in food-producing animals, his review of the inflation impact focused only on the uses of furazolidone. A major inflation impact has been found, as defined in Executive Order 11821, OMB Circular A–107, and the Guidelines issued by the Department of Health, Education, and Welfare. Copies of the inflation impact statement on nitrofurans are on file with the Hearing Clerk, Food and Drug Administration. The major conclusions found in the inflation impact statement are summarized in the May 13, 1976 FEDERAL REGISTER notice concerning furazolidone (NF–180) (41 FR 19906).

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.29) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), the Director proposes that Parts 510, 526, 540, 556, and 558 of Chapter I of Title 21 of the Code of Federal Regulations be amended, taking into consideration the specific revocations related to furazolidone referred to in the FEDERAL REGISTER of May 13, 1976 (41 FR 19906; formerly FDC–D–281, now Doc. No. 76N–0173), in addition to those relating to furaltadone, nihydrazone, and nitrofurazone, as follows:

§ 510.515 [Amended]

1. Section 510.515 *Animal feeds bearing or containing new animal drugs subject to the provisions of section 512(n) of the act* is amended:

a. By revoking paragraphs (a) (4) and (5):

b. By revoking and reserving paragraph (b) (11) and (15); by redesignating paragraph (b) (17) (i) as (b) (17) and by revoking paragraph (b) (17) (ii);

c. By revoking and reserving in the table in paragraph (c), items 8, 9, and 10.

§ 526.1014 [Revoked]

2. By revoking § 526.1014 *Furaltadone.*

3. By revising § 540.274c(a) (1) and (4), to delete references to furaltadone, as follows:

§ 540.274c Procaine penicillin G in oil.

(a) * * *

(1) *Standards of identity, strength, quality, and purity.* It is exempt from the potency requirement in § 440.274a(a)(1) of this chapter. It is not required to be sterile if it is packaged and labeled solely for udder instillations of cattle. If it is packaged and labeled solely for udder instillations of cattle, the penicillin used is exempt from the requirements of § 40.74a(a)(1) (ii), (iii), and (iv) of this chapter.

* * * * * *

(4) *Requests for certification; samples.* If the batch of procaine penicillin in oil is intended solely for udder instillations of cattle, test results for toxicity, sterility, and pyrogen are not required.

* * * * * *

§ 540.380a [Amended]

4. By deleting from paragraph (a)(1) of § 540.380a *Penicillin ointment* the second sentence, "If it is intended solely for topical veterinary use and not for udder instillation in dairy animals and is conspicuously so labeled, it may contain nitrofurazone."

§ 540.874g [Revoked]

5. By revoking § 540.874g *Procaine penicillin G—furaltadone.*

§ 556.280 [Revoked]

6. By revoking § 556.280 *Furaltadone.*

§ 556.290 [Revoked]

7. By revoking § 556.290 *Furazolidone.*

§ 556.450 [Revoked]

8. By revoking § 556.450 *Nihydrazone.*

9. By amending § 558.15 by deleting references to nitrofuran in the section heading, in paragraph (a), in the introductory text of paragraph (b), and in (b) (1) and (3); by deleting from the table in paragraph (g)(1) the entries for Norwich Pharmacal, and for Hess & Clark and Norwich Pharmacal Co., and by deleting from the table in paragraph (g)(2) the entries for Norwich Pharmacal Co.; as amended § 558.15 (a), (b) introductory text), (b) (1) and (3), and the tables in (g) (1) and (2) read as follows:

§ 558.15 Antibiotic and sulfonamide drugs in the feed of animals.

(a) The Commissioner of Food and Drugs will propose to revoke currently approved subtherapeutic (increased rate of gain, disease prevention, etc.) uses in animal feed of antibiotic and sulfonamide drugs whether granted by approval of new animal drug applications, master files and/or antibiotic or food additive regulations, by no later than April 20, 1975, unless data are submitted which resolve conclusively the issues concerning their safety to man and animals and their effectiveness under specific criteria established by the Food and Drug Administration based on the guidelines included in the report of the FDA task force on the use of antibiotics in animal feeds. All persons or firms previously marketing identical, related, or similar products not the subject of an approved new animal drug application must submit a new animal drug application by July 19, 1973, if marketing is to continue during the interim. New animal drug entities with antibacterial activity not previously marketed, now pending approval or submitted for approval prior to, on, or following the effective date of this publication, shall satisfy such criteria prior to approval.

(b) Any person interested in developing data which will support retaining approval for such uses of such antibiotic and sulfonamide drugs pursant to section 512(l) of the Federal Food, Drug, and Cosmetic Act shall submit to the Commissioner the following:

(1) By July 19, 1973, records and reports of completed, ongoing, or planned studies, including protocols, on the tetracyclines, streptomycin, dihydrostreptomycin, pencillin, and the sulfonamides; for all other antibiotics by October 17, 1973. The Food and Drug Administration encourages sponsors to consult with the Bureau of Veterinary Medicine on protocol design and plans for future studies.

(2) By April 20, 1975, data satisfying all other specified criteria for safety and effectiveness, including the effect on the salmonella reservoir for any antibiotic or sulfonamide drugs approved for subtherapeutic use in animal feeds. Drug efficacy data shall be submitted for any feed-use combination product containing such drug and any feed-use single ingredient antibiotic or sulfonamide not reviewed by the National Academy of Sciences—National Research Council, Drug Efficacy Study covering drugs marketed between 1938 and 1962.

Do	do	do	50 to 150 g/ton	As an idain the maintenance of weight gains and feed consumption in presence of atrophic rhinitis.
Do	do	do	500 g/ton	In presence of porcine leptospirosis reduces instances of abortion, gives higher survival rate, heavier and healthier newborn pigs, reduces urinary shedding of leptospirae and aids in maintenance of normal weight gains and feed consumption. Feed 7 to 14 d, approximately 1 mo before farrowing.
Do	do	Calves	0.05 to 0.1 mg/lb of body weight daily or 25 to 75 mg per head daily.	To increase rate of gain and improve feed efficiency.
Do	do	do	0.5 mg/lb of body weight daily or in complete feed at 50 g/ton.	As an aid in the prevention of bacterial diarrhea.
Do	do	do	0.5 to 5.0 mg/lb of body weight daily or complete feed at 50 g/ton.	As an aid in the treatment of bacterial diarrhea.
Do	do	Cattle	75 to 80 mg per head daily.	As an aid in reducing incidence and severity of bloat. As an aid in reducing incidence and severity of liver abscesses (for cattle weighing over 400 lb). To increase rate of gain and improve feed efficiency. As an aid in increasing milk production in lactating dairy cows.
Do	do	do	0.1 to 0.5 mg/lb of body weight daily.	As an aid in the prevention of bacterial diarrhea.
Do	do	do	0.5 to 5.0 mg/lb of body weight daily.	As an aid in the treatment of bacterial diarrhea, also known as scours.
Do	do	do	0.5 to 2.0 g per head daily.	For the prevention and treatment of the early stages of shipping fever complex. Oxytetracycline is effective prophylaxis when fed 3 to 5 d preceding shipment and/or 3 to 5 d following arrival in feedlots. For treatment of shipping fever, these levels should be fed at onset of the disease symptoms until symptoms disappear.
Do	do	Sheep	10 to 20 g/ton	To increase rate of gain and improve feed efficiency during finishing period.
Do	do	do	50 g/ton	As an aid in the prevention of bacterial diarrhea, also known as scours, lamb dysentery, and white scours of lambs.
Do	do	do	100 g/ton	As an aid in the treatment of bacterial diarrhea, also known as scours, lamb dysentery, and shite scours of lambs.
Do	do	do	25 mg per head daily.	As an aid in reduction of losses due to enterotoxemia, also known as overeating disease.

HESS AND CLARK ET AL.

Furazolidone (NF–180); Opportunity for Hearing on Proposal To Withdraw Approval of Certain New Animal Drug Applications; Corrections

In FR Doc. 76–13969 appearing on page 19907 in the FEDERAL REGISTER of Thursday, May 13, 1976, the following corrections are made:

1. On page 19907 in the second column, the fourth full paragraph is corrected by deleting the last sentence which reads, "Copies of these studies have been placed on file with the Hearing Clerk, Food and Drug Administration." The studies referred to in this sentence are part of a new animal drug application and are therefore confidential under § 514.111 (21 CFR 514.111).

2. On page 19909 in the first column, in paragraph (4), the words "Project No. 375.09E" are corrected to read, "Project No. 475.09E."

3. On page 19920 in the second column, in paragraph 3., "Vol. 16" is corrected to read, "Vol. 13."

4. On page 19918 in the second column, in the second full paragraph, "May 16, 1972" is corrected to read, "May 26, 1972."

Dated: August 9, 1976.

[Docket No. 72N–0231]

HESS & CLARK, ET AL.

Furaltadone (NF–260); Opportunity for Hearing on Proposal To Withdraw Approval of Certain New Animal Drug Applications

The Director of the Bureau of Veterinary Medicine of the Food and Drug Administration (FDA) is issuing a notice of opportunity for hearing on a proposal to withdraw approval of approved new animal drug applications (NADA's) Nos. 12–738, 14–283 and 65–059 for the use of furaltadone (NF–260) in food-producing animals in accordance with section 512(e)(1)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b (e)(1)(B)) (hereinafter, "the act") on the grounds that new evidence not available when the applications were approved, evaluated together with the evidence available at the time of approval, shows that furaltadone is not shown to be safe for use under either the approved or currently labeled conditions of use. Holders of approved NADA's have until September 16, 1976 to submit requests for a hearing in accordance with § 514.200 (21 CFR 514.200).

In FR Doc. 76–23620 appearing elsewhere in this issue of the FEDERAL REGISTER, the Director is issuing a notice of proposed rule making to revoke the appropriate provisions of sections affected by the proposed withdrawal.

Furaltadone (NF–260) is a member of a class of chemicals called "nitrofurans," which have prophylactic and therapeutic uses in food-producing animals as antibacterial and antiprotozoan agents. In addition to furaltadone (NF–260), which is the subject of this notice, there are three other nitrofurans that are used in food-producing animals and are or have been subject to agency action: Nitrofurazone (NF–7) and nihydrazone (NF–64), which are subjects of companion notices in this issue of the FEDERAL REGISTER; and furazolidone (NF–180), which was the subject of notices in the FEDERAL REGISTER of May 13, 1976 (41 FR 19906, 19907). A fifth nitrofuran, furamazone (NF–84), is not at this time the subject of contemplated agency action for withdrawal. Another proposed agency action concern-furaltadone (NF–260) was published in the FEDERAL REGISTER of August 30, 1974 (39 FR 31678).

Furaltadone (NF–260) was approved in 1962 for treating mastitis in dairy cows via infusion into the mammary gland. It is used in products that are marketed in single-dose units containing 500 milligrams of furaltadone and as a combination drug with each single-dose unit containing 50 milligrams of furaltadone and 100,000 units of procaine penicillin G. The approved treatment in lactating cows is the infusion of one squeeze jet in each infected quarter (an individual mammary gland, including the teat) immediately after milking. Medication remains in the quarter until the next milking. Treatment is repeated after each milking up to a limit of three infusions. For dry cows with a history of mastitis, one squeeze jet is infused into each quarter at the end of the last normal lactation. A second infusion may be given after 5 days.

The NADA's for furaltadone alone are approved with a 36-hour withdrawal for milk, which involves discarding the milk for three milkings. The sponsors, Norwich Pharmacal Co., Division of Morton-Norwich Products, Inc., and Hess & Clark, currently a Division of Rhodia, Inc., voluntarily revised the labels in January 1971, to require a 48-hour withdrawal for milk, which involves discarding the milk from four milkings. The furaltadone combination with penicillin carries a 96-hour withdrawal or eight-milkings discard.

The Food and Drug Administration issued a notice of opportunity for hearing, published in the FEDERAL REGISTER of August 4, 1971 (36 FR 14343), proposing to withdraw approval of NADA's for furaltadone (NF–260) on grounds that:

> Information available to the Commissioner establishes that the drugs, when administered to laboratory animals, have been shown to produce tumors. The drugs are, therefore, not considered to be safe for use in the absence of appropriately sensitive methods of analysis to establish their absence in food derived from treated animals.

Similar notices were published for furazolidone in the FEDERAL REGISTER of August 4, 1971 (36 FR 14343) and for nitrofurazone (NF–7) and nihydrazone (NF–64) on March 31, 1971 (36 FR 5926 and 5927). The history leading to the publication of the 1971 notices is discussed in the May 13, 1976 notice for furazolidone (NF–180).

Norwich and Hess & Clark responded to the August 4, 1971 notice concerning furaltadone (NF–260) by filing requests for a hearing. Norwich assured FDA that it had adequate methods of analysis to determine residues and adequate data to show that under the currently labeled conditions of use, the drugs were safe. In addition, Norwich set forth a hypothesis that nitrofurans were not primary tumorigens but stimulated spontaneous tumor growth by disrupting the normal hormone balance.

Norwich has continued to submit data pertaining to the use of furaltadone (NF–260) in food-producing animals. The Food and Drug Administration has determined that new evidence, evaluated together with the evidence available when the approvals were granted, fails to demonstrate that either the approved or currently labeled uses of furaltadone are shown to be safe. The Director is withdrawing the August 4, 1971 notice of opportunity for hearing concerning furaltadone (NF–260), and is issuing this new notice, which presents in detail all of the evidence now available to him and the basis on which he proposes to withdraw approval of all uses of furaltadone in food-producing animals in accordance with section 512(e)(1)(B) of the act.

Section 512(e)(1)(B) of the act requires that FDA withdraw approval of an NADA when "new evidence * * * evaluated together with the evidence available * * * when the application was approved, shows that such drug is not shown to be safe * * *." Under this provision, the new evidence and the evidence submitted at the time the application was approved must be evaluated to determine whether all of the requirements for safety contained in section 512 of the act continue to be fulfilled.

THE DETERMINATION OF "SAFETY" IN SECTION 512

Section 512 of the act requires that the use(s) of a new drug in food-producing animals must be supported by adequate data supplied by the sponsor in applications that include, among other things, demonstration that the drug use will not result in unsafe residues in human food.

Under section 512(b) of the act, whenever a drug use may result in residues of the drug in food, an application must include not only full reports of investigations to show that the use of the drug is safe, but also a description of practicable methods for monitoring food to assure there are no unsafe residues in human food attributable to the drug use, and demonstration that the conditions of use are adequate to assure there are no unsafe residues.

Under section 512(d)(2) of the act, FDA is required, in the evaluation of the supporting safety data, to consider, among other things:

V 41 160 AUG 17 76 UMI

1. The probable consumption of such drug and of any substance formed in or on food because of the use of such drug, i.e., probable human consumption of residues including the parent drug and metabolites.

2. The cumulative effect on man or animal of such drug, taking into account any chemically or pharmacologically related substance, i.e., toxicological effects of the compounds comprising the residues.

3. Safety factors which, in the opinion of experts qualified by scientific training and experience to evaluate the safety of such drugs, are appropriate for the use of animal experimentation data, i.e., establishing "safe" levels of residues using appropriate safety factors to extrapolate animal data on cumulative effects to humans.

Under section 512(d)(1)(H) of the act, additional requirements must be met if the drug is a carcinogen.

The determination of safety within the meaning of section 512 of the act for a drug whose use may result in residues in the edible products of the treated animal, whether or not the drug is a carcinogen, requires a multistep process. These steps form an orderly procedure by which information is derived to satisfy each of the three considerations stated above.

Step 1. Assessment of the total residues in edible products and the depletion of those residues with time following cessation of drug treatment in order to determine probable human consumption (section 512(b)(1) and (d)(2)(A) of the act).

Step 2. Assessment of information about the residues to determine the appropriate testing in laboratory animals required to estimate the cumulative effects of human exposure to the residues (section 512 (b)(1) and (d)(2)(A) of the Act).

Step 3. Acquisition of dose-response data in test animals to determine the cumulative effects of dietary exposure to the residue compounds from which the maximum acceptable concentration of residues in food can be established using appropriate safety factors to assure that human exposure to residues in the total diet does not exceed a level deemed safe (section 512 (b)(1) and (d)(2) (B) and (C) of the act). In the case of a carcinogenic drug, a conservative statistical extrapolation of the tumor data is used to estimate a level of residue exposure that could be considered insignificant and poses essentially no risk of cancer and operationally defines "no residue" for purposes of computing the residue assay requirements under section 512(d)(1)(H) of the act.

Step 4. Acquisition of information about the residues to (a) determine the tissue (called the target tissue) from which residues require the longest time to deplete to safe levels, and which, therefore, must be monitored by the regulatory assay, and (b) determine the compound (called the marker) that is to be measured in the regulatory assay (step 5) so that by its measurement there is assurance that no unsafe residues occur from the use of the drug (section 512 (b)(7) of the act).

Step 5. Development of a practicable method of analysis that can measure the marker in the target tissue at a concentration which assures that total residues in the daily diet of humans do not exceed the level established in step 3 as safe (section 512(b)(7) of the act).

Step 6. Demonstration that practical conditions of use can be prescribed on the label of the product to assure there will be no unsafe residues in the food products from treated animals (section 512 (b)(8) and (d)(2)(D) of the act).

Each of the steps involves principles that are essential for a determination of food safety and compliance with the requirements of the act to assure there are no unsafe residues in human food from the animal drug use. Each step builds upon the preceding step. Therefore, failure to accomplish any one of the six steps in whole or in part for any drug ordinarily will preclude a sponsor's fulfilling its obligation under the act to determine probable consumption of residues and cumulative effects of exposure, and to establish safe conditions of use with appropriate regulatory methods of analysis to control residues when deemed necessary.

New evidence concerning furaltadone (NF–260) not available when the applications were approved includes, among other things, a demonstration that furaltadone induces mammary adenocarcinomas in female rats and may be a more potent carcinogen than furazolidone (NF–180). The Director has evaluated all of the data now available, including the new data received since 1962 when NADA's for furaltadone (NF–260) were first approved and the data available to FDA at the time of approval, and has concluded that the approval of NADA's for furaltadone (NF–260) must be withdrawn under section 512(e)(1)(B) of the act because:

1. Adequate investigations have not been provided to show that the uses of furaltadone are safe, as required by section 512(b)(1) of the act. Adequate information has not been provided on the probable consumption of residues, and the cumulative effects of exposure have not been determined by appropriate tests, as required by section 512(d)(2)(A) and (B) of the act. Therefore, "safe" levels of residue cannot be determined using appropriate safety factors, as required by section 512(d)(2) (C) of the act.

2. Adequate, reliable, and practicable methods of analysis are not available for monitoring food to assure there are no unsafe residues in edible tissues and milk that are attributable to the use of furaltadone, as required by section 512 (b)(7) of the act.

3. Practical conditions of use cannot be specified in the labeling to assure there are no unsafe residues attributable to the use of furaltadone, as required by section 512(b)(8) and (d)(2)(D) of the act.

The data on which these conclusions are based are presented in the succeeding sections of this notice. The Director first describes all the relevant new evidence bearing on the determination of safety for the uses of furaltadone. Then he evaluates all the evidence before him using the six-step procedure necessary to satisfy a human safety determination for the use of furaltadone (NF–260) and to meet the considerations required in section 512 of the act.

I. New Evidence

In October 1966 and January 1967, Norwich submitted reports of the effect in rats of feeding diets containing nitrofurans for 45 weeks. These studies included tests on furaltadone (NF–260) and furazolidone (NF–180). In these studies it was shown that both furaltadone (NF–260) and furazolidone (NF–180) induced mammary tumors in female rats; that furaltadone (NF–260) caused an increase in the number of mammary adenocarcinomas (cancers) which developed in female rats compared with control rats maintained on drug-free diets; and that furaltadone (NF–260) may be a more potent tumor-inducer than furazolidone (NF–180).

Subsequently, more extensive, longer term testing of furazolidone (NF–180) was conducted, but further testing of the carcinogenic potential of furaltadone (NF–260) has not been undertaken. The more extensive testing of furazolidone (NF–180), as described in the May 13, 1976 Federal Register, shows that the drug induces cancer in both rats and mice and that the tumors and cancers were not limited to the mammary gland or the endocrine tissues of female rats.

The Director is including in this notice information available on the toxitological propertes of furazolidone (NF–180) as well as furaltadone (NF–260) because of the structural similarities of the drugs and their similar biological properties, which have been observed in the limited comparative data available. The new evidence showing that furazolidone (NF–180) is a carcinogen has a significant bearing on the Director's conclusions that the uses of furaltadone (NF–260) are not shown to be safe.

Although it is appropriate to consider data on furazolidone (NF–180) to judge the adequacy of existing data to support the safe use of furaltadone (NF–260) in food-producing animals, these data are not a substitute for the data on furaltadone (NF–260) that are required by the statute. Basic data are required for each drug, recognizing that slight differences in chemical structure can result in significant differences in metabolism, residues, and toxicity. Although comparative data on the biochemical and toxicological properties of related drugs may be useful and appropriate in making decisions about the degree of testing required for each drug to show there is no probable hazard, these data cannot be used as a substitute for the basic information necessary on each drug to determine the probable exposure to residues and cumulative effects of exposure.

A. *Carcinogenic Potential of Furaltadone.* Norwich submitted data in October 1966 and January 1967 on the cumulative effects in rats of feeding diets containing furaltadone (NF–260) for 45 weeks ("Effects of Long Term Feeding of Various Nitrofurans," October 13, 1966 and January 4, 1967, Project No. 440.07, submitted to FDA as part of a June 2, 1967, Drug Experience Report). These studies included testing in female Sprague-Dawley (Holtzman strain) rats and testing in both male and female Carworth Farms (CFE strain) rats.

1. The Sprague-Dawley female rat study: Thirty-five female Sprague-Dawley (Holtzman strain) rats were fed furaltadone at a level of about 0.15 percent (85 milligrams per kilogram (mg/kg) body weight) in their diet for 45 weeks, followed by maintenance on an unmedicated diet for an additional 8 weeks before sacrifice. A comparable control group of female rats was maintained on a furaltadone-free diet for 53 weeks. At termination of the study the animals were autopsied, and tissues were examined for histopathological lesions.

The most prominent drug-related effect was the induction of tumors in the mammary glands of the female rats. Although rats develop mammary tumors spontaneously as they age, the incidence of spontaneous mammary tumors in rats just over 1 year old, depending upon the strain of rat used, can be quite low. The furaltadone-treated female rats had an increased number of mammary tumors, particularly the number of fibroadenomas, as compared with the control rats. Even more impotrant, the furaltadone-treated female rats had an increased number of mammary adenocarcinomas compared with the control rats.

Norwich reported that no mammory tumors of any type were observed in the 33 control rats examined. It reported a total of 77 mammary tumors in 25 of the 33 furaltadone-treated rats examined for histopathology. Three of the mammary tumors were reported by Norwich as adenocarcinomas. The report did not indicate which rats had multiple tumors or whether the three adenocarcinomas were in three different rats or included any multiple malignancies.

An Ad Hoc Committee was established to review the pathology data on all the nitrofurans tested in the Sprague-Dawley rat study and the Carworth Farms rat study. One member of the Ad Hoc Committee was the director of the Eppley Institute for Research in Cancer, University of Nebraska. He and his associate pathologists reviewed the pathology slides of the mammary tissues from 33 of the furaltadone-treated rats provided by Norwich and submitted a detailed report to FDA. They did not review all of the mammary gland slides from the control rats. Each of the reviewed slides had a rat identification number, and there were several slides for each rat. However, there was no information on the number of tumors in each rat. Therefore, it was not possible, in many cases, for the pathologists to determine which slides represented different tumors in the same rat and which were different sections of a single tumor.

The Eppley pathologists diagnosed mammary adenocarcinoma in 10 of the furaltadone-treated female rats, and found apparent multiple tumors, predominantly fibroadenomas, in 25 of the treated rats. However, because the Norwich report did not indicate which 25 rats had tumors, it is not possible from the data available to determine if the tumors reported by the Eppley pathologists were from the same 25 rats in which Norwich had reported tumors. The Eppley pathologists did report a considerably higher number of rats with mammary adenocarcinoma than was reported by Norwich. However, because the Eppley pathologists did not review all of the mammary gland slides from the control rats, a comparative incidence of mammary cancer cannot be determined from the reports.

A pathologist from the Bureau of Foods of FDA, not a member of the Ad Hoc Committee, later reviewed the pathology slides of the mammary tumors from the 25 furaltadone-treated rats in which the Eppley pathologists had reported mammary tumors. From his examination of the histopathological preparations provided, he reported 4 slides of mammary fibroma from 3 rats, 70 slides of mammary fibroadenoma from 23 rats, and 14 slides of mammary adenocarcinoma from 10 rats. The mammary adenocarcinomas were diagnosed in the same 10 rats in which the Eppley pathologists had diagnosed adenocarcinoma.

The Bureau of Foods pathologist also did not have information indicating which slides were multiple sections of single tumors or which represented different tumors. He did have information on the rat identification number for each set of slides. Because the Bureau of Foods pathologist did not review all of the slides in the study, tumor incidence and the comparison of incidence with the control rats cannot be determined from his report. However, his report supports the Eppley pathologists' findings that mammary tumors were found in at least 25 of the furaltadone-treated rats, and mammary adenocarcinoma was found in at least 10 of the furaltadone-treated rats.

2. The Carworth Farms rat study: Furaltadone (NF–260) was fed to 20 male and 20 female Carworth Farms "(CFE strain) rats at about 0.15 percent in the diet (67 to 84 mg/kg body weight) daily for 45 weeks, followed by maintenance on an unmedicated diet for an additional 7 weeks before sacrifice. A comparable control group of rats was maintained on a furaltadone-free diet for 52 weeks. At termination of the study the animals were autopsied, and the tissues were examined for histopathological lesions.

As in the previous Sprague-Dawley rat study, the most prominent drug-related effect seen was the induction of tumors in the mammary glands of the female rats. This included an increase in the number of mammary fibroadenomas and an increase in the number of mammary adenocarcinomas.

No mammary tumors were found by Norwich in the 15 female control and 18 male control rats examined. Norwich reported that 14 out of the 17 furaltadone-treated female rats examined had a total of 49 mammary tumors. Norwich also reported that five mammary adenocarcinomas were found in the furaltadone-treated female rats but did not report whether these adenocarcinomas were seen in five different rats or whether some of these were multiple tumors in the same rat.

The Eppley pathologists reviewed the slides of the mammary tissues from 17 furaltadone-treated rats provided by Norwich. They concluded that 5 of the furaltadone-treated female rats had adenocarcinoma of the mammary gland and that mammary tumors, primarily fibroadenomas, were present in 14 of the furaltadone-treated rats. Slides of the mammary tumors reported by the Eppley pathologists were later reviewed by the Bureau of Foods pathologist. He reported mammary tumors in each of the 14 rats. From his examination of the histopathological preparations provided, he reported 4 slides of fibroma from 4 rats, 38 slides of fibroadenoma from 8 rats, and 11 slides of adenocarcinoma from the same 5 rats in which the Eppley pathologists had reported adenocarcinoma.

Because Norwich did not report the number of rats in which mammary adenocarcinoma was found, and because the Eppley and Bureau of Foods reviewing pathologists did not review mammary tissue slides from control rats, and because the Bureau of Foods pathologist did not examine all the slides from the treated rats, the incidence of mammary cancer cannot be determined from the available reports. However, the Eppley and Bureau of Foods reviewing pathologists did concur in the finding of mammary adenocarcinoma in at least five furaltadone-treated female rats from the study.

Food and Drug Administration scientists recognize that there are uncertainties and limitations in the examination of tumors to determine if they have malignant potential. For example, in the early stages of a mammary tumor growth, the mass may be chiefly adenomatous. As the growth continues, the supporting white fibrous connective tissue may also begin to proliferate, resulting in a fibroadenoma. Later the adenomatous part of the neoplastic mass may entirely disappear, leaving a fibroma. Finally, a part of the adenoma or fibroadenoma may develop malignant tendencies and that portion may then become an adenocarcinoma. All four tumor types, i.e., adenoma, fibroadenoma, fibroma, and adenocarcinoma may be present in the same tumor mass. A small focus of adenocarcinoma in the early stage of a malignant tumor may be overlooked in the tumor growth unless adequate multiple sections of the tumor are made.

Also, unless great care is exercised in the evaluation of the spread of an adenocarcinoma of the mammary gland, the metastasis along the lymphatic routes passing through, under or near other

V 41 160
AUG 17 76
UMI

mammary glands may be considered to be separate primary adenocarcinomas rather than a single primary growth with multiple metastases.

The reports from Norwich indicate that furaltadone caused an increase of mammary tumors in female rats just over 1 year old and caused an increase in the number of mammary adenocarcinomas compared with control rats.

Food and Drug Administration scientists conclude that both studies show that furaltadone is tumorigenic in rats, and that the data raise questions about the carcinogenic potential and potency of furaltadone. They conclude that neither of the studies is adequate to assess the cumulative effects of exposure to furaltadone and its carcinogenic potential and potency because the studies were not of sufficient duration and the number of animals used was not sufficient. In the Sprague-Dawley rat study only female animals were used, so it is not possible to determine whether furaltadone might have produced effects in the male rats. In the Carworth Farms rat study, the number of males was too small to determine with any confidence that furaltadone did not have an adverse effect. In both studies drug treatment was for only 45 weeks and included only one dose-level. In spite of the weaknesses in the reports available, it is evident that a 45-week treatment was sufficient to induce tumors in female rats, and that some of these tumors were mammary cancers. The dose level, frequency, and duration of exposure to a compound are related not only to whether or not cancer is induced but also to the latency period before the expression of cancer. Therefore, the 45-week treatment with furaltadone is not considered a sufficient period of exposure to determine adequately the cancer potential or potency.

The Director concludes that the available data provide sufficient cause for concern that furaltadone may be a carcinogen and that adequate lifetime testing in appropriate animal species is required to evaluate its carcinogenic in potential and potency. The Director concludes that because furaltadone is a tumorigen, dose-response data in lifetime studies, using several dose levels, are necessary to develop the information required to assess the cumulative affects of exposure and to establish conditions of safe use. Although the demonstration of cancer induction may be made on the basis of testing at only one dose level and it may be possible from the results of this testing to conclude that a drug requires regulation under the provisions of section 512(d)(1)(H) of the act, dose-response data are necessary to provide information from which FDA can establish the operational definition of "no residue" for purposes of determining the required conditions for the regulatory assay for residues of a carcinogenic drug. Regardless of whether adequate testing were to show that furaltadone induced cancer or induced only benign tumors, dose-response information would be required to establish the conditions of safe use.

The Norwich data from these two studies were available at the time FDA issued the August 1971 FEDERAL REGISTER notice of opportunity for hearing on the proposed withdrawal of approvals for furaltadone (NF–260). In response to the August 1971 notice, Norwich stated that all four nitrofurans (NF–260, NF–7, NF–64, and NF–180) caused an early development of mammary tumors that were of the type normally found in aging rats, and it postulated that the nitrofurans caused these tumors only at high levels of exposure in the female rats because of disruption in the hormonal system. Norwich presented data purporting to show that the hormonal disruption resulting in the tumors involved a process not applicable to humans and that the proposed methods of analysis for control of residues were more than adequate to assure that levels of residues were below any level which might adversely affect humans.

The Norwich hormonal hypothesis is described in detail in the May 13, 1976 FEDERAL REGISTER notice on furazolidone (NF–180). The supporting information provided by Norwich for the hypothesis was primarily limited to data on furazolidone (NF–180) and some very limited comparative data on nitrofurazone (NF–7). No data were presented on furaltadone (NF–260) related to a hormonal mechanism of action.

B. *Comparative Data on Furaltadone and Furazolidone.* Norwich has provided data on furazolidone (NF–180) from the Sprague-Dawley female rat study and the Carworth Farms rat study. It has also supplied data on testing of furazolidone (NF–180) in three chronic rat studies and one mouse study; the tests are described in the May 13, 1976 FEDERAL REGISTER notice. The data have a bearing on the Director's proposed action in this notice for furaltadone (NF–260) and his decision to reject the Norwich hormonal hypothesis for furaltadone (NF–260) and furazolidone (NF–180). They also have a bearing on his decision to reject the sponsors' claims that adequate studies have been provided for furaltadone (NF–260) to support a determination that the drug uses are shown to be safe.

In the Sprague-Dawley female rat study and Carworth Farms study, furazolidone (NF–180) was also tested in the protocols using a dietary level of about 0.1 percent as compared to the furaltadone (NF–260) dietary level, which was about 0.15 percent.

In the first study, Norwich reported that 14 of the furazolidone-treated Sprague-Dawley female rats out of 32 rats examined had mammary tumors. The total number of tumors reported by Norwich was roughly half the number of tumors reported for the furaltadone-treated rats. Norwich reported 5 adenocarcinomas in the mammary glands of the furazolidone-treated rats but did not specify in which rats these were found or whether any were multiple malignancies.

The Eppley pathologists reviewed the mammary tissue slides from 32 furazolidone-treated female rats and reported tumors in 14 of the rats. The Bureau of Foods pathologist later reviewed slides of the mammary tumors from the 14 rats and reported tumors in all of these rats. Both the Eppley and Bureau of Foods pathologists reported only one mammary adenocarcinoma and one mammary squamous cell carcinoma, each in a different rat, from the slides of the furazolidone-treated rates they had examined. In contrast to these furazolidone-treated rats, the Eppley and Bureau of Foods pathologists had reported mammary adenocarcinomas in slides from 10 rats treated with furaltadone, indicating a significant increase in the number of mammary adenocarcinomas from the furaltadone-treated rats compared to the furazolidone-treated rats.

In the Carworth Farms rat study, 15 of the furazolidone-treated female rats out of 17 examined were reported by Norwich as having mammary tumors. In comparison, Norwich had reported that 14 of the female rats treated with furaltadone (NF–260) had mammary tumors. The total number of mammary tumors in the furazolidone-treated female rats was greater than the total number of mammary tumors in the furaltadone-treated female rats, but the number of mammary adenocarcinomas and the incidence of rats with adenocarcinomas was greater for the furaltadone-treated female rats compared to the furazolidone-treated female rats. Norwich reported only two mammary adenocarcinomas in the furazolidone-treated female rats, but did not designate whether these were in one or two rats. The Eppley pathologists diagnosed mammary adenocarcinomas in two furazolidone-treated female rats. The Burau of Foods pathologist also reported adenocarcinoma in the same two rats. He further diagnosed tumors from two additional rats as also showing low-grade mammary adenocarcinoma. Tumors from these two additional rats had been diagnosed as fibroadenomas by the Eppley pathologists. In contrast Norwich had reported five adenocarcinomas in the furaltadone-treated rats and the Eppley and Bureau of Foods pathologists diagnosed mammary adenocarcinomas in five of the furaltadone-treated rats, indicating an increase in the number of adenocarcinomas for furaltadone-treated rats compared to furazolidone-treated rats.

Based on these comparative data, the Director concludes that furazolidone (NF–180) and furaltadone (NF–260) qualitatively exhibit very similar tumorigenic effects in female rats. Because the dose levels of the two drugs were not the same (furaltadone (NF–260) at about 0.15 percent in the diet and furazolidone (NF–180) at about 0.1 percent in the diet) and because the studies are not adequate to assess the cumulative effects of exposure and carcinogenic potential and potency, the data are not sufficient for a precise comparison of the tumorigenic potencies. However, based on the limited comparative data available, furaltadone (NF–260) may have a greater carcinogenic potential than furazolidone (NF–180).

More definitive studies of the carcinogenic potential of furazolidone (NF–180) in male and female rats and mice provided by Norwich are described in the May 13, 1976 FEDERAL REGISTER notice. A summary of the findings from the three chronic rat studies and the mouse study include the following:

1. Furazolidone induced malignancies in both rats and mice.

2. Furazolidone also induced nonmalignant tumors.

3. In most cases, the induced malignant and nonmalignant tumors were found at the same sites.

4. There is some evidence that the induction of benign tumors is related to the induction of, or progression to, malignancies as a function of dose.

5. There are marked sex differences in the tumor responses in the rats. There are also some commonalities in the tumor sites for the male and female rats.

6. Mammary tumors were the predominant effect in the female rats.

7. Nonmammary tumors were induced in the Sprague-Dawley male rats, with no one type singularly significant. In the Fischer rats, however, several specific nonmammary tumors were induced in both male and female rats.

8. The major target tumor site in the mouse was the lung. There was no evidence of a significant difference between male and female mice in tumor response, and there were no tumorigenic effects in the endocrine tissues.

9. The induction of tumors involved not only increased incidence of animals with tumors but also an increased number of tumors per animal.

The Director has rejected the data supplied by Norwich to support the hormonal hypothesis for furazolidone (NF–180). A discussion of these data and his basis for rejection are also presented in the May 13, 1976 FEDERAL REGISTER notice. The Director also rejects the Norwich reply to the 1971 FEDERAL REGISTER notice on furaltadone (NF–260) attempting to explain the tumorigenic effects of furaltadone primarily on the basis of the furazolidone (NF–180) data relative to the hormonal hypothesis. The Director finds that the new evidence provided by the more extensive chronic testing data for furazolidone (NF–180), which shows that tumors were induced in both male and female rats and mice and were not limited to tumors of the mammary gland or the endocrine tissues, is inconsistent with the hormonal hypothesis.

Therefore, the Director concludes that the comparative data available on furazolidone (NF–180) and furaltadone (NF–260) in the Sprague-Dawley female rat study and the Carworth Farms rat study, together with the data on the four chronic studies of furazolidone (NF–180) in rats and mice, indicate that adequate testing of furaltadone (NF–260) has not been provided to assess the cumulative effects of exposure necessary for a determination of safety.

II. USES OF FURALTADONE ARE NOT SHOWN TO BE SAFE

To assess the safety of residues using criteria described in section 512(b) of the act and elaborated on in section 512(d)(2) of the act requires a multistep process that must take into account consideration of the metabolism of the drug, determination of the resulting residues, including parent drug and the metabolites, the depletion of those residues with time after drug treatment, and the cumulative effect of human ingestion of the residues. The six basic steps involved in this evaluation process have been previously described in this notice.

A. *The Amount of Total Residue in the Edible Products and the Depletion of Residues with Time Has Not Been Determined (Step 1).* When a drug is administered to an animal, the drug may be altered by the animal into a variety of compounds called metabolites. The process of alteration may be such that little residue of the parent drug remains in the animal tissue, but the amount of metabolites may be substantial. Therefore, the total residue with which FDA is concerned includes both the parent drug and the metabolites.

The nature and amount of each of the residues depend in part upon the metabolism in a particular species. Because there are species differences in metabolism, it is necessary to determine metabolism and residues in each of the species for which the drug is used. Therefore, § 514.1(b)(7)(i) (21 CFR 514.1(b)(7)(i)) includes metabolism and residue depletion studies among those kinds of studies that are used to determine residues.

Exposure to furaltadone in the diet induced mammary tumors and adenocarcinomas in female rats. It is not known whether the parent drug was the active agent or whether the responses were due to one or more active metabolites produced as a result of ingestion of the parent drug by the rats. Such lack of knowledge is not unique to furaltadone; it is typical of many tumorigenic and carcinogenic agents that the mechanism of the induction of tumors or the identification of the active agent is not known. Therefore, when considering the safety of food from furaltadone-treated animals, all drug-related residues to which humans may be exposed must be assumed to be potentially carcinogenic unless convincing evidence is presented to the contrary. Such evidence consists of not only the identification of the residues that are claimed to be safe, but also adequate toxicological studies showing that the levels of each of the identified claimed to be safe are in fact safe. All residues not identified or not shown to be safe must be considered potentially carcinogenic and must be required to be below a level of measurement that can be considered insignificant and to pose essentially no risk of cancer in humans.

The use of chemical assays to determine initially the total residues would require knowledge about what residues occur (parent drug and metabolites) and would require the availability of adequate methods of analysis to measure each one of the residues at the level of interest in the edible tissues. Therefore, this chemical approach is usually not feasible. Instead, a radiolabeled parent drug is used to provide a practical and adequate approach to the initial measurement of total residues in the edible tissues. In this approach, the drug is synthesized with a radioisotope so that when the drug is administered to the animal according to label directions, all resulting residues of potential interest can be measured in the edible products. This is accomplished by counting the radioactivity in the tissues and converting these measurements to an estimation of the amount of residue expressed as parent drug equivalents.

No data have been provided by the sponsors to measure total residues in milk or in edible tissues from furaltadone-treated animals. Similarly no data have been provided to characterize the residues occurring in the edible products. It has been shown that furaltadone is found as a residue in milk following drug treatment, as will be described in paragraph F. (step 6) below in this section, but it has not been shown what proportion of the total residue is the parent drug.

In FDA experience with the use of drugs injected into the mammary gland for treatment of mastitis, it has been shown that such drug use may result in systemic absorption leading to residues in the edible tissues as well as in the milk. No data have been supplied by the sponsors of furaltadone to show whether or not the use of furaltadone results in residues in the edible tissues.

Although no data of any type have been supplied on the metabolism of furaltadone in cows, very limited information in the following references has been provided regarding rats and dogs.

1. Paul, M. F., et al., "Studies on Distribution and Excretion of Certain Nitrofurans," Antibiotics and Chemotherapy, 10:287–302, 1960.

2. Bugard, J. A. and J. D. Conklin, "Distribution of Furaltadone in the Rat," Antibiotics and Chemotherapy, 11:89–96, 1961.

Data from these studies show that in the rat, furaltadone is absorbed from the small intestine and colon, and that in the excreta less than 5 percent of the administered dose is eliminated as the intact parent drug. The in vivo data are limited to the examination of blood and excreta and do not include any structural characterization of metabolites or the examination of tissue storage and distribution. The references also provide the results of some in vitro studies using liver, kidney, and intestinal homogenates prepared from rats and dogs. Furaltadone was added to the homogenates, and it was shown under these conditions that the biological half-life of the parent drug was about 35 minutes in the rat and 37 minutes in the dog. Both rats and dogs appear to rapidly metabolize furaltadone. These data reinforce the Director's conclusion that consideration must be given to metabolism in the animal of the intended drug use to assess the residues and their significance as contaminants in food.

V 41 160 AUG 17 76 UMI

The Director concludes that adequate information on metabolism of furaltadone in the cow and the determination of total drug residues and their depletion in both edible tissues and milk has not been provided. Therefore, the first step necessary to estimate probable consumption of residues, which is a required consideration of section 512(d)(2)(A) of the act, has not been fulfilled.

B. *Sufficient Information Has Not Been Provided about the Residues to Determine the Appropriate Testing Required in Laboratory Animals to Estimate the Cumulative Effects of Human Exposure to the Residues (Step 2).* The composition of a drug's residue may vary from the extremes of less than 1 percent parent drug and more than 99 percent metabolites to less than 1 percent metabolites and more than 99 percent parent drug, though the latter case would be rare. The Food and Drug Administration must assess the toxicity of the total residue because this is what man will be exposed to in food. Ideally, this assessment would be based on the identification of each of the metabolites in the residue, their synthesis, and subsequent testing of the parent drug and all of the metabolites for the cumulative effects of exposure. However, this approach is usually impractical.

Various approaches are available to limit the number of residue compounds for which toxicity testing is required to provide a sufficiently conservative estimate of the toxicity of the total residue. However, Norwich has not presented any quantitative or qualitative information about the total residues of furaltadone in edible tissues or milk.

Therefore, the Director concludes that not only is the toxicological testing provided for furaltadone inadequate, but he is unable to determine whether testing of metabolites in addition to the parent drug is required to determine the safe level of human exposure to residues in food. Step 2 has not been fulfilled; therefore the requirements for step 3 cannot be fully determined.

C. *Adequate Dose-Response Data in Test Animals to Determine the Cumulative Effects of Dietary Exposure to the Residue Compounds Have Not Been Provided; Therefore, the Maximum Acceptable Concentration of Residues in Food Cannot be Established Using Appropriate Safety Factors to Assure that Human Exposure to Residues in the Total Diet Does Not Exceed a Level Deemed Safe (Step 3).* As discussed under section I of this notice, the Director has concluded that adequate testing of the parent drug furaltadone has not been provided. Also, under paragraphs A and B (steps 1 and 2) of this section, the Director concluded that adequate information has not been provided about the residues to determine if toxicity testing of residue compounds in addition to the parent drug is required to estimate conservatively the cumulative effects of exposure to the residues.

The Director concludes that without such essential information about the residues and adequate toxicity testing data, he cannot, in light of the new evidence, determine if furaltadone requires regulation as a carcinogenic animal drug nor can he reasonably estimate a maximum acceptable level of residue in food that can be deemed safe. Therefore, he concludes that adequate information has not been provided to assess the cumulative effects of exposure and to determine the appropriate safety factors required in section 512(d)(2)(B) and (C) of the act.

D. *Sufficient Information about the Residues Has Not Been Provided to Establish the Conditions Necessary for the Analytical Method Used to Control Residues (Step 4).* The evaluation of an analytical method for residues first requires a determination of the tissues to be analyzed, the compound to be measured, and the lower limit of measurement that must be achieved to control total residues adequately. Only then, after selection of these parameters, is it meaningful to consider whether the method proposed by the sponsor meets other characteristics necessary for a practicable reliable method.

1. Determination of the target tissue: A probability exists that residues of furaltadone occur not only in milk, which must be monitored, but may also occur in edible carcases tissues. The most practical approach to monitoring and controlling residues in the field is dependent on the selection of that edible tissue in which residues require the longest time to deplete to a "safe" concentration." Therefore, by monitoring this tissue to assure that residues are below a "safe concentration," it can be assured that all residues in the carcass are below "safe concentrations." In lieu of this determination (identification of the target tissue), all edible tissues, including milk where applicable, must be monitored. This would place an additional burden on public funds for monitoring.

The target tissue is readily identified if the requirements of step 1 of the evaluation process are met: either by showing that there is no systemic absorption of the drug from the udder that causes residues in tissues at any time after drug treatment, or by showing that if tissue residues occur, from what edible tissues the total residues require the longest time to deplete. Norwich has failed to meet these requirements. Therefore, it cannot be determined if analytical methods are required for tissues in addition to methods of analysis for milk.

2. Determination of the compound (marker) which can be measured by the analytical method to assure control of total residues: Because the radiolabeled drug approach used initially to estimate total residues is not applicable to regulatory use, an alternative approach must be developed to assure control of total residues after drug approval. This is achieved by selecting an appropriate residue compound, which may be the parent drug or one or more metabolites, in such a way that its measurement serves as a valid indicator that when the marker compound is below a certain level in the target tissue, all residues in edible tissues are at safe levels. This step is essential to determine if the method of analysis for regulatory use is adequate. To determine a valid marker, adequate information (e.g., information derived from conducting an adequate metabolism study) is required that relates the proportionate amount of each of the residues to the total residue and their change in quantitative relationships with time. The marker must be a known proportion of the total residue when the total residue depletes to the "safe concentration" in the target tissue. It also must be structurally identified so that an adequate and specific method of analysis can be developed for its determination.

This information must be provided for milk. It would also be required for edible carcass tissues if systemic absorption occurs. Because the resulting residues in milk may be different from the residues in edible carcass tissue, it is possible that a marker compound for milk may be different from a marker compound in edible carcass tissue. Norwich has not provided the necessary information from which a valid marker can be selected to monitor total residues in either milk or edible carcass tissues. The regulatory method proposed by Norwich to control residues in milk uses furaltadone as the marker. Norwich has not substantiated that the measurement of furaltadone is adequate to control total residues of potential concern in milk or alternatively to show that all other residues are safe and do not need to be controlled.

3. Determination of the lower limit of measurement required for the analytical method: Establishment of the lower limit of measurement required for the assay begins with the availability of adequate toxicological testing to determine the cumulative effects of exposure. As described in section I and in steps 2 and 3 of this section, the sponsors have not provided adequate testing. Therefore, an estimate of the acceptable level of exposure to total residues in food cannot be determined.

If it were shown by adequate testing that furaltadone (NF–260) and furazolidone (NF–180) were of comparable carcinogenic potencies, and if it were shown that the estimate of the carcinogenic potency for the total residue could be based on the testing results of the parent drug without the need for further testing of metabolites, then the estimate of the maximum human exposure in the daily diet that could be deemed insignificant for purposes of establishing the minimum assay requirements would be about 0.5 part per billion (ppb). The derivation of this estimate is described in detail in the May 13, 1976 FEDERAL REGISTER notice for furazolidone (NF–180).

Milk may comprise essentially the entire diet of infants. For this reason, no additional adjustments to this amount of daily consumption would be permitted and, under the same assumptions, 0.5 ppb would be the maximum allowed concentration of total residues from furaltadone treatment in milk.

No information has been provided on the composition of residues in milk or any measurement of total residues in milk. Therefore, the essential information required to determine a marker for measuring total residues in milk, as described above, is not available. Without this information, even if it were assumed that 0.5 ppb of total residues is "safe," it is not possible to determine the concentration of the marker at the time when total residues in milk would be below 0.5 ppb.

Norwich has proposed that the measurement of furaltadone is adequate to assure control of residues, but it has not provided any information to show if furaltadone may be, for example, 80 percent of the total residue or 10 percent of the total residue. Therefore, it is not possible to determine at what concentration the marker must be measured to assure that total residues are at a "safe concentration."

After making the adjustment for the percent of total residue that the marker represents, one further adjustment is necessary to determine the lower limit of measurement required for the assay. This last adjustment takes into account the degree to which the method of analysis recovers the residue from the sample. Minimum standards for recovery for the acceptance of the method take into account that 100 percent recovery is rarely achieved and that a combined evaluation of the precision and accuracy for measurement of the marker must be considered.

Even if very liberal assumptions were made to accept that furaltadone (NF–260) would not be a more potent carcinogen than furazolidone (NF–180) and would be the most potent of the residue compounds that required testing, and if it was determined that furaltadone was a valid marker and was a major constituent of the total residue, and that an analytical method would achieve good recovery of furaltadone, even then it is likely that a method that can measure 0.2 ppb of furaltadone would be required as a minimum to assure safe use.

Under similar assumptions, even if they could be made, methods of analysis in tissue would be required to measure residues at 1 ppb or less in lieu of data demonstrating that no systemic absorption occurred from the udder.

Norwich is aware of the principles just described for the selection of a target tissue, marker compound, and the adjustments required to establish conditions for the assay; this is evidenced by Norwich's citation of a paper prepared by two FDA scientists in a submission for furazolidone (NF–180) to FDA on November 11, 1975. The cited paper by M. K. Perez and N. E. Weber, entitled "Requirements for Metabolic Studies—Impact on Food Safety Regulation" was presented at the Gordon Research Conference on Drug Metabolism, June 23–27, 1975.

The Director concludes that he cannot make an assessment of the toxicity, including the carcinogenic potency, of furaltadone without adequate testing data; he cannot conclude that furaltadone serves as a valid marker for control of total residues of toxicological interest; and therefore he cannot without adequate supporting data determine the conditions necessary for the analytical method used to control residues. The requirements of step 4 have not been fulfilled. He concludes that the new evidence on furaltadone (NF–260) and furazolidone (NF–180) leads to a determination that the methods of analysis for residues for furaltadone (NF–260) are not shown to be adequate.

E. *Practicable Methods of Analysis are Not Available to Assure that Total Residues in the Daily Diet of Humans Do Not Exceed a Level Deemed Safe (Step 5).* Section 514.1(b)(7) (21 CFR 514.1(b)(7)) requires the sponsor of a new animal drug application to provide a practicable method of analysis to be used for the control of residues of its product. A "practicable" method is defined by FDA as one that reliably measures the compound throughout all residue levels of interest, and also is sufficiently rapid and reasonable in terms of the expertise and equipment required to be applicable for use in the surveillance and control of residues. "Reliability" is a combination of accuracy, precision, and specificity. Accuracy and precision are quantitative terms. "Accuracy" is the measure of deviation from the true value, and "precision" refers to the variability of measurement in replications, either by one analyst or within a laboratory or between laboratories. A method may provide reliable measurement if the measurements are not too variable, even though it measures less than or more than 100 percent of the true value. Therefore, accuracy and precision must be considered together.

"Specificity" is a qualitative term. The measurements obtained by the method must reflect only the compound of interest. Because the method will be used on samples from animals for which exposure history is unknown, the techniques used in the method must be adequate to assure not only the integrity of the measurements, but also the identity of the residue to the exclusion of other interfering substances. Therefore, when the quantitative measurements are made by techniques that are not inherently specific, a confirmatory test is required as part of the official method to assure the identity of the residue.

The submitted methodology for furaltadone is based on chromatographic separation and fluorometric determination, which are both nonspecific techniques.

Before receiving reports that furaltadone induced tumors in female rats, FDA had accepted a colorimetric method of analysis for furaltadone, which could detect furaltadone in milk as low as 10 ppb. This method was accepted based on a desk review of recovery data provided by Norwich on the analysis of milk samples to which known amounts of the drug were added (spiked samples). At that time FDA did not require validation trials of methods before acceptance and also did not require evidence that the method satisfactorily recovered the residues when they were naturally incurred through drug treatment (dosed samples).

After FDA received reports of the tumorigenic effects of furaltadone, the drug sponsors were advised in 1969 that their method for determining residues in milk was no longer adequate and that a method capable of determining 0.2 ppb of the drug in milk was required. At a meeting with FDA on January 4, 1971, Norwich representatives stated that they had developed an analytical method for furaltadone (NF–260) in milk capable of detecting 0.2 ppb and had analytical methods for furazolidone (NF–180) in tissue capable of detecting to 2 ppb, which they felt could be adapted to provide acceptable methods for the other nitrofurans.

Both methods were submitted to FDA for evaluation on January 31, 1971. In 1971, the current practice of subjecting potential regulatory methods to validation trials in U.S. Department of Agriculture (USDA) and/or FDA laboratories was in effect.

A discussion of the results on the evaluation of the furazolidone (NF–180) method for tissue analysis is presented in the May 13, 1976 FEDERAL REGISTER notice for furazolidone. In that notice the Director concluded that the methods for edible tissue were not shown to be adequate. No data have been supplied to show that methods of analysis for furazolidone (NF–180) in tissue are adaptable for furaltadone (NF–260). No methods for furaltadone (NF–260) in edible tissues have been provided, except for a method with a claimed lower limit of measurement of 0.1 part per million (ppm), which FDA does not consider to be adequately sensitive.

The method presented by the sponsors for milk in 1971 was a thin layer chromatography (TLC) ultraviolet-based method which the sponsors claimed was capable of detecting 0.2 ppb of furaltadone (NF–260). This method was found deficient in a desk review based on the supporting data supplied by Norwich. Subsequently, a revised procedure using TLC–fluorometry for the determination of furaltadone in milk was submitted to FDA and was accepted for laboratory validation trials on May 26, 1972.

The method presented was not quantitative. Norwich and FDA agreed that any positive reading where a peak was observed at the same R_f value as the furaltadone standard would be taken as indicative of a violative residue. (R_f is defined as the ratio of the distance traveled by the solute to the distance traveled by the mobile phase.)

Two FDA laboratories participated in evaluation of the revised TLC-fluorometric analytical method for furaltadone residues in milk. A total of five replicate analyses were performed in the two laboratories on samples of milk from unmedicated cows before and after fortification by the analyst with 0.2 ppb

V41160 AUG 17 76 UMI

of furaltadone. Before fortification, four control milk samples produced a zero response (one control sample was lost). Recoveries from milk fortified at the 0.2 ppb level were found to be highly variable, ranging from 10 percent to 55 percent. It was concluded, on the basis of these results, that the method was capable of detecting, but not quantitating, the presence of furaltadone in milk at 0.2 ppb.

Norwich was informed of the results of the validation trial in conferences and of the FDA rejection of the assay method for furazolidone (NF–180) in tissue. Norwich was informed that methods for furaltadone (NF–260) in tissue were required and that a confirmatory method was required for both milk and tissue to provide adequate identification of the residue. The inherent lack of specificity of the TLC-fluorometric method of analysis for furaltadone (NF–260) and the increased probability of unpredictable interference from impurities in solvents, reagents, etc., when measuring residues at extremely low levels, combine to make the need for confirmatory tests for furaltadone in milk and tissues especially acute.

In 1974, as part of its annual Drug Experience Report to the Bureau of Veterinary Medicine, Norwich submitted results of a residue depletion study of furaltadone (NF–260) in milk conducted using a modification of the previously submitted analytical method. The modification consisted of the use of a new technique called programmed multiple development (PMD), which should, in theory, improve the results obtained by thin layer chromatography as it is used in the analysis of furaltadone. However, Norwich reported that it had to discontinue use of the PMD technique in this experiment because of the presence of an extraneous blue fluorescing band that overlapped the critical zones and interfered with the measurement of the drug.

The Director concludes that practicable methods of analysis for milk and tissue residues of furaltadone are not available. No adequate methods have been provided for the analysis of tissue, nor have data been submitted to show cause for exemption from the need for control of residues in edible carcass tissues. Appropriate data have not been provided to determine if furaltadone can be used as a marker to control total residues in milk, nor to determine the lower limit of measurement required for a method to assure that total residues do not exceed safe levels. The Director concludes that the method provided by Norwich for the determination of furaltadone in milk at 0.2 ppb is not quantitative and is not specific and, therefore, is not a quantitatively or qualitatively reliable practicable method for regulatory use, even if it were established that measurement of furaltadone at 0.2 ppb was adequate to control total residues. Therefore, step 5 and the requirements of section 512(b)(7) of the act have not been met.

F. *Practical Conditions of Use Cannot be Prescribed on the Label of Products to Assure Safe Use (Step 6).* Section 512(b)(8) of the act requires that conditions of use assure there are no unsafe residues, and section 512(d)(2)(D) of the act adds a further requirement that these conditions be such that they are "reasonably certain to be followed in practice."

Norwich has provided data that demonstrate that furaltadone is present in milk after use of the drug, and the milk must be discarded for a period of time because of the presence of residues. No data have been provided to show if residues occur in tissues or if a withdrawal period following drug use is required for residues in edible tissues to deplete to safe levels.

A withdrawal period is the time following drug treatment when because of residues, a treated animal cannot be slaughtered for food and its milk must be discarded. A withdrawal period must be sufficiently long to assure adequate residue depletion, but it cannot be so long that it is impractical and would not likely be followed in practice. The maximum withdrawal period considered practical for milk is 96 hours or the discard of eight successive milkings.

It is required by FDA that residue depletion studies be conducted for each drug use under simulated field use conditions to develop data for establishing the withdrawal period. An adequate analytical method for residues, preferably the same method that will be approved for regulatory use, must be used to measure the residues in the depletion studies.

For mastitis products, the residue depletion studies in milk should be conducted with normal lactating cows (disease-free) and mastitic cows to determine if the disease state produces a different rate of residue depletion. The drug treatment in the study must be at the maximum dose for the drug use.

A total of 11 studies of the depletion of furaltadone in milk, using a chemical method of analysis for furaltadone, has been presented to FDA.

Three of these studies used methodology with a lower limit of measurement of furaltadone in milk of 1.0 ppm. Several milk samples collected at 32 hours following medication were shown in these studies to contain levels of furaltadone in excess of 1.0 ppm.

Three more studies used chemical methods with a lower limit of measurement of furaltadone in milk of 10 ppb. On the basis of the results from these experiments, FDA required a 36-hour or three-milking discard period for milk from animals medicated with furaltadone as a condition of approval of the NADA's in 1962.

The following five studies were submitted since the approval of the NADA's. In these studies the chemical methods of analysis used are those described in the preceding section, which Norwich claimed were capable of detecting furaltadone as low as 0.2 ppb.

1. NADA 12–738, Vol. 5, Letter from Norwich dated March 15, 1971.

A single lactating cow with mastitis was treated at the label-recommended dose with furaltadone. Milk collected at 24, 36, 48, and 60 hours after medication was reported to contain furaltadone at 11 ppb, 3 ppb, 1 ppb and less than 0.2 ppb at the respective withdrawal periods. The method of analysis used was presumably the TLC ultraviolet-based method that was judged to be inadequate, on the basis of erratic recovery data, in a desk review by FDA. No supporting raw data were presented. No explanation was given of the significantly lower levels of furaltadone observed in 24- and 36-hour milkings from this cow compared to those found in previously reported studies using less sensitive methodology.

2. NADA 12–738, Vol. 5, Project No. 469–02, dated June 22, 1971.

Five healthy lactating cows were treated with Altapen, a product containing procaine penicillin G in addition to furaltadone. The furaltadone dose was identical to that recommended for formulations containing only furaltadone, and the penicillin was shown not to interfere with the analysis of furaltadone. Milk was collected every 12 hours from each cow, and samples were analyzed for furaltadone using the TLC ultraviolet-based method of analysis that was judged to be inadequate, on the basis of erratic recovery data, in a desk review by FDA. Levels of furaltadone in milk were reported by Norwich to fall from a range of 180 ppb to 3,500 ppb in the five 12-hour post-medication samples, to a range of 1.4 ppb to less than 0.2 ppb in the 48-hour samples. Furaltadone in milk was reported by Norwich to be below 0.2 ppb in all five 60-hour milk samples.

3. Project No. 469.02 and 469.11, Special Report, dated October 25, 1971. Hearing Clerk Docket No. FDC–D–283.

Five dry cows were given two injections of Altapen, 5 days apart, into each udder segment. Cows were not milked until they calved—between 1 and 2 months after the second injection. No furaltadone was found in the first (24-hour) post-parturition sample of colostral milk. The method of analysis was the same TLC ultraviolet-based method discussed under study 2 above.

4. Project No. 469.02 and 469.11. Special Report, dated October 29, 1971. Hearing Clerk Docket No. FDC–D–283.

Five lactating cows (disease state unknown) were treated with a preparation containing only furaltadone according to label-recommended directions. Milk samples were collected every 12 hours, beginning 24 hours after the last injection. Three of the five cows produced 48-hour milk samples reported to contain 0.26 to 0.4 ppb of furaltadone. The method of analysis was the TLC ultraviolet-based method discussed under study 2 above.

5. NADA 12–738–34A, Drug Experience Report submitted to FDA November 1975.

This report contains the results of three residue studies of furaltadone in milk following medication of five mastitic cows in each study with a pathogen-free formulation of the product. (The drug is marketed as a sterile formulation.) Norwich used the PMD modification of the TLC fluorometric method of analysis discussed under paragraph E (step 5) of this section.

In the first study, furaltadone at levels ranging from 0.2 ppb to more than 24 ppb was found in the five 108-hour post-medication milk samples. Norwich blamed probable contamination of the collection equipment for these results.

In the second study, the milk samples at 72- or 84-hour withdrawal from all five treated cows were reported to contain less than 0.2 ppb of furaltadone. However, later milkings from three of the five animals were reported to contain 0.4 to 1.6 ppb of furaltadone. Norwich blamed these unusual results on improper sampling techniques.

In the third study the PMD modification of the method subjected to validation in 1971 was used initially, but it was discontinued because of the presence of an extraneous blue fluorescence band that overlapped the critical zones and interfered with the measurement of furaltadone. The study was completed using the TLC fluorometric method that was previously determined by FDA in method trials to be capable of detecting, but not quantitating, furaltadone at 0.2 ppb. Furaltadone was found in one of five 84-hour post-medication milk samples. Furaltadone was not found in the milk collected at 96, 108, and 120 hours following drug treatment.

The Director concludes that all the depletion studies submitted on milk are inadequate for the establishment of a milk discard time that will assure no unsafe residues. His reasons are as follows:

a. Adequate information is not available to determine if measurement of furaltadone can be used to assure adequate depletion of total residues.

b. Adequate information is not available to determine the level of residues that can be deemed safe for human consumption.

c. Data obtained in the various studies on the amount of furaltadone in milk are not consistent. For this reason, FDA cannot rely on results of any one of these experiments to predict the levels of furaltadone that may be present in milk from furaltadone-treated cows.

d. The methods of analysis that are claimed by Norwich to be capable of detecting 0.2 ppb of furaltadone are not quantitative at this level. Results at the limit of detection are of necessity extremely variable by definition. The agency can agree only that any positive reading would indicate the possible presence of furaltadone in a milk sample, but it cannot agree that a reading equivalent to less than 0.2 ppb (or a reading below the average reading obtained with samples fortified at 0.2 ppb) as used by Norwich denotes the absence of furaltadone.

The Director concludes that withdrawal periods are required for the safe use of furaltadone; that for products containing only furaltadone, as the active drug, the officially approved withdrawal period for milk of 36 hours or three-milkings discard is not shown to be adequate; that the currently labeled withdrawal period for milk voluntarily used by the sponsors, i.e., 48 hours or four-milkings discard, has not been shown to be adequate; and that for products containing furaltadone and penicillin, the withdrawal period for milk of 96 hours or eight-milkings discard has not been shown to be adequate in light of new evidence presented since the uses of furaltadone were approved. The Director further concludes that withdrawal periods may be required for dairy cows culled from the herd to assure adequate residue depletion from edible tissues before slaughter. He concludes that adequate information has not been provided to show what withdrawals are required for milk discard or slaughter to assure safe conditions of use for furaltadone, as required by section 512(b)(8) and (d)(2)(D) of the act. The requirements of step 6 have not been fulfilled.

Therefore, the Director is hereby withdrawing the notice of opportunity for hearing issued August 4, 1971, proposing to withdraw approval of NADA's providing for the use of furaltadone in food-producing animals. Under section 512(e)(1)(B) of the act (21 U.S.C. 360b(e)(1)(B), the Director proposes to withdraw approval of certain existing NADA's providing for the use of furaltadone in food-producing animals on the grounds that such use violates section 512 of the act in that such use has not been shown to be safe.

This notice applies to all outstanding NADA's for the use of furaltadone in food-producing animals. All such applications known to FDA are listed below by NADA number and by each applicant's name and last known address in FDA records. Copies of this notice are being forwarded by registered or certified mail to each of the known applicants. Notice to other applicants or holders of NADA's whose identity is not known to FDA is given by this publication.

12–738, 65–059, Eaton Laboratories, Division of Morton-Norwich Products, Inc., P.O. Box 181, Norwich, NY 13815.

14–283, Hess and Clark, Division of Rhodia, Inc., 7th and Orange St., Ashland, OH 44805.

Any holder of an approved application that elects to avail itself of an opportunity for hearing pursuant to section 512(e)(1) of the act and § 514.200 of Chapter I of Title 21 of the Code of Federal Regulations must file with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, a written appearance requesting such hearing by September 16, 1976, giving the reasons why approval of the application should not be withdrawn, and providing a well-organized and full-factual analysis of the scientific and other investigational data such holder is prepared to prove in support of its opposition to the Director's proposal. A request for hearing may not rest upon mere allegations or denials but must set forth specific facts showing that there is one or more genuine and substantial issue(s) of fact requiring a hearing. Responses to this notice and copies of published literature cited in this notice may be seen in the office of the Hearing Clerk, Food and Drug Administration, during regular business hours, Monday through Friday.

If a hearing is requested and is justified by any holder's response to this notice of opportunity for hearing, the issues will be defined, an administrative law judge will be assigned, and a written notice of the time and place at which the hearing will commence will be issued as soon as practicable.

Any hearing on the withdrawal of approval of the foregoing NADA's will be open to the public. If, however, the Director finds that portions of the applications that serve as a basis for such a hearing contain information concerning a method or process that is entitled to protection as a trade secret, the part of the hearing involving such portions will not be public, unless the respondent so specifies.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b)) and under authority delegated to the Commissioner (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.29) (recodification published in the FEDERAL REGISTER of June 16, 1976 (41 FR 24262)).

A discussion of the economic and environmental impact of this action is set forth in the notice of proposed rule making on furaltadone published elsewhere in this issue of the FEDERAL REGISTER.

It is hereby certified that the economic and inflation effects of this proposal have been carefully evaluated in accordance with Executive Order 11821.

Dated: August 6, 1976.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.76-23621 Filed 8-10-76;11:19 am]

[Docket No. 76N–0232]

HESS & CLARK, ET AL.

Nitrofurazone (NF–73); Opportunity for Hearing on Proposal To Withdraw Approval of Certain New Animal Drug Applications

The Director of the Bureau of Veterinary Medicine of the Food and Drug Administration (FDA) is issuing a notice of opportunity for hearing on a proposal to withdraw approval of approved new animal drug applications (NADA's) Nos. 6–395, 6–475, 6–649, 7–801, 8–129, 8–142, 8–324, 8–410, 8–529, 8–784, 9–013, 9–415, 10–741, and 11–154 for the use of nitrofurazone (NF–7) in food-producing animals in accordance with section 512(e)(1)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(e)(1)(B)) (hereinafter, "the act") on the grounds that new evidence not available when the applications were approved, evaluated together with the evidence available at the time of approval, shows that nitro-

V41160
AUG 17 76
UMI

furazone is not shown to be safe for use under either the approved or currently labeled conditions of use. Holders of approved NADA's have until September 16, 1976 to submit requests for a hearing in accordance with § 514.200 (21 CFR 514.-200).

In FR Doc. 76-23620 appearing elsewhere in this issue of the FEDERAL REGISTER, the Director is issuing a notice of proposed rulemaking to revoke the appropriate provisions of sections affected by the proposed withdrawal.

Nitrofurazone (NF-7) is a member of a class of chemicals called "nitrofurans," which are used at low levels in animal feed as antibacterial and antiprotozoan agents to increase resistance to disease, thereby assisting growth. Nitrofurans also have prescribed therapeutic uses. In addition to nitrofurazone (NF-7), which is the subject of this notice, there are three other nitrofurans that are used in food-producing animals and are or have been subject to agency action: nihydrazone (NF-64) and furaltadone (NF-260), which are subjects of companion notices in this issue of the FEDERAL REGISTER; and furazolidone (NF-180), which was the subject of notices in the FEDERAL REGISTER of May 13, 1976 (41 FR 19906, 19907). A fifth nitrofuran, furamazone (NF-84), is not at this time the subject of contemplated agency action for withdrawal.

Nitrofurazone (NF-7), approved in 1948, was the first nitrofuran approved by FDA for use in food-producing animals. It is currently approved for use in mastitis products for dairy cattle (dry cow treatment only); for the treatment of genital tract infections in large female animals; for prevention and treatment of surface bacterial infections (all animals); as a medication in feed for swine for the treatment of infectious necrotic enteritis caused by *Salmonella choleraesuis;* for chickens and turkeys for the prevention and control of cecal and intestinal coccidiosis; and for chickens for the prevention of pullorum.

The original applications were approved without a requirement that the drug treatment be discontinued for a specified period of time before the slaughter of the animals. However, two of the sponsors, Norwich Pharmacal Co., Division of Morton-Norwich Products, Inc., and Hess & Clark, currently a Division of Rhodia, Inc., voluntarily revised the labels in 1971 to require that swine, turkeys, and chickens be withdrawn from nitrofurazone (NF-7) 5 days before slaughter.

The Food and Drug Administration issued a notice of opportunity for hearing, published in the FEDERAL REGISTER of March 31, 1971 (36 FR 5927), proposing to withdraw approval of NADA's for nitrofurazone (NF-7) on grounds that:

Information available to the Commissioner establishes that the drugs, when administered to laboratory animals, have been shown to produce tumors. The drugs are, therefore, not considered to be safe for use in the absence of appropriately sensitive methods of analysis to establish their absence in food derived from treated animals.

Similar notices were published for nihydrazone (NF-64) in the FEDERAL REGISTER of March 31, 1971 (36 FR 5926) and for a hearing. Norwich assured FDA that done (NF-260) on August 4, 1971 (36 FR 14343). The history leading to the publication of these 1971 notices is discussed in the May 13, 1976 notice for furazolidone (NF-180).

Norwich and Hess & Clark responded to the March 31, 1971 notice concerning nitrofurazone (NF-7) by filing requests for a hearing. Norwich assured FDA that it had adequate methods of analysis to determine residues and adequate data to show that under the currently labeled conditions of use, the drugs were safe. In addition, Norwich set forth a hypothesis that nitrofurans were not primary tumorigens but stimulated spontaneous tumor growth by disrupting the normal hormone balance.

In response to the March 31, 1971 notice, Pharm-House, Inc. submitted a method for the determination of nitrofurazone (NF-7) in milk, which it indicated could detect nitrofurazone at levels down to 2 parts per billion (ppb).

Norwich has continued to submit data pertaining to the use of nitrofurazone (NF-7) in food-producing animals. The Food and Drug Administration has determined that new evidence, evaluated together with the evidence available when the approvals were granted, fails to demonstrate that either the approved or currently labeled uses of nitrofurazone are shown to be safe. The Director is withdrawing the March 31, 1971 notice of opportunity for hearing concerning nitrofurazone (NF-7), and is issuing this new notice, which presents in detail all of the evidence now available to him and the basis on which he proposes to withdraw approval of all uses of nitrofurazone in food-producing animals in accordance with section 512(e)(1)(B) of the act.

Section 512(e)(1)(B) of the act requires that FDA withdraw approval of an NADA when "new evidence • • • evaluated together with the evidence available • • • when the application was approved, shows that such drug is not shown to be safe • • •." Under this provision, the new evidence and the evidence submitted at the time the application was approved must be evaluated to determine whether all of the requirements for safety contained in section 512 of the act continue to be fulfilled.

THE DETERMINATION OF "SAFETY" IN SECTION 512

Section 512 of the act requires that the use(s) of a new drug in food-producing animals must be supported by adequate data supplied by the sponsor in applications that include, among other things, demonstration that the drug use will not result in unsafe residues in human food.

Under section 512(b) of the act, whenever a drug use may result in residues of the drug in food, an application must include not only full reports of investigations to show that the use of the drug is safe, but also a description of practicable methods for monitoring food to assure there are no unsafe residues in human food attributable to the drug use, and demonstration that the conditions of use are adequate to assure there are no unsafe residues.

Under section 512(d)(2) of the act, FDA is required, in the evaluation of the supporting safety data, to consider, among other things:

1. The probable consumption of such drug and of any substance formed in or on food because of the use of such drug (i.e., probable human consumption of residues, including the parent drug and metabolites).

2. The cumulative effect on man or animal of such drug, taking into account any chemically or pharmacologically related substance, i.e, toxicological effects of the compounds comprising the residues.

3. Safety factors that, in the opinion of experts qualified by scientific training and experience to evaluate the safety of such drugs, are appropriate for the use of animal experimentation data (i.e., establishing "safe" levels of residues using appropriate safety factors to extrapolate animal data on cumulative effects to humans).

Under section 512(d)(1)(H) of the act, additional requirements must be met if the drug is a carcinogen.

The determination of safety within the meaning of section 512 of the act for a drug whose use may result in residues in the edible products of the treated animal, whether or not the drug is a carcinogen, requires a multistep process. These steps form an orderly procedure by which information is derived to satisfy each of the three considerations stated above.

Step 1. Assessment of the total residues in edible products and the depletion of those residues with time following cessation of drug treatment in order to determine probable human consumption (section 512(b)(1) and (d)(2)(A) of the act).

Step 2. Assessment of information about the residues to determine the appropriate testing in laboratory animals required to estimate the cumulative effects of human exposure to the residues (section 512(b)(1) and (d)(2)(A) of the act).

Step 3. Acquisition of dose-response data in test animals to determine the cumulative effects of dietary exposure to the residue compounds from which the maximum acceptable concentration of residues in food can be established using appropriate safety factors to assure that human exposure to residues in the total diet does not exceed a level deemed safe (section 512(b)(1), and (d)(2)(B) and (C) of the act). In the case of a carcinogenic drug, a conservative statistical extrapolation of the tumor data is used to estimate a level of residue exposure that could be considered insignificant and poses essentially no risk of cancer and operationally defines "no residue" for purposes of computing the residue assay requirements under section 512(d)(1)(H) of the act.

Step 4. Acquisition of information about the residues to (1) determine the tissue (called the target tissue) from which residues require the longest time to deplete to safe levels and which, therefore, must be monitored by the regulatory assay (step 5), and (2) determine the compound (called the marker) that is to be measured in the regulatory assay so that by its measurement there is assurance that no unsafe residues occur from the use of the drug (section 512(b)(7) of the act).

Step 5. Development of a practicable method of analysis that can measure the marker in the target tissue at a concentration that assures that total residues in the daily diet of humans do not exceed the level established in step 3 as safe (section 512(b)(7) of the act).

Step 6. Demonstration that practical conditions of use can be prescribed on the label of the product to assure there will be no unsafe residues in the food products from treated animals (section 512(b)(8) and (d)(2)(D) of the act).

Each of the steps involves principles that are essential for a determination of food safety and compliance with the requirements of the act to assure there are no unsafe residues in human food from the animal drug use. Each step builds upon the preceding step. Therefore, failure to accomplish any one of the six steps in whole or in part for any drug will ordinarily preclude a sponsor's fulfilling its obligation under the act to determine probable consumption of residues and cumulative effects of exposure, and to establish safe conditions of use with appropriate regulatory methods of analysis to control residues when deemed necessary.

New evidence concerning nitrofurazone (NF-7) not available when the applications were approved includes, among other things, a demonstration that nitrofurazone induces mammary tumors in female rats. The Director has evaluated all the data now available, including the new data received since 1948 when the uses for nitrofurazone (NF-7) were first approved, and the data available to FDA at the time of approval, and has concluded that the approval of NADA's for nitrofurazone (NF-7) must be withdrawn under section 512(e)(1)(B) of the act because:

1. Adequate investigations have not been provided to show that the uses of nitrofurazone are safe, as required by section 512(b)(1) of the act. Adequate information has not been provided on the probable consumption of residues, and the cumulative effects of exposure have not been determined by appropriate tests, as required by section 512(d)(2)(A) and (B) of the act. Therefore, "safe" levels of residue cannot be determined using appropriate safety factors, as required by section 512(d)(2)(C) of the act.

2. Adequate, reliable, and practicable methods of analysis are not available for monitoring food to assure there are no unsafe residues in edible tissues and milk that are attributable to the use of nitrofurazone, as required by section 512(b)(7) of the act.

3. Practical conditions of use cannot be specified in the labeling to assure there are no unsafe residues attributable to the use of nitrofurazone, as required by section 512(b)(8) and (d)(2)(D) of the act.

The data on which these conclusions are based are presented in the succeeding sections of this notice. The Director first describes all the relevant new evidence bearing on the determination of safety for the uses of nitrofurazone. Then he evaluates all the evidence before him using the six-step procedure necessary to satisfy a human safety determination for the use of nitrofurazone (NF-7) and to meet the considerations required in section 512 of the act.

I. NEW EVIDENCE

In In October 1966 and in January 1967, Norwich submitted reports of the effect in rats of feeding diets containing nitrofurans for 45 weeks. These studies included tests on nitrofurazone (NF-7) and furazolidone (NF-180). In these studies it was shown that both nitrofurazone (NF-7) and furazolidone (NF-180) induced mammary tumors of similar type in female rats.

Subsequently, more extensive, longer term testing of furazolidone (NF-180) was conducted, but further testing of the carcinogenic potential of nitrofurazone (NF-7) has not been undertaken. The more extensive testing of furazolidone (NF-180), as described in the May 13, 1976 FEDERAL REGISTER, shows that the drug induces cancer in both rats and mice and that the tumors and cancers were not limited to the mammary gland or the endocrine tissues of female rats.

The Director is including in this notice information available on the toxicological properties of furazolidone (NF-180) as well as introfurazone (NF-7) because of the structural similarities of the drugs and their similar biological properties, which have been observed in the limited comparative data available. The new evidence showing that furazolidone (NF-180) is a carcinogen has a significant bearing on the Director's conclusions that the uses of nitrofurazone (NF-7) are not shown to be safe.

Although it is appropriate to consider data on furazolidone (NF-180) to judge the adequacy of existing data to support the safe use of nitrofurazone (NF-7) in food-producing animals, these data are not a substitute for data on nitrofurazone (NF-7) that are required by the statute. Basic data are required for each drug, recognizing that slight differences in chemical structure can result in significant differences in metabolism, residues, and toxicity. Although comparative data or the biochemical and toxicological properties of related drugs may be useful and appropriate in making decisions about the degree of testing required for each drug to show there is no probable hazard, these data cannot be used as a substitute for the basic information necessary on each drug to determine the probable exposure to residues and cumulative effects of exposure.

A. *Carcinogenic Potential of Nitrofurazone.* Norwich submitted data in October 1966 and January 1967 on the cumulative effects in rats of feeding diets containing nitrofurazone (NF-7) for 45 weeks ("Effects of Long Term Feeding of Various Nitrofurans," October 13, 1966 and January 4, 1967, Project No. 440.07, submitted to FDA as part of a June 2, 1967 Drug Experience Report). These studies include testing in female Sprague-Dawley (Holtzman strain) rats and testing in both male and female Carworth Farms (CFE strain) rats.

1. The Sprague-Dawley Female Rat Study: Seventy female Sprague-Dawley rats (Holtzman strain) were equally divided into two groups that were fed nitrofurazone at about 0.1 percent (55 milligrams per kilogram (mg/kg) body weight per day) and about 0.05 percent (28 mg/kg body weight per day) respectively in their diet for 45 weeks, followed by maintenance on an unmedicated diet for an additional 8 weeks before sacrifice. A comparable control group of female rats was maintained on a nitrofurazone-free diet for 53 weeks. At termination of the study the animals were autopsied, and tissues were examined for histopathological lesions.

The most prominent drug-related effect was the induction of tumors in the mammary glands of the female rats. Although rats develop mammary tumors spontaneously as they age, the incidence of spontaneous mammary tumors in rats just over 1 year old, depending upon the strain of rat used, can be quite low. The nitrofurazone-treated female rats had an increased number of mammary tumors, particularly the number of fibroadenomas, as compared with the control rats. The development of tumors included the finding of some mammary adenocarcinoma (cancer).

Norwich reported that no mammary tumors of any type were observed in the 33 control rats examined. It reported from hispopathological examination that a total of 19 mammary tumors were observed in 13 of the 30 rats examined that were fed nitrofurazone at 0.1 percent in the diet. In the 0.05 percent dose group a total of 18 mammary tumors were found by Norwich in 12 of the 33 rats examined for histopathology. Norwich did not report any of adenocarcinoma in either the 0.1 percent or 0.05 percent dose groups.

An Ad Hoc Committee was established to review the pathology data on all the nitrofurans tested in the Sprague-Dawley rat study and the Carworth Farms rat study. One member of the Ad Hoc Committee was the director of the Eppley Institute for Research in Cancer, University of Nebraska. He and his associate pathologists reviewed the pathology slides of the mammary tissues from the nitrofurazone-treated rats provided by Norwich and submitted a detailed report to FDA. They did not review all the mammary gland slides from the control rats.

V41160 AUG 17 76 UMI

Each of the reviewed slides had a rat identification number, and there were several slides for each rat. However, there was no information on the number of tumors in each rat. Therefore, it was not possible, in many cases, for the pathologists to determine which slides represented different tumors in the same rat and which were different sections of a single tumor.

The Eppley pathologists concluded from their review of the 0.1 percent dose group rats that 14 of the 30 nitrofurazone-treated female rats examined had mammary tumors that were predominantly fibroadenomas and that 4 of these rats had mammary adenocarcinoma.

From their examination of the 0.05 percent nitrofurazone dose group, they found mammary tumors in 12 out of the 33 rats examined. This included the finding of mammary adenocarcinoma in one rat. The remainder of the tumors in this dose group were fibroadenomas.

Because the Norwich report did not indicate which rats had tumors, it is not possible from the data available to determine if the tumors reported by the Eppley pathologists were from the same rats in which Norwich had reported tumors. The Eppley pathologists reported mammary adenocarcinoma in the nitrofurazone-treated rats, whereas the Norwich report shows no nitrofurazone-treated rats had mammary adenocarcinoma. However, because the Eppley pathologists did not review all the mammary gland slides from the control rats, a comparative incidence of mammary cancer cannot be determined from the reports.

A pathologist from the Bureau of Foods of FDA, who was not a member of the Ad Hoc Committee, later reviewed the pathology slides of the mammary tumors from the nitrofurazone-treated rats in which the Eppley pathologists had reported mammary tumors. From his examination of the histopathological preparations provided, he reported for the 0.1 percent dose group, 15 slides of mammary fibroadenoma from 10 rats and 4 slides of mammary adenocarcinoma from 3 rats. The mammary adenocarcinomas were diagnosed in the same three rats in which the Eppley pathologists had diagnosed mammary adenocarcinoma. The Bureau of Foods pathologist did not have any slides from the fourth rat in which the Eppley pathologist had found adenocarcinoma. In the 0.05 percent dose group, the Bureau of Foods pathologist reported histopathological preparations of mammary tumors from 12 rats. These included 5 slides of adenoma, 13 slides of fibroadenoma, and 1 slide of adenocarcinoma. The mammary adenocarcinoma was in the same rat in which the Eppley pathologists had diagnosed mammary adenocarcinoma.

The Bureau of Foods pathologist also did not have information indicating which slides were multiple sections of single tumors or which represented different tumors. He did have information on the rat identification number for each set of slides. Because the Bureau of Foods pathologist did not review all the slides in the study, tumor incidence and the comparison of incidence with the control rats cannot be determined from his report. However, his report supports the Eppley pathologists' findings that mammary tumors were found in at least 13 of the rats in the 0.1 percent nitrofurazone-treated group and in at least 12 of the rats in the 0.05 percent nitrofurazone-treated group. It also confirms that mammary adenocarcinoma was found in at least three rats in the 0.1 percent nitrofurazone-treated group and in one rat in the 0.05 percent nitrofurazone-treated group.

2. The Carworth Farms Rat Study: Nitrofurazone (NF–7) was fed to 20 male and 20 female Carworth Farms (CFE strain) rats at about 0.1 percent in the diet (50 mg/kg body weight per day) for 45 weeks, followed by maintenance on an unmedicated diet for an additional 7 weeks before sacrifice. A comparable control group of rats was maintained on a nitrofurazone-free diet for 52 weeks. At termination of the study the animals were autopsied, and the tissues were examined for the histopathological lesions.

As in the previous Sprague-Dawley rat study, the most prominent drug-related effect seen was the induction of tumors in the mammary glands of the female rats. This included an increase in the number of mammary fibroadenomas and the finding of some adenocarcinomas.

Norwich reported that no tumors were observed in the 15 female control and 18 male control rats examined. Norwich reported from histopathological examination that 11 out of 19 nitrofurazone-treated female rats examined had a total of 28 mammary tumors. No mammary tumors were reported in the male rats treated with nitrofurazone. Norwich reported 3 mammary adenocarcinomas among the 28 mammary tumors found in the nitrofurazone-treated female rats but did not specify whether these adenocarcinomas were seen in 3 different rats or whether some of these were multiple tumors in the same rat.

The Eppley pathologists reviewed the slides of the mammary tissues from the 19 nitrofurazone-treated rats provided by Norwich. They also concluded that 11 of the nitrofurazone-treated female rats had mammary tumors. However, from the slides reviewed they found only one rat with mammary adenocarcinomas. It is not known if the Eppley pathologists had all the slides that Norwich had diagnosed as mammary adenocarcinoma.

Slides of the mammary tumors reported by the Eppley pathologists were later reviewed by the Bureau of Foods pathologist. He reported mammary tumors in each of the 11 female rats. From his examination of the histopathological preparations provided, he reported 9 slides of mammary adenoma, 1 slide of mammary fibroma, 19 slides of mammary fibroadenoma, and 1 slide of mammary adenocarcinoma. The adenocarcinoma was in the same rat in which the Eppley pathologist had reported a mammary adenocarcinoma.

Because Norwich did not report the number of rats in which mammary adenocarcinoma was found, and because the Eppley and Bureau of Foods reviewing pathologists did not receive mammary tissue slides from control rats, and because the Bureau of Foods pathologist did not review slides from all of the treated rats, and because there is some question about whether the Eppley pathologists received all the mammary tissue slides of the treated rats, the incidence of mammary cancer cannot be determined from the available reports. However, the Eppley and Bureau of Foods reviewing pathologists did concur in the finding of mammary tumors in 11 rats and mammary adenocarcinoma in at least 1 nitrofurazone-treated female rat from the study.

Food and Drug Administration scientists recognize that there are uncertainties and limitations in the examination of tumors to determine if they have malignant potential. For example, in the early stages of a mammary tumor growth, the mass may be chiefly adenomatous. As the growth continues, the supporting white fibrous connective may also begin to proliferate, resulting in a fibroadenoma. Later the adenomatous part of the neoplastic mass may entirely disappear, leaving a fibroma. Finally, a part of the adenoma or fibroadenoma may develop malignant tendencies and that portion may then become an adenocarcinoma. All four tumor types, i.e., adenoma, fibroadenoma, fibroma, and adenocarcinoma may be present in the same tumor mass. A small focus of adenocarcinoma in the early stage of a malignant tumor may be overlooked in the tumor growth unless adequate multiple sections of the tumor are made.

Also, unless great care is exercised in the evaluation of the spread of an adenocarcinoma of the mammary gland, the metastasis along the lymphatic routes passing through, under, or near other mammary glands may be considered to be separate primary adenocaricinomas rather than a single primary growth with multiple metastases.

The reports from Norwich indicate that nitrofurazone (NF–7) caused an induction of mammary tumors in female rats just over 1 year old and that there is an indication of an increase in the number of mammary adenocarcinomas compared with control rats.

Erturk et al. (*Cancer Research*, 30:1409–1412, 1970) transplanted mammary fibroadenomas from female Holtzman rats orally treated with nitrofurazone into male and female newborn Holtzman rats. They reported increased anaplasia pleomorphism and mitotic activity in the rats into which the tumors had been transplanted. One of the tumors developed into an adenocarcinoma. The transplantability of rat mammary fibroadenomas and their conversion to malignant tumors has been considered by some eminent pathologists as one criterion of cancer (H. L. Stewart et al., "Atlas of Tumor Pathology," Sec. XII, Fascicle 40, pp. 249–297, Washington, DC, Armed Forces Institute of Pathology, 1959).

Food and Drug Administration scientists conclude that the above studies show that nitrofurazone is tumorigenic in rats and that the data raise questions about the carcinogenic potential and potency of nitrofurazone. They conclude that none of the studies is adequate to assess the cumulative effects of exposure to nitrofurazone and its carcinogenic potential and potency because the studies were not of sufficient duration, and the number of animals used was not sufficient. In the Sprague-Dawley rat study only female animals were used; so it is not possible to determine whether nitrofurazone might have produced effects in the male rats. In the Carworth Farms rat study, the number of males was too small to determine with any confidence that nitrofurazone did not have an adverse effect. In both studies, drug treatment was for only 45 weeks. In spite of the weaknesses in the reports available, it is evident that a 45-week treatment was sufficient to induce tumors in female rats, and that some of these tumors were mammary cancers. The dose level, frequency, and duration of exposure to a compound are related not only to whether or not cancer is induced, but also to the latency period before the expression of cancer. Therefore, the 45-week treatment with nitrofurazone is not considered a sufficient period of exposure to determine adequately the cancer potential or potency.

The Director concludes that the available data provide sufficient cause for concern that nitrofurazone may be a carcinogen and that adequate lifetime testing in appropriate animal species is required to evaluate its carcinogenic potential and potency. The Director concludes that because nitrofurazone is a tumorigen, dose-response data in lifetime studies, using several dose levels, are necessary to determine the information required to assess the cumulative effects of exposure and to establish conditions of safe use. Although the demonstration of cancer induction may be made on the basis of testing at only one dose level, and it may be possible from the results of this testing to conclude that a drug requires regulation under the provisions of section 512(d)(1)(H) of the act, dose-response data are necessary to provide information from which FDA can establish the operational definition of "no residue" for purposes of determining the required conditions for the regulatory assay for residues of a carcinogenic drug. Regardless of whether adequate testing were to show that nitrofurazone induced cancer or induced only benign tumors, dose-response information would be required to establish the condition of safe use.

The Norwich data from these studies were available at the time FDA issued the March 31, 1971 FEDERAL REGISTER notice of opportunity for hearing on the proposed withdrawal of approvals for nitrofurazone (NF–7). In response to the March 31, 1971 notice, Norwich stated that all four nitrofurans (NF–7, NF–64, NF–180, and NF–260) cause an early development of mammary tumors that were of the type normally found in aging rats, and it postulated that the nitrofurans caused these tumors only at high levels of exposure in the female rats because of disruption in the hormonal system. Norwich presented data purporting to show that the hormonal disruption resulting in the tumors involved a process not applicable to humans, and that the proposed methods of analysis for control of residues were more than adequate to assure that levels of residues were below any level that might adversely affect humans.

The Norwich hormonal hypothesis is described in detail in the May 13, 1976 FEDERAL REGISTER notice on a furazolidone (NF–180). The supporting information provided by Norwich for the hypothesis was primarily limited to data on furazolidone (NF–180) and some very limited comparative data on nitrofurazone (NF–7).

B. *Comparative Data on Nitrofurazone and Furazolidone.* Norwich has provided data on furazolidone (NF–180) from the Sprague-Dawley female rat study and the Carworth Farms rat study. It has also supplied data on testing on furazolidone (NF–180) in three chronic rat studies and one mouse study; the tests are described in the May 13, 1976 FEDERAL REGISTER notice. The data have a bearing on the Director's proposed action in this notice for nitrofurazone (NF–7) and his decision to reject the Norwich hormonal hypothesis for nitrofurazone (NF–7) and furazolidone (NF–180). They also have a bearing on his decision to reject the sponsors' claims that adequate studies have been provided for nitrofurazone (NF–7) to support a determination that the drug uses are shown to be safe.

In the Sprague-Dawley female rat study and Carworth Farms rat study, furazolidone (NF–180) was also tested in the protocols using a dietary level of about 0.1 percent.

In the first study, Norwich reported that 14 of the furazolidone-treated Sprague-Dawley female rats out of 32 rats examined had mammary tumors. Norwich reported a total of 37 mammary tumors, including 5 mammary adenocarcinomas, but did not designate in how many rats or in which rats the adenocarcinomas were found. The Eppley pathologists reviewed the mammary tissue slides from the 32 furazolidone (NF–180)-treated female rats and reported mammary tumors in 14 of the rats. The Bureau of Foods pathologist, who later examined only the slides from the 14 rats reported to have mammary tumors by the Eppley pathologists, confirmed the presence of mammary tumors in the 14 rats. Both the Eppley and Bureau of Foods pathologists reported only one mammary adenocarcinoma and one mammary squamous cell carcinoma, each in a different rat, from the slides they had examined of the furazolidone (NF–180)-treated rats. From these results it appears that both furazolidone (NF–180) and nitrofurazone (NF–7) at 0.1 percent in the diet had about the same effect on the incidence of rats that developed mammary tumors. However, Norwich reported that furazolidone (NF–180) caused a greater increase in the number of multiple mammary tumors that developed. From the reviewing pathologists' reports it appears that there were slightly more female rats treated with nitrofurazone (NF–7) that developed mammary adenocarcinomas that were found in the rats treated with furazolidone (NF–180). The results reported by Norwich contradict this finding on malignancies.

In the Carworth Farms rat study, 15 of the furazolidone (NF–180)-treated female rats out of 17 examined were reported by Norwich as having mammary tumors. In comparison, Norwich had reported that 11 of the nitrofurazone (NF–7)-treated female rats out of 19 examined had mammary tumors. In the furazolidone (NF–180) study the total number of tumors reported by Norwich in the furazolidone (NF–180)-treated female rats was greater than twice the number found for the nitrofurazone (NF–7)-treated female rats. Norwich reported finding two mammary adenocarcinomas in the furazolidone (NF–180)-treated female rats, but it did not specify whether these were in one or two rats. The Eppley pathologists also reported finding two mammary adenocarcinomas in two rats, and these same findings were made by the Bureau of Foods pathologist who reviewed only the slides from rats in which tumors were reported by the Eppley pathologists. In addition, the Bureau of Foods pathologist reported mammary adenocarcinoma of low-grade malignancy in two additional rats. Tumors from these two additional rats had been diagnosed as fibroadenoma by the Eppley pathologists. The numer of mammary malignancies reported for rats treated with nitrofurazone (NF–7) and furazolidone (NF–180) are comparatively small in both cases, and no meaningful conclusions can be drawn about the relative carcinogenic potentials of the two drugs. It is evident from the reviewing pathologists' reports that the predominant number of tumors found in the furazolidone (NF–180)-treated female rats were fibroadenomas, as was also seen in the nitrofurazone (NF–7)-treated rats.

Based on these comparative data, the Director concludes that furazolidone (NF–180) and nitrofurazone (NF–7) qualitatively exhibit similar tumorigenic effects in female rats. Because the studies are not adequate to assess the cumulative effects of exposure and carcinogenic potential and potency, the data are not sufficient for a precise comparison of the tumorigenic potencies. The Director, therefore, concludes that although the limited data give some indication that nitrofurazone (NF–7) may be a less potent tumorigen than furazolidone (NF–180), adequate testing of nitrofurazone (NF–7) in lifetime studies in appropriate animal species with the development of dose-response data from the administration of nitrofurazone at

V41160 AUG 17 76 UMI

several dose levels would be required to determine adequately the carcinogenic potential of nitrofurazone (NF–7).

More definitive studies of the carcinogenic potential of furazolidone (NF–180) in male and female rats and mice provided by Norwich are described in the May 13, 1976 FEDERAL REGISTER notice. A summary of the findings from the three chronic rat studies and the mouse study include the following:

1. Furazolidone induced malignancies in both rats and mice.

2. Furazolidone also induced nonmalignant tumors.

3. In most cases, the induced malignant and nonmalignant tumors were found at the same sites.

4. There is some evidence that the induction of benign tumors is related to the induction of, or progression to, malignancies as a function of dose.

5. There are marked sex differences in the tumor responses in the rats. There are also some commonalities in the tumor sites of the male and female rats.

6. Mammary tumors were the predominant effect in the female rats.

7. Nonmammary tumors were induced in the Sprague-Dawley male rats, with no one type singularly significant. In the Fisher rats, however, several specific nonmammary tumors were induced in both male and female rats.

8. The major target site for tumors in the mouse was the lung. There was no evidence of a significant difference between male and female mice in tumor response, and there were no tumorigenic effects in the endocrine tissues.

9. The induction of tumors involved not only increased incidence of animals with tumors but also an increased number of tumors per animal.

The Director has rejected the data supplied by Norwich to support the hormonal hypothesis for furazolidone (NF–180). A discussion of these data and his basis for rejection are also presented in the May 13, 1976 FEDERAL REGISTER notice. The Director also rejects the Norwich reply to the 1971 FEDERAL REGISTER notice on nitrofurazone (NF–7) attempting to explain the tumorigenic effects of nitrofurazone primarily on the basis of the furazolidone (NF–180) data relative to the hormonal hypothesis. The Director finds that the new evidence provided by the more extensive chronic testing data for furazolidone (NF–180), which shows that tumors were induced in both male and female rats and mice and were not limited to tumors of the mammary gland or the endocrine tissues, is inconsistent with the hormonal hypothesis.

Therefore, the Director concludes that the comparative data available on furazolidone (NF–180) and nitrofurazone (NF–7) in the Sprague-Dawley female rat study and the Carworth Farms rat study, together with the data on the four chronic studies of furazolidone (NF–180) in rats and mice, indicate that adequate testing of nitrofurazone (NF–7) has not been provided to assess the cumulative effects of exposure necessary for a determination of safety.

II. USES OF NITROFURAZONE ARE NOT SHOWN TO BE SAFE

To assess the safety of residues using criteria described in section 512(b) of the act and elaborated on in section 512(d)(2) of the act requires a multistep process that must take into account consideration of the metabolism of the drug, determination of the resulting residues, including parent drug and the metabolites, depletion of those residues with time after drug treatment, and the cumulative effect of human ingestion of the residues. The six basic steps involved in this evaluation process have been described previously in this notice.

A. *The Amount of Total Residue in the Edible Products and the Depletion of Residues with Time Has Not Been Determined (Step 1).* When a drug is administered to an animal, the drug may be altered by the animal into a variety of compounds called metabolites. The process of alteration may be such that little residue of the parent drug remains in the animal tissue, but the amount of metabolites may be substantial. Therefore, the total residue with which FDA is concerned includes both the parent drug and the metabolites.

The nature and amount of each of the residues depend in part upon the metabolism in a particular species. Because there are species differences in metabolism, it is necessary to determine metabolism and residues in each of the species for which the drug is used. Therefore, § 514.1(b)(7)(i) (21 CFR 514.1(b)(7)(i)) includes metabolism and residue depletion studies among those kinds of studies that are used to determine residues.

Exposure to nitrofurazone in the diet induced mammary tumors in female rats. It is not known whether the parent drug was the active agent or whether the responses were due to one or more active metabolites produced as a result of ingestion of the parent drug by the rats. Such lack of knowledge is not unique to nitrofurazone; it is typical of many tumorigenic and carcinogenic agents that the mechanism of the induction of tumors or the identification of the active agent is not known. Therefore, when considering the safety of food from nitrofurazone-treated animals, all drug-related residues to which humans may be exposed must be assumed to be potentially carcinogenic unless convincing evidence is presented to the contrary. Such evidence consists of not only the identification of the residues that are claimed to be safe, but also adequate toxicological studies showing that the levels of each of the residues claimed to be safe are in fact safe. All residues not identified or not shown to be safe must be considered potentially carcinogenic and must be required to be below a level of measurement that can be considered insignificant and to pose essentially no risk of cancer in humans.

The use of chemical assays to determine initially the total residues would require knowledge about what residues occur (parent drug and metabolites) and would require the availability of adequate methods of analysis to measure each one of the residues at the level of interest in the edible tissues. Therefore, this chemical approach is usually not feasible. Instead, a radiolabeled parent drug is used to provide a practical and adequate approach to the initial measurement of total residues in the edible tissues. In this approach, the drug is synthesized with a radioisotope so that when the drug is administered to the test animal according to label directions, all resulting residues of potential interest can be measured in the edible products. This is accomplished by counting the radioactivity in the tissues and converting these measurements to an estimation of the amount of residue expressed as parent drug equivalents.

No data have been provided by the sponsors to measure total residues in edible tissues and in milk from nitrofurazone-treated animals. Similarly no data have been provided to characterize the residues occurring in the edible products. It has been shown that nitrofurazone is found as a residue in edible tissues after drug treatment, as will be described below in step 6 (paragraph F. of this section), but it has not been shown what proportion of the total residue is the parent drug.

Although no data of any type have been supplied on the metabolism of nitrofurazone in any of the animals of intended use, some limited information has been provided on nitrofurazone in published studies of the absorption, distribution, and metabolism of nitrofurazone, primarily in rats:

1. Paul, M. F. et al., "Studies on Distribution and Excretion of Certain Nitrofurans," Antibiotics and Chemotherapy, 10:287–302, 1960. The authors reported that only 4.6 percent of an administered dose of nitrofurazone was recovered as unchanged nitrofurazone in rat urine, and 0.5 percent in feces. From the report it is evident that nitrofurazone is absorbed and rapidly metabolized before elimination.

2. Paul, H. E. et al., "Metabolic Degradation of Nitrofurans," Journal of Medicinal and Pharmaceutical Chemistry, 2:563, 1960. The report described in vitro studies where nitrofurazone was added to rat tissue homogenates. After a period of incubation, extracts were analyzed by ultraviolet (uv) spectroscopy. The resulting UV spectra were compared with (1) spectra from nitrofurazone that had been subjected to chemical reduction of the nitro-group to an amine, and (2) nitrofurazone that had been subjected to action by certain reductive enzyme systems. The authors report that the three uv spectra were similar, indicating that nitrofurazone metabolism in the rat appears to include a reductive pathway.

Data from these two studies reinforce the Director's conclusion that consideration must be given to metabolism in the animal of intended drug use to assess the residues and their significance as contaminants in food.

Data on the metabolism of another nitrofuran, nihydrazone (NF–64), in chickens have been submitted by Norwich. However, these data cannot be accepted as a substitute for metabolism data on nitrofurazone in chickens or the other animals for which the drug is approved because the metabolism of each compound may differ in each of the animal species.

Because no relevant data have been submitted on the metabolism and total residue depletion of nitrofurazone, the Director concludes that he cannot determine the amount of total residue and its depletion with time in the edible products for any of the approved uses of nitrofurazone. Therefore, the first step necessary to estimate probable consumption of residues, which is a required consideration of section 512(d)(2)(A) of the act, has not been fulfilled.

B. *Sufficient Information Has Not Been Provided about the Residues to Determine the Appropriate Testing Required in Laboratory Animals to Estimate the Cumulative Effects of Human Exposure to the Residues (Step 2).* The composition of a drug's residue may vary from the extremes of less than 1 percent parent drug and more than 99 percent metabolites to less than 1 percent metabolites and more than 99 percent parent drug, though the latter case would be rare. The Food and Drug Administration must assess the toxicity of the total residue because this is what man will be exposed to in food. This assessment would be based ideally on the identification of each of the metabolites in the residue, their synthesis, and subsequent testing of the parent drug and all the metabolites for the cumulative effects of exposure. However, this approach is usually impractical.

Various approaches are available to limit the number of residue compounds for which toxicity testing is required to provide a sufficiently conservative estimate of the toxicity of the total residue. However, Norwich has not presented any quantitative or qualitative information about the total residues of nitrofurazone in the edible tissues or milk.

Therefore, the Director concludes that not only is the toxicological testing provided for nitrofurazone inadequate, but he is unable to determine whether testing of metabolites in addition to the parent drug is required to determine the safe level of human exposure to residues in food. Step 2 has not been fulfilled; therefore, the requirements for step 3 cannot be fully determined.

C. *Adequate Dose-Response Data in Test Animals to Determine the Cumulative Effects of Dietary Exposure to the Residue Compounds Has Not Been Provided; Therefore, the Maximum Acceptable Concentration of Residues in Food Cannot Be Established Using Appropriate Safety Factors to Assure that Human Exposure to Residues in the Total Diet Does Not Exceed a Level Deemed Safe (Step 3).* As discussed under section I of this notice, the Director has concluded that adequate testing of the parent drug, nitrofurazone, has not been provided. Also, under steps 1 and 2 (paragraphs A and B of this section), the Director concluded that adequate information has not been provided about the residues to determine if toxicity testing of residue compounds in addition to the parent drug is required to estimate conservatively the cumulative effects of exposure to the residues.

The Director concludes that without such essential information about the residues and adequate toxicity testing data, he cannot, in light of the new evidence, determine if nitrofurazone requires regulation as a carcinogenic animal drug or, alternatively, to reasonably estimate a maximum acceptable level of residue in food that can be deemed safe. Therefore, he concludes that adequate information has not been provided to assess the cumulative effects of exposure and to determine the appropriate safety factors required in section 512(d)(2)(B) and (C) of the act.

D. *Sufficient Information about the Residues Has Not Been Provided to Establish the Conditions Necessary for the Analytical Method Used to Control Residues (Step 4).* The evaluation of an analytical method for residues first requires a determination of the tissues to be analyzed, the compound to be measured, and the lower limit of measurement that must be achieved to control total residues adequately. Only then, after selection of these parameters, is it meaningful to consider whether the method proposed by the sponsor meets other characteristic necessary for a practical reliable method.

1. Determination of the target tissue: The most practical approach to monitoring and controlling residues in the field is dependent on the selection of that edible tissue in which residues require the longest time to deplete to a "safe concentration." Therefore, by monitoring this tissue to assure that residues are below a "safe concentration," it can be assured that all residues in the carcass are below "safe concentrations." In lieu of this determination (identification of the target tissue), all edible tissues, including milk where applicable, must be monitored. This would place an additional burden on public funds for monitoring.

The target tissue is readily identified if the requirements of step 1 of the evaluation process are met. Norwich has failed to meet these requirements for any of the approved uses of nitrofurazone.

2. Determination of the compound (marker) which can be measured by the analytical method to assure control of total residues: Because the radiolabeled drug approach used initially to estimate total residues is not applicable to regulatory use, an alternative approach must be developed to assure control of total residues after drug approval. This is achieved by selecting an appropriate residue compound, which may be the parent drug or one or more metabolites, in such a way that its measurement serves as a valid indicator that when the marker compound is below a certain level in the target tissue, all residues in edible tissues are at safe levels. This step is esential to determine if the method of analysis for regulatory use is adequate. To determine a valid marker, adequate information, e.g., information derived from conducting an adequate metabolism study, is required that relates the proportionate amount of each of the residues to the total residue and their change in quantitative relationships with time. The marker must be a known proportion of the total residue when the total residue depletes to the "safe concentration" in the target tissue. It also must be structurally identified so that an adequate and specific method of analysis can be developed for its determination.

The regulatory method proposed by Norwich to control residues uses the parent drug, nitrofurazone, as a marker in each of the major edible tissues. Norwich has failed to submit substantiating evidence to show that the measurement of nitrofurazone is adequate to control total residues of potential concern or, alternatively, to show that all other residues are safe and do not need to be controlled.

3. Determination of the lower limit of measurement required for the analytical method: Establishment of the lower limit of measurement required for the assay begins with the availability of adequate toxicological testing to determine the cumulative effects of exposure. As described in section I of this notice and in steps 2 and 3 of this section, the sponsors have not provided adequate testing. Therefore, an estimate of the acceptable level of exposure to total residues in food cannot be determined.

Even if adequate testing data were available to estimate the acceptable level of exposure to total residues in food, Norwich has not provided adequate information about a marker compound to determine the lower limit of measurement required for the assay.

As previously stated, Norwich has proposed that the measurement of nitrofurazone is adequate to assure control of residues, but it has not provided any information to show whether nitrofurazone may be, for example, 80 percent of the total residue or 10 percent of the total residue. Therefore, it is not possible to determine at what concentration the marker must be measured to assure that total residues are at a "safe concentration."

After making the adjustment for the percent of total residue that the marker represents, one further adjustment is necessary to determine the lower limit of measurement required for the assay. This last adjustment takes into account the degree to which the method of analysis recovers the residue from the sample. Minimum standards for recovery for the acceptance of the method take into account that 100 percent recovery is rarely achieved and that a combined evaluation of the precision and accuracy for measurement of the marker must be considered.

Norwich is aware of the principles just described for the selection of a target tissue, marker compound, and the adjustments required to establish condi-

V41160 AUG 17 76 UMI

tions for the assay; this is evidenced by Norwich's citation of a paper prepared by two FDA scientists in Norwich's submission for furazolidone (NF–180) to FDA on November 11, 1975. The cited paper by M. K. Perez and N. E. Weber, entitled "Requirements for Metabolic Studies—Impact on Food Safety Regulation" was presented at the Gordon Research Conference on Drug Metabolism, June 23–27, 1975.

The Director concludes that he cannot make an assessment of the toxicity, including the carcinogenic potential and potency, of nitrofurazone without adequate testing data; he cannot conclude that nitrofurazone serves as a valid marker for control of total residues of toxicological interest; and therefore he cannot without adequate supporting data determine the conditions necessary for the analytical method used to control residues. The requirements of step 4 have not been fulfilled. He concludes that the new evidence on nitrofurazone (NF–7) and furazolidone (NF–180) leads to a determination that the methods of analysis for residues of nitrofurazone (NF–7) are not shown to be adequate.

E. *Practicable Methods of Analysis are Not Available to Assure that Total Residues in the Daily Diet of Humans Do Not Exceed a Level Deemed Safe (Step 5).* Section 514.1(b)(7) (21 CFR 514.1 (b)(7)) requires the sponsor of a new animal drug application to provide a practicable method of analysis to be used for the control of residues of its product. A "practicable" method is defined by FDA as one that reliably measures the compound throughout all residue levels of interest, and also is sufficiently rapidly and reasonable in terms of the expertise and equipment required to be applicable for use in the surveillance and control of residues. "Reliability" is a combination of accuracy, precision, and specificity. Accuracy and precision are quantitative terms. "Accuracy" is the measure of deviation from the true value, and "precision" refers to the variability of measurement in replications either by one analyst or within a laboratory or between laboratories. A method may provide reliable measurement if the measurements are not too variable even though it measures less than or more than 100 percent of the true value. Therefore, accuracy and precision must be considered together.

"Specificity" is a qualitative term. The measurements obtained by the method must reflect only the compound of interest. Because the method will be used on samples from animals for which exposure history is unknown, the techniques used in the method must be adequate to assure not only the integrity of the measurements, but also the identity of the residue to the exclusion of other interfering substances. Therefore, when the quantitative measurements are made by techniques that are not inherently specific, a confirmatory test is required as part of the official method to assure the identity of the residue.

The submitted methodology for nitrofurazone is based on chromatographic separation and fluorometric determination; both are nonspecific techniques. The uses of nitrofurazone were approved before that time when regulatory methods of analysis for residues were required. In 1960, a method of analysis for tissues capable of measuring nitrofurazone as low as 1 part per million (ppm) was published in Analytical Chemistry, 32(12):1676–1678. In 1962, FDA was provided with a method of analysis for nitrofurazone in milk; the method was claimed to be capable of measuring nitrofurazone as low as 0.01 ppm. This method was subsequently published in the Journal of Agricultural and Food Chemistry, 12:121, 1964. About the same time, revised methodology for tissue residues was also submitted to FDA; the revised methodology was claimed to be capable of measuring nitrofurazone as low as 0.1 ppm in tissue.

None of these methods have been subjected to validation trials by FDA. The data submitted in support of these methods only include studies of the recovery of nitrofurazone from samples to which known amounts of the drug have been added, i.e., spiked samples. No evidence has been submitted to show that the methods will satisfactorily recover nitrofurazone when the residue is naturally incurred through drug treatment, i.e., dosed samples.

After FDA received reports that nitrofurans had induced tumors in female rats, the drug sponsors were advised in 1969 and officially informed in a conference held January 4, 1971, that the residue methods were no longer deemed adequate. They were told that methods capable of measuring at least 2 ppb of the drug in edible tissues and at least 0.2 ppb of the drug in milk were required. In response to the notices of opportunity for hearing, Norwich and other sponsors submitted newly developed methods of analysis.

For the measurement of tissue residues, Norwich concentrated primarily on the method for furazolidone (NF–180) in the belief that this method could be readily adopted for the measurement of tissue residues for the other nitrofurans.

A discussion of the results on the evaluation of the furazolidone (NF–180) method for tissue analysis (including swine liver, kidney, muscle and fat and poultry liver, kidney, muscle and skin with adhering fat) is presented in the May 13, 1976 FEDERAL REGISTER notice for furazolidone. In that notice the Director concluded that the methods for edible tissue were not shown to be adequate.

Although the drug sponsors have submitted far more information to support the adequacy of the methods of analysis for furazolidone (NF–180) than they have submitted on methods of analysis for nitrofurazone, the sponsors have in the intervening years submitted some progress reports on the development of analytical methods for nitrofurazone.

In 1971, three different progress reports were submitted on the analysis of nitrofurazone in chicken tissues.

1. Project No. 475–17 Interim Report, "Chemical Method for Determination of Concentrations of Nitrofurazone in Chicken Liver at 2 ppb." Submitted to FDA with cover letter dated April 29, 1971.

The method presented was based on an ultraviolet densitometric measurement similar to the original method submitted for furazolidone (NF–180), which was rejected by FDA after a desk review of the supporting data. In the nitrofurazone submission, no recovery data were submitted. The results of analysis of five control chicken liver samples were submitted and compared to results obtained on three samples, each fortified with 2 ppb and 4 ppb of nitrofurazone. The measured responses for the samples fortified at the same level were quite variable, though it appeared that the method could perhaps distinguish between fortified and nonfortified samples. In a conference on May 4, 1971, Norwich was advised that the data were too meager for reasonable evaluation.

2. By letter dated May 17, 1971, Norwich provided data on the recovery of nitrofurazone from chicken liver, muscle, and skin-with-fat samples. The same ultraviolet densitometric method described in study 1 above was used. Norwich reported the following recoveries and standard deviations from tissues fortified with 2 ppb of nitrofurazone: liver (49±15%, muscle (47±14%), and skin-with-fat (39±5%). These recoveries were presumably based on the use of an internal standard where corrections were made for aliquot losses and losses in partitioning between solvents; so, they appear higher than the actual recoveries. The firm submitted data for samples fortified with nitrofurazone at 2 ppb, 4 ppb, and 6 ppb. These comparative data showed that the method could not reliably distinguish between the presence of 2 ppb and 4 ppb of nitrofurazone in liver tissue. Also, the single skin-with-fat sample fortified with 6 ppb nitrofurazone produced a lower reading than the one sample fortified with 4 ppb of nitrofurazone.

3. On September 17, 1971, Norwich submitted data on the analysis of chicken kidney for nitrofurazone using the same ultraviolet densitometric method used in studies 1 and 2 described above. Data were provided on peak areas, but sufficient data were not provided to calculate recoveries. The analytical response for the control tissues was as high as 66 percent of the response obtained with tissues fortified with 2 ppb of nitrofurazone.

After 1971, Norwich apparently abandoned the ultraviolet densitometric approach and concentrated on the method of analysis for furazolidone (NF–180) that was subjected to a method trial by FDA and USDA in 1972. They also explored the use of new instrumentation (programmed multiple development thin layer chromatography (PMD–TLC)) and mechanization of spotting thin layer chromatography plates.

By letter dated September 6, 1974, Norwich submitted a status report to FDA on the analysis of nitrofurazone in chicken and swine tissue using the PMD–TLC method. This report included the results of analyses of samples of chicken muscle, kidney, and skin-with-fat and swine muscle, fat, liver, and kidney fortified at 2 ppb, 4 ppb, and 6 ppb with nitrofurazone. No data were presented on the analysis of chicken liver. Recoveries for the samples fortified with 2 ppb of nitrofurazone were calculated by FDA as follows: chicken muscle (112–141%), chicken kidney (84–103%), chicken skin-with-fat (46–76% with the exclusion of one of the four samples where there was an interfering fluorescent band), swine liver (108–142%), swine muscle (82–127%), swine kidney (81–117%), and swine fat (67–116% with the exclusion of one of four samples as an outlier).

Due to the within-laboratory variability in the results, FDA chemists rejected the data as not adequate to warrant interlaboratory validation of the method. It appeared unlikely that the method, if subjected to validation trials, would prove reliable for measurement of nitrofurazone at 2 ppb. Also, as stated previously, until adequate data are presented as described in steps 1 through 4 of the safety evaluation process, the conditions required of a regulatory assay cannot be determined and, therefore, a validation trial is of no value at this stage.

No supporting data have been presented on a method of analysis for edible carcass tissue of food animals other than chickens and swine for which nitrofurazone is approved.

In response to the March 31, 1971 notice of opportunity for hearing on nitrofurazone, Pharm-House Inc. submitted a method of analysis for nitrofurazone in milk; it claimed the method could detect nitrofurazone as low as 2 ppb. The method was based on colorimetric determination of a phenylhydrazone derivative of nitrofuzazone. This method was based on essentially the same derivatization technique and measurement as the method submitted by Norwich in 1962, but the Pharm-House method used a different chromatographic cleanup of the extract and concentration of the colored analyte before the colorimetric determination of the nitrofurazone derivative. No recovery data were submitted and a satisfactory standard curve was not presented. Control milk samples showed a response 50 percent of that measured for samples fortified with 2 ppb of nitrofurazone. Only two samples at each fortification level were reported; that is an insufficient number. From the data submitted it is doubtful that the method could provide reliable measurement of nitrofurazone at 2 ppb even if this level were found adequate.

None of the submitted methods of analysis for nitrofurazone in edible carcass tissue or milk are inherently specific, and no confirmatory tests have been provided by the sponsors that could be used to confirm the identity of any residue found by the proposed assay methods.

The Director concludes that the sponsors have not shown that adequate practicable methods of analysis for residues of nitrofurazone in edible carcass tissue and milk are available. Appropriate data have not been provided to determine if nitrofurazone can be used as a marker to control total residues in edible products, nor to determine the lower limit of measurement required for a method to assure that total residues do not exceed safe levels. The Director concludes that the methods proposed by the sponsors for the determination of nitrofurazone are not quantitative and are not adequately specific at the levels of measurement that are likely to be necessary based on the tumorigenic property of the drug. Therefore, the methods proposed are not quantitatively or qualitatively reliable practicable methods for regulatory use, even if it were established that measurement of nitrofurazone was adequate to control total residues. Therefore, step 5 and the requirements of section 512 (b)(7) of the act have not been met.

F. *Practical Conditions of Use Cannot be Prescribed on the Label of Products to Assure Safe Use (Step 6).* Section 512 (b)(8) of the act requires that conditions of use assure that there are no unsafe residues, and section 512(d)(2)(D) of the act adds a further requirement that these conditions be such that they are "reasonably certain to be followed in practice."

It is required by FDA that residue depletion studies be conducted for each drug use under simulated field use conditions to develop data for establishing the withdrawal period. A withdrawal period is the time following drug treatment when, because of residues, a treated animal cannot be slaughtered for food and its milk must be discarded. A withdrawal period must be sufficiently long to assure adequate residue depletion, but it cannot be so long that it is impractical and unlikely to be followed in practice. An adequate analytical method for residues, preferably the same method that will be approved for regulatory use, must be used to measure the residues in the depletion studies.

Only two reports have been submitted by the sponsors of nitrofurazone on residue depletion, and both studies measured only the presence of the parent drug nitrofurazone:

1. Final Report Problem 466.03.23, Phase II and 466.27.23, "Tissue Residues in Swine from Furacin Water Mix," April 19, 1967, NADA 9–415, Vol. 3. From cover letter to FDA, dated January 8, 1971.

Swine were administered nitrofurazone at 0.011 percent in drinking water for 14 days. No nitrofurazone was detected in the edible tissues (liver, kidney, fat, or muscle) at zero day's withdrawal by a chemical method of analysis that Norwich claimed was capable of detecting nitrofurazone as low as 0.1 ppb.

2. Dr. J. L. Mertz's Memorandum to Dr. J. P. Heotis, "Tissue Residue Withdrawal Studies for Nitrofurazone (Amifur) in Chickens Fed Nitrofurazone at 150 Grams Per Ton of Feed for 14 Days," November 8, 1971, NADA 9–415, Vol. 3.

Chickens were fed nitrofurazone at 150 grams per ton in feed for 14 days. Animals were slaughtered at 3, 4, and 5 days after withdrawal from medication. Edible tissues were examined using the TLC-ultraviolet based methodology, which the sponsor claimed could detect nitrofurazone as low as 2 ppb. However, FDA had not accepted this method because of the variability in the recovery data submitted. Only kidney samples were analyzed after 3 days' withdrawal. Samples of kidney, liver, muscle, and skin with fat were analyzed at 4 and 5 days' withdrawal. One of four kidney samples was reported to contain 2 ppb of nitrofurazone at 3 days' withdrawal. One of two kidney samples was reported to contain nitrofurazone above 2 ppb after 5 days' withdrawal. All other samples analyzed at the various withdrawal times were reported to contain no detectable nitrofurazone.

No residue depletion data have been provided for the other food-producing animals for which the use of nitrofurazone is approved, i.e., poultry other than chickens and large animals other than swine.

Nitrofurazone was originally approved for the treatment of mastitis in 1949, including both lactating and dry cow treatment. However, in 1963, the sponsor revised the labeling to limit its use to dry cow treatment only. No residue depletion studies have been submitted to demonstrate whether this dry cow treatment results in residues in milk after the treated animals freshen or whether the treatment would result in residues in the edible carcass tissues that would be of concern in the event the animal was culled from the dairy herd for slaughter.

The Director concludes that withdrawal periods are likely to be necessary for the safe use of nitrofurazone. The currently labeled withdrawal period for chickens, turkeys, and swine voluntarily used now by the sponsors is 5 days. The Director concludes that data to support this withdrawal period or any practical withdrawal period for any of the uses have not been provided because:

a. No data for any of the uses have been submitted on the amount of total residue (parent drug and metabolites) after drug treatment and the depletion with time of total residues of concern.

b. No data have been provided to show that only the parent drug compound is of concern in evaluating the safety of the residue.

c. No data have been provided to show whether the measurement of nitrofurazone in edible products can be used to control total residues and, if so, at what level its measurement is required to assure that all residues are below concentrations deemed safe.

d. The residue depletion studies submitted for chickens and swine are not shown to be adequate even if nitrofurazone could be shown to be an adequate marker for total residues. In the swine study the method of analysis would not be sufficiently sensitive based on the known tumorigenic properties of the drug. Similarly, the method use in the chicken study, even if it could be shown that nitrofurazone measurement at 2 ppb was adequately sensitive, is not acceptable because the supporting data on the

V 41 160
AUG 17 76
UMI

method are not adequate to assure the reliability of results.

e. No depletion data have been submitted for uses of nitrofurazone in poultry other than chickens and in large animals other than swine, or for safe use of nitrofurazone as a dry cow treatment for mastitis.

The requirements of step 6 and section 512(b)(8) and (d)(2)(D) of the act have not been fulfilled.

Therefore, the Director is hereby withdrawing the notice of opportunity for hearing issued March 31, 1971, proposing to withdraw approval of NADA's providing for the use of nitrofurazone (NF–7) in food-producing animals. Under section 512(e)(1)(B) of the act (21 U.S.C. 360b(e)(1)(B)), the Director proposes to withdraw approval of certain existing NADA's providing for the use of nitrofurazone in food-producing animals on the grounds that such use violates section 512 of the act in that such use has not been shown to be safe.

This notice applies to all outstanding NADA's for the use of nitrofurazone in food-producing animals. All such applications known to FDA are listed below by NADA number and by each applicant's name and last known address in FDA records. Copies of this notice are being forwarded by registered or certified mail to each of the known applicants. Notice to other applicants or holders of NADA's whose identity is not known to FDA is given by this publication.

6–395, 7–801, 8–324, 8–410, 8–529, 8–784, 10–741, Hess & Clark, Division of Rhodia, Inc., 7th and Orange St., Ashland, OH 44805.
6–475, 8–129, 9–415, Eaton Laboratories, Division of Morton-Norwich Products, Inc., P.O. Box 191, Norwich, NY 13815.
6–649, E. F. Drew & Co., Farm Feed Division, Boonton, NH 07005.
9–013, Nopco Chemical Co., 60 Park Place, Newark, NJ 07102.

Any holder of an approved application that elects to request an opportunity for hearing pursuant to section 512(e)(1) of the act and § 514.200 of Chapter I of Title 21 of the Code of Federal Regulations must file with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, a written appearance requesting such hearing by September 16, 1976, giving the reasons why approval of the application should not be withdrawn, and providing a well-organized and full-factual analysis of the scientific and other investigational data such holder is prepared to prove in suppport of its opposition to the Director's proposal. A request for hearing may not rest upon mere allegations or denials but must set forth specific facts showing that there is one or more genuine and substantial issue(s) of fact requiring a hearing. Responses to this notice and copies of published literature cited in this notice may be seen at the office of the Hearing Clerk, Food and Drug Administration, during regular business hours, Monday through Friday.

If a hearing is requested and is justified by any holder's response to this notice of opportunity for hearing, the issues will be defined, an Administrative Law Judge will be assigned, and a written notice of the time and place at which the hearing will commence will be issued as soon as practicable.

Any hearing on withdrawal of approval of the foregoing NADA's will be open to the public. If, however, the Director finds that portions of the applications that serve as a basis for such a hearing contain information concerning a method or process that is entitled to protection as a trade secret, the part of the hearing involving such portions will not be public, unless the respondent so specifies.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b) and under authority delegated to the Commissioner (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.29) (recodification published in the FEDERAL REGISTER of June 16, 1976 (41 FR 24262)).

A discussion of the economic and environmental impact of this action is set forth in the notice of proposed rule making on nitrofurazone published elsewhere in this issue of the FEDERAL REGISTER.

It is hereby certified that the economic and inflation effects of this proposal have been carefully evaluated in accordance with Executive Order 11821.

Dated: August 6, 1976.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.76 23622 Filed 8-10-76;11:19 am]

[Docket No. 76N-0233]

HESS & CLARK, ET AL.

Nihydrazone (NF–64); Opportunity for Hearing on Proposal To Withdraw Approval of Certain New Animal Drug Applications

The Director of the Bureau of Veterinary Medicine of the Food and Drug Administration (FDA) is issuing a notice of opportunity for hearing on a proposal to withdraw approval of approved new animal drug applications (NADA's) Nos. 13–195 and 13–200 for the use of nihydrazone (NF–64) in food-producing animals in accordance with section 512(e)(1)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(e)(1)(B)) (hereinafter, "the act") on the grounds that new evidence not available when the applications were approved, evaluated together with the evidence available at the time of approval, shows that nihydrazone is not shown to be safe for use under either the approved or currently labeled conditions of use. Holders of approved NADA's have until September 16, 1976 to submit requests for a hearing in accordance with § 514.200 (21 CFR 514.200).

In FR Doc. 76–23620, appearing elsewhere in this issue of the FEDERAL REGISTER, the Director is issuing a notice of proposed rule making to revoke the appropriate provisions of sections affected by the proposed withdrawal.

Nihydrazone (NF–64) is a member of a class of chemicals called "nitrofurans," which are used at low levels in animal feed as antibacterial and antiprotozoan agents to increase resistance to disease, thereby assisting growth. Nitrofurans also have prescribed therapeutic uses. In addition to nihydrazone (NF–64), which is the subject of this notice, there are three other nitrofurans that are used in food-producing animals and are or have been subject to agency action: nitrofurazone (NF–7) and furaltadone (NF–260), which are subjects of companion notice in this issue of the FEDERAL REGISTER; and furazolidone (NF–180), which was the subject of notices in the FEDERAL REGISTER of May 13, 1976 (41 FR 19906–19907). A fifth nitrofuran, furamazone (NF–84), is not at this time the subject of contemplated agency action for withdrawal.

Nihydrazone (NF–64) was first approved in 1963. It is currently approved for use in medicated broiler and replacement chicken feeds for the prevention of chronic respiratory disease (air sac infection), pullorum disease, fowl typhoid, paratyphoid (salmonellosis), histomoniasis (blackhead) and coccidiosis caused by *Eimeria tenella, E. necatrix, E. maxima,* and *E. brunetti.*

The original applications were approved without a requirement that the drug treatment be discontinued for a specified period of time before slaughter of the animals. However the sponsors, Norwich Pharmacal Co., Division of Morton-Norwich Products, Inc., and Hess & Clark, currently a Division of Rhodia, Inc., voluntarily revised the labels in January 1971 to require that chickens be withdrawn from nihydrazone (NF–64) 4 days before slaughter.

The Food and Drug Administration issued a notice of opportunity for hearing published in the FEDERAL REGISTER of March 31, 1971 (36 FR 5927) proposing to withdraw approval of NADA's for nihydrazone (NF–64) on grounds that:

Information available to the Commissioner establishes that the drugs, when administered to laboratory animals, have been shown to produce tumors. The drugs are, therefore, not considered to be safe for use in the absence of appropriately sensitive methods of analysis to establish their absence in food derived from treated animals.

Similar notices were published for nitrofurazone (NF–7) in the FEDERAL REGISTER of March 31, 1971 (36 FR 5926) and for furazolidone (NF–180) and furaltadone (NF–260) on August 4, 1971 (36 FR 14343). The history leading to the publication of these 1971 notices is discussed in the May 13, 1976 notice for furazolidone (NF–180).

Norwich and Hess & Clark responded to the March 31, 1971 notice concerning nihydrazone (NF–64) by filing requests for a hearing. Norwich assured FDA that it had adequate methods of analysis to determine residues and adequate data to show that under the currently labeled conditions of use the drugs were safe. In addition, Norwich set forth a hypothesis that nitrofurans were not primary

tumorgens but stimulated spontaneous tumor growth by disrupting the normal hormone balance.

Norwich has continued to submit data pertaining to the use of nihydrazone (NF–64) in food-producing animals. The Food and Drug Administration has determined that the new evidence, evaluated together with the evidence available when the approvals were granted, fails to demonstrate that either the approved or currently labeled uses of nihydrazone are shown to be safe. The Director is withdrawing the March 31, 1971 notice of opportunity for hearing concerning nihydrazone (NF–64), and is issuing this new notice, which presents in detail all the evidence now available to him, and the basis on which he proposes to withdraw approval of all uses of nihydrazone (NF–64) in food-producing animals in accordance with section 512(e)(1)(B) of the act.

Section 512(e)(1)(B) of the act requires that FDA withdraw approval of an NADA when "new evidence • • • evaluated together with the evidence available • • • when the application was approved, shows that such drug is not shown to be safe • • •." Under this provision, the new evidence and the evidence submitted at the time the application was approved must be evaluated to determine whether all of the requirements for safety contained in section 512 of the act continue to be fulfilled.

THE DETERMINATION OF "SAFETY" IN SECTION 512

Section 512 of the act requires that the use(s) of a new drug in food-producing animals must be supported by adequate data supplied by the sponsor in applications that include, among other things, demonstration that the drug's use will not result in unsafe residues in human food.

Under section 512(b) of the act, whenever a drug's use may result in residues of the drug in food, an application must include not only full reports of investigations to show that the use of the drug is safe, but also a description of practicable methods for monitoring food to assure there are no unsafe residues in human food attributable to the drug's use, and demonstration that the conditions of use are adequate to assure there are no unsafe residues.

Under section 512(d)(2) of the act, FDA is required, in the evaluation of the supporting safety data, to consider, among other things, the following:

1. The probable consumption of such drug and of any substance formed in or on food because of the use of such drug (i.e., probable human consumption of residues, including the parent drug and metabolites).

2. The cumulative effect of such drug on man or animals, taking into account any chemically or pharmacologically related substance (i.e., toxicological effects of the compounds comprising the residues).

3. Safety factors that, in the opinion of experts qualified by scientific training and experience to evaluate the safety of such drugs, are appropriate for the use of animal experimentation data (i.e., establishing "safe" levels of residues using appropriate safety factors to extrapolate animal data on cumulative effects to humans).

Under section 512(d)(1)(H) of the act, additional requirements must be met if the drug is a carcinogen.

The determination of safety within the meaning of section 512 of the act for a drug whose use may result in residues in the edible products of the treated animal, whether or not the drug is a carcinogen, requires a multistep process. These steps form an orderly procedure by which information is derived to satisfy each of the three considerations stated above.

Step 1. Assessment of the total residues in edible products and the depletion of those residues with time following cessation of drug treatment in order to determine probable human consumption (section 512(b)(1) and (d)(2)(A) of the act).

Step 2. Assessment of information about the residues to determine the appropriate testing in laboratory animals required to estimate the cumulative effects of human exposure to the residues (section 512(b)(1) and (d)(2)(A) of the act).

Step 3. Acquisition of dose-response data in test animals to determine the cumulative effects of dietary exposure to the residue compounds from which the maximum acceptable concentration of residues in food can be established using appropriate safety factors to assure that human exposure to residues in the total diet does not exceed a level deemed safe (section 512(b)(1) and (d)(2)(B) and (C) of the act.) In the case of a carcinogenic drug, a conservative statistical extrapolation of the tumor data is used to estimate a level of residue exposure that could be considered insignificant and poses essentially no risk of cancer and operationally defines "no residue" for purposes of computing the residue assay requirements under section 512(d)(1)(H) of the act.

Step 4. Acquisition of information about the residues to (1) determine the tissue (called the target tissue) from which residues require the longest time to deplete to safe levels and which, therefore, must be monitored by the regulatory assay (step 5), and (2) determine the compound (called marker) that is to be measured in the regulatory assay so that by its measurement there is assurance that no unsafe resides occur from the use of the drug (section 512(b)(7) of the act).

Step 5. Development of a practicable method of analysis that can measure the marker in the target tissue at a concentration that assures that total residues in the daily diet of humans do not exceed the level established in step 3 as safe (section 512(b)(7) of the act).

Step 6. Demonstration that practical conditions of use can be prescribed on the label of the product to assure there will be no unsafe residues in the food products from treated animals (section 512(b)(8) and (d)(2)(D) of the act).

Each of the steps involves principles that are essential for a determination of food safety and compliance with the requirements of the act to assure there are no unsafe residues in human food from the animal drug use. Each step builds upon the preceding step. Therefore, failure to accomplishment any one of the six steps in whole or in part for any drug ordinarily will preclude a sponsor's fulfilling its obligation under the act to determine probable consumption of residues and cumulative effects of exposure, and to establish safe conditions of use with appropriate regulatory methods of analysis to control residues when deemed necessary.

New evidence concerning nihydrazone (NF–64) not available when the applications were approved includes, among other things, a demonstration that nihydrazone induces mammary tumors in female rats. The Director has evaluated all the data now available, including the new data received since 1963 when uses for nihydrazone were first approved and the data available to FDA at the time of approval, and has concluded that the approval of NADA's for nihydrazone must be withdrawn under section 512(e)(1)(B) of the act because:

1. Adequate investigations have not been provided to show that the uses of nihydrazone are safe, as required by section 512(b)(1) of the act. Adequate information has not been provided on the probable consumption of residues, and the cumulative effects of exposure have not been determined by appropriate tests, as required by section 512(d)(2)(A) and (B) of the act. Therefore, "safe" levels of residue cannot be determined using appropriate safety factors, as required by section 512(d)(2)(C) of the act.

2. Adequate, reliable, and practicable methods of analysis are not available for monitoring food to assure there are no unsafe residues in edible tissues that are attributable to the use of nihydrazone, as required by section 512(b)(7) of the act.

3. Practical conditions of use cannot be specified in the labeling to assure there are no unsafe residues attributable to the use of nihydrazone, as required by section 512(b)(8) and (d)(2)(D) of the act.

The data on which these conclusions are based are presented in the succeeding sections of this notice. The Director first describes all the relevant new evidence bearing on the determination of safety for the uses of nihydrazone. Then he evaluates all the evidence before him using the six-step procedure necessary to satisfy a human safety determination for the use of nihydrazone (NF–64) and to meet the considerations required in section 512 of the act.

I. NEW EVIDENCE

In October 1966 and in January 1967, Norwich submitted reports of the effect in rats of feeding diets containing nitrofurans for 45 weeks. These studies included tests on nihydrazone (NF–64) and furazolidone (NF–180). In these studies it was shown that both nihydrazone (NF–64) and furazolidone (NF–180) in-

V 41 160
AUG 17 76
UMI

duced mammary tumors of similar type in female rats.

Subsequently, more extensive, longer term testing of furazolidone (NF–180) was conducted, but further testing of the carcinogenic potential of nihydrazone (NF–64) has not been undertaken. The more extensive testing of furazolidone (NF–180), as described in the May 13, 1976 FEDERAL REGISTER, shows that the drug induces cancer in both rats and mice and that the tumors and cancers were not limited to the mammary gland or the endocrine tissues of female rats.

The Director is including in this notice information available on the toxicological properties of furazolidone (NF–180) as well as nihydrazone (NF–64) because of the structural similarities of the drugs and their similar biological properties, which have been observed in the limited comparative data available. The new evidence showing that furazolidone (NF–180) is a carcinogen has a significant bearing on the Director's conclusions that the uses of nihydrazone (NF–64) are not shown to be safe.

Although it is appropriate to consider data on furazolidone (NF–180) to judge the adequacy of existing data to support the safe use of nihydrazone (NF–64) in food-producing animals, these data are not a substitute for data on nihydrazone (NF–64) that are required by the statute. Basic data are required for each drug, recognizing that slight differences in chemical structure can result in significant differences in metabolism, residues, and toxicity. Although comparative data on the biochemical and toxicological properties of related drugs may be useful and appropriate in making decisions about the degree of testing required for each drug to show there is no probable hazard, these data cannot be used as a substitute for the basic information necessary on each drug to determine the probable exposure to residues and cumulative effects of exposure.

A. *Carcinogenic Potential of Nihydrazone.* Norwich submitted data in October 1966 and January 1967 on the cumulative effects in rats of feeding diets containing nihydrazone (NF–64) for 45 weeks ("Effects of Long Term Feeding of Various Nitrofurans, October 13, 1966 and January 4, 1967, Project No. 440.07, submitted to FDA as part of a June 2, 1967 drug experience report). These studies include data on testing in female Sprague-Dawley (Holtzman strain) rats and testing in both male and female Carworth Farms (CFE strain) rats.

1. The Sprague-Dawley Female Rat Study: Thirty-five female Sprague-Dawley rats (Holtzman strain) were fed nihydrazone at about 0.06 percent (34 milligrams per kilogram (mg/kg) body weight per day) in their diet for 45 weeks, followed by maintenance on an unmedicated diet for an additional 8 weeks before sacrifice. A comparable control group of female rats was maintained on a nihydrazone-free diet for 53 weeks. At termination of the study the animals were autopsied, and tissues were examined for histopathological lesions.

The most prominent drug-related effect was the induction of tumors in the mammary glands of the female rats. Although rats develop mammary tumors spontaneously as they age, the incidence of spontaneous mammary tumors in rats just over 1 year old, depending upon the strain of rat used, can be quite loww. The nihydrazone-treated female rats had an increased number of mammary tumors, particularly the number of fibroadenomas, as compared with the control rats. The development of tumors included the finding of some mammary adenocarcinoma (cancer).

Norwich reported that no mammary tumors of any type were observed in the 33 control rats examined. It reported from histopathological examination that a total of 11 mammary tumors were found in 9 of the 32 nihydrazone-treated female rats examined. Two of the mammary tumors were reported by Norwich as adenocarcinomas. Norwich did not designate whether these cancers were found in one or two rats.

An Ad Hoc Committee was established to review the pathology data on all the nitrofurans tested in the Sprague-Dawley rat study and the Carworth Farms rat study. One member of the Ad Hoc Committee was the director of the Eppley Institute for Research in Cancer, University of Nebraska. He and his associate pathologists reviewed the pathology slides of the mammary tissues from 32 of the nihydrazone-treated rats provided by Norwich; they submitted a detailed report to FDA. They did not review all the mammry gland slides from the control rats.

Each of the reviewed slides had a rat identification number, and there were several slides for each rat. However, there was no information on the number of tumors in each rat. Therefore, it was not possible, in many cases, for the pathologists to determine which slides represented different tumors in the same rat and which were different sections of a single tumor.

The Eppley pathologists concluded from their review of the nihydrazone-treated female rats that nine of the rats had mammary tumors that were predominantly fibroadenomas and that three of these rats had mammary adenocarcinoma.

Because the Norwich report did not indicate which rats had tumors, it is not possible from the data available to determine if the tumors reported by the Eppley pathologists were from the same rats in which Norwich had reported tumors. The Eppley pathologists reported mammary adenocarcinoma in three of the nihydrazone-treated rats, whereas the Norwich report only indicates the finding of two mammary adenocarcinomas and does not indicate the number of rats with cancer. However, because the Epply pathologists did not review all the mammary gland slides from the control rats, a comparative incidence of mammary cancer cannot be determined from the reports.

A pathologist from the Bureau of Foods of FDA, who was not a member of the Ad Hoc Committee, later reviewed the pathology slides of the mammary tumors from the nihydrazone-treated rats in which the Eppley pathologists had reported mammary tumors. From his examination of the histopathological preparations provided, he reported nine slides of mammary fibroadenoma from nine rats and three slides of mammary adenocarcinoma from two rats. The mammary adenocarcinomas were diagnosed in the same two rats in which the Eppley pathologists had diagnosed mammary adenocarcinoma. However, the Bureau of Foods pathologist diagnosed a fibroadenoma in the third rat, which has been reported by the Eppley pathologsts to have an adenocarcinoma.

The Bureau of Foods pathologist also did not have information indicating which slides were multiple sections of single tumors or which represented different tumors. He did have information on the rat identification number for each set of slides. Because the Bureau of Foods pathologist did not review all the slides in the study, tumor incidence and the comparison of incidence with the control rats cannot be determined from his report. However, his report supports the Eppley pathologists' findings that mammary tumors were found in at least nine of the rats treated with nihydrazone and confirms that mammary adenocarcinoma was found in at least two of the nihydrazone-treated rats.

2. The Carworth Farms Rat Study: Nihydrazone (NF–64) was fed to 20 male and 20 female Carworth Farms (CFE strain) rats at about 0.06 percent in the diet (27 to 32mg/kg body weight per day) for 45 weeks, followed by maintenance on an unmedicated diet for an additional 7 weeks before sacrifice. A comparable control group of rats was maintained on a nihydrazone-free diet for 52 weeks. At termination of the study the animals were autopsied, and the tissues were examined for histopathological lesions.

As in the previous Sprague-Dawley rat study, the most prominent drug-related effect seen was the induction of tumors in the mammary glands of female rats. This included an increase in the number of mammary fibroadenomas and the finding of one rat with mammary adenocarcinoma.

Norwich reported that no tumors were observed in the 15 female control and 18 male control rats examined. Norwich reported from histopathological examination that 7 out of 20 nihydrazone-treated female rats examined had a total of 9 mammary tumors. It reported 1 male rat out of 18 nihydrazone-treated male rats as having a tumor mass. However, it is not known what diagnosis was made from the histopathology for this male rat. Norwich also reported that no mammary adenocarcinomas were found in the nihydrazone-treated female rats.

The Eppley pathologists reviewed the slides of the mammary tissues from the 20 nihydrazone-treated female rats provided by Norwich. They also concluded that seven of the treated female rats had mammary tumors, and they reported that

one of these tumors was a mammary adenocarcinoma.

Slides of the mammary tumors in the nihydrazone-treated female rats reported by the Eppley pathologists were later reviewed by the Bureau of Foods pathologist. He reported mammary tumors in each of the seven female rats. From his examination of the histopathological preparations provided, he reported eight slides of mammary fibroadenoma and one slide of mammary adenocarcinoma. The adenocarcinoma was in the same rat in which the Eppley pathologists had reported a mammary adenocarcinoma.

Food and Drug Administration scientists recognize the there are uncertainties and limitations in the examination of tumors to determine if they have potential for malignancy. For example, in the early stages of a mammary tumor growth, the mass may be chiefly adenomatous. As the growth continues, the supporting white fibrous connective tissue may also begin to proliferate, resulting in a fibroadenoma. Later, the adenomatous part of the neoplastic mass may entirely disappear, leaving a fibroma. Finally, a part of the adenoma of fibroadenoma may develop malignant tendencies, and that portion may then become an adenocarcinoma. All four tumor types, i.e., adenoma, fibroadenoma, fibroma, and adenocarcinoma may be present in the same tumor mass. A small focus of adenocarcinoma in the early stage of a malignant tumor may be overlooked in the tumor growth unless adequate multiple sections of the tumor are made.

Also, unless great care is exercised in the evaluation of the spread of an adenocarcinoma of the mammary gland, the metastasis along the lymphatic routes passing through, under, or near other mammary glands may be considered to be separate primary adenocarcinomas rather than a single primary growth with multiple metastases.

The reports from Norwich indicate that nihydrazone (NF–64) caused an induction of mammary tumors in female rats just over 1 year old and that there is an indication of an increase in the number of mammary adenocarcinomas compared with control rats.

Food and Drug Administration scientists conclude that both studies show that nihydrazone is tumorigenic in rats and that the data rose questions about the carcinogenic potential and poency of nihydrazone. They conclude that neither of the studies is adequate to assess the cumulative effects of exposure to nihydrazone and its carcinogenic potential and potency because the studies were not of sufficient duration and the number of animals used was not sufficient. In the Sprague-Dawley rat study only female animals were used; so it is not possible to determine whether nihydrazone might have produced effects in the male rats. In the Carworth Farms rat study, the number of males was too small to determine with any confidence that nihydrazone did not have an adverse effect. In both studies, drug-treatment was for only 45 weeks and included only one dose level. In spite of the weaknesses in the reports available, it is evident that a 45-week treatment was sufficient to induce tumors in female rates, and that some of these tumors were mammary cancers. The dose level, frequency, and duration of exposure to a compound are related not only to whether or not cancer is induced but also to the latency period before the expression of cancer. Therefore, the 45-week treatment with nihydrazone is not considered a sufficient period of exposure to determine adequately the cancer potential or potency.

The Director concludes that the available data provide sufficient cause for concern that nihydrazone may be a carcinogen and that adequate life-time testing in appropriate animal species is required to evaluate its carcinogenic potential and potency. The Director concludes that because nihydrazone is a tumorigen, dose-response data in lifetime studies, using several dose levels, are necessary to develop the information required to assess the cumulative effects of exposure and to establish conditions of safe use. Although the demonstration of cancer induction may be made on the basis of testing at only one dose level, it may be possible from the results of this testing to conclude that a drug requires regulation under the provisions of section 512(d)(1)(H) of the act, dose-response data are necessary to provide information from which FDA can establish the operational definition of "no residue" for purposes of determining the required conditions for the regulatory assay for residues of a carcinogenic drug. Regardless of whetheer adequate testing were to show that nihydrazone induced cancer or induced only benign tumors, dose-response information would be required to establish the conditions of safe use.

The Norwich data from these two studies were available at the time FDA issued the March 31, 1971 FEDERAL REGISTER notice of opportunity for hearing on the proposed withdrawal of approvals for nihydrazone (NF–64). In response to the March 1971 notice, Norwich stated that all four nitrofurans (NF–64, NF–7, NF–180, and NF–260) caused an early development of mammary tumors that were of the type normally found in aging rats, and it postulated that the nitrofurans caused these tumors only at high levels of exposure in the female rats because of disruption in the hormonal system. Norwich presented data purporting to show that the hormonal disruption that produced the tumors involved a process not applicable to humans, and that the proposed methods of analysis for control of residues were more than adequate to assure that levels of residues were below any level which might adversely affect humans.

The Norwich hormonal hypothesis is described in detail in the May 13, 1976, FEDERAL REGISTER notice on furazolidone (NF–180). The supporting information provided by Norwich for the hypothesis was primarily limited to data on furazolidone (NF–180) and some very limited comparatative data on nitrofurazone (NF–5). No data were presented on nihydrazone related to a hormonal mechanism of action.

B. *Comparative Data on Nihydrazone and Furazolidone.* Norwich has provided data on furazolidone (NF–180) from the Sprague-Dawley female rat study and the Carworth Farms rat study. It has also supplied data on testing of furazolidone (NF–180) in three chronic rat studies and one mouse study; the tests are described in the May 13, 1976 FEDERAL REGISTER notice. The data have a bearing on the Director's proposed action in this notice for nihydrazone (NF–64) and his decision to reject the Norwich hormonal hypothesis for nihydrazone (NF–64) and furazolidone (NF–180). They also have a bearing on his decision to reject the sponsor's claims that adequate studies have been provided for nihydrazone (NF–64) to support a determination that the drug uses are shown to be safe.

In the Sprague-Dawley female rat study and Carworth Farms rat study, furazolidone (NF–180) was also tested in the protocols; it was tested using a dietary level of about 0.1 percent as compared to the nihydrazone (NF–64) dietary level, which was about 0.06 percent.

In the first study, Norwich reported that 14 of the furazolidone-treated female Sprague-Dawley rats out of 32 rats examined had mammary tumors. The total number of rats with tumors reported by Norwich was roughly twiee the number of female rats with tumors reported for the nihydrazone-treated rats. However, the tumor multiplicities reflected in the total number of tumors for the furazolidone (NF–180)-treated female rats were better than three times the number of total tumors found in the nihydrazone-treated rates. Norwich reported five adenocarcinomas in the mammary glands of the furazolidone-treated rats and did not specify in how many rats or in which rats these were found. The Eppley pathologists reviewed the mammary tissue slides from 32 furazolidone-treated female rats and reported tumors in 14 of the rats. The Bureau of Foods pathologist later reviewed slides of the mammary tumors from the 14 rats and reported tumors in all of these rats. Both the Eppley and Bureau of Foods pathologists reported only one mammary adenocarcinoma and one mammary squamous cell carcinoma, each in a different rat, from the slides of the furazolidone-treated rats they had examined. In comparison with these furazolidone-treated rats, the Eppley pathologist found mammary adenocarcinoma in three nihydrazone-treated rats, and the Bureau of Foods pathologist confirmed the cancer diagnosis of the Eppley pathologist in two of the three rats.

In the Carworth Farms rat study, 15 of the furazolidone-treated female rats out of 17 examined were reported by Norwich as having mammary tumors. In com-

V41160
AUG 17 76
UMI

parison, Norwich had reported that 7 of the nihydrazone (NF–64)-treated female rats out of 20 examined had mammary tumors. The total number of mammary tumors reported by Norwich in the furazolidone (NF–180)-treated female rats was seven times the total number of mammary tumors that it had reported for the nihydrazone (NF–64)-treated female rats.

Based on these comparative data, the Director concludes that furazolidone (NF–180) and nihydrazone (NF–64) qualitatively exhibit similar tumorigenic effects in female rats. Because the dose levels of the two drugs were not the same (nihydrazone at about 0.06 percent in the diet and furazolidone at about 0.1 percent in the diet), and because the studies are not adequate to assess the cumulative effects of exposure and carcinogenic potential and potency, the data are not sufficient for a precise comparison of the tumorigenic potencies. The Director therefore concludes that although the limited data give some indication that nihydrazone may be a less potent tumorigen than furazolidone, adequate testing of nihydrazone in lifetime studies in appropriate animal species with the development of dose-response data from the administration of nihydrazone at several dose levels is required to determine adequately the carcinogenic potential and potency of nihydrazone.

More definitive studies of the carcinogenic potential of furazolidone (NF–180) in male and female rats and mice provided by Norwich are described in the May 13, 1976 FEDERAL REGISTER notice. A summary of the findings from the three chronic rat studies and the mouse study include the following:

1. Furazolidone induced malignanices in both rats and mice.

2. Furazolidone also induced nonmalignant tumors.

3. In most cases, the induced malignant and nonmalignant tumors were found at the same sites.

4. There is some evidence that the induction of benign tumors is related to the induction of, or progression to, malignancies as a function of dose.

5. There are marked sex differences in the tumor responses in the rats. There are also some commonalities in the tumor sites of the male and female rats.

6. Mammary tumors were the predominant effect in the female rats.

7. Nonmammary tumors were induced in the Sprague-Dawley male rats, with no one type singularly significant. In the Fisher rats, however, several specific nonmammary tumors were induced in both male and female rats.

8. The major target site for tumors in the mouse was the lung. There was no evidence of a significant difference between male and female mice in tumor response, and there were no tumorigenic effects in the endocrine tissues.

9. The induction of tumors involved not only increased incidence of animals with tumors but also an increased number of tumors per animal.

The Director has rejected the data supplied by Norwich to support the hormonal hypothesis for furazolidone (NF–180). A discussion of these data and his basis for rejection are also presented in the May 13, 1976 FEDERAL REGISTER notice. The Director also rejects the Norwich reply to the 1971 FEDERAL REGISTER notice on nihydrazone (NF–64), which attempted to explain the tumorigenic effects of nihydrazone primarily on the basis of the furazolidone (NF–180) data relative to the hormonal hypothesis. The Director finds that the new evidence provided by the more extensive chronic testing data for furazolidone (NF–180), which shows that tumors were induced in both male and female rats and mice and were not limited to tumors of the mammary gland or endocrine tissues, is inconsistent with the hormonal hypothesis.

Therefore, the Director concludes that the comparative data available on furazolidone (NF–180) and nihydrazone (NF–64) in the Sprague-Dawley female rat study and the Carworth Farms rat study, together with the data on the four chronic studies of furazolidone (NF–180) in rats and mice, indicate that adequate testing of nihydrazone (NF–64) has not been provided to assess the cumulative effects of exposure necessary for a determination of safety.

II. USES OF NIHYDRAZONE ARE NOT SHOWN TO BE SAFE

To assess the safety of residues using criteria described in section 512(b) of the act and elaborated on in section 512(d)(2) of the act requires a multistep process that must take into account consideration of the metabolism of the drug, determination of the resulting residues, including parent drug and the metabolites, the depletion of those residues with time after drug treatment, and the cumulative effect of human ingestion of the residues. The six basic steps involved in this evaluation process have been previously described above.

A: *The Amount of Total Residue in the Edible Products and the Depletion of Residues with Time must be Determined (Step 1).* When a drug is administered to an animal, the drug may be altered by the animal into a variety of compounds called metabolites. The process of alteration may be such that little residue of the parent drug remains in the animal tissue, but the amount of metabolites may be substantial. Therefore, the total residue with which FDA is concerned includes both the parent drug and the metabolites.

The nature and amount of each of the residues depend in part upon the metabolism in a particular species. Because there are species differences in metabolism, it is necessary to determine metabolism and residues in each of the species for which the drug is used. Therefore, § 514.1(b)(7)(i) (21 CFR 514.1(b)(7)(i)) includes metabolism and residue depletion studies among those kinds of studies that are used to determine residues.

Exposure to nihydrazone in the diet-induced mammary tumors in female rats. It is not known whether the parent drug was the active agent or whether the responses were due to one or more active metabolites produced as a result of ingestion of the parent drug by the rats. Such lack of knowledge is not unique to nihydrazone; it is typical of many tumorigenic and carcinogenic agents that the mechanism of the induction of tumors or the identification of the active agent is not known. Therefore, when considering the safety of food from nihydrazone-treated animals, all drug-related residues to which humans may be exposed must be assumed to be potentially carcinogenic unless convincing evidence is presented to the contrary. Such evidence consists of not only the identification of the residues that are claimed to be safe but also adequate toxicological studies showing that the levels of each of the residues claimed to be safe are in fact safe. All residues not identified or not shown to be safe must be considered potentially carcinogenic and must be required to be below a level of measurement that can be considered insignificant and to pose essentially no risk of cancer in humans.

The use of chemical assays to determine initially the total residues would require knowledge about what residues occur (parent drug and metabolites) and would require the availability of adequate methods of analysis to measure at the level of interest each one of the residues in the edible tissues. Therefore, this chemical approach is usually not feasible. Instead, a radiolabeled parent drug is used to provide a practical and adequate approach to the initial measurement of total residues in the edible tissues. In this approach, the drug is synthesized with a radioisotope, so that when the drug is administered to the test animal according to label directions, all resulting residues of potential interest can be measured in the edible products. This is accomplished by counting the radioactivity in the tissues and converting these measurements to an estimation of the amount of residue expressed as parent drug equivalents.

By using radiolabeled nihydrazone administered to chickens, Norwich has measured total radioactivity in the tissues. Norwich has provided these data, which include the study of residue deposition in edible tissues as a function of the length of time of drug administration and the depletion of residues with time after cessation of drug treatment. Comparative data were presented with a carbon-14 label ("C) on the first carbon in the side chain at the 2-position of the furan ring (formyl label) and a "C label on the carbonyl carbon of the side chain (acetyl label). Both the nitrofuran part and the hydrazine part of the molecule are of toxicological interest. These studies show that under the approved conditions of use for nihydrazone, residues in edible tissues of chickens, as reflected by measurement of the radioactivity expressed as nihydrazone equivalents, are in the parts per million (ppm) range. Evidence is provided to show that the parent drug, nihydrazone, appears to be only a small fraction of the total radioactivity in the tissue. Other data are presented

to further define the metabolic pathways of nihydrazone.

First, the studies on tissue residues in chickens are discussed. These also include balance studies to account for the percent of administered dose eliminated and that retained in the tissues. Second, the studies relating to the metabolic pathways are discussed. These include studies of urinary metabolites in chickens, rats, and rabbits, as well as synthetic studies, bearing on the questions. The discussion in this second part is organized to present, in turn, evidence for (1) a reductive pathway, (2) a hydrolytic pathway, (3) a pathway involving formation of "415" metabolite, and (4) a discussion of possible ring cleavage.

1. *"C-Nihydrazone studies in chickens.* a. Food and Drug Research Laboratories (FDRL), under contract to Norwich, presented a report dated November 27, 1959, which was submitted in NADA 13–200, Vol. 3. In these studies, white Leghorn cockerels from the hatchery were maintained on niyhdrazone-medicated feed to a weight of 200 grams (20 to 22 days on medication). "C-nihydrazone (formyl label) was then administered twice daily to three of the cockerels at a daily dose of 4 mg/day. The birds were sacrificed after 2, 4, and 9 days on treatment with the radiolabeled drug.

Norwich stated that the result of the balance study, to account for the percent of administered dose eliminated versus that retained, showed the chick attained body equilibrium with respect to the drug after 2 days and before the fourth day of dosing, and further showed no evidence of residue accumulation in any specific tissue. Food and Drug Administration scientists conclude that with only one bird examined after each feeding period, animal variation in tissue residue levels cannot be determined. Therefore, definitive evidence is not presented to determine if residues are accumulating after 4 days of repeated dosing. However, in the following two examples, it appears that there is an indication of accumulation. The residue levels in the leg muscle for the three birds after 2, 4, and 9 days' dosing, reported as nihydrazone equivalents, were 3.92, 5.79, and 7.01 ppm, respectively. Corresponding values for liver were 9.68, 10.61, and 13.42 ppm. Residues in blood, head, leg muscle, fat, and residual carcass after 9 days on radioactive drug treatment were reported at about 7 ppm and were all greater than the 4-day values. In the reported balance study, recovery of the radioactivity as percent of total dose administered for treatment periods of 2, 4, and 9 days, respectively were: expired carbon dioxide ("CO_2) (11.5, 4.3, and 10.9 percent); urine and feces not separated (80.6, 71.5, and 85.0 percent), and tissues (12.1, 6.0, and 5.9 percent). These data will be compared with a later study also utilizing the formyl label (section II.A.1.d. of this notice) and a study utilizing the acetyl label (section II.A.1.b.).

b. Nuclear Science and Engineering Corp. (NSEC), also conducted a study for Norwich, titled "Chicken Residue of "C-nihydrazone", NSEC No. 50–11–9098, December 4, 1959, submitted in NADA 13–200, Vol. 3. In the NSEC study, 1-day-old white Leghorn chicks were maintained on nihydrazone-medicated feed for 4 weeks before the administration of radiolabeled drug. "C-nihydrazone (acetyl label) was given twice daily at a dose of 4 mg/day to three birds. The birds were treated with the radiolabeled drug for either 2, 4, or 8 days, and then were withdrawn from medication for 1 day before sacrifice. Recoveries of radioactivity as percent of total dose for the treatment periods of 2, 4, and 8 days, were as follows: expired "CO_2 (46.8, 57.4, and 60.9 percent); urine and feces not separated (33.6, 37.9, and 47.6 percent); and tissue (11.78, 7.92, and 10.2 percent). It is apparent from the results on expired "CO_2 in the NSEC study that the radioactive carbon derived from the acetyl label is removed from molecular species of toxicological interest and that the radioactivity in the tissue will include incorporation of "C into endogenous substances that are not of toxicological interest. For this reason, the NSEC study does not answer the questions about the total drug-related residues in tissues of interest and their depletion with time. The results from the formyl label studies discussed in the preceding paragraph also indicate some expired "CO_2, but to a lesser extent (4.3 percent to 11.5 percent).

c. Further studies were conducted by J. A. Buzzard et al. and were submitted by Norwich (Special Report Problem No. 360.3, September 1, 1961, NADA 13–200, Vol. 3). In these studies, male and female chicks were administered nihydrazone ad libitum in the feed at 0.0138 percent for 3 weeks. One group was then given "C-nihydrazone, labeled in the formyl position, and another group was given "C-nihydrazone labeled in the acetyl position. Radiolabeled drug was given for 4 days; Norwich claimed that previous studies showed that 4 days was the time required for tissue saturation and equilibration. One male and one female chick from each group were sacrified for analysis after radiolabeled drug treatment for 1, 3, or 4 days; there was no withdrawal from treatment before sacrifice.

In the formyl-labeled studies, the maximum levels of radioactive residue after dosing from 1 to 4 days, expressed as nihydrazone equivalents, were approximately 2 to 3 ppm in thigh, breast, and leg muscle; and about 8 ppm in liver and kidney. Fat was only analyzed on day 1 and was 1.35 ppm nihydrazone equivalent. With the acetyl label, the maximum level of radioactive residue after dosing for 1 to 4 days was much higher. For example, maximum values of 6.8 ppm in thigh muscle, 35 ppm in kidney, 15.6 ppm in liver, and 91.3 ppm in fat, expressed as nihydrazone equivalents, were reported. Data were also presented on the depletion of residues after 3 weeks' treatment with 0.0138 percent nihydrazone in feed followed by 4 days of radiolabeled drug treatment and subsequent withdrawal from medication. The formyl-label-treated chicks were analyzed after sequential sacrifices up to 5 days postmedication, and the acetyl-label-treated chicks were analyzed after sequential sacrifices up to 16 days postmedication. One male and one female chick were analyzed from each group at each withdrawal time up to 5 days withdrawal. After 5 days withdrawal, the formyl-label-treated chick had the following residue levels, expressed as nihydrazone equivalents: 0.79 ppm and 0.96 ppm in muscle tissues, 0.70 ppm and 0.86 ppm in fat, 1.27 ppm and 1.64 ppm in kidney, and 1.36 ppm and 1.64 ppm in liver. Liver and kidney showed biphasic disappearance curves indicating a pool of rapidly disappearing metabolites with a biological half-life, calculated by Norwich to be about 0.7 day. The pool of slower-depleting components in the various tissues was reported to have a biological half-life ranging from 3.2 days in liver to 4.9 days in breast muscle. Fat was not examined. Results demonstrating a biphasic nature for the depletion of residues from use of the acetyl label were also presented. A biological half-life for the rapidly depleting pool is reported at about 0.8 to 1.6 days. The biological half-life of the slower-depleting pool was reported as 4.1 days for fat, about 5 days in kidney and liver, and 7.2 to 11.7 days for muscle tissues. Norwich did not explain how it derived the biological half-lives for the rapidly depleting pools.

With the acetyl label, initial residues were much higher than with the formyl label. After 16 days withdrawal, the level of radioactivity in tissues was in the same range as that seen after only 5 days withdrawal with the formyl label.

Further studies were presented in this report to show the effect of longer-term administration of radiolabeled drug on the residues measured. Norwich claimed from the previous studies that dosing with the labeled drug for 4 days was sufficient to assure saturation of tissues with radiolabeled drug residues after pretreatment with unlabeled drug. Three 21-day-old male Leghorn birds, not pretreated with nihydrazone, were given the formyl label drug in feed for 8, 16, or 32 days, after which each bird was withdrawn from treatment for 4 days before sacrifice and measurement of residues. The data combined with the 4-day treatment data from the previous study show that the amount of residue in liver, kidney, fat and thigh, breast, and muscle tissue, expressed as nihydrazone equivalents, continued to increase with increasing length of treament. For example, muscle residues were reported as 0.79, 1.35, 1.78, and 2.17 ppm for the 4-, 8-, 16-, and 32-day treatment, respectively, each followed by a 4-day withdrawal from medication. A similar study with the acetyl label, where drug treatment was given for 8, 16, 24, or 32 days followed by 4 days withdrawal, also indicated an increase in residues with prolonged treatment. However, the pattern seen in the tissues in this study deviates for the kidney and fat tissue in particular. Food and Drug Administration scientists agree in part with Norwich that this deviation probably results from loss of labeled acetate from nihydrazone. This would result in the

V41160 AUG 17 76 UMI

incorporation of ^{14}C derived from acetate into endogenous substances. This is consistent with the showing of a much higher $^{14}CO_2$ expiration with the acetyl label compared to the formyl label as previously discussed. It is also consistent with the higher level of radioactivity, especially in fat, for the acetyl versus the formyl-label-treated birds. Acetate is a biochemical precursor of fatty acids, and therefore a higher incorporation of radiolabel into endogenous fatty acids would be expected. Norwich references work by Weinhouse et al. (Journal of Biological Chemistry, 166: 691, 1946) and Elliott et al. (Journal of Biological Chemistry, 186: 477, 1950) to support that kidney in general is a high acetate metabolizing organ, and therefore, as with fat, the high apparent residue levels in kidney may result from the incorporation of radiolabeled acetate into endogenous substances.

Food and Drug Administration scientists agree that kidney is a high acetate metabolizing organ; however, liver also has strong acetate metabolizing capability, and in comparison to kidney, liver has a much more versatile anabolic (synthetic) capability. Therefore, the argument of Norwich that the disproportionate amount of kidney residues results from the labeled acetate is not supported in view of the data for liver and common knowledge of liver metabolism.

d. Norwich has provided an additional report using the formyl label to study residues in chickens. Buzzard et al., in Special Report Problem, No. 370.3, September 1, 1961, reported a radioactivity recovery study in the chicken. One chicken was fed a diet containing nihydrazone at 0.0138 percent for 5 weeks before the administration of ^{14}C-nihydrazone (formyl label) for 8 days. The bird was then withdrawn from medication for 4 days before sacrifice. Recovery of radioactivity as percent of the total dose administered was reported as follows: expired $^{14}CO_2$ (2.52 percent), urine and feces (100.45 percent), and tissues (2.17 percent). Residues in the tissues, expressed as nihydrazone equivalents, ranged from a low of 0.5 ppm in the crop and its contents, to 1 to 2 ppm in muscle tissues, 4.0 ppm is liver, and 4.2 ppm in kidney. The results of this experiment show a lower level of expired $^{14}CO_2$ compared to the results of the FDRL study with the formyl label previously described, where about 11 percent of the total dose was accounted for as $^{14}CO_2$ for two of the three birds examined. In the Food and Drug Research Laboratories study (cited previously in this notice, under section II.A.1.a.), some high values during the early collection period were questioned; investigators felt they might possibly be due to fermentation of droppings during collection.

The report continues with data that Norwich claims demonstrate that the ^{14}C-nihydrazone (formyl label) results in the incorporation of carbon-14 into serum proteins, glucose from liver glycogen, glutathione from erythrocytes, glutamic acid isolated from erythrocyte glutathione, and glutamic acid, serine, tyrosine, aspartic acid, and phenylalanine from blood hydrolysates. These results are based on presumptive identification. After acid hydrolysis of the tissues, ion exchange column chromatography was used to separate the amino acids, and identification was based on column retention time compared to standards. From the evidence of expired $^{14}CO_2$ (although only a small percentage of the total dose), it may be expected that the formyl label also would result in a small amount of incorporation of ^{14}C into endogenous substances. The data presented by Norwich do not provide any estimate of the proportion of the total radioactive residues that result from such incorporation. Therefore, the total drug residues of toxicological concern cannot be determined. As one example, Norwich reported that erythrocytes contained 74 percent of the radioactivity in the blood. The extraction of 1 milliliter of erythrocytes yielded 1.4 milligrams of glutathione with a radioactive count of 10,466 disintegration per minute per milligram (dpm/mg). After hydrolysis and chromatography to separate glycine, cystine, and glutamic acid, it was reported that the radioactivity was associated with glutamic acid representing a radioactive count of 560 dpm, which is only a minor part of the total radioactivity in the isolated glutathione fraction (about 14,600 dpm). Bar graphs were presented for the various amino acid fractions from hydrolyzed blood protein with which radioactivity was associated. The largest component was not identified with the endogenous substances examined.

Food and Drug Administration scientists cannot use such data to determine what amount of radioactive residue has to be subtracted from the total residue in edible tissue to yield that portion that is of remaining toxicological interest. Furthermore, although much of the radioactivity appeared to chromatograph with retention times similar to the amino acid standards, many substances, even including some of the standards, co-chromatograph. Therefore, to presume identification of an endogenous substance solely by column retention time is not considered reliable because it is possible that drug-related metabolites may also chromatograph in the system described. Furthermore, it is possible that some of the nihydrazone metabolite residues may be "bound" in some manner with macromolecular structures and at least in part may be contributing to some of the results seen in the data of this study.

The Director concludes from the studies with the acetyl label that this label does not provide any meaningful answers to the question of drug-related residues of toxicological concern. It appears that the acetyl label may not remain associated with the hydrazine part of the molecule that is of toxicological interest, and would likewise not provide an adequate label for following the fate of the nitrofuran part. The Director concludes that the formyl label more reasonably provides an estimate of the total drug-related residues of interest. Studies, which will be discussed later, indicate that one pathway for nihydrazone metabolism includes breaking the carbon nitrogen double bond in the side chain giving rise to furan derivatives as well as hydrazine derivatives. The latter would not be followed with the formyl label. However, this hydrolytic pathway appears to be significant in the rat and rabbit but is apparently not operant in the chicken, possibly due to different gastrointestinal tract acidity.

The Director further concludes that substantial levels of radioactive residue are shown in the edible tissues of chickens. The Director acknowledges that the formyl label data also indicate that some ^{14}C incorporation into endogenous substances may occur, based on the small amount of expired $^{14}CO_2$. The Director concludes that Norwich's data on this point are presumptive qualitative information without quantitative accountability. Therefore, the Director concludes that even if he agreed that the evidence supports the presence of labeled ^{14}C in the endogenous substances, he is not able to determine what amount of residue may be subtracted from the total residue as demonstrated to be safe; therefore, he cannot estimate the amount of total drug-related residues of interest from the data presented. Because of the evidence suggesting a carcinogenic potential for the drug, even low levels of nihydrazone-related metabolites are significant.

As will be discussed in the second part of section II.A of this notice, there is reason to believe that major portions of the residue are likely to be drug-related metabolites of toxicological concern.

e. Norwich has presented some data on the amount of parent drug residue, i.e., nihydrazone residue, that occurs in chicken tissue. These data are described in detail in section II. F. of this notice. In one study, broiler chickens were treated for 5 days with nihydrazone in their ration at 100 grams/ton. A ^{14}C-nihydrazone (formyl label) was used, and the levels of nihydrazone, parent drug only, were measured by using a reverse isotope dilution technique following the 5-day treatment and for 5 subsequent days of withdrawal. The maximum concentration of nihydrazone at 0-day withdrawal was in skin with adhering fat at a level of 37 parts per billion (ppb), which depleted to a level of 2 ppb after 3 days withdrawal.

Subsequently, other studies in chickens were conducted using chemical assays to measure residues that Norwich claimed were specific for nihydrazone and could detect residues as low as 2 ppb. The method of analysis used was similar to the one subjected to validation trials for furazolidone (NF–180); the method was not shown to be reliable. Data from these studies, which involved longer periods of treatment of the birds with nihydrazone, indicated that the levels of parent drug, nihydrazone, in edible tissues are in the parts-per-billion range. It is therefore apparent that nihydrazone represents only a very small fraction of the total residue in the tissues when compared to the findings from the radiolabeled drug studies.

The Director concludes that Norwich has not provided adequate identification of the residues in edible tissue to provide convincing evidence that the substantial levels of residues reflected by the radioactivity measurements are safe. However, Norwich has provided other data on the metabolism of nitrofurans. From studies of the nature of metabolites in rabbit, rat, and chicken urine and from synthetic studies, Norwich has shown that several pathways may be operant. These data are germane to the Director's conclusion that adequate information has not been provided about the residues in edible tissues of treated animals to conclude that such residues are safe.

2. *Metabolic pathways.* Norwich has provided some data on the chromatographic analysis of urine from chickens dose with ^{14}C-nihydrazone that indicates that several metabolic pathways are involved. They present evidence to show that in the urine, about 5 percent of the administered dose is excreted as nihydrazone, a similar amount as 5-acetamido-2-furaldehyde acetylhydrazone, about 16 to 17 percent as a compound designated as "415" because the ultraviolet (uv) spectra shows an absorption maximum at 415 nanometers and several other unidentified compounds that had been chromatographically separated. These data will be discussed along with other relevant studies in the following paragraphs.

a. *The reductive pathway.* Norwich has provided several references of work by others that show evidence of the reduction of a number of nitrofurans by various body tissues and bacteria. Beckett and Robinson (Journal of Medical and Pharmaceutical Chemistry, 1:155, 1959) postulated that hydrazone derivatives of nitrofurans of the B Type (—CH=N—N)(R)COR) are unstable and that furan ring cleavage occurs upon reduction because they cannot be stablized by hydrogen bonding. These same authors (Ibid. p. 135) demonstrated the stability of Type A hydrazone derivatives of nitrofurans(—CH=N—N(H)COR) upon reduction to their amino analogs. They suggest that the NH group alpha to the Schiff's base may be essential for stability of these amino compounds. Beckett and Robinson used bacterial systems, as well as alcohol solutions (highly protonic) for the reductions. Elbetino et al. ("Reduction of Nitrofurans I. Aminofuran," Eaton Laboratories, report submitted in NADA 13–200, Vol. 3) reported on the catalytic reduction of a number of 2-substituted 5-nitrofurans to the corresponding aminofurans, including the reduction of nihydrazone. They avoided the use of exclusively protonic solutions for the reduction. Based on their findings, these authors found that the reduction did not necessarily result in ring cleavage, particularly for the Type B nitrofurans. They found that the 5-nitrofuran compounds could be catalytically reduced and that the amino analogs were easily acetylated. The acetylated amino derivatives were more stable in aqueous solution than the corresponding amino compounds.

They reported the catalytic reduction of nihydrazone to 5-amio-2-furaldehyde acethylhydrazone, which, after reaction with acetic anhydride in the presence of pyridine, produced 5-acetamino-2-furaldehyde acetylhydrazone. This compound had infrared and uv spectra and a paper chromatography retardation factor (R_f) value identical to that of a nihydrazone metabolite found in rabbit urine by Olivard et al. of Eaton Laboratories (discussed below), which was subsequently confirmed as to identity. Elbetino et al. reported that the 5-amiofuran derivative of nihydrazone and other Type A nitrofurans produced through the catalytic reduction were relatively unstable compared to the Type B nitrofurans studies. In contrast to Beckett and Robinson, they postulated a hydrogen-bonded form that might be more susceptible to furan ring cleavage.

Olivard et al. ("Metabolism of 5-nitro-2-furaldehyde acetylhydrazone," NADA 13–200, Vol. 3) reported the presence if 5-acetamido-2-furaldehyde acetylhydrazone and evidence for 5-amino-2-furaldehyde acetylhydrazone in the urine of rabbits that had been given nihydrazone by stomach tube at a dose of 100 mg/kg body weight/day for 5 days.

The 2,4-dinitrophenylhydrazone derivative of 5-acetamido-2-furaldehyde was isolated from the urine of the nihydrazone-treated rabbits after the addition to the urine of 2,4-dinitrophenylhydrazine in hydrochloric acid, and subsequent extraction with ethyl acetate followed by chromatography on alumina. The isolated derivative was identical with an authentic sample by melting point, absorption maxima in neutral and alkaline solutions, infrared-spectra, and R_f values on paper chromatograms. Elemental analysis supported the empirical formula. Additional evidence for the existence of the 5-acetamido-2-furaldehyde acetylhydrazone in urine was shown by the demonstration of ^{14}C in the R_f area corresponding to the authentic sample when ^{14}C nihydrazone (acetyl label) was administered. Thus it was demonstrated that the carbon-nitrogen double bond in the side chain remains intact, at least in part, in the rabbit. Although neither the 5-acetamido nor 5-diacetamido compounds, synthetically produced or isolated from the urine, could be recrystallized to satisfactory purity for elemental analysis, evidence of the identity of the isolated products from the urine is reasonably assured by the spectral data and paper chromatography R_f values. The "diacetyl" derivative was actually a triacetyl compound when including the acetyl group attached to hydrazine. The infrared spectra, however, did not distinguish whether the diacetamido occurs in association with the hydrazine part or the 5-amino part of the molecule. Fresh rabbit urine indicated only traces of nihydrazone and the 5-amino analog; however, the urine of chickens that had been dosed orally with 100 mg/kg body weight/day of nihydrazone showed essentially equal quantities of nihydrazone, 5-acetamido and the 5-amino metabolites.

In a series of studies, Buzzard et al. reported on the chromatographic study of urine from rats dosed with ^{14}C-nihydrazone as well as urine from chickens dosed with ^{14}C-nihydrazone (Problem No. 370.3, September 1, 1960, June 15, 1961, and September 1, 1961, NADA 13–200, Vol. 3).

The studies all show paper chromatographic evidence for the presence of the acetamido nihydrazone derivative in urine. The paper chromatographic profiles of urine are discussed here and will be referred to in succeeding discussions of the different metabolic pathways and species differences and are relevant to the Director's conclusions in section II.B. of this notice.

In this first study, one rat was dosed with 20 milligrams of ^{14}C-nihydrazone (formyl label) and one rat was dosed with 20 milligrams of ^{14}C-nihydrazone (acetyl label). The urine was first analyzed by paper chromatography using *n*-butanol: 95 percent ethanol: 0.5 *N* ammonium hydroxide in a 4:1:1: system (butanol system). Both labels yielded qualitatively similar chromatographs. From one label, presumably the formyl label, the authors found that 14 percent of the urine radioactivity was 5-acetamido-2-furaldehyde acetylhydrazone, 35 to 40 percent was the "415" metabolite that will be discussed later, 6 to 8 percent was an unknown acidic compound (R_f 0.3) and 30 to 40 percent remained at the origin.

Further paper chromatography of the urine samples was carried out in an SDA (specially denatured alcohol) 30: tris buffer system (SDA 30: 0.5M tris-(hydroxymethyl)-aminomethane in a 4:1 ratio). This system provided improved separation of the more polar materials that remained at the origin in the butanol system.

Comparative data for the rats given the acetyl-labeled nihydrazone indicated that only 6 percent of the urine radioactivity was the 5-acetamido-2-furaldehyde acetylhydrazone, 20 percent was the "415" metabolite, and there was no evidence for the unknown acidic compound at R_f 0.3 in the butanol system. Only a trace of nihydrazone was found. After chromatography in the SDA 30: tris buffer system, 14 percent of the activity was attributed to R_f 0.33 compounds, 10 percent to R_f 0.45 compounds, and 21 percent to R_f 0.70 compounds. Two other minor peaks represented about 12 percent of the urine radioactivity. No explanation is given for the apparent differences in results when the formyl label was used. Deficiencies in the use of the acetyl label, which have been previously discussed, would be expected to confound the relative proporitions of residues separated in the chromatographic systems.

Subsequent data were reported using the same chromatographic systems for the urine from a fasted 200-gram chicken given a 28.6-milligram dose of ^{14}C-nihydrazone (formyl label). Fifteen urine samples separated from feces were collected over a 31-hour period. The maxi-

V41160 AUG 17 76 UMI

mum excretion of radioactivity occurred between 2 to 5 hours after dosing. After 31 hours, 40 percent of the administered dose had been recovered in either urine or expired $^{14}CO_2$.

Sufficient raw data were not presented to show what percent of total excreted radioactivity may be assigned to each component chromatographically separated. However, from the data presented for two early collections of urine, it appeared that the nihydrazone and the 5-acetamido derivative were each about 4 to 6 percent of the total radioactivity, and the "415" compounds were about 16 to 17 percent of the total radioactivity in the respective samples. About 60 percent of the radioactivity remained at the origin in the butanol system previously described (1.25 to 2-hour collection sample), and about 10 percent of the radioactivity at R_f 0.35 in the butanol system was designated as an unknown acidic compound. By using the SDA 30: tris buffer system, the origin activity in the butanol system was separated into at least three major metabolites with R_f 0.33 (8.7 percent), R_f 0.45 (10.7 percent), and R_f 0.70 (34.2 percent). The 3 to 4.25-hour collection sample was analyzed for these data. The R_f 0.70 zone in this system also contained the unknown acidic compound with R_f 0.35 in the butanol system. The unidentified compound at R_f 0.35 in the butanol system was not acetylhydrazine, 5-nitrofuric acid, nor the endogenous substance, α-ketoglutaric acid.

The Director concludes that these data conclusively demonstrate a reductive pathway in chickens, rats, and rabbits as shown by the presence of the acetamido derivative of nihydrazone. Hence, the reduced compounds are not necessarily subject to hydrolysis of the carbon nitrogen double bond of the side chain or to ring cleavage, as will be discussed later. The reduced compounds are shown to be partially eliminated as the reduced intact drug. The Director concludes that the potential presence of reduced nihydrazone analogs and derivatives in edible chicken tissues may well be of major toxicological significance because there is reason to believe such compounds may be biologically active when ingested.

b. *Hydrolytic pathway.* A review of the literature on hydrazine derivatives indicates two usual pathways of metabolism in mammalian species. One is *N*-acetylation and the other is a hydrolytic pathway breaking the carbon-nitrogen double bond of hydrazones. By the hydrolytic pathway, nihydrazone would be metabolized to 5-nitro-2-furaldehyde and acetylhydrazide. These pathways influence toxicity. The *N*-acetylation appears to be a detoxification pathway. Monacetyl hydrazide appears consistently to have toxic properties that may approach those of hydrazine. However, 1,2-diacetylhydrazide produces fewer or diminished toxic reactions. Conversely, for the hydrazone derivatives, the toxicity is generally greater in those species where a hydrolytic cleavage of the carbon-nitrogen double bond occurs.

Free hydrazine and various hydrazine derivatives have been reported as carcinogenic in mice, rats, or hamsters (*Biancifiori Tumori* 60:429, 1974 and *Cancer Research*, 35:3693, 1975). The monoacetyl and diacetyl metabolites of hydrazine have not been tested for their carcinogenic potential.

Norwich presented work by McKennis et al. (Journal of Pharmacology and Experimental Therapeutics, 126:109–116, 1959) that included a discussion of previous work by others on the metabolism of certain hydrazines. McKennis et al. have shown that hydrazine and monoacetyl hydrazide on interperitoneal injection to rabbits are both metabolized to 1,2 diacetylhydrazide.

Olivard et al., in a previously referenced work on the metabolism of nihydrazone in the rabbit, reported that following oral administration of nihydrazone, the urine collected contained 5-nitrofuroic acid based on the paper chromatographic R_f value and spectral data, and also contained 1,2-diacetylhydrazide. The 1,2-diacetylhydrazide was identified by R_f value and Ehrlich reagent with subsequent column purification, crystallization, and demonstration of the identity by infrared spectra, R_f value, melting point, and mixed melting point (no depression) with authentic standard. The authors stated that no 1,2-diacetylhydrazide, acetylhydrazide, or 5-nitrofuroic acid was found in urine by paper chromatography if the rabbits were given nihydrazone interperitoneally. Similarly, they found no evidence by paper chromatography of 1,2-diacetylhydrazide, acetylhydrazide, or 5-nitrofuroic acid in the urine from a chicken given nihydrazone orally. The authors suggest that the hydrolysis of the carbon-nitrogen-double-bond linkage of the side chain is related to the liability of nihydrazone under conditions of acidity comparable to those in the mammalian stomach, and that it is unlikely to occur under the weakly acidic conditions of the gastrointestinal tract of the chicken.

It was shown by studies with chickens using the ^{14}C-nihydrazone (acetyl label) discussed in the first part of section II.A. of this notice, that a large amount of $^{14}CO_2$ was recovered in expired air as opposed to a much smaller amount of $^{14}CO_2$ recovered when the formyl label was used. Therefore, it would appear from this evidence and considering the evidence presented in the above studies by Olivard et al. that another type of hydrolysis may occur in the chicken. It appears that in the chicken, deacetylation might be a major hydrolytic pathway that was not discussed in the data presented by Norwich. Some compounds are known to be *N*-deacetylated in poultry, as evidenced by reports by S. A. Peoples and G. L. Westberg, Federation Proceeding, 34:227, 1975, and R. H. Nimmo-Smith, Biochemical Journal, 75: 284, 1960. The formation of deacetylated nihydrazone or its corresponding reduced analogs or derivatives in the chicken may result in tissue residues. Such residues might then be subject to hydroylsis in the gastrointestinal tract of man, involving breaking the carbon-nitrogen double bond, giving rise to hydrazine as well as potentially toxic nitrofuran metabolites.

The data presented by Norwich on nihydrazone show that a hydrolysis, breaking the carbon-nitrogen double bond of the side chain, is operant in the mammalian systems but does not appear to be operant in the chicken.

The Director concludes that hydrolytic pathways of two types may occur. The first type, deacetylation, has been indicated in the chicken by the large amount of expired $^{14}CO_2$ when the ^{14}C-nihydrazone (acetyl label) was orally administered compared to use of the formyl label. Although N-acetylation is generally the usual pathway for hydrazine metabolism is mammalian species, there is evidence for deacetylation of some drugs in poultry. The second type of hydrolysis, involving breaking the carbon-nitrogen double bond, has been shown in the rabbit. However, this hydrolysis does not appear to be operant in the chicken; this observation is based on the lack of evidence for 5-nitrofuroic acid, and mono- or diacetyl hydrazide as urinary metabolites. The Director concludes that deacetylated nihydrazone, and its reduced analogs or derivatives are of concern as potential tissue residues in chickens. Studies have not been presented by the sponsors of nihydrazone to show that the substantial levels of radioactive residues in chicken tissues are not due to the presence of such compounds. The Director further concludes that deacetylated nihydrazone derivates, if present in chicken tissues, upon ingestion by man would likely be subject to hydrolysis, breaking the carbon-nitrogen double bond, as indicated by the evidence for this pathway in mammalian species. This probability presents serious questions about man's potential exposure to free hydrazine, which is a demonstrated carcinogen, in addition to exposure to other potentially toxic derivatives of the 5-nitrofuran part of nihydrazone.

c. *Pathway involving formation of "415" metabolites.* A metabolite yielding a uv absorption maximum of 415 nanometers was found in rat, rabbit, dog, monkey, and chicken urine after dosing with nihydrazone according to the report by Olivard et al., previously referenced. The "415" metabolite did not appear to result from either the simple hydrolysis of the carbon-nitrogen double bond or from the reductive pathway, yet both a nitro group and a carbon-nitrogen double bond are apparently necessary for the formation of the "415" metabolite. Administration of "415" metabolite to the rat did not yield reduced nitrofurans nor did dosing with the reduced nitrofurans yield "415." The infrared spectra of "415" metabolite indicated a carboxyl anion, two carbonyl groups, a carbon double bond with no furan, nitro or aromatic group. The spectroscopist indicated there was a probability for the presence of OH and NH, but not much CH.

The compound with mild acid treatment instantly was converted to one with an R_f of 0.5 in the butanol paper chromatographic system previously described and had an absorption maximum of 400 nanometers. It is in turn gradually destroyed by 2.3N hydrochloric acid at 70° C. Chromatographs of the hydrolyzate showed no ninhydrin positive zones, as would be expected for amino acids. Preparation of the 2,4-dinitrophenylhydrazine derivative of "415," as indicated by the infrared spectra, gave a compound showing only one absorption peak in the carbonyl region in contrast to the 2 carbonyl peaks seen in the infrared spectrum of "415." The "415" metabolite can apparently be made photochemically from 5-nitro-2-furaldehyde diacetate and coupling with acetone acetylhydrazone. It is believed that the "415" compound retains the carbon-nitrogen double bond of the side chain and thus would include the hydrazine part of the molecule. Buzzerd and Olivard proposed that the "415" compound may be related to the Stenhouse dyes formed from aniline and furfural. However, all attempts by the sponsors to identify the "415" metabolite, which appears to be the major residue component in the urine of animals dosed with nihydrazone, have been unsuccessful.

The Director concludes that a pathway involving formation of "415" metabolite is operant in chickens and mammalian species, and the evidence indicates this metabolite is drug related and not an endogenous substance. Its potential presence as a tissue residue and a part of the total radioactive residue seen in chicken tissue has not been resolved.

d. *Furan ring cleavage.* Buzzard, Hoctis and Klein (Problem No. 370.3, October 1, 1961, NADA 13–200, Vol. 3) showed that by alkali-catalyzed hydrolysis of ethyl-5-amino-2-furoate, followed by acid hydrolysis of the products of the ring opening reaction, α-ketoglutaric acid was formed, identified as the 2,4-dinitrophenyl hydrazone derivative) as well as β-formyl propionic acid. A mechanism for the reaction was proposed. Since attempts to prepare 5-amino-2-furoic acid were not successful, it could not be shown whether nihydrazone would react similarly. Based on the observed chemical activity of the model furan studied, Norwich hypothesized that the slower depleting pool of residues in chickens dosed with nihydrazone arose from a similar degradation of nihydrazone through formation of α-ketoglutaric acid. The work of Buzzard et al., discussed in section II.A.1.d. of this notice, which presents presumptive evidence for the incorporation of ^{14}C into endogenous substances in chicken tissues, in the opinion of Norwich, adds further support to the hypothesis.

There is no evidence to show that the chemical reaction of the model furan giving rise to α-ketoglutaric acid is a reaction that would occur in the chicken. Investigation of the "415" metabolite in urine also gave some evidence that ring cleavage may be involved. However, as previously discussed, "415" is not an endogenous substance.

Even if α-ketoglutaric acid were one of the products of nihydrazone metabolism, there is question about what part of the radioactive residues in chicken tissues would be attributable to this hypothetical pathway. As discussed in section II.A.1.d. of this notice, the evidence provided by Buzzard et al. for the identification of the radioactive residues in chicken tissues as endogenous substances is presumptive and does not provide quantitative accountability.

Therefore, the Director does not accept the evidence provided by Norwich as sufficient to show that the residues persisting in chicken tissues after a short withdrawal period are the result of nihydrazone metabolism to endogenous substances through ring cleavage and formation of α-ketoglutaric acid. Norwich has provided evidence in animals that ring cleavage of nihydrazone may occur in the formation of "415" metabolite that is not an endogenous substance. Norwich has not provided conclusive evidence that ring cleavage of nihydrazone occurs in chickens to produce the formation of α-ketoglutaric acid. Even if this pathway did occur, no quantitative accountability of residues identified as endogenous substances has been provided. Furthermore, a pathway by which nihydrazone would be degraded to α-ketogolutaric acid would require hydrolysis of the carbon-nitrogen double bond. Therefore, the fate of the hydrazine part of the molecule would also have to be accounted for. Studies provided by Norwich indicate that this hydrolysis is not prevalent in the chicken. Therefore, the Director concludes that a pathway involving furan ring cleavage does not necessarily lead to metabolities that may be presumed safe without supporting evidence.

In summary, the Director concludes that each of the studies presented in this part adds to knowledge of the metabolism of nihydrazone, but the studies do not satisfactorily answer the significant questions about the safety of the residues. There is a demonstration of a reductive pathway leading to the formation of compounds of toxicological concern. There is also evidence of a possible deacetylation pathway in the chicken that leads to the potential for compounds which, as residues, if ingested by mammalian species may result in exposure to free hydrazine, which is a carcinogen, and other potentially toxic nitrofuran analogs and derivatives. There is further demonstration of a major pathway involving formation of "415" metabolite; it appears to result from ring cleavage but with the hydrazine part of nihydrazone intact. From all of these factors and the lack of information on tissue residues arising from these proposed pathways of metabolism, the Director concludes that the substantial levels of radioactive residues in chicken tissue even after a 4- or 5-day withdrawal period are not shown to be safe. There is no conclusive evidence that nihydrazone is degraded to α-ketoglutaric acid in the chicken. Nor is there concurrent accountabiilty for the hydrazine part of nihydrazone in this proposed pathway. Even if the identification of some radioactive residues in chickens as endogenous substances, based on column chromatography, were accepted, quantitative accountability for these residues is lacking. Therefore, the Norwich contention that nihydrazone residues in chicken tissue, following the currently labeled conditions of use, are endogenous substances and therefore safe, cannot be accepted by the Director.

B. *Sufficient Information Has Not Been Provided about the Residues to Determine the Appropriate Testing Required in Laboratory Animals to Estimate the Cumulative Effects of Human Exposure to the Residues (Step 2).* Norwich has demonstrated that very little of the residue in edible tissues is nihydrazone and most of the residues are metabolites.

The Food and Drug Administration must assess the toxicity of the total residue because this is what man will be exposed to in food. This assessment would be based ideally on the identification of each of the metabolites in the residue, their synthesis, and subsequent testing of the parent drug and all the metabolites for the cumulative effects of exposure. However, this approach is usually impractical.

Recognizing this, FDA makes judgmental assessments from certain types of data about the residue and metabolism. A determination is made about assumptions that can be accepted from the toxicity testing of the parent drug. Because the test animal metabolizes the drug, the resulting dose-response effects represent to some degree the cumulative effects of exposure to each of the biologically active substances produced by the test animal.

Norwich has provided some comparative metabolic data in the rat and chicken through chromatographic analysis of the urine collected after treatment with labeled drug. These data show certain qualitative similarities between the two species. Both the chicken and rat appear to excrete "415" metabolites and 5-acetamido-2-furaldehyde acetylhydrazone; this indicates that both the reductive pathway and the pathway leading to formation of the "415" metabolite are involved in both species. The proportion of the total radioactivity in urine for each of the compounds appears to be somewhat higher for the rat than for the chicken. Only trace quantities of nihydrazone are reported in rat urine, whereas nihydrazone was about 5 percent of the total radioactivity in early collection samples of chicken urine, roughly equal to the amount of 5-acetamido-2-furaldehyde acetylhydrazone excreted in urine. It was also reported that an acidic compound with an R_f at about 0.3 in the butanol chromatographic system represented about 10 percent of the radioactivity in chicken urine. This compound was also reported in the urine of the rat treated with the formyl label, but the compound was not seen with the acetyl label. Substantial quantities of unknown compounds were seen in both rat and chicken urine which remained at the

V41160 AUG 17 76 UMI

origin in the butanol system and were further separated in the SDA 30: tris buffer system, indicating that these materials represented more polar metabolites.

One major difference is apparent in the chicken versus mammalian species. This involves the hydrolytic pathways previously discussed. Deacetylation is an apparent major pathway in the chicken, and there is no evidence for a hydrolytic pathway in the chicken that involves breaking the carbon-nitrogen double bond. Conversely, there is evidence that a hydrolytic pathway with breaking of the carbon-nitrogen double bond is operant in the mammalian species, and that the resulting hydrazide is acetylated. The scientific literature suggests that deacetylation in mammalian species is not a significant pathway.

Although the sponsors have not provided information characterizing the tissue residues, it may be assumed that at least some of the metabolites found in chicken urine may also be present as tissue residues. The "415" metabolite and at least some of the reduced nitrofurans appear as urinary metabolites in the chicken as well as in mammalian species. Therefore, in testing nihydrazone in the rat, some exposure of the rat to these metabolites would have occurred. However, chicken tissue may contain deacetylated metabolites of nihydrazone. Testing of nihydrazone in the rat is unlikely to have provided exposure to deacetylated nihydrazone or deacetylated derivatives of nihydrazone formed through other pathways operant in the chicken. Both the nitrofuran part of nihydrazone as well as the hydrazide part of nihydrazone may be involved with tumorigenesis. In general, acetylation appears to be a detoxification pathway for hydrazines. Therefore, there is some reason to believe that deacetylated nihydrazone metabolites may be more toxic than nihydrazone when ingested by mammalian species.

In order to make an adequate assessment of the extent to which testing of nihydrazone can be used to evaluate the safety of residues, sufficient information about the residues in chickens is required in addition to comparative metabolic data in the test species. Because the nature of the residues in chicken tissues is not known, there are unanswered questions about potential residues, including those residues that may give rise to exposure to free hydrazine when ingested. Therefore, the Director concludes that not only is the toxicological testing provided for nihydrazone inadequate, but he is unable to determine whether testing of metabolites in addition to the parent drug is required to determine the safe level of human exposure to residues in food. Step 2 has not been fulfilled; therefore, the requirements for step 3 cannot be fully determined.

C. *Adequate Dose-Response Data in Test Animals to Determine the Cumulative Effects of Dietary Exposure to the Residue Compounds Has Not Been Provided; Therefore, the Maximum Acceptable Concentration of Residues in Food Cannot be Established Using Appropriate Safety Factors to Assure That Human Exposure to Residues in the Total Diet Does Not Exceed a Level Deemed Safe (Step 3).* As discussed under section I of this notice, the Director has concluded that adequate testing of the parent drug, nihydrazone, has not been provided. Also, under steps 1 and 2, discussed in section II. A. and B. of this section, the Director concluded that adequate information has not been provided about the residues to determine if toxicity testing of residue compounds in addition to the parent drug is required to estimate conservatively the cumulative effects of exposure to the residues.

The Director concludes that without such essential information about the residues and adequate toxicity testing data, he cannot, in light of the new evidence, determine if nihydrazone requires regulation as a carcinogenic animal drug or, alternatively, to reasonably estimate a maximum acceptable level of residue in food that can be deemed safe. Therefore, he concludes that adequate information has not been provided to assess the cumulative effects of exposure and to determine the appropriate safety factors required under section 512(d)(2)(B) and (C) of the act.

D. *Sufficient Information about the Residues Has Not Been Provided to Establish the Conditions Necessary for the Analytical Method Used to Control Residues (Step 4).* The evaluation of an analytical method for residues first requires a determination of the tissues to be analyzed, the compound to be measured, and the lower limit of mesurement that must be achieved to control total residues adequately. Only then, after selection of these parameters, is it meaningful to consider whether the method proposed by the sponsor meets other characteristics necessary for a practicable reliable method.

1. Determination of the target issue: The most practical approach to monitoring and controlling residues in the field is dependent on the selection of that edible tissue in which residues require the longest time to deplete to a "safe concentration." Therefore, by monitoring this tissue to assure that residues are below a "safe concentration," it can be assured that all residues in the carcass are below "safe concentrations." In lieu of this determination (identification of the target tissue), all edible tissues, including milk where applicable, must be monitored. This would place an additional burden on public funds for monitoring.

The target tissue is readily identified if the requirements of step 1 of the evaluation process are met. Although Norwich has presented data on the total residues, as measured by radioactivity and expressed as nihydrazone equivalents, these data show substantial amounts of residues and do not show depletion to levels that might be presumed safe, considering that nihydrazone is a tumorigen and may be a carcinogen. From the radiotracer studies it would appear that liver or kidney may be the target tissue. On the other hand, data on the measurement of parent drug, nihydrazone, indicate that skin with adhering fat shows residues at the highest level for the longest time for this residue component. Because adequate data have not been provided to determine when total drug residues of toxicological interest are reduced to levels that can be presumed safe, and depletion characteristics of the component residues are not provided relative to the total residues down to an established safe level, it is not possible to make an assignment of the target tissue.

2. Determination of the compound (marker) that can be measured by the analytical method to assure control of total residues: Because the radiolabeled drug approach used initially to estimate total residues is not applicable to regulatory use, an alternative approach must be developed to assure control of total residues after drug approval. This is achieved by selecting an appropriate residue compound, which may be the parent drug or one or more metabolites, in such a way that its measurement serves as a valid indicator that when the marker compound is below a certain level in the target tissue, all residues in edible tissues are at safe levels. This step is essential to determine if the method of analysis for regulatory use is adequate. To determine a valid marker, adequate information, e.g., information derived from conducting an adequate metabolism study, is required to relate the proportionate amount of each of the residues to the total residue and their change in quantitative relationships with time. The marker must be a known proportion of the total residue when the total residue depletes to the "safe concentration" in the target tissue. It also must be structurally identified so that an adequate and specific method of analysis can be developed for its determination.

The regulatory method proposed by Norwich to control residues uses the parent drug, nihydrazone, as a marker in each of the major edible tissues. Norwich has failed to submit substantiating evidence to show that the measurement of nihydrazone is adequate to control total residues of potential concern or, alternatively, to show that all other residues are safe and do not need to be controlled.

3. Determination of the lower limit of measurement required for the analytical method: Establishment of the lower limit of measurement required for the assay begins with the availability of adequate toxicological testing to determine the cumulative effects of exposure. As described in section I of this notice, the sponsors have not provided adequate toxicological testing of nihydrazone. Also, as described in steps 1 and 2 in section II.A. and B. of this notice, the sponsors have not provided adequate information about the substantial levels of residue shown by radiotracer studies to show if portions of the residue can be removed from toxicological concern, and to adequately define the residues of interest to determine if testing of any of

the metabolites in addition to the parent drug, nihydrazone, is required for a determination of safety. Therefore, lacking this essential information, the Director concludes that he is unable to make an appropriate estimate of the acceptable level of exposure to total residues of interest in food.

Even if adequate testing were available to estimate the acceptable level of exposure to total residues in food, Norwich has not provided adequate information about a marker compound to determine the lower limit of measurement required for the assay.

As previously stated, Norwich has proposed that the measurement of nihydrazone is adequate to assure control of residues. The proportional relationship of the amount of nihydrazone to the amount of total residues indicates that nihydrazone is even less than 1 percent of the total residue during the early periods of withdrawal. It is therefore unlikely that nihydrazone can be used as a suitable marker unless it were shown that the major portion of the residue, reflected by the radioactivity measurements, can be qualitatively and quantitatively defined to show that these residues are of no toxicological interest. And if the residues cannot be shown to be of no toxicological interest, the lower limit of measurement that would have to be placed on nihydrazone to assure no significant residues from the use of this tumorigenic and potentially carcinogenic drug would probably be beyond technological achievement.

When a "safe concentration is assigned for the total residue of interest, and a suitable marker is selected and its proportional relationship to the total residue at the "safe concentration" is known, one further adjustment is necessary to determine the lower limit of measurement required for the assay. This last adjustment takes into account the degree to which the method of analysis recovers the residue from the sample. Minimum standards for recovery for the acceptance of the method take into account that 100 percent recovery is rarely achieved and that a combined evaluation of the precision and accuracy for measurement of the marker must be considered.

Norwich is aware of the principles just described for the selection of a target tissue, marker compound, and the adjustments required to establish conditions for the assay; this is evidence by Norwich's citation of a paper prepared by two FDA scientists in a submission for furazolidone (NF–180) to FDA on November 11, 1975. The cited paper by M. K. Perez and N. E. Weber, entitled "Requirements for Metabolic Studies—Impact on Food Safety Regulation" was presented at the Gordon Research Conference on Drug Metabolism, June 23–27, 1975.

The Director concludes that he cannot make an assessment of the toxicity, including the carcinogenic potential and potency, of nihydrazone without adequate testing data; he cannot conclude that nihydrazone serves as a valid marker for control of total residues of toxicological interest; and therefore he cannot without adequate supporting data determine the conditions necessary for the analytical method used to control residues. The requirements of step 4 have not been fulfilled. He concludes that the new evidence on nihydrazone (F–64) and furazolidone (NF–180) leads to a determination that the methods of analysis for residues of nihydrazone (NF–64) are not shown to be adequate.

E. *Practicable Methods of Analysis are Not Available to Assure that Total Residues in the Daily Diet of Humans Do Not Exceed a Level Deemed Safe (Step 5).* Section 514.1(b)(7) (21 CFR 514.1(b)(7)) requires the sponsor of a new animal drug application to provide a practicable method of analysis to be used for the control of residues of its product. A "practicable" method is defined by FDA as one that reliably measures the compound throughout all residue levels of interest, and also is sufficiently rapid and reasonable in terms of the expertise and equipment required to be applicable for use in the surveillance and control of residues. "Reliability" is a combination of accuracy, precision, and specificity. Accuracy and precision are quantitative terms. "Accuracy" is the measure of deviation from the true value, and "precision refers to the variability of measurement in replications either by one analyst or within a laboratory or between laboratories. A method may provide reliable measurement if the measurements are not too variable even though it measures less than or more than 100 percent of the true value. Therefore, accuracy and precision must be considered together.

"Specificity is a qualitative term. The measurements obtained by the method must reflect only the compound of interest. Because the method will be used on samples from animals for which exposure history is unknown, the techniques used in the method must be adequate to assure not only the integrity of the measurements, but also the identity of the residue to the exclusion of other itnerfering substances. Therefore, when the quantitative measurements are made by techniques that are not inherently specific, a confirmatory test is required as part of the official method to assure the identity of the residue. The most recently submitted methodology for nihydrazone is based on chromatographic separation and fluorometric determination, which are both nonspecific techniques.

The uses of nihydrazone were approved prior to that time when regulatory methods of analysis for residues were required. In 1962, a method of analysis for tissues capable of measuring nihydrazone as low as 0.1 ppm was submitted in Food Additive Petition No. 665. The method is based on acid hydrolysis to break the carbon-nitrogen double bond, generating 5-nitro-2-furaldehyde and reaction with phenylhydrazone to form the 5-nitro-2-furfural phenylhydrazone derivative, which is measured colorimetrically.

This method was not subjected to validation trials by FDA because it predated this current FDA preclearance requirement. The data submitted in support of this method only included studies of the recovery of nihydrazone from samples to which known amounts of the drug had been added (spiked samples). Recoveries of about 50 percent were estimated by FDA for samples fortified at 0.1 ppm. No evidence has been submitted to show that the method will satisfactorily recover nihydrazone when the residue is naturally incurred through drug treatment (dosed samples) at a level of 0.1 ppm. Furthermore, the method is not specific.

After FDA received reports that nitrofurans had induced tumors in female rats, the drug sponsors were advised in 1969 and officially informed in a conference held January 4, 1971, that the residue methods were no longer deemed adequate. They were told that methods capable of measuring at least 2 ppb of the drug in edible tissues were required. In response to the notices of opportunity for hearing, Norwich submitted newly developed methods of analysis.

For the measurement of tissue residues, Norwich concentrated primarily on the method for furazolidone (NF–180) in the belief that this method could be readily adapted for the measurement of tissue residues for the other nitrofurans.

A discussion of the results on the evaluation of the furazolidone (NF–180) method for tissue analysis (including swine liver, kidney, muscle, and fat and poultry liver, kidney, muscle, and skin with adhering fat) is presented in the May 13, 1976 FEDERAL REGISTER notice for furazolidone. In that notice, the Director concluded that the methods for edible tissues were not shown to be adequate.

Although the drug sponsors have submitted far more information to support the adequacy of the methods of analysis for furazolidone (NF–180) than they have submitted on methods of analysis for nihydrazone, the sponsors have in the intervening years submitted some progress reports on the development of analytical methods for nihydrazone.

In 1971, three different progress reports were submitted on the analysis of nihydrazone in chicken tissues:

1. Project No. 476.17 Interim Report, "Chemical Method for the Determination of Concentrations of Nihydrazone in Chicken Liver at 2 ppb," submitted to FDA by cover letter dated June 30, 1971.

The method presented was based on a fluorometric-densitometry measurement similar to the method submitted for furazolidone (NF–180); the method was not shown to be reliable in the validation trial in 1973. Farrand integrator counts were provided for five control chicken liver samples and for chicken liver samples fortified with 2 ppb of nihydrazone. Norwich reported an approximate recovery of 40 percent using an external standard curve and making corrections for aliquot losses. Food and Drug Administration chemists estimated the actual recovery from these data to be about 28 percent. Individual recoveries for each

V41160
AUG 17 76
UMI

sample were not provided by Norwich. The sponsor was notified that these data were not acceptable.

2. By letter dated May 17, 1971, Norwich provided data on the recovery of nihydrazone from chicken liver, kidney, and mucle samples. The same fluorometric-densitometry method was used. Norwich reported the following recoveries and standard deviations from tissues fortified with 2 ppb of nihydrazone: liver (78±31 percent), with a range of 35 to 102 percent; kidney (85±26 percent), with range of 43 to 121 percent; and muscle (77±18 percent), with a range of 30 to 96 percent. These recoveries were corrected for aliquot losses and losses in partitioning between solvents. Therefore, they appear higher than the actual recoveries. The Food and Drug Administration has concluded that the results are too erratic and too low for an acceptable method of analysis.

3. On June 30, 1971, in a letter to the FDA hearing clerk, Norwich submitted an interim report on Project No. 476.17, June 29, 1971, "Chemical Method for the Determination of Nihydrazone in Chicken Skin with Fat at 2 ppb." This project used the same fluorometric-densitometry method used for the other two submissions. Data were presented for 7 control samples of skin with adhering fat and for 21 samples fortified with 2, 4, or 6 ppb of nihydrazone. No recovery data were provided and none could be calculated in the absence of a standard curve. The integrator counts were variable, and the result for one of the 4-ppb-fortified samples was below several of those reported for the 2-ppb-fortified samples. A similar overlap of values for the 4- and 6-ppb-fortified samples was observed. These data were rejected as inadequate. No further data have been supplied by the drug sponsors on methods of analysis for nihydrazone.

None of the submitted methods of analysis for nihydrazone, i.e., the colorimetric or fluorometric-densitometry methods, are inherently specific. No confirmatory tests have been provided by the sponsors that can be used to confirm the identity of any residue found by the proposed assay methods.

The Director concludes that the sponsors have not shown that adequate practicable methods of analysis for residues of nihydrazone in edible chicken tissue are available. Appropriate data have not been provided to determine if nihydrazone can be used as a marker to control total residues in edible products, nor to determine the lower limit of measurement required for a method to assure that total residues do not exceed safe levels. The Director concludes that the methods proposed by the sponsors for the determination of nihydrazone are not quantitative and are not adequately specific at the levels of measurement that are likely to be necessary, based on the tumorigenic property of the drug. Therefore, the methods proposed are not quantitatively or qualitatively reliable and practicable methods for regulatory use, even if it were established that measurement of nihydrazone at 2 ppb was adequate to control total residues of toxicological interest. Therefore, step 5 and the requirements of section 512(b)(7) of the act have not been met.

F. *Practical Conditions of Use Cannot be Prescribed on the Label of Products to Assure Safe Use (Step 6).* Section 512(b)(8) of the act requires that conditions of use assure there are no unsafe residues, and section 512(d)(2)(D) of the act adds a further requirement that these conditions be such that they are "reasonably certain to be followed in practice."

It is required by FDA that residue depletion studies be conducted for each drug use under simulated field use conditions to develop data for establishing the withdrawal period. A withdrawal period is the time following drug treatment when, because of residues, a treated animal cannot be slaughtered for food. A withdrawal period must be sufficiently long to assure adequate residue depletion, but it cannot be so long that it is impractical and unlikely to be followed in practice. An adequate analytical method for residues, preferably the same method that will be approved for regulatory use, must be used to measure the residues in the depletion studies.

Because Norwich has not provided adequate data to determine the requirements necessary for an analytical method to control total residues of toxicological concern, depletion studies under those conditions currently required by FDA for the establishment of an adequate withdrawal period cannot be designed. Norwich, through its radiotracer studies, has shown that substantial levels of residue, expressed as nihydrazone equivalents, are present in edible tissues following drug treatment and persisting through the longest periods of withdrawal (5 days with the formyl-labeled nihydrazone). Although radiolabeled studies may be used initially to estimate drug depletion, it is usually not practical to follow this approach for the final determination of the withdrawal period. The establishment of a withdrawal period requires consideration of animal-to-animal variability, thus requiring that larger numbers of animals be used for the determination of residues. Likewise, it is important to have data using the chemical method proposed for control of residues and to compare these results with the results from the radiotracer metabolism studies to evaluate the capability of the method satisfactorily to recover the residue when naturally incurred.

Norwich has failed to show through the radiotracer studies that a safe and practical withdrawal period can be established for the uses of nihydrazone. Radioactive residues, expressed as nihydrazone equivalents, are shown in the few animals examined to be at levels of 1 to 13 ppm in tissues after treatment with the ^{14}C-formyl-labeled nihydrazone. They are shown to persist in muscle tissue at levels just below 1 ppm and in other major edible tissues at levels from 1 to 2 ppm following treatment of birds on the approved level of drug for 3 weeks and subsequent dosing with the radiolabeled drug for 4 days and observation of a 5-day withdrawal period.

Norwich has provided data in 3 reports on the depletion of parent drug, nihydrazone, from edible tissues:

1. Problem No. 476.03, Final Report "NF-64 and Metabolite Residues," September 24, 1969, NADA 13-200V, Vol. 5. ^{14}C-Nihydrazone (formyl label) was given to broiler chickens in their ration at 100 grams per ton for 5 days. The birds were then maintained on unmedicated feed, and four birds were sacrificed each day thereafter, up to 5 days after withdrawal from medication. A reverse isotope dilution technique was used to determine parent drug, nihydrazone, in muscle, liver, kidney, and skin-with-fat tissues. Norwich claimed the reverse isotope procedure was capable of measuring nihydrazone as low as 2 ppb. At 0-day withdrawal the levels of nihydrazone were reported as follows: muscle (less than 2 ppb to 9 ppb), kidney (4 ppb to 23 ppb), skin with fat (3 ppb to 37 ppb), and liver (less than 2 ppb and 3 ppb). Norwich reported that no nihydrazone was detected at the other withdrawal times, except for skin with fat. One skin-with-fat sample out of four examined after 3 days withdrawal indicated 2 ppb of nihydrazone.

2. Research Report No. JMS 63:1, "Nihydrazone Residue Analysis of Tissues of Chickens Receiving Rations Containing 100 g Nihydrazone per Ton of Feed for Eight Months," August 27, 1963, NADA 13-200, Vol. 5, from letter of submission to FDA January 8, 1971. Edible tissues from five birds given nihydrazone in the feed at 100 grams per ton for 3 months were analyzed using a colorimetric procedure. Norwich claimed the colorimetric procedure could detect nihydrazone at levels as low as 0.1 ppm. Norwich reported that all tissues contained less than 0.1 ppm of nihydrazone at 0-day withdrawal. Positive values for one liver and one kidney sample were reported but were dismissed by Norwich as false positives because of the lack of the characteristic pink or red color generally observed for the 5-nitro-2-furfural phenylhydrazone derivative during column chromatography.

3. "Tissue Residue Withdrawal Studies for Nihydrazone (Sonifur) in Chickens Fed Nihydrazone at 100 Grams Per Ton of Feed for Eight Weeks," from a Memorandum from Dr. Mertz to Dr. Heotis, November 9, 1971, submitted to FDA by cover letter of November 10, 1971, NADA 13-200V, Vol. 5.

Edible tissues from chickens fed a ration containing nihydrazone at 100 grams per ton for 8 weeks were analyzed by the fluorometric-densitometry method described in section II.E. of this notice. Norwich claimed the fluorometric-densitometry method could measure nihydrazone as low as 2 ppb. Samples of liver, muscle, kidney, and skin with fat from birds sacrificed at 4 and 5 days after withdrawal from medication were examined. One out of eight liver samples after 5 days withdrawal was reported to contain nihydrazone at 2 ppb. One out of seven skin-with-fat samples examined after 5 days withdrawal from medication was reported to contain nihydrazone above 2 ppb, and an additional sample was reported questionable.

The Director concludes that withdrawal periods are necessary for the safe use of nihydrazone. The currently labeled withdrawal period for chickens now voluntarily used by the sponsors is 4 days. The Director concludes that data to support this withdrawal period or any practical withdrawal period has not been provided because of the following reasons:

a. The data show that the levels of total residue, from the limited radiotracer studies available, are substantial and not shown to be safe.

b. The data on depletion of nihydrazone where larger numbers of birds were used are not adequate because no data have been provided to show whether the measurement of nihydrazone in edible products can be used to control total residues of toxicological concern and, if so, at what level its measurement is required to assure that all residues are below concentrations deemed safe.

c. The chemical methods used to determine the depletion of nihydrazone in chicken tissues are not shown to be adequate, even if nihydrazone could be shown to be an adequate marker for total residues. In the second study the method of analysis would not be sufficiently sensitive, based on the known tumorigenic properties of the drug. In the third study the method used, even if it could be shown that nihydrazone measurement at 2 ppb was adequately sensitive, is not aceptable because the supporting data on the method are not adequate to assure the reliability of results. Likewise, in the first study the results are so variable that a withdrawal period for the depletion of parent drug, nihydrazone, if nihydrazone were accepted as a marker at 2 ppb, could not be established with reasonable certainty, based on the numbers of animals used in view of data presented. The requirements of step 6 and section 512(b)(8) and (d)(2)(D) of the act have not been fulfilled.

Therefore, the Director is hereby withdrawing the notice of opportunity for hearing issued March 31, 1971, proposing to withdraw approval of NADA's providing for the use of nihydrazone (NF-64) in food-producing animals. Under section 512(e)(1)(B) of the act (21 U.S.C. 360b(e)(1)(B), the Director proposes to withdraw approval of certain existing NADA's providing for the use of nihydrazone in food-producing animals on the grounds that such use violates section 512 of the act in that such use has not been shown to be safe.

This notice applies to all outstanding NADA's for the use of nihydrazone in food-producing animals. All such applications known to FDA are listed below by NADA number and by each applicant's name and last known address in FDA records. Copies of this notice are being forwarded by registered or certified mail to each of the known applicants. Notice to other applicants or holders of NADA's whose identity is not known to FDA is given by this publication.

13-195, Hess and Clark, Division of Rhodia, Inc., 7th and Orange St., Ashland, OH 44805.

13-200, Norwich Pharmacal Co., Division of Morton-Norwich Products, Inc., 13-27 Eaton Ave., Norwich, NY 13815.

Any holder of an approved application that elects to avail itself of an opportunity for hearing pursuant to section 512(e)(1) of the act and § 514.200 of Chapter I of Title 21 of the Code of Federal Regulations must file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, a written appearance requesting such hearing by September 16, 1976, giving the reasons why approval of the application should not be withdrawn, and providing a well-organized and full-factual analysis of the scientific and other investigational data such holder is prepared to prove in support of its opposition to the Director's proposal. A request for hearing may not rest upon mere allegations or denials but must set forth specific facts showing that there is one or more genuine and substantial issue(s) of fact requiring a hearing. Responses to this notice and copies of published literature cited in this notice may be seen in the office of the Hearing Clerk, Food and Drug Administration, during regular business hours, Monday through Friday.

If a hearing is requested and is justified by any holder's response to this notice of opportunity for hearing, the issues will be defined, an Administrative Law Judge will be assigned, and a written notice of the time and place at which the hearing will commence will be issued as soon as practicable.

Any hearing on the withdrawal of approval of the foregoing NADA's will be open to the public. If, however, the Director finds that portions of the applications that serve as a basis for such a hearing contain information concerning a method or process that is entitled to protection as a trade secret, that part of the hearing will not be public, unless the respondent so specifies.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343-361 (21 U.S.C. 360b)) and under authority delegated to the Commissioner (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.29) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)).

A discussion of the economic and environmental impact of this action is set forth in the notice of proposed rulemaking on nihydrazone, which is published elsewhere in this issue of the FEDERAL REGISTER.

It is hereby certified that the economic and inflation effects of this proposal have been carefully evaluated in accordance with Executive Order 11821.

Dated: August 6, 1976.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

PART III:

DEPARTMENT OF DEFENSE

Department of the Army

ENVIRONMENTAL QUALITY

Facilities Engineering, Pest Control Services

V41 1 160 AUG 17 76 UMI

DEPARTMENT OF DEFENSE

Department of the Army

[32 CFR Part 657]

ENVIRONMENTAL QUALITY

Facilities Engineering, Pest Control Services (AR 420–76)

Notice is hereby given that the Secretary of the Army, acting through the Chief of Engineers, is proposing a regulation to prescribe the policies, responsibilities and procedures for conducting pest control services on all Army installations and activities. The regulation implements Department of Defense Directive 4150.7 and the policies and procedures of 32 CFR 650, "Environmental Protection and Enhancement," and 40 CFR 165—"Regulations for the Acceptance of Certain Pesticides and Recommended Procedures for the Disposal and Storage of Pesticides and Pesticides Containers." The proposed regulation is being published pursuant to the following authorities: Executive Order 11870, Environmental Safeguards on Activities for Animal Damage Control on Federal Lands; Executive Order 11752, Prevention, Control and Abatement of Environmental Pollution at Federal Facilities; Pub. L. 92–516, Federal Environmental Pesticide Control Act of October 21, 1972; Pub. L. 93–205, Endangered Species Act of 1973. This regulation applies to: Installations and activities in use by the Regular Army, those held in inactive or standby condition for future active use by the Regular Army, and those in excess category; Federally operated installations and activities, or portions thereof, which are in full-time or intermittent use by the National Guard, or which are being held by the Department of the Army for use by the National Guard; Installations and activities, or portions thereof, which are in full-time or intermittent use by Army Reserve or ROTC. This regulation does not apply to: Installations and activities, or portions thereof, which have been licensed or transferred to the States, to the Commonwealth of Puerto Rico or to the Territory of the Virgin Islands for use by the National Guard; Civil Works functions of the Corps of Engineers; Facilities occupied by Army activities as tenants when responsibility for support is vested in another Government agency.

The proponent agency of this regulation is the Office of the Chief of Engineers. Prior to the adoption of this proposed regulation, consideration will be given to any comments, suggestions, or objections thereto which are submitted in writing to the Chief of Engineers, Forrestal Building, Washington, DC 20314, ATTEN: DAEN–FEB–N on or before September 16, 1976.

Dated: August 4, 1976.

W. O. BACHUS,
Brigadier General, USA,
Director of Facilities Engineering.

This regulation provides general Department of the Army policy, and guidance in pest control services. Local limited supplementation of this regulation is permitted but not required. If supplements are issued, Army staff agencies and major Army commands will furnish one copy each to HQDA (DAEN–FEB) WASH DC 20314; other commands will furnish one copy each to the next higher headquarters. A Department of the Army pamphlet supplementing this regulation will be published that will provide detailed guidance to pest controllers on operational, procedural, reporting and record keeping requirements.

This regulation supersedes AR 420–76, 24 November 1971.

PART 657—FACILITIES ENGINEERING, PEST CONTROL SERVICES (AR 420–76)

Subpart A—General

Sec.
657.1 Purpose.
657.2 Applicability.
657.3 Explanation of terms.
657.4 Objective.

Subpart B—Policies

657.11 General.
657.12 Supervision.
657.13 Operations.
657.14 Materials and equipment.
657.15 Training and certification.
657.16 Environmental quality.
657.17 Nonappropriated fund activities.
657.18 Property leased to the Government.
657.19 Cooperation with other agencies.
567.20 Quarantine.
657.21 Aerial application of pesticides.
657.22 Outleased property.
657.23 Contractual services for pest control.

Subpart C—Responsibilities

657.31 MACOM entomologist.
657.32 Facilities engineer.
657.33 Installation commanders.
657.34 Surgeon general.
657.35 Building occupants.

Subpart D—Procedures

657.41 Handling.
657.42 Contract operations.
657.43 Record keeping and reporting requirements.

Subpart A—General

§ 657.1 Purpose.

This regulation provides policies, responsibilities and certain procedures for pest control activities at U.S. Army installations.

§ 657.2 Applicability.

The regulation applies to all Department of the Army installations and activities owned and/or controlled by the Department of the Army, including those in full-time or intermittent use by the ARNG and USAR.

§ 657.3 Explanation of terms.

The terms used herein are explained as follows:

(a) *Pests.* Those organisms which adversely affect the health of man and animals (except those living on or in man or animals); which attack military facilities, stored supplies or equipment; or which are otherwise undesirable by their presence.

(b) *Pesticides.* Substances or combinations of substances intended for preventing, destroying, repelling or mitigating pests.

(c) *Pest control services.* All actions taken to prevent or mitigate pest problems including surveillance, determining proper application procedures, and operational implementation of chemical, physical and biological control techniques.

(d) *Pesticide classification.* A categorization of pesticides, based on toxicity and use patterns, for general or restricted use by the U.S. Environmental Protection Agency (EPA).

(e) *Certification.* Recognition by the MACOM and/or a State certification agency that a pest control supervisor or operator has been trained and is qualified to use pesticides.

(f) *MACOM entomologist.* A professional entomologist serving on the headquarters engineer staff of the MACOMs or a subordinate command, as appropriate.

(g) *Operating personnel.* Trained pest control services personnel who are employed in the facilities engineering organization that have a valid Certificate of Competency, DD Form 1826.

(h) *Standard pesticides and equipment.* Only those pesticides and equipment listed in the Department of Defense (DOD) section of the Federal Supply Catalog (ref para 4c(1)) will normally be used in pest control operations.

(i) *Nonstandard pesticides and equipment.* All pesticides and equipment that are not listed as standard items in the DOD section of the Federal Supply Catalog.

§ 657.4 Objective.

Preventive measures will be continuously applied with the objective of:

(a) Maintaining an effective pest control program at each Army facility.

(b) Minimizing service calls on common household and nuisance pests.

Subpart B—Policies

§ 657.11 General.

Pest control operations will be developed and applied consistent with the policies stated below.

§ 657.12 Supervision.

Except as specifically exempted (see Section 657.22 below—Outleased property), pest control operations will be performed by trained and certified personnel or under the direct and continuing supervision of these personnel.

§ 657.13 Operations.

Surveillance and control operations will be conducted on a scheduled basis to:

(a) Determine effectiveness of preventive and corrective measures.

(b) Prevent development of excessive pest populations.

§ 657.14 Materials and equipment.

(a) Pesticides and equipment listed in the DOD section of the Federal Supply Catalogs and registered with EPA will be used in pest control operations. Microfiches of catalogs C6800IL and 3740/50IL are available from the Adjutant General, USA Publications Directorate, Supply Operations Branch, ATTN: DAAG–PAS–T, Washington, DC 20314. Use of a pesticide other than those registered by EPA and approved for specific application in accordance with labeling is not authorized. Pesticides that have been suspended or finally canceled by EPA will not be used.

(b) MACOM entomologists will review and approve proposed projects prior to acquisition or application of:

(1) Nonstandard pesticides and pest control equipment.

(2) Standard pesticides with restricted use patterns as classified by EPA.

(c) Justification for the use of standard pesticides with restricted use patterns and nonstandard pesticides or equipment will be approved only when one or more of the following criteria are met:

(1) An emergency exists which requires local purchase.

(2) Comparable standard pesticides with general use patterns are not available.

(3) Resistance to standard pesticides has been verified by competent authority.

(d) Contract items. Alternate pesticides (standard or nonstandard) which do not meet applicable contract specifications will not be authorized without approval of the MACOM entomologist.

(e) Requisitions. (1) Requisitions for pesticides requiring entomological approval will be forwarded to the MACOM for review and written approval. Agencies or commands not having access to engineer entomological support may obtain requisition review service from HQDA (DAEN–FEB) WASH DC 20314. Pesticide requisitions must be accompanied by data indicating the target pest, description of the area to be treated, extent of the area to be treated; the rate of application, name and certification number of the applicator and the justification as outlined in § 657.14(c) above.

(2) The Cdr DARCOM, CINCUSAREUR, Cdr USARJ, and Cds USAEIGHT may delegate to subordinate commanders (excluding installation commanders) served by MACOM entomologists as much of their approval authority as they may desire.

(3) CONUS (includes Alaska and Hawaii). Upon written approval of the requisition by the MACOM entomologist, nonstandard pesticides may be purchased locally.

(4) Overseas. When written approval of the requisition is received, it will be submitted through the appropriate supply agency for CONUS procurement. The DA entomologist, DAEN–FEB will be available to furnish technical guidance to CONUS supply agencies regarding procurement of nonstandard pesticides and equipment.

(f) Equipment listings are contained in TM 5–632. Procurement criteria are listed in AR 420–17. Information concerning new developments in equipment is available from MACOM entomologists.

§ 657.15 Training and certification.

(a) All personnel responsible for determining the need for, the effectiveness of, or selection and application of pest control measures on Army real property must receive periodic training and examination. Training information (initial and refresher) is available from:

(1) U.S. Army Health Services Command, ATTN: HSA–INS, Ft. Sam Houston, TX 78234, for the use of insecticides and rodenticides.

(2) The Pesticide Applicator Training Coordinator located at the respective land grant agricultural colleges. All States must meet the requirements of the Federal Insecticide, Fungicide and Rodenticide Act by submitting their pesticide programs to EPA, including training and certification, for the approval of EPA by October 1977. The target date for EPA approval of all state plans is October 1977.

(b) A Certificate of Competency (DD Form 1826) will be issued to personnel who successfully meet the required competency levels and as recommended by the MACOM entomologist. Refresher training and re-certification will be required at 3-year intervals.

(c) On-the-job training of new hires and interns will be accomplished by supervisors and certified applicators. MACOM entomologists may assist in the training during technical visits.

§ 657.16 Environmental quality.

Pest control operations will be planned and conducted to minimize and/or eliminate adverse environmental effects. When environmental impact or assessments statements are required, draft documents and final environmental impact statements will be prepared and processed in a timely manner in accordance with AR 200–1.

§ 657.17 Nonappropriated fund activities.

The application of pesticides at nonappropriated fund activities shall be made only by or under the direct supervision of trained and certified personnel. Contracts for pest control at nonappropriated fund activities shall be governed by provisions of this regulation.

§ 657.18 Property leased to the Government.

(a) CONUS and overseas. (1) Lease instruments will be negotiated to delineate specifically the responsibilities of the Lessor and of the Lessee (Government) for accomplishing pest control operations. In foreign countries, these responsibilities will be predicated upon custom, condition, and practices of the country concerned as applicable. In CONUS responsibilities must be in accordance with applicable laws and regulations.

(2) Occupants will maintain the leased premises in a clean and sanitary condition in conformance with normal standards of good housekeeping.

(b) CONUS (includes Alaska and Hawaii). Where feasible, the lessor will:

(1) Furnish the leased housing in pest-infestation-free condition to the lessee and maintain the premises free of pest infestation (AR 420–71).

(2) Employ control measures and pesticides which conform to local health department regulations.

§ 657.19 Cooperation with other agencies.

(a) *General.* Specialists of other Federal agencies provide consultation service and assistance on problems of medical, agricultural, and environmental importance (e.g., disease and pest control, quarantine control, customs inspection, fish and wildlife protection, water protection) as requested. Requests for services of these specialists will be made by the installation commander to the appropriate MACOM commander. The agencies include the United States Department of Health, Education, and Welfare (Public Health Service); the United States Department of Agriculture (Plant Protection Division, Plant Quarantine Division, and Animal Health Division of the Agricultural Research Service); the United States Department of the Interior (Fish and Wildlife Service); the United States Treasury Department (Bureau of Customs); and the Environmental Protection Agency.

(b) *Coordination.* Installations will coordinate environmental assessments of outdoor applications of pesticides with appropriate departments and agencies in section § 657.19(a). This coordination will be requested through the MACOM to the appropriate agency. Requirements for Environmental Impact Assessments or Statements (EIA/EIS) for certain application of pesticides are provided in AR 200–1.

(c) *Notification.* Installations will notify MACOM commanders, or their designees, of proposed visits or surveys by representatives of the departments and agencies identified in section 657.19(a) when these visits or surveys relate to quarantine or to past or proposed pesticide applications.

§ 657.20 Quarantine.

(a) General. In accordance with AR 40–12, all echelons of command will give full cooperation to officials of governmental agencies responsible for quarantines of agricultural and public health significance.

(b) MACOM commanders, or their designees, will insure that areas to receive pesticide treatment are liimted to the minimum necessary to meet quarantine requirements.

(c) Installations will procure pesticides, equipment, and other materials necessary to comply with quarantine requirements.

§ 657.21 Aerial application of pesticides.

Will be accomplished in accordance with AR 40–574.

§ 657.22 Outleased property.

Outgrant holders must comply with all applicable pesticide and animal damage control laws, ordinances, specifications and rules set forth in the land use regulations referred to and part of the outgrant document. Prior to commencing any program for compliance which de-

V 41 160 AUG 17 76 UMI

viates from the land use regulation specifications, review and approval of details of said program must be obtained from the MACOM. Where possible, supplemental agreement to existing outgrants so renewed or amended, for any reason, shall make provision for compliance hereof.

§ 657.23 Contractual services for pest control.

(a) Determinations made on methods of performance (in-house versus contract) must adhere to the requirements of AR 235–5.

(b) Installations located in states that conduct pesticide training, regulation and certification programs approved by EPA will determine contract/in-house triennial review as outlined in para 3–3 AR 235–5.

(c) Installations located in states that do not have EPA approved programs may justify in-house performance under Exemption Code C (Table B–2, App. B, AR 235–5).

(d) MACOMS will approve the technical provisions of all proposed contracts. CINCUSAREUR, USARJ and Eighth Army may delegate this approval.

Subpart C—Responsibilities

§ 657.31 MACOM entomologist.

The entomologist serving on the engineer staff will provide direction, focus and technical supervision for pest control services on all real property within the MACOM jurisdiction. Included are:

(a) Advising on all aspects of pest control operations to include manpower requirements, operational needs, minimizing pesticidal environmental impact, training and certification of pest control personnel, and procedural requirements necessary to assure efficient pest control programs.

(b) Coordinating with other agencies to assure implementation of environmentally safe and efficient pest control programs.

(c) Coordinating with Army medical authorities in implementing their responsibilities as given in AR 40–5.

(d) Reviewing and providing written approval for the use of standard pesticides with restricted use patterns and all nonstandard pesticides prior to procurement.

(e) Conducting reviews of installation pest control programs and recommending to the facilities engineer those changes which would result in safer, more economical, and more efficient operations.

(f) Maintaining professional proficiency by attending professional meetings and keeping abreast of new developments reported in professional publications.

(g) Providing on-the-job training for installation pest control personnel in the selection, use, and maintenance of pest control equipment; in the selection, preparation, and application of pesticides; and in accurate reporting of usage of these materials.

(h) Maintaining surveillance and record of training and certification status of pesticide applicators.

(i) Recommending certification of those pest control personnel who have been found competent in accordance with FIFRA standards.

§ 657.32 Facilities engineers.

Installation facilities engineers will:

(a) Plan, supervise and manage pest control operations.

(b) Conduct preventive maintenance and surveillance inspections at timely intervals.

(c) Assure that pest control services personnel receive adequate training to achieve essential certification.

(d) Provide on-the-job training of pest control services personnel.

(e) Obtain and maintain adequate supplies of materials and equipment.

(f) Assure all pest control operations are accomplished safely.

(g) Determine the phases of pest control to be accomplished by contract based on existing policies. Included are:

(1) Preparation of necessary specifications and technical provisions of the contract document.

(2) Arranging for the purchasing and contracting (P&C) officer to obtain contractural services.

(3) Assuring that the contract operations are conducted in accordance with the specifications through direct and continuous inspection by a certified pest controller.

(h) Perform all recordkeeping and reporting requirements of this regulation.

(i) Inform heads of nonappropriated fund activities that applications of pesticides at these activities shall be made by certified personnel and where certification training is given.

(j) Assure that pest control services are conducted so as to minimize any adverse effects on the environment.

(k) Cooperate with the installation medical authority by:

(1) Furnishing and maintaining mosquito light traps.

(2) Performing essential pest control operations indicated by results of surveillance of medical and quarantine pests.

(3) Providing all essential requirements to meet health safety requirements criteria, including shops, equipment, and protective gear.

(l) Maintain records of operations (e.g., investigations, inspections; utilization of manpower, funds, and pesticides) to be used for analyzing efficiency and economy, and evaluating accomplishment, of pest control.

§ 657.33 Installation commanders.

Will be responsible for:

(a) Determining an installation's position and responsibilities in community-wide pest control activities regarding quarantines and epidemics.

(b) Maintaining liaison with MACOM's concerning pest surveys, and investigations proposed by other agencies.

(c) Establishing lessee responsibility for using pesticides on outgrants of military real property.

(d) Initiating requests for aerial spraying of pesticides as prescribed in AR 40–574.

§ 657.34 Surgeon General.

The medical authority (State Adjutant General for the National Guard Bureau) serving the installation is responsible for:

(a) Conducting surveillance of populations of pests involved in the health of the command and those involved in U.S. Department of Agriculture quarantine regulations, and furnishing the facilities engineer results of the surveillance activities.

(b) Conducting the installation pesticide monitoring program.

(c) Obtaining identification and susceptibility status of pests to pesticides as necessary and furnishing this information to facilities engineers to be incorporated into pest control operations.

(d) Establishing health and personnel safety criteria associated with pesticide operations.

§ 657.35 Building occupants.

Occupants of buildings, including Army family housing will:

(a) Apply good sanitation practices to prevent pest infestations.

(b) Apply only those pesticides approved for use by building occupants.

(c) Cooperate fully with installation pest control personnel in scheduling major pest control operations, to include preparation of areas to be treated.

Subpart D—Procedures

§ 657.41 Handling.

(a) Pesticides will be stored and mixed in an adequately ventilated and heated shop. Showers will be readily accessible to mixing facilities.

(b) Usable standard pesticides (in unopened containers) no longer needed will be reported as excess to the property disposal office.

(c) Pesticides in deteriorated containers will be transferred to lined containers that preclude chemical reactions. Labels will be properly affixed.

(d) Appropriate action will be taken to deactivate areas contaminated by pesticide spills.

(e) Vehicles with lockable storage suitable for safe transportation of pesticides, personnel and supplies will be assigned for control operations and will not be used for other purposes.

(f) Pesticides will not be transported in cabs of military vehicles or anywhere in privately owned vehicles.

(g) Pesticide contaminated clothing will not be home laundered.

(h) Inspection and inventory of stored pesticides will be made at appropriate intervals. Certified personnel, safety and fire protection officers will perform and record inspections in accordance with their criteria.

§ 657.42 Contract operations.

(a) Contracts for pest control services will be executed, when required, according to existing procurement regulations and the following guidelines:

(1) The services are economically beneficial to the Government, or the annual operating cost of the service is less than $50,000 and certified contractors are available.

(2) Application by trained and certified facilities engineering personnel is not feasible because of remote location, project size, and/or manpower-time-equipment limitations.

(3) Single applications of fumigants for entire building or other large inclosure are required.

(4) Aerial or special equipment applications over large areas such as mosquito breeding areas are necessary.

(5) Extensive wood treatment projects such as groundline treatment of utility poles are proposed.

(6) Extensive termite control operations are required which facilities engineering personnel cannot accomplish with in-house resources.

(b) Technical requirements for all pest management contracts will be prepared by the facilities engineering office in cooperation with the installation medical authority. Project plans and specifications will be forwarded to the appropriate MACOM for approval before a request is submitted for procurement of the service from commercial sources. Information should be included on the status of the Environmental Protection Agency's approval of State Plans for training and certification of commercial applicators and/or Department of the Army criteria established pending EPA approval of State Plans.

(c) Technical provisions will specify only the pesticides approved by HQDA DAEN–FEB WASH DC and registered by EPA. The items provided for use by the contractor must be identified qualitatively and quantitatively.

(d) The contractor must submit proof that the supervisory personnel to be employed on the contract will:

(1) Meet the State certification standards that have been established in response to EPA's implementation of FIFRA, or competency requirements established by HQDA (DAEN–FEB) WASH DC for the pesticide(s) to be used in the contract for those states that do not meet FIFRA certification requirements.

(2) Be capable of providing safe working conditions for his personnel and installation occupants.

(e) Inspection of the contract will be performed by a representative of the contracting officer who has a current DA Certificate of Competency (DD Form 1826) in pesticide selection and application. Inspection will include but not be limited to:

(1) Onsite inspection, by the contracting officer of unopened pesticide containers to verify that the chemicals listed on the label meet contract specifications and can be applied in accordance with the registered use.

(2) Observation of the mixing and equipment operations, rate of application (volume versus area), recognition of environmental hazards, and safety precautions in order to verify competence equal to DA standards for pesticide applicators.

§ 657.43 Record and reporting requirements.

(a) Adequate records must be maintained of all pest control operations. The records will serve as reference for continuous monitoring and management of pest control operations and for the reporting, inspection and manpower requirements.

(b) DD Form 1532. The Pest Control Summary Report (Report Control Symbol DD–HL (AR 1080)) will be prepared on DD Form 1532 dated 1 July 1974. Each installation will submit the reports monthly to the appropriate MACOM; the US Army Environmental Hygiene Agency (USAEHA), Aberdeen Proving Ground, MD 21010; and to the appropriate medical entomologist at USAEHA Regional Divisions, within 15 days after the report period. This regulation does not change any other instructions or standard terminology previously furnished.

(c) Annual Pesticide Usage Report (RCS DD–H&E (A) 1124). This report must be submitted by 31 December each year for annual review by the Federal Working Group on Pest Management. The routine programmed uses of pesticides reported in the past are to be excluded from future reports. MACOM entomologists will review all programs submitted and forward only those involving use of new programs, procedures, methods, materials or any control measures of a controversial nature. Negative reports will be submitted by installations if programs are routine as described above.

PART IV:

FEDERAL COMMUNICATIONS COMMISSION

Nondiscrimination in the Employment Policies and Practices of Cable Television Applicants and Certificate Holders and Licensees of Cable Television Relay Stations

Notice of Proposed Rulemaking

V41-160 AUG 17 76 UMI

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20829; FCC 76-749]

[47 CFR Part 76]

CABLE TELEVISION APPLICANTS

Nondiscrimination in Employment Policies and Practices

In the matter of nondiscrimination in the employment policies and practices of cable television applicants and certificate holders and licensees of cable television relay stations.

1. Notice of proposed rule making is hereby given in the above-captioned matter, relating to the Commission's policies concerning nondiscrimination in the employment policies and practices of cable television applicants and certificate holders and Cable Television Relay Station (CARS) licensees subject to the provisions of Parts 76 and 78 of the Commission's Rules.

2. The Commission has conducted a thorough examination of its rules, policies and compliance review procedures as they relate to nondiscrimination in the employment policies and practices of cable television applicants and operators. Additionally, we have conducted a study of the FCC Form 395's (Annual Employment Reports) filed by cable systems in 1974, in an attempt to ascertain present employment levels of minorities and women in the cable industry. Our findings indicate that although our nondiscrimination rules are fairly comprehensive, there is a further need to describe and exemplify the measures which cable operators should undertake to promote the full realization of equal opportunity in employment for minorities and women. Our purposes in initiating this proceeding are, therefore, threefold:

First, to emphasize to cable and CARS operators and the public that equal employment opportunity (EEO) is an important aspect of our regulatory scheme for cable operations in the public interest;

Second, to clarify our policy that equal employment programs must be active and affirmative, not merely passive or nondiscriminatory; and

Third, to propose changes in our rules and procedures which will make enforcement more effective without unnecessarily increasing the record keeping and reporting burdens on cable certificate of compliance holders.

Background

3. In March 1972, we adopted rules prohibiting discriminatory employment practices by cable television operators and cable television relay station licensees analogous to those already adopted for broadcast and common carrier licensees.[1] These cable rules require submission of affirmative action programs, annual employment reports (FCC Form 395), and annual complaint reports. Discriminatory Employment Practices, FCC 72-275, 34 FCC 2d 186 (1972).

4. When cable EEO rules were first proposed, we stated that "the same considerations of public policy that apply to broadcast . . . facilities are applicable to community antenna television systems and community antenna relay stations . . . [and] . . . that the national policy against discrimination is applicable to all CATV systems and CAR stations, whether or not they are subject to the specific provisions of the Civil Rights Act." Notice of Proposed Rule Making in Docket 19246, FCC 71-455, 29 FCC 71-455, 29 FCC 2d 18, 19 (1971). See also *United States* v. *Southwestern Cable Company*, 392 U.S. 157 (1968); *United States* v. *Midwest Video*, 406 U.S. 649 (1972). And we reaffirmed that conclusion in Discriminatory Employment Practices, supra. In addition to recognizing the fact that the national policy of nondiscrimination in employment necessitated the development of EEO rules for cable television, we also noted the unique position of cable television as a potential outlet for minority expression. In paragraph 9 of Discriminatory Employment Practices, supra. at 190, we stated.

> Cable, by virtue of its multi-channel capacity, is uniquely capable of serving the special programming, and other communications needs of discriminated-against minority groups. But a company which is not an equal opportunity employer is less likely than it otherwise would be, to recognize and respond to those needs. In light of this fact, among others, it would certainly be improper for the Commission to countenance discriminatory practices by cable systems at the same time as it forbids such practices by broadcast . . . facilities.[2]

Therefore, in view of the potential of cable as an outlet for minority expression, and in light of the Supreme Court's decision in *United States* v. *Southwestern Cable Co.*, supra. which indicated that the Communications Act confers on the Commission that jurisdiction over cable television "reasonably ancillary to the effective performance of the Commission's various responsibilities for the regulation of television broadcasting", id. at 178,[3] we determined that discriminatory employment practices on the part of cable operators call into question their continued ability to serve the public interest.

5. The FCC Form 395's recently analyzed contained information on full-time cable system employees for any one payroll period in January, February or March, 1974. Approximately 90 percent of all cable television employment units (with five or more employees) submitted reports. The analysis separated job categories into high salary and low salary positions, and according to managerial and technical functions of employees, e.g., officials and managers through laborers and unskilled workers. Additionally, persons were classified according to race, sex, and national origin. Our statistics showed that minority and female employment levels in the cable television industry were very low in relation to their numbers in society, and that minorities and females were disproportionately represented in the lower skilled and lower paying jobs. These statistics also suggest that, on the whole, existing equal employment opportunity programs are not sufficiently active and affirmative. Practices and procedures neutral on their face "cannot be maintained if they operate to freeze the status quo or perpetuate prior discriminatory employment practices." *Griggs* v. *Duke Power Co.*, 401 U.S. 424 (1971).

6. The foregoing considerations shape our present intent to seek comment as to whether cable applicants and operators should be required to develop updated affirmative action employment programs consistent with the new proposals to be set forth hercin. The objective to be achieved is to insure that all cable applicants and operators are identifying and eliminating artifical barriers having discriminatory effects in their employment systems, and that, in time, minority groups and women will participate in each cable television work force in a reasonable relationship to their availability in the labor recruitment area generally.

The Commission's Authority

7. We note that a recent case involving the Federal Power Commission raises issues regarding the authority of federal agencies to promulgate EEO rules for their respective regulated industries. It has been previously recognized that the "public interest" mandate of a federal regulatory agency is not a broad license to promote the general welfare, and that such a mandate takes on specific content and meaning only when one carefully examines the purposes for which the agency was established. In keeping with this principle, the Supreme Court recently held that a general grant of authority to regulate an industry in the "public interest" does not authorize the regulation of employment discrimination per se, and that discriminatory practices may be considered only to the extent that such conduct is directly related to the agency's particular statutory responsibilities. *NAACP* v. *Federal Power Commission*, 44 U.S.L.W. 4659 (May 19, 1976). The court went on to note, however, that our regulations, including a specific reference to cable television regulations, can be justified insofar as they are "necessary to enable the FCC to satisfy its obligation under the Communications Act . . . to ensure that its licensees' programming fairly reflects the tastes and viewpoints of minority groups." Id. at 4662, note 7. The Supreme Court affirmed the decision of the Court of Appeals, which held that the FPC has the "power to take into account, in the performance of its regulatory functions, including licensing and rate review, evidence that the regulatee is a demonstrated discriminator in its employment relations." 520 F. 2d at 435 (D.C. Circuit, 1975). As the Court of Appeals noted:

> A regulatee's performance in the area of equal employment oportunity may also be relevant to that company's efforts to secure a license renewal or other Commission authorization. It is concelvable that an applicant's record could be so riddled with discrimination—related legal difficulties, and its future so lacking in any promise of improvement on that score, that the Commission could validly conclude that for this reason it should not be permitted to be the recipient of franchise grants. 520 F. 2d at 444.

8. In light of the Supreme Court's opinion, we seek comment as to whether our proposed actions are within the Commission's "statutory authority to consider the consequences of employment discrimination in performing its mandated regulatory functions." *NAACP* v. *FPC, supra*, note 2.

Policy Clarification

9. As noted above, the Commission's rules embody two concepts: Nondiscrimination and affirmative action. Nondiscrimination applies to all persons. Thus, no person may be denied employment or related benefits on grounds of race, color, religion, national origin or sex. Affirmative action, however, requires more than mere employment neutrality. It calls upon cable operators and applicants to make additional efforts—to engage in a positive, continuing program of specific practices—to assure equal employment opportunity with regard to recruiting, hiring, training, promotion and other personnel actions.

10. In its simplest terms, therefore, an affirmative action plan is a set of specific and result oriented procedures in which cable operators and applicants undertake good faith efforts to assure that minorities and women are given equal and full consideration for job opportunities. The essential elements of such a program are embodied in Section 76.311 of our Rules. Section 76.311(a) provides, in substance, that each cable operator shall provide equal opportunity in employment to all qualified individuals, and that no person shall be discriminated against in employment because of race, color, religion, national origin or sex. A basic element, and the starting point for developing an effective employment program, therefore, is a reaffirmation of each cable operator's equal employment opportunity policy with respect to recruitment, evaluation, selection, promotion, compensation, training and termination. Therefore, each cable operator's program should set forth at the outset its policy and commitment with respect to the national goal of eliminating discrimination and fostering equal employment opportunity.

11. In developing a positive, continuing program of specific practices to assure equal opportunity in employment, Section 76.311(b)(2)(i) requires each cable television system to "[d]efine the responsibility of each level of management to insure a positive application and vigorous enforcement of . . . [its] policy of equal opportunity, and establish a procedure to review and control managerial and supervisory performance." Accordingly, the second element in developing an equal opportunity program consistent with our rules is identification of the individual(s) responsible for administration and implementation of the cable system's policy. Whether employment decisions are made by one individual or by several persons, the cable operator must develop a procedure to insure that these decisions are consistent and are not based on discriminatory factors, no matter how inadvertent.

12. Section 76.311(b)(2)(iii) provides that each cable system should make reasonable efforts to "[c]ommunicate the system's equal employment opportunity policy and program and its employment needs to sources of qualified applicants without regard to race, color, religion, national origin or sex, and solicit their recruitment assistance on a continuing basis." Accordingly, an objective of any equal employment opportunity policy and program should be to assure that employees and prospective employees are aware that the cable system is an equal opportunity employer and does not discriminate against any individual because of his or her race, color, religion, or national origin. Each operator's program should, therefore, in some manner, describe its efforts to communicate its policy to employees and prospective employees.[4] In addition to other outreach techniques described herein, this requires the posting of notices advising employees and applicants of the operator's policy and of their employment rights if they believe they have been the victims of discrimination.

13. Section 76.311(b)(2)(iv) of the Rules provides that each cable system should "[c]onduct a continuing campaign to exclude every form of prejudice or discrimination based upon race, color, religion, national origin or sex, from the system's personnel policies and practices and working conditions." The system's total employment system and each major element of the personnel process must be analyzed to assure that none of the policies and procedures relating thereto, regardless of how neutral they appear, have an unreasonably adverse effect on minorities and women. In this regard, each cable operator's equal employment program should set forth the outreach techniques it uses to solicit for consideration minority and women applicants. An applicant should also examine the effectiveness of its recruitment sources to determine whether sufficient qualified minority and female applicants are being referred. Those sources which are not providing the needed service should be eliminated and new sources developed. In this regard, there are numerous outreach techniques which can be used to increase minority and female applicants.[5]

14. In addition to the major objective of broadening a system's pool of applicants so that qualified minorities and women have an equal chance to be considered for employment, a cable operator's equal employment program must be designed to assure that such persons are placed and promoted in a nondiscriminatory manner. To assure that minorities and women are given due consideration for promotional opportunities, the operator's porgram must also contain a description of any efforts being undertaken to foster the advancement of minorities and women in the organizational structure. Closely connected with this aspect of the cable operator's policy are the training efforts—both internal and external—which are or will be undertaken to qualify minorities and women for upgraded positions or to train applicants who demonstrate sufficient potential. This does not mean a formal training program is required. A cable system's equal employment opportunity program should, however, also contain a description of any training it has undertaken to upgrade the skills of minorities and women. Furthermore, the operator's program should assure that such items as compensation, fringe benefits, and opportunity to perform overtime work are allocated in a nondiscriminatory fashion. Comments are invited on this and other aspects of the foregoing policy clarification.

Analysis of EEO Program

15. Having clarified some of the necessary elements of an effective affirmative action program, we now turn to a consideration of how both the cable operator and the Commission can evaluate the implementation of such a program, apart from analysis of FCC Form 395's. Section 76.311(b)(2)(v) of the Rules requires each cable television system to:

> Conduct continuing review of job structure and employment practices and adopt positive recruitment, training, job design, and other measures needed to assure genuine equality of opportunity to participate fully in all organizational units, occupations, and levels of responsibility in the system.

16. One analytical tool for evaluating an effective affirmative action program is a determination of the percentages of minority groups and women in the local labor pool area from which employees are

---

[1] Section 76.311 of the Commission's Rules applies to operators of cable television systems, both in that capacity and as licensees and permittees of CARS stations. See also Section 78.75.

[2] Although cable operators, unlike broadcasters, are under no affirmative duty to program in the public interest, the availability of multiple channels allows cable a great potential to offer diverse programming and community access. The Commission no longer requires any cable television operator to engage in origination cablecasting. FCC 74-1279, 49 FCC 2d 1090 (1974).

[3] In *United States* v. *Midwest Video Corp.*, *supra*, the Supreme Court affirmed the Commission's decision to go beyond mere protective measures aud also regulate cable with a view to "promote the objectives for which the Commission had been assigned jurisdiction over broadcasting." 406 U.S. 649, 665. Among those objectives recognized by the Court are increasing the number of outlets for local self-expression and augmentnig the diversity of programs and types of services available to the public.

[4] See Section III, sample affirmative action plan (Appendix 2). See also present Section 76.311(c)(2)(i).

[5] In addition to the outreach techniques suggested for broadcasters at 54 FCC 2d 359, the following might prove useful: (1) Assist secondary schools and colleges in programs designed to enable minority and women graduates of these institutions to compete in the open employment market on an equitable basis; (2) Continue to actively recruit minority and femal high school students for part-time work as needed.

V 41 160
AUG 17 76
UMI

drawn or reasonably could be drawn—referred to herein as an availability survey. We recognize, in this regard, that there is no single definition of "local labor pool area." It follows, therefore, that each applicant should develop his own definition of what is "local" and supply corresponding data.[6]

17. In evaluating utilization of minorities and women, the information set forth in the availability survey will be compared to the applicant or operator's current workforce, a breakdown by job category of which appears on the most recently filed FCC Form 395. Specifically, underutilization may be defined as either employing minorities and women in jobs that do not make adequate use of their skills, or having fewer such persons on the applicant or operator's work force than could reasonably be expected by their availability. If there is a substantial incongruity in the proportion of minorities and/or women in the applicant or operator's work force and the availability in the local labor pool area, then specific remedial steps may be required to correct the deficiencies, unless there is a satisfactory explanation for the incongruity. (See paras. 22–24, infra.)

18. Because the written affirmative action program proposed herein seeks to assess progress and because the courts have recognized that such programs are evolving and dynamic,[7] we are proposing that updated statements, including current statistical data and availability surveys, together with any changes or amendments to existing programs, be filed on or before a fixed date to be established and each third, or perhaps each fifth, year thereafter. We believe that three to five years is an appropriate time period to provide reasonably current data and yet allow for trends to develop.

19. We seek comment on the appropriate threshold for the filing of written EEO programs. It would appear that the imposition of such requirements may be unnecessarily burdensome on cable systems with less than five (or perhaps 10) full-time employees, and that reliable statistical analysis is more difficult for smaller employment units. Requiring programs to be filed by all cable units with five or more full-time employees would cover about 19,000 employees, or approximately 75% of all cable industry employees. Alternatively, raising the cable threshold to 10 would cover about 14,000 employees, representing approximately 55% of the cable industry positions. Regardless of the threshold ultimately adopted, all operators and applicants will continue to be required to comply with other applicable portions of Section 76.311, and to file an annual report of complaints.[8] If a review of Annual Employment reports or other information indicates that closer Commission scrutiny and follow-up is warranted, we may reqire additional reports, data, or other appropriate remedial steps from any operator or applicant, regardless of the number of full-time employees.[9] Such additional remedial steps are expected to be ordered in only very limited circumstances.

20. Comments are specifically requested on all of the matters raised in paragraphs 15–19 above. We also invite comment on the proposed amendment which would exempt from coverage in a given plan any minority group insignificantly represented in the cable system's labor pool area,[10] including the question of what population proportion might define "significant."[11] In addition, attached is a sample affirmative action program which includes the elements which we feel are necessary to develop and carry out an effective equal employment opportunity program in accordance with Section 76.311 of the Rules, as clarified herein. Comments are invited on thisp rogram and whether it should be adopted as a guideline in conjunction with our proposed amendments to Section 76.311(c), or whether such a program should be adopted as an official Commission form.

ENFORCEMENT AND MONITORING

21. Generally speaking, we recognize that the development of an equal employment opportunity program containing the foregoing elements manifests an intent to comply with our rules. The adequacy of such programs will, of course, be subject to review by the Commission to determine whether each operator and applicant is following personnel policies and practices designed to promote the full realization of equal opportunity in employment for minorities and women. Both the Commission and the courts have recognized that non-proportionate minority and female employment—standing alone—does not necessarily evidence discrimination requiring administrative action. Thus, in *Stone v. F.C.C.*, 466 F. 2d 316, rehearing denied, 466 F. 2d 331 (1971), the court noted that disproportionate minority employment was in a "zone of reasonableness" in light of the licensee's affirmative recruitment practices. Conversely, ". . . a disparity that is reasonable in light of a recruitment policy might not be reasonable in its absence." *Bilingual Bicultural Coalition of Mass Media, Inc. v. F.C.C.*, 492 F. 2d 656 (D.C. Cir. 1974). In this regard, it should be noted that such a "zone" is not static and that continued operation of an affirmative action plan should result in additional employment opportunities for minorities and women.

22. Where it appears that any cable system's EEO program is not achieving the desired results or that certain elements of its employment procedures are questionable, we may—as a preliminary remedial step—request more specific data by race and sex on such areas as applicant flow, hires, promotions and terminations.[12]

In those cases where it appears that a more comprehensive analysis of a particular operator's employment practices is warranted, the Commission may consider the use of on-site investigations. In such instances, the on-site visit may consist of a complete analysis of the system's equal employment practices in an attempt to resolve existing differences. As a remedy for employers whose performance suggests significantly deficient EEO programs, the Commission may require establishment of specific goals and timetables. A "goal" is a numerical employment objective—a target—which should be fixed realistically in terms of the number of job opportunities expected and the number of qualified minorities and women in the local labor market. A "timetable," on the other hand, is a period during which employment goals should be obtained. Where required, goals and timetables should be set forth to numerically demonstrate the operator's good faith intention to increase minority and female utilization. A numerical projection will also enable the Commission to periodically assess the progress of the employer's corrective action program. We are guided in this course of action by statutory and case law which views goals and timetables as methods of eliminating the effects of past discrimination and guaranteeing against discrimination in the immediate future.

23. Absent discrimination, one would expect that in time minorities and women will be employed in some reasonable relationship to their numbers in the area. It has been recognized that factors other than discrimination may account for disparities between an employer's minority and female work force and their availability.[13] If, however, an extremely low rate of minority and female employment persists in a cable system's work

[6] Generally speaking, where a system is located in a Standard Metropolitan Statistical Area, we proposed to consider the S.M.S.A. as the labor pool area. In this situation, the necessary data may be obtained from state employment agencies "Manpower Information for Affirmative Action Programs" which is available in most localities. The specific figures generally shown in Tables I and II in those releases can be used in the analysis of population, unemployment and work force availability. Where a cable system is not in an S.M.S.A., city or county figures will suffice. The publications "General Population Characteristics" and "General Social and Economic Characteristics" should provide the required information. They are in the PC(1)–B and PC(1)–C series of State Reports of the U.S. Bureau of Census' U.S. Census of Population: 1970, obtainable from any Department of Commerce Field Office.

[7] Bilingual Bicultural Coalition of Mass Media, Inc. v. F.C.C., 492 F. 2d 656 (D.C. Circuit 1974).

[8] We are proposing an amendment to Section 76.311(d) to clarify that such annual complaint reports are required of all cable systems.

[9] See para. 22, infra.

[10] See note 6, supra.

[11] Of course, women ostensibly are significantly represented virtually everywhere, and thus would be covered in most every plan.

[12] See 54 FCC 2d at 357, note 1, for examples of such additional reporting requirements which have been applied to broadcast licensees.

[13] For example, availability of particular skills among women or minority groups, the employer's capacity for special job training or recruiting, etc. Also, the rate of turnover and anticipated expansion will have a bearing on the length of time it will take to correct any significant disparity.

force, or if it is apparent that a system's affirmative action program is not having practical effects, such systems may be required to establish employment goals and timetables to increase minority and female participation on their work force." When such a corrective action program is ordered, the fixing of the goals and timetables would initially be left to the operator. This is a virtual necessity for a realistic framework of goals and timetables. However, it is our belief that projected hiring and promotion goals should be the maximum that can be realistically achieved during each year of the adopted timetable. The success of a corrective action program depends, in large measure, on setting realstic goals in terms of the number of minorities and women that can actually be hired, trained or promoted over a given period of time and on taking positive, continuing steps to achieve those goals. Our assessment, in this respect, will be based on whether the operator has established meaningful goals and made substantial efforts to achieve those goals.

24. Where there is a disparity in minority and female employment that is reasonable in light of the cable system's equal employment opportunity program, further administrative action by way of show cause hearing or otherwise would appear unwarranted. However, since a substantial incongruity in minority or female employment calls into question whether a cable system is being operated in the public interest, where it appears that a cable operator has followed discriminatory employment practices, we retain the option to order a hearing to resolve any substantial and material questions of fact relating to the system's employment policies and practices. We trust that most cases will not proceed to such extremes. Comment is invited on the proposals for EEO monitoring and enforcement outlined above.

COMPLAINTS

25. Under our proposed procedures, we shall continue to refer complaints of discrimination against cable applicants and operators to appropriate state, local and Federal agencies. This is consistent with our view that it is not our responsibility to remedy employment discrimination per se, but rather to assure that the public interest continues to be served by our certificating or licensing. We urge complainants alleging discrimination because of race, color, religion, sex or national origin to initially file their grievances with the appropriate state, local [15] or federal agency given primary jurisdiction in such matters because we lack the resources and the expertise to give them the same evaluation as those agencies whose primary function lies in the area of discrimination complaints. Where no state or local ageney with primary jurisdiction exists, complaints are referred to the U.S. Equal Employment Opportunity Commission (EEOC), which possesses jurisdiction over employers of 15 or more individuals. Age discrimination charges are referred to the Wage and Hour Division of the U.S. Department of Labor's Employment Standards Administration. Where complaints are referred to other agencies, the Commission requests notification of that agency's final determination so the Commission may decide what further action is warranted.[16] In the event that no federal, state or local agency has jurisdiction over an individual employment discrimination complaint concerning a cable system, we invite complainants to address to the Commission their specific allegations indicating violations of our EEO rules for our determination of the appropriate action in the matter.

26. The receipt of such a complaint may result in an internal audit of the applicant or operator's Form 395 and EEO program to determine if the applicant or operator appears to be discriminating against women or minorities. Where we make such a determination, we will notify the local franchising authority or other governmental entity asserting jurisdiction to franchise, license, certify, or otherwise regulate cable television at the State or local level of the determination and of any remedial action which we may direct the applicant or operator to take to correct the situation. Where any Federal, State or local agency or court of competent jurisdiction makes a final determination that the employment practices of any applicant or operator are discriminatory, we shall consider such findings and orders as is appropriate in light of the facts supporting them. For the reasons set out at Paras. 7 and 21, supra, a finding by another agency will not necessarily present a substantial question or a basis for further inquiry under our own Act and rules. Comments are invited on the foregoing proposed complaint procedure.

CONCLUSION

27. In this Notice, we have outlined the development of our EEO rules as they relate to cable television and CARS operators, licensees, and applicants. We have also discussed the ingredients of an acceptable affirmative action program, and our compliance review and complaint procedures. In this respect, we have stressed the remedial rather than the punitive aspects of our rules and policies. However, we have also endeavored to erase any doubts about the seriousness with which we view the obligation of our applicants and operators to provide equal employment opportunity to all persons.

28. Authority for the rule making proposed herein is contained in Section 4 (i) and (j), 303, 307 and 403 of the Communications Act of 1934, as amended.

29. All interested persons are invited to file written comments on or before November 10, 1976, and reply comments on or before December 10, 1976. It is hoped that comments, either formal or informal, will be submitted by all segments of the public, the communications bar, national and state cable associations, and individual cable television operators and applicants. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching a decision in this matter, the Commission may take into account any other relevant information before it, in addition to the comments invited by this Notice.

30. In accordance with the provisions of Section 1.419 of the Commission's Rules, an original and 11 copies of all comments, replies, pleadings, briefs, or other documents filed in this proceeding shall be furnished to the Commission. However, in an effort to obtain the widest possible response in this proceeding from cable operators and members of the public, informal comments (without extra copies)* will be accepted. Copies of all responses will be availabl efor public inspection during regular business hours in the Commission's Docket Reference Room (Room 239) at its Headquarters in Washington, D.C. (1919 "M" Street NW.).

Adopted: July 30, 1976.

Released: August 13, 1976.

FEDERAL COMMUNICATIONS COMMISSION,[17]
VINCENT J. MULLINS,
Secretary.

Part 76 of Chapter I of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

Section 76.311(c) and paragraph (d) (1) are revised to read as follows:

§ 76.11 Equal employment opportunities.

* * * * *

(c) *Equal employment programs to be filed with the Commission.* (1) The operator of each cable television system having 5 (or 10) or more full-time employees, or [within the meaning of paragraph (b)(3)] together with other cable television systems constituting a single employment unit with a total of 5 (or 10) or more full-time employees, shall

[14] In establishing goals there is no requirement that employees be displaced or that unneeded persons be hired. Further, as noted above, many localized factors may distort the resemblance between minority/female employment percentages and minority/female labor market percentages, even in the absence of discriminatory employment barriers. These factors must be considered if the goals established are to be realistic and attainable. Accordingly, the operator would be required to develop realistic goals and apply every good faith effort to meet those goals. Our rules prohibit preferential treatment on the basis of race, color, religion, sex or national origin.

[15] Local agencies could include franchising authorities, especially where EEO matters are covered in the franchise.

[16] Section 76.411 of the rules requires each cable television system to file an annual report of complaints, which, pursuant to Section 76.311(d)(1), must recite the respective disposition or current status of each complaint. An editorial change in 76.411 (Appendix One) seeks to make clear that the obligation to report EEO complaints falls on all cable systems, regardless of number of employees.

[17] Statement of Commissioner Hooks filed as part of original document.

V 41 160 AUG 17 76 UMI

file a statement of its equal employment opportunity program, indicating specific practices to be followed in order to assure equal employment opportunities for females, Negroes, Oriental, American Indians, and Spanish-surnamed Americans in such aspects of employment practices as a recruitment, selection, training, placement, promotion, pay, working conditions, demotion, layoff, and termination. [Guidelines for the preparation of such statements are set out at ____ FCC 2d_____.] [1]

(2) If, pursuant to paragraph (c)(1) of this section or § 76.13(a)(8), a cable operator has been exempted from the requirement that it file an equal employment opportunity program statement, but has failed to satisfy the conditions of that exemption at any time during the first three months of a calendar year, it shall file the statement on or before May 31 of that year.

(3)(i) Where, pursuant to paragraph (b)(3) of this section a program is jointly established by two or more cable systems with an aggregate total of 5 (or 10) or more full-time employees, a multiple cable operator shall file a combined statement.

(ii) A multiple cable operator shall file a separate equal employment opportunity statement for each headquarters office if that office has five (or ten) or more full-time employees, and its work is primarily related to the operation of more than one cable television system under common ownership or control.

(4) The program need not include any minority group which is represented in insignificant numbers in the labor recruitment or population area, in which case a statement of explanation must be filed.

(5) Updated program statements, including current statistical data and availability surveys, together with any changes or amendments to existing programs, shall be filed on or before _____, and each third (or fifth) year thereafter.

(d) • • •

(1) All operators of cable television systems, regardless of their number of full-time employees, shall submit an annual report to the Commission no later than May 31 of each year indicating whether any complaints regarding violations by the operator of equal employment provisions of Federal, State, territorial, or local law have been filed during the preceding calendar year before any body having competent jurisdiction.

• • • • • •

SAMPLE EEO PROGRAM (CABLE TV)

PREFACE

The following *sample* affirmative action program is provided to assist cable television operators and applicants in the development and presentation of their own plans. By no means is the sample intended as an all-inclusive document. It is a guide that may be adapted to the uniqueness of each employment situation. Indeed, operators are encouraged to supplement these suggestions with any special features of their EEO plans not covered herein. Similarly, we expect them to omit from their plans the sample elements which are not warranted or feasible in their particular circumstances, so long as all major aspects of the pertinent EEO rules are covered. For example, an availability survey is essential for meaningful analysis of the effectiveness of any EEO program, hence some form of Sections IX and X must be included. Section VI, on the other hand, might be deleted if the operator has no internal or external training programs. We realize that workforce availability data is not readily obtainable for all localities; however, we urge applicants to assemble as much information as possible concerning the population from which employees are drawn. We suggest the following sources as reference points: Office of Department of Commerce (U.S. Census of Population Reports), Bureau of Labor Statistics, National Technical Information Service, State Employment Office, Chamber of Commerce, local employer's associations, and community organizations.

I. POLICY STATEMENT

It is the policy of _____ to pro-
(Name of organization)
vide equal employment opportunity to all individuals without regard to race, color, religion, sex, or national origin in all personnel actions including recruitment, evaluation, selection, promotion, compensation, training and termination.

To ensure implementation of this policy and to ensure conformance with the requirements set forth in Title VII of the Civil Rights Act of 1964 and FCC Rules and Regulations, _____ has developed a posi-
(Name of organization)
tive, continuing result-oriented Affirmative Action Plan, and is committed to apply good faith efforts toward the attainment of these objectives.

II. RESPONSIBILITY FOR IMPLEMENTATION

All company officials and managers are responsible for implementation of affirmative action and for seeing that stated objectives are effectively accomplished. _____,
(Name)
_____, is responsible for the administra-
(Title)
tion of the system's policy and plan and will keep senior management informed of progress on a regular basis.

III. POLICY DISSEMINATION

( ) Where a significant percentage of employees, employment applicants, or residents of the community of a cable television system are Spanish-surnamed Americans, all notices, applications and other equal employment opportunity information is posted or distributed in both Spanish and English. Similar use is made of other languages where appropriate.

( ) We seek the cooperation of the unions represented in our employment units to help develop and implement our EEO program and all new or re-negotiated union agreements contain an effective nondiscrimination clause.

Internal Communications: To assure that all members of the staff are cognizant of our equal employment oportunity policy and their individual responsibilities in carrying out this policy, the following communication efforts are made:

( ) Appropriate notices are posted informing applicants and employees that the system is an Equal Opportunity Employer and of their right to notify an appropriate local, state, or federal Communications Commission, if they believe they have been the victims of discrimination.

( ) Other (specify)

_____

_____

External Communications: In order to assure that all prospective applicants and the general public are aware of our EEO policy, the following specific communications efforts are made:

( ) The system's employment application form contains a notice in bold type informing prospective employees that discrimination because of race, color, religion; national origin or sex is prohibited and that they may notify the appropriate local, state, or federal agency, including the Federal Communications Commission, if they believe they have been the victim of discrimination.

( ) Other (specify)

_____

_____

IV. RECRUITING AND SELECTION

_____ actively seeks and en-
(Name of organization)
courages minorities and women to apply for existing and future available job openings. In so doing, contact was made with the following organizations in the past (three) year(s):

_____

Organization and Address

_____

Number of Referrals

( ) Selection techniques or tests (If used) are designed to avoid discriminatory effects.

( ) Present employees are encouraged to refer minority or female applicants.

V. JOB HIRES

During the period _____
(month-day-year)
through _____, we receive a
(month-day-year)
total of (_____) applications for employment. Of these applicants (_____) were
(month-day-year)
hired.

Analysis of our recruiting performance and new hires reveals that:

( ) Sufficient minorities and women are applying for available positions.

( ) An insufficient number of qualified minorities and/or women are applying for positions. Therefore, we are expanding our recruitment sources to include:

_____

Organization

_____

Address

VI. TRAINING

( ) We provide on-the-job training to upgrade the skills of employees. Tangible benefits of such training to minority and women employees during the past (three) year(s) may be briefly described as follows:

_____

_____

( ) We utilize the following other sources to assist in training potential employees or qualifying current employees for higher-level positions:

_____

_____

( ) There are no specific internal or external programs for upgrading the skills of employees.

VII. PROMOTION AND TRANSFER

It is our policy to provide promotions on a nondiscriminatory basis. Further, to assure that minorities and women are given due consideration for promotional opportunities, special effort is taken to encourage minorities and women to qualify and apply for advancement. During the past twelve months our policy has had the following results:

( ) Those of the system's staff who make decisions on hiring placement and promotion are personally instructed that minority employees and females are to be considered without discrimination, and that job areas in which there is little or no minority or female representation should be reviewed to determine whether this results from discrimination.

( ) Minority groups and female employees are given equal opportunity for positions which lead to higher positions. We inquire as to the interests and skills of all lower-paid employees with respect to any of the higher-paid positions, followed by assistance, counselling, and effective measures to enable employees with interest and potential to qualify themselves for such positions.

( ) Seniority practices are reviewed periodically to insure that such practices are nondiscriminatory and do not have a discriminatory effect.

VIII. COMPENSATION

( ) Rates of pay and fringe benefits for present employees with equivalent duties have been examined within the last (three) year(s) and any inquiries found have been adjusted.

( ) Opportunity to perform overtime work is provided on a basis that does not discriminate against qualified minority groups or female employees.

[1] Assuming the sample program is not adopted as an official form.

IX. AVAILABILITY SURVEY

The following analysis has been prepared to determine the extent to which minorities and/or women are represented in the cable system's labor or population area. In determining the available minority and female work force, we have used information obtained from:

( ) Office of Department of Commerce
( ) "General Population Characteristics"
( ) "General Social and Economic Characteristics"
( ) Bureau of Labor Statistics
( ) National Technical Information Service
( ) "Manpower Information for Affirmative Action Programs"
( ) State Employment Office
( ) Chamber of Commerce
( ) Local employer's association
( ) Community organizations (specify)
( ) Other (specify)

	Women	Negro	Oriental	American Indian	Spanish surnamed American
Percentage of women and each minority group in the work force					
Percentage of women and each minority group in the population (to be used only if work force data is unavailable)					

The above information is relative to: ( ) S.M.S.A. ( ) City ( ) County ( ) Other (specify)

Based on the data, the following groups are not significantly represented in the cable system's area _____ (attach statement of explanation).

X. EFFECTIVENESS OF AFFIRMATIVE ACTION PLAN

This section should contain a brief narrative discussion of the effectiveness of the operator's efforts to ensure Equal Employment Opportunity. For example, the operator should review the current workforce breakdown, which data appears on the most recently filed FCC Form 395. This data should be compared to the Availability Survey appearing in Section IX to determine whether there is a substantial incongruity in the proportion of women and/or any significantly represented minority group in the system's workforce to their availability in the local labor pool area. If a substantial incongruity is determined to exist, any changes instituted to overcome the deficiency should be set forth. The operator may wish to explain why any discrepancies which may exist are not unreasonable. Any rifficulties experienced in implementing the affirmative action plan might also be described, together with any steps proposed to surmount these difficulties in the future.

List of Public Laws

This is a continuing numerical listing of public bills which have become law, together with the law number, the title, the date of approval, and the U.S. Statutes citation. The list is kept current in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

S. 1526..... Public Law 94–384
To make additional funds available for purposes of certain public lands in northern Minnesota, and for other purposes (Aug. 13, 1976; 90 Stat. 1123)

V 41 161 AUG 18 76 UMI

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

Organization and Functions

Pursuant to section 552 of Title 5 of the United States Code (80 Stat. 383), as amended by Pub. L. 93-502 (88 Stat. 1561), and the authority contained in section 103 of the Immigration and Nationality Act (66 Stat. 173; 8 U.S.C. 1103), 28 CFR 0.105(b) and 8 CFR 2.1, miscellaneous amendments, as set forth herein, are prescribed to Parts 100, 103 and 316a of Chapter I of Title 8 of the Code of Federal Regulations.

Effective September 1, 1976, the suboffice of the Immigration and Naturalization Service located at San Diego will be redesignated a district office under the jurisdiction of the Western Region. This district is being established in order to divide the workload presently carried by the Los Angeles District Office (District No. 16) and to provide for more effective management and supervision over Service activities in southern California. Accordingly, § 100.4 will be amended to set forth the jurisdiction of this district and also to reflect the placement of the State of North Carolina under the jurisdiction of the Atlanta District. The following changes are made in § 100.4:

In paragraph (a), *Regional Offices*, the fourth sentence is amended by adding District No. 39 to the list of district offices under the jurisdiction of the Western Region. In paragraph (b), *District offices*, District No. 16, Los Angeles, California, is amended by deleting Imperial and San Diego counties from the jurisdiction thereof and by adding District No. 39, San Diego, California, having jurisdiction over Imperial and San Diego counties and placing the San Diego District in the proper numerical sequence. In paragraph (c)(2), *Ports of entry for aliens arriving by vessel or by land transportation*, District No. 16—Los Angeles, Calif., is amended by deleting Andrade, Calif.; Calexico, Calif.; San Diego, Calif.; San Diego Border Station, Calif.; and Tecate, Calif.; from the list of Class A ports under the jurisdiction of that office and by adding District No. 39—San Diego, Calif., to have jurisdiction over the above indicated Class A ports with the exception of San Diego Border Station, Calif., which will be redesignated the San Diego, Calif., suboffice. Also, District No .25—Washington, D.C., is amended by deleting Morehead City, N.C., and Wilmington, N.C., from the Class A ports under the jurisdiction of that district and District No. 26—Atlanta, Ga., is amended by adding Morehead City, N.C., and Wilmington, N.C., to the list of Class A ports under the jurisdiction of the Atlanta District. Paragraph (c)(3), *Ports of entry for aliens arriving by aircraft*, is amended by deleting District No. 16—Los Angeles, Calif., and by adding District No. 39—San Diego, Calif., and by placing that district in the proper numerical sequence. District No. 39 will have jurisdiction over Calexico International Airport, Calexico, Calif., and San Diego Munical Airport (Lindbergh Field), San Diego, Calif. Paragraph (e) is amended to indicate that Special Inquiry Officers will be stationed at District No. 39, San Diego, Calif.

Also, § 103.10(a) is amended by deleting San Diego, Calif., from the list of offices set forth therein because that office is being reestablished as a district office. Records requested under the Freedom of Information Act will be available from the San Diego district office beginning September 1, 1976.

Section 103.7(d) is being amended to include the Assistant Commissioner, Information Services as a certifying official in connection with the furnishing of information from Service records, and to provide for alternative authority to certify records where appropriate.

Section 316a.2 is amended by adding the Harvard Institute for International Development to the list of American Institutions of Research recognized by the Attorney General.

The above-described amendments as set forth below, are hereby prescribed:

PART 100—STATEMENT OF ORGANIZATION

In § 100.4, paragraphs (a), (b), (c)(2), (c)(3), and (e) are amended as follows:

§ 100.4 Field Service.

The territory within which officials of the Immigration and Naturalization Service are located is divided into regions, districts, suboffices, and Border Patrol sectors as follows:

(a) *Regional offices.* • • • The Western Regional Office, located at San Pedro, California, has jurisdiction over districts 13, 16, 17, 18, and 39 and Border Patrol sectors 10, 11, 12, 13, and 14.

(b) *District offices.* The following districts, which are designated by numbers, have fixed headquarters and are divided as follows:

• • • • • •

16. *Los Angeles, California.* The district office in Los Angeles, California, has jurisdiction over the following counties in the State of California: Inyo, Kern, Los Angeles, Orange, Riverside, San Bernardino, San Luis Obispo, Santa Barbara, and Ventura.

• • • • • •

39. *San Diego, California.* The district office in San Diego, California, has jurisdiction over the following counties in the State of California: Imperial and San Diego.

(c) *Suboffices.* • • •

(2) *Ports of entry for aliens arriving by vessel or by land transportation.* • • •

DISTRICT NO. 16—LOS ANGELES, CALIF

CLASS A

Los Angeles, Calif. (the port of Los Angeles includes, among others, the port facilities at San Pedro, Long Beach, Port Hueneme, and Ventura, Calif.)

thorized in writing as specified below, have authority to make certification, as follows:

(1) The Associate Commissioner, Management, or the Assistant Commissioner, Information Services, or the designee of either, authorized in writing to make certification in his absence—copies of files, documents, and records in the custody of the Central Office.

(2) A regional commissioner, or district director, or the designee of either, authorized in writing to make certification in his absence—copies of files, documents, and records in the custody of his office.

(3) The Assistant Commissioner, Information Services, or the Chief, Records Administration and Information Branch, Central Office, or the designee of either, authorized in writing to make certification in his absence—the non-existence of an official record in the records of the Service.

In § 103.10, paragraph (a)(1) is revised as follows:

§ 103.10 Requests for records under the Freedom of Information Act.

(a) *Place and manner of requesting records.*—(1) *Place.* Records shall be made available in the Central Office, each regional office, any district office, and the following offices: Agana, Guam; Albany, N.Y.; Cincinnati, Ohio; Dallas, Tex.; Hammond, Ind.; Harlingen, Tex.; Las Vegas, Nev.; Memphis, Tenn.; Milwaukee, Wis.; Norfolk, Va.; Pittsburgh, Pa.; Providence, R.I.; Reno, Nev.; St. Louis, Mo.; Salt Lake City, Utah; Spokane, Wash.; additionally, in particular cases a district director may designate any other Service office. Active alien records are maintained in the district or suboffice listed above where the subject of the record resides. For locations of regional and district offices, see 8 CFR 100.4.

PART 316a—RESIDENCE, PHYSICAL PRESENCE AND ABSENCE

§ 316a.2 [Amended]

In § 316a.2 *American institutions of research*, the listing of research institutions is amended by adding thereto in alphabetical sequence the following institution: "Harvard Institute for International Development."

(Sec. 103, 66 Stat. 173; 8 U.S.C. 1103.)

Compliance with the provisions of section 553 of Title 5 of the United States Code (80 Stat. 383) as to notice of proposed rule making and delayed effective date is unnecessary in this instance because the amendments to §§ 100.4 (a), (b), (c)(2), (c)(3), (e); 103.7(d)(1), (2), (3) and 103.10(a) relate to agency organization and management and the amendment to § 316a.2 adds an institution of research to the listing.

Effective date. The effective date of the amendments prescribed in connection with the establishment of the District Office at San Diego in §§ 100.4 (a), (b), (c)(2), (c)(3), (e) and 103.10(a) will be September 1, 1976. The amendments pertaining to Districts 25 and 26 in § 100.4 (c)(2); the amendment to §§ 103.7(d)(1), (2), (3); and the amendment to § 316a.2 are effective August 18, 1976.

Dated: August 12, 1976.

L. F. CHAPMAN, Jr.,
Commissioner of Immigration and Naturalization.

[FR Doc.76-24091 Filed 8-17-76;8:45 am]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

[Reg. T]

PART 220—CREDIT BY BROKERS AND DEALERS

Use of Escrow Receipts for Option Transactions Effected in Special Cash Account

The Board of Governors has interpreted § 220.4(c) of Regulation T as allowing the use of escrow receipts for option transactions effected in a special cash account if the customer represents that the covering securities or funds are held by a bank and the broker independently verifies that the appropriate escrow receipt will be delivered no later than three business days after the option is written.

§ 220.130 Escrow receipts for option transactions.

(a) The Board has been asked whether or not it is permissible under the provisions of § 220.4(c) of Regulation T (12 CFR 220.4(3)) relating to the special cash account, to allow customers to write put and call securities options which are "covered" by the escrow receipt of a bank when the escrow receipt, because of the mechanics of the trade, cannot be delivered to the broker on the day the option is written. When exchange-traded securities options were first introduced in 1973 the Board expressed the view that certain option transactions were permitted in the cash account (1973 Bulletin 525; 12 CFR 220.126) under circumstances which indicated their nature as bona fide cash transactions. Basically, that interpretation indicates that the special cash account can be used if the underlying securities, or the funds necessary to pay for the securities, are held in the account on the day the option is written. (This is commonly referred to as a "covered" transaction.) The use of "escrow receipts" for option transactions to be effected in a special cash account was not considered by the Board at the time of the 1973 interpretation.

(b) An escrow receipt is an agreement under which a bank represents and warrants that it holds for the account of a customer the securities which are the subject of a call, or the cash to purchase the securities which are the subject of a put, and will continue to hold the same until the option is either exercised or expires. If the option is exercised, the bank will deliver or accept delivery of the appropriate securities against payment, as the circumstances require.

(c) It has been represented to the Board that customers who wish to write covered options in a cash account using escrow receipts are hampered because of procedural delays in transmitting the escrow receipt from the bank to the broker. Up to three business days may elapse before the receipt can be in the physical possession of the broker because, for example, some banks will not issue the receipt until the premium for writing the option is delivered.

(d) The Board is of the view that a broker may effect an option transaction in a special cash account where the customer represents that the required securities or cash are then held for that customer at a bank and the broker independently verifies that the appropriate escrow receipt will be delivered to the broker by the bank as soon as possible but, in no event, later than three business days after the option is written. (The term "bank" as defined in section 3(a)(6) of the Securities Exchange Act of 1934 includes banks, trust companies and those branches of foreign banks which are located in the United States and are supervised and examined by State banking authorities.) Any delay in delivery of the escrow receipt resulting from factors within the customer's control would, of course, cast doubt on the eligibility of the transaction as a *bona fide* cash transaction.

By order of the Board of Governors, August 13, 1976.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.76-24252 Filed 8-13-76;4:55 pm]

Title 15—Commerce & Foreign Trade

SUBTITLE A—OFFICE OF THE SECRETARY OF COMMERCE

PART 0—EMPLOYEE RESPONSIBILITY & CONDUCT

Financial Interests

The purpose of this amendment is to include a secretarial determination which (1) exempts certain types of financial interests of Department of Commerce officers and employees from the provisions of section 208(a) of Title 18, United States Code, prohibiting their participating in matters in which they have a financial interest; and (2) provides that these financial interests need not be reported on their statement of employment and financial interests. It has been determined, pursuant to the authority of 18 U.S.C. 208(b)(2), that these financial interests are too remote or too inconsequential to affect the integrity of the officer's or employee's services in any matter covered by 18 U.S.C. 208(a).

Since this amendment is a matter relating to agency management and personnel, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation and delay in effective date are inapplicable.

In consideration of the above, effective August 18, 1976, 15 CFR Part 0 is

amended by adding a new § 0.735-13(d) to read as follows:

§ 0.735-13 Financial interests.

• • • • •

(d) The financial (or economic) interests described below are too remote or too inconsequential to affect the integrity of an employee's services in any matter involving them, and are thereby exempted from the prohibitions of 18 U.S.C. 208(a), and do not exclude such employee's participation in the transaction of any official business involving such financial or economic interests:

Deposits in a bank, savings and loan association, building association, credit union or similar financial institution; policies held with an insurance company; constructive interests in companies and other entities owned or held by a mutual fund or other diversified investment company in which the employee has an interest.

These exempted financial (or economic) interests need not be reported by employees in their statements of employment and financial interests referred to in section 0.735-21.

(18 U.S.C. 208(b); 5 CFR 735.404a.)

Dated: August 12, 1976.

ELLIOT RICHARDSON,
Secretary of Commerce.

[FR Doc.76-24236 Filed 8-17-76;8:45 am]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket 8987-o]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

National Commission on Egg Nutrition, et al.

Subpart—Advertising falsely or misleadingly: § 13.10 Advertising falsely or misleadingly; § 13.170 Qualities or properties of product or service; 13.170-52 Medicinal, therapeutic, healthful, etc.; § 13.205 Scientific or other relevant facts. Subpart—Misrepresenting oneself and goods—Goods: § 13.1710 Qualities or properties; § 13.1740 Scientific or other relevant facts. Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1885 Qualities or properties; § 13.1895 Scientific or other relevant facts. Subpart—Using misleading name—Vendor: § 13.2410 Individual or private business being educational, religious or research institution or organization.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45, 52)

In the Matter of National Commission on Egg Nutrition, a corporation, and Richard Weiner, Inc., a corporation.

Order requiring a Park Ridge, Ill., egg industry trade association and a New York City public relations firm, among other things to cease misrepresenting the physiological effects of consuming dietary cholesterol or eggs and to cease using a misleading trade name.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:[1]

ORDER

I

It Is Ordered, That respondents National Commission on Egg Nutrition and Richard Weiner, Inc., corporations, their successors and assigns, either jointly or individually, and respondents' officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of eggs for human consumption do forthwith cease and desist from:

A. Disseminating or causing the dissemination of any advertisement by means of the United States mails or by any means in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, which directly or indirectly

1. Represents that there is no scientific evidence that eating eggs increases the risk of heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition;

2. Represents that there is scientific evidence that dietary cholesterol, including that in eggs, decreases the risk of heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition;

3. Represents that there is scientific evidence that avoiding dietary cholesterol, including that in eggs, increases the risk of heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition;

4. Represents that eating eggs does not increase the blood cholesterol level in a normal person;

5. Represents that the blood cholesterol level is prevented from being raised or lowered by dietary cholesterol intake;

6. Represents that the human body increases its manufacture of cholesterol in an amount equal to a decrease in dietary cholesterol intake;

7. Represents that the average human body eliminates the same amount of cholesterol as that eaten;

8. Represents that dietary cholesterol, including that in eggs, is needed by the body for building sex hormones, for transmitting nerve impulses and for maintaining life in cells; or

9. Utilizes the name "National Commission on Egg Nutrition" unless it is clearly and conspicuously disclosed in immediate conjunction with the name that the National Commission on Egg Nutrition is composed of egg producers and other individuals and organizations of, or relating to, the egg industry.

B. Disseminating, or causing the dissemination of any advertisement by means of the United States mails or by any means in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act which directly or indirectly

1. Represents that eating eggs does not increase the risk of heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition or represents that there exists, or describes scientific evidence which supports the theory that consumption of dietary cholesterol, including that in eggs, does not increase the risk of heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition or

2. Makes any representation concerning the relationship of dietary cholesterol, including that in eggs, to heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition unless it is clearly and conspicuously disclosed in immediate conjunction therewith that many medical experts believe that existing evidence indicates that increased consumption of dietary cholesterol, including that in eggs, may increase the risk of heart disease.

C. Disseminating, or causing the dissemination of, any advertisement by means of the United States mails or by any means in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, which directly or indirectly

1. Represents as insignificant the available scientific evidence that the consumption of dietary cholesterol, including that in eggs, may increase the risk of heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition, or represents that there is overwhelming scientific evidence or otherwise misrepresents the amount of scientific evidence that eating eggs does not increase the risk of heart attacks, heart disease, atherosclerosis, arteriosclerosis, or any attendant condition.

2. Misrepresents in any manner the physiological effects of consuming dietary cholesterol or eggs.

II

It Is Further Ordered, That respondents shall forthwith distribute a copy of this order to each of their operating divisions, and to all current and future members of respondent National Commission on Egg Nutrition.

It Is Further Ordered, That each respondent notify the Commission at least thirty (30) days prior to any proposed change in its corporate structure such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It Is Further Ordered, That each respondent shall, within sixty (60) days after this order becomes final, file with the Commission a report, in writing, signed by respondent, setting forth in detail the manner and form of its compliance with the order to cease and desist.

The Final Order was issued by the Commission, July 20, 1976.

CHARLES A. TOBIN,
Secretary.

minate contracts, dealings, franchises, etc. Subpart — Controlling, unfairly, seller-suppliers: § 13.530 Controlling, unfairly, seller-suppliers. Subpart—Corrective actions and/or requirements: § 13.533 Corrective actions and/or requirements; 13.533–45 Maintain records; 13.533–45(k) Records, in general; 13.533–65 Renegotiation and/or amendment of contracts. Subpart—Cutting off access to customers or market: § 13.560 Interfering with distributive outlets. Subpart—Cutting off supplies or service: § 13.610 Cutting off supplies or service; § 13.655 Threatening disciplinary action or otherwise. Subpart—Failing to maintain records: § 13.1051 Failing to maintain records. Subpart—Maintaining resale prices: § 13.1145 Discrimination; 13.1145–5 Against price cutters; 13.1145–45 In favor of price maintainers; § 13.1155 Price schedules and announcements; § 13.1160 Refusal to sell; § 13.1165 Systems of espionage; 13.1165–80 Requiring information of price cutting.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

In the Matter of Nikko Electric Corporation of America, a corporation.

Consent order requiring a Van Nuys, California, manufacturer, importer and distributor of high fidelity audio components, among other things to cease maintaining resale prices and engaging in restrictive trade practices. The order further requires respondent to maintain records; reinstate dealers terminated for non-conformance with previously required pricing schedules and to take appropriate action against those distributors found to be in violation of the provisions of the order.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:[1]

ORDER

It is Ordered, That respondent Nikko Electric Corporation of America, a corporation, its successors and assigns and respondent's employees, agents, representatives, including sales representatives, or other independent contractors, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, importation, distribution, offering for sale and sale of high fidelity audio components and other products in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Establishing, continuing or enforcing any contracts, agreements, understandings or arrangements with distributors or retail dealers of respondent's products (hereinafter distributors and retail dealers are referred to in this Order as "dealers") which have the purpose or effect of fixing, establishing, maintaining, or enforcing the prices at which respondent's products are to be resold.

2. Fixing, establishing, controlling or maintaining the prices at which dealer may advertise, promote, offer for sale or sell respondent's products.

3. Publishing, disseminating, circulating or providing by any other means, any suggested resale prices; *provided however*, that subsequent to two (2) years after the date on which this Order becomes final, respondent may suggest resale prices if it is clearly and conspicuously stated on each page of any price list, book, tag, advertising or promotional material or other document that the price is suggested.

4. Requiring any dealer to enter into written or oral agreements or understandings that such dealer will adhere to established or suggested prices for respondent's products as a condition to receiving or retaining its dealership.

5. Refusing to sell or threatening to refuse to sell to any dealer who desires to engage in the sale of respondent's products for the reason that such dealer will not enter into an understanding or agreement with respondent to advertise or sell said products at respondent's established or suggested resale price.

6. Threatening to withhold or withholding earned cooperative advertising credits or allowances from any dealer because said dealer advertises respondent's products at retail prices other than that which respondent deems appropriate or has approved.

7. Disseminating or circulating any warranty registration form or any other document which requires or requests that the retail price paid by the ultimate consumer for respondent's products be stated and reported to respondent.

8. Securing or attempting to secure any promises or assurances from dealers or prospective dealers regarding the prices at which such dealers will advertise or sell respondent's products or requesting or requiring any dealer or prospective dealer to obtain approval from respondent for prices offered by said dealers in advertisements for respondent's products.

9. Requiring, soliciting or encouraging any dealer, person or firm either directly or indirectly to report the identity of any dealer, person or firm who does not adhere to any resale or retail price for any of respondent's products, or acting on reports so obtained by refusing or threatening to refuse sales to any dealer, person or firm so reported.

10. Terminating, threatening, intimidating, coercing, delaying shipments, or taking any other action to prevent the sale of respondent's products by a dealer because said dealer has advertised or sold, is advertising or selling, or is suspected of advertising or selling such products at other than prices that respondent may deem to be appropriate or has approved.

11. Establishing, continuing or enforcing, by refusal to sell, termination or threat thereof, delay in shipment or threat thereof, or in any other manner, any contract, agreement, understanding, or arrangement or method of doing business which has the purpose or effect of restricting or limiting in any manner the customers or classes of customers to whom dealers may sell respondent's products.

12. Convening or participating in any meeting for the purpose of undertaking or engaging in any of the acts or practices prohibited by this Order.

13. Guaranteeing, promising, through agreements or advertising or by any other means the profit margins of its dealers, selective franchising, or limited distribution of its products.

In connection with the foregoing provisions under Part I of this Order, it is further provided that after the expiration of five (5) years from the date this Order becomes final, nothing contained in this Order shall prohibit respondent from lawfully exercising such rights, if any, as it may have to distribute and establish resale prices for its products under fair trade laws then in effect.

II

It Is Further Ordered, That respondent shall:

1. Forthwith upon this Order becoming final, mail or deliver, and obtain signed receipts therefor, copies of this Order to every present dealer, to ever dealer terminated by respondent since January 1, 1972 and to every new dealer for a period of three (3) years.

2. Forthwith distribute a copy of this Order to each of its operating divisions and subsidiaries and to all officers, sales personnel, sales agents, sales representatives and advertising agencies and secure from each such entity or person a signed statement acknowledging receipt of said Order.

3. Within thirty (30) days from the date on which this Order becomes final, mail or deliver, and obtain a signed receipt therefor, written notice to all of respondent's sales personnel, sales agents and sales representatives and advertising agencies informing such persons that their violation of any provision of this Order may result in the termination of said employment or business relationship. Respondent shall obtain prior approval from the New York Regional Office of the Federal Trade Commission of said written notification.

4. Forthwith terminate the employment or business relationship with any person or firm willfully violating any provision of this Order and take appropriate disciplinary and corrective action, which may include termination, for nonwillful violation.

5. Within sixty (60) days from the date on which this Order becomes final, mail or deliver, and obtain a signed receipt therefor, a written offer of reinstatement upon the same terms and conditions available to respondent's other dealers, to any distributor or dealer located in an area where resale prices were not or could not be lawfully controlled who was terminated by respondent from January 1, 1972 to the effective date of this order unless respondent can establish that the dealer terminated does not or did not at the time of termination have good credit or that the dealer does not have reasonably adequate facilities for selling respondent's products, and forthwith reinstate any such distributor or dealer who within thirty (30) days thereafter requests, in writing, reinstatement.

III

It Is Further Ordered, That respondent:

1. Notify the Commission at least thirty (30) days prior to any proposed change in the respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation of or dissolution of subsidiaries or any other such change in the corporation which may affect compliance obligations arising out of the Order.

2. For a period of three (3) years from the date this Order becomes final, establish and maintain a file of all records referring or relating to respondent's refusal during such period to sell its products to any dealer, which file shall contain a record of a communication to each such dealer explaining respondent's refusal to sell, and which file will be made available for Commission inspection on reasonable notice; and, annually, for a period of three (3) years from the date hereof, submit a report to the Commission's New York Regional Office listing the names and addresses of all dealers with whom respondent has refused to deal during the preceding year, a description of the reason for the refusal and the date of the refusal.

IV

It Is Further Ordered, That in the event the Commission hereafter issues any Order which is less restrictive than the provisions of Paragraphs I, II, or III, Sections 1 through 12, of this Order, in any proceeding involving alleged resale price maintenance of a manufacturer or supplier of audio components subject to investigation by the Commission pursuant to File No. 741 0042, then the Commission shall, upon the application of Nikko Electric Corporation of America reconsider this Order and may reopen this proceeding in order to make whatever revisions, if any, are necessary to bring the foregoing paragraphs into conformity with the less stringent restrictions imposed upon respondent's competitors.

The Decision and Order was issued by the Commission July 12, 1976.

CHARLES A. TOBIN,
Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

In the Matter of Northerlin Co., Inc., a corporation doing business as Vulcan Basement Waterproofing Company.

Consent order requiring a Flushing, N.Y., franchisor of residential basement waterproofing products, among other things to cease misrepresenting the nature and effectiveness of its products or services; failing to respond to requests for service or maintenance; failing to maintain adequate records; failing to disclose relevant facts concerning its two forms of waterproofing services; misrepresenting guarantees; misrepresenting the size of its business; using misleading sales plans and furnishing means and instrumentalities of misrepresentation or deception.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:[1]

ORDER

I

It is ordered that respondent Northerlin Co., Inc., a corporation, doing business as Vulcan Basement Waterproofing Company or any other trade name or names, its successors and assigns, and its officers, (hereinafter sometimes referred to as "respondent"), and respondent's agents, representatives and employees, directly or through any corporation, subsidiary, division, franchisee, licensee or other device, in connection with the advertising, offering for sale, sale or distribution of basement waterproofing and termite control products or services, or other products or services, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, that respondent employs an exclusive patented process.

2. Representing, directly or by implication, that such products or services will seal all types of basement walls, floors and foundations against water leakage.

3. Using the words, "permanently," "completely," "perpetually," "once and for all," or other words or phrases of similar import, to describe such products or services; or misrepresenting, in any manner, the nature and effectiveness of such products or services.

4. Misrepresenting the efficacy of the protection against termites and other insects afforded by such products or services; or misrepresenting, in any manner, the degree of protection from termites or other insects provided by such products or services.

5. Using the words "24-Hour," "year-round" or other words or phrases of similar import to describe the availability of respondent's installation, repair and maintenance service to customers.

6. (a) Failing to maintain a customer relations department to which purchasers of such products or services may refer complaints and/or requests for maintenance or replacement of faulty products or services promised under the terms of respondent's contract and guarantee; or failing to furnish to each customer at the time of purchase of such products or services the name, address and telephone number of such customer relations office to which requests for service and/or maintenance may be directed by such customers.

(b) Failing to respond to requests for service or maintenance within seven (7) days from the date of receipt thereof, by customers who previously purchased such products or services.

(c) Failing to maintain for a period of three (3) years, records of customers' service and maintenance requests and related documents in connection with the implementation of Paragraph 6 (a) and (b) above.

7. Failing to disclose in writing on the face of every contract for the pressure pumping process, in bold print, on an easily detachable form which shall be executed by the customer and retained by the seller and orally, prior to the signing of any contract, and in ten point bold face type in all advertisements, promotional materials and similar documents, the following notice:

Vulcan provides two kinds of waterproofing services: channeling water away from the basement and pressure pumping a Bentonite mixture against walls and footings. The bentonite material used in the pressure pumping process will not prevent leaks in your basement under certain types of soil and water table conditions. If you have not had engineering tests conducted on your property by a qualified engineer, you cannot be sure the process you have contracted for will work on your home.

7a. Failing to disclose in radio and other electronic media advertisements the following notice:

The Bentonite material used in the pressure pumping process will not prevent leaks in your basement under certain types of soil and water table conditions. If you have not had engineering tests conducted on your property by a qualified engineer, you cannot be sure this process will work.

8. Making any representations, orally or in writing or in any other manner, relating to the efficacy, effectiveness or performance of

[1] Copies of the Complaint, Decision and Order filed with the original document.

V 41 161 AUG 18 76 UMI

such products or services unless, at the time such representations are made, respondent has a reasonable basis for such representations which shall consist of competent engineering or other similar objective material.

9. Failing to maintain accurate records which may be inspected and copies by Commission staff members upon reasonable notice:

(a) Which consist of documentation to support any and all claims made after the effective date of this order in advertising or sales promotion material concerning the efficacy and performance characteristics of any such products or services marketed by the respondent.

(b) Which provided the basis upon which respondent relied as of the time those claims were made; and

(c) Which shall be maintained by respondent for a period of three years from the date such advertising or sales promotion material was last disseminated.

10. Representing, directly or by implication, orally or in writing, that any of respondent's products or services are guaranteed unless the nature, extent and duration of the guarantee, the identity of the guarantor, and the manner in which the guarantor will perform thereunder are clearly and conspicuously disclosed; and unless respondent promptly and fully performs all of its obligations and requirements, directly or impliedly represented under the terms of each said guarantee.

11. Representing, directly or by implication, that an office is maintained by respondent in any city or town other than that in which a fully staffed sales, service and installation office or place of business is, in fact, maintained, occupied and used by respondent; or misrepresenting in any manner the size of respondent's business.

12. Representing, directly or by implication, that respondent will apply such products or services to waterproof basements without digging, or without the necessity of having waterproofing work done inside the basement.

13. Using in any manner, a sales plan, scheme or device wherein false, misleading or deceptive statements or representations are made, directly or by implication, in order to obtain leads or prospects for the sale of, or induce purchases of goods or services.

14. Furnishing or otherwise placing in the hands of others the means and instrumentalities by and through which the public may be misled or deceived in the manner, or by the acts and practices prohibited by this order.

15. Failing to maintain and produce for inspection and copying, for a period of three years, copies of all advertisements, brochures, sales contracts, salesmen's manuals and sales bulletins, and all other promotional materials utilized in the advertising, promotion and sale of such products or services.

16. Contracting for any sale of such products or services in the form of a sales contract or other agreement which shall become binding on the buyer prior to midnight of the third day, excluding Sundays and legal holidays, after the date of execution of the contract or other agreement.

17. Failing to furnish the buyer with a fully completed receipt or copy of any contract pertaining to such sale at the time of its execution which shows the date of the transaction and contains the name and address of the seller, and in immediate proximity to the space reserved in the contract for the signature of the buyer or on the front page of the receipt if a contract is not used and in bold face type of a minimum size of 10 points, a statement in substantially the following form:

You, the buyer, may cancel this transaction at any time prior to midnight of the third business day after the date of this transaction. See the attached notice of cancellation form for an explanation of this right.

18. Failing to furnish each buyer, at the time he signs the sales contract or otherwise agrees to buy consumer goods or services from the seller, a completed form in duplicate, captioned "Notice of Cancellation," which shall be attached to the contract or receipt and easily detachable, and which shall contain in ten point bold face type the following information and statements.

NOTICE OF CANCELLATION

(Enter Date of Transaction)

You may cancel this transaction, without any penalty or obligation, within three business days from the above date.

To cancel this transaction, mail or deliver a signed and dated copy of this cancellation notice or any other written notice, or send a telegram to ----------, at
(Name of Seller)

(Address of Seller's Place of Business)
not later than midnight of ----------
(Date)

I hereby cancel this transaction.

(Date)

(Buyer's Signature)

19. Failing to inform each buyer orally, at the time he signs the contract or purchase the goods or services, of his right to cancel.

20. Failing or refusing to honor any valid notice of cancellation by a buyer and within 3 business days after the receipt of such notice, to (i) refund all payments made under the contract or sale; (ii) cancel and return any negotiable instrument executed by the buyer in connection with the contract or sale.

II

1. It is Further Ordered that:

(a) Respondent herein deliver, by registered mail, a copy of this Decision and Order to each of its present and future franchisees, licensees, employees, salesmen, agents, solicitors, independent contractors or to any other person who advertises, promotes, offers for sale, sells or distributes such products or services offered by respondent.

(b) Respondent herein provide each person so described in paragraph (a) above with a form returnable to the respondent clearly stating his intention to be bound by and to conform his business practices to the requirements of this Order; retain said statement during the period said person is so engaged; and make said statement available to the Commission's staff for inspection and copying upon request;

(c) Respondent herein inform each person so described in paragraph (a) above that the respondent will not use or engage or will terminate the use or engagement of any such party, unless such party agrees to and does file notice with the respondent that he will be bound by the provisions contained in this Order;

(d) If such party as described in paragraph (a) above will not agree to so file the notice set forth in paragraph (b) above with the respondent and be bound by the provisions of the Order, the respondent shall not use or engage or continue the use or engagement of, such party to promote, offer for sale, sell or distribute such products or services included in this Order;

(e) Respondent herein inform the persons described in paragraph (a) above that the respondent is obligated by this Order to discontinue dealing with or to terminate the use or engagement of persons who continue on their own the deceptive acts or practices prohibited by this Order;

(f) Respondent herein institute a program of continuing surveillance adequate to reveal whether the business practices of each said person described in paragraph (a) above conform to the requirements of this Order;

(g) Respondent herein discontinue dealing with or terminate the use or engagement of any person described in paragraph (a) above, as revealed by the aforesaid program of surveillance, who continues on his own any act or practice prohibited by this Order.

2. It is further ordered that respondent Northerlin Co., Inc., shall forthwith distribute a copy of this Order to each of its operating divisions.

3. It is further ordered that respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

4. It is further ordered that in the event that the corporate respondent merges with another corporation or transfers all or a substantial part of its business or assets to any other corporation or to any other person, said respondent shall require such successor or transferee to file promptly with the Commission a written agreement to be bound by the terms of this order; provided that if said respondent wishes to present to the Commission any reasons why said order should not apply in its present form to said successor or transferee, it shall submit to the Commission a written statement setting forth said reasons prior to the consummation of said succession or transfer.

5. It is further ordered that the respondent herein shall within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

The Decision and Order was issued by the Commission July 12, 1976.

CHARLES A. TOBIN,
Secretary.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

[Docket No. 75F-0010]

PART 121—FOOD ADDITIVES

Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

COMPONENTS OF PAPER AND PAPERBOARD IN CONTACT WITH AQUEOUS AND FATTY FOODS

The Food and Drug Administration is amending the food additive regulations to provide for the use of an additional

copolymer; effective August 18, 1976; objections by September 17, 1976.

Notice was given in the FEDERAL REGISTER of June 3, 1975 (40 FR 23919) that a food additive petition (FAP 5B3072) had been filed by the Rohm and Haas Co., Independence Mall West, Philadelphia, PA 19105, proposing that § 121.2526 (21 CFR 121.2526) be amended to provide for the safe use of oxazolidinylethylmethacrylate copolymer with ethyl acrylate and methyl methacrylate as a component of paper and paperboard for food-contact use.

The Commissioner of Food and Drugs, having evaluated the data in the food additive petition and other relevant material, concludes that § 121.2526 should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), § 121.2526 (b)(2) is amended by adding alphabetically a new item to the list of substances as follows:

§ 121.2526 Components of paper and paperboard in contact with aqueous and fatty foods.

* * * * * * *

(b) * * *

(2) * * *

List of substances

* * * * * * *

Oxazolidinylethylmethacrylate (CAS Registry No. 46236-15-1) copolymer with ethyl acrylate and methyl methacrylate, and containing not more than 6 percent by weight of oxazolidinylethylmethacrylate. Maximum nitrogen content shall be 0.5 percent and number average molecular weight of that portion of the copolymer soluble in tetrahydrofuran shall be not less than 50,000.

Limitations

* * * * * * *

For use only as a binder for pigment coatings as a binder level not to exceed 4.0 percent by weight of dry paper or paperboard.

* * * * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before September 17, 1976, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the regulation, specify with particularity the provisions of the regulation deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Six copies of all documents shall be filed and should be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This regulation shall become effective August 18, 1976.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: August 10, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

[FR Doc. 76-24146 Filed 8-17-76;8:45 am]

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Tylosin and Sulfamethazine

The Food and Drug Administration approves new animal drug application (100-127V) filed by V.P.O., Inc., 4444 S. 76th St., Omaha, NE 68127, proposing safe and effective use of a tylosin and sulfamethazine premix used in the manufacture of swine feeds. The approval is effective August 18, 1976.

The Commissioner of Food and Drugs is amending § 558.630 (21 CFR 558.630) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), § 558.630 is amended by revising paragraph (b)(3) to read as follows:

§ 558.630 Tylosin and sulfamethazine.

* * * * * *

(b) * * *

(3) To 011490, 016968, 017255, 025796, 034500, 035955, 043743: 10 grams per pound each, paragraph (f)(2)(ii) of this section.

* * * * * *

Effective date. This amendment shall be effective August 18, 1976.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: August 11, 1976.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.76-24148 Filed 8-17-76;8:45 am]

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-2250]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128).

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at 40 F.R. 57210-212 and 41 F.R. 1062). A list of servicing companies is also available from the Federal Insurance Administration (FIA), HUD, 451 Seventh Street, SW., Washington, D.C. 20410.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. 551. The entry reads as follows:

§ 1914.4 List of eligible communities.

[Docket No. FI–895]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Bellefonte, Centre County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Bellefonte, Centre County, Pennsylvania under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Council Room, Borough Hall, Bellefonte.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Spring Creek	At Northern corporate limits	730	135	55
	North of Lamb St	736	100	80
	North of High St	742	365	0
Logan Branch	North of Spring St	749	20	220
	South of Spring St	(1)	0	150
Spring Creek	At Southwest corporate limits	751	200	60

[1] Approximate study.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: July 23, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI–896]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Township of Castanea, Clinton County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Township of Castanea, Clinton County, Pennsylvania under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Township must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1971, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Meeting Hall, Municipal Building, Nittany Road, Castanea.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream			
			Left		Right	
West Branch Susquehanna River.	Eastern corporate limit	563	(1)		(2)	
	L.R. 18042	563.5	(2)		(3)	
	U.S. 220	564	(1)		(4)	
Bald Eagle Creek	Eastern corporate limit	563	(4)			140
	Penn Central RR	563	(5)			90
	Appalachian Throughway	563	(3)			80
	Casteaea Bridge	563		700		60
	Appalachian Throughway	563		120		440
	Penn Central RR	564.5		20	(1)	

[1] Outside corporate limit.
[2] Overlaps with Bald Eagle Creek.
[3] 60 to corporate limit.
[4] 40 to corporate limit.
[5] Overlaps with West Branch Susquehanna.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: July 22, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-909]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Collingdale, Delaware County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Collingdale, Delaware County, Pennsylvania under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the counter of the Main office, Borough Hall, Collingdale.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Darby Creek (flooding source entirely in adjacent community of Darby).	Upstream from 9th St	27	[1] 310	240
Darby Creek	Upstream from MacDade Blvd	28	[1] 590	[2] 270
Pusey Run, studied by approximate methods.	Upstream from Eden Cemetery Rd		140	135
	Upstream from Andrews Rd. (extended)		150	90
Hermsprota Rnn, studied by approximate methods.	Upstream from B. & O. RR		60	40
	MacDade Blvd		60	50

[1] Left bank and area inundated by 100-yr flood is entirely within adjacent community of Darby.
[2] Left bank and approximately ½ of the area inundated by 100-yr flood is within the adjacent community of Darby

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: July 22, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-897]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Eddystone, Delaware County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Eddystone, Delaware County, Pennsylvania under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Borough Secretary's office, Borough Hall, Eddystone.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Ridley Creek	4th Street Bridge	10	85	(1)
	Penn Central Railroad Bridge	10	3	(1)
	9th Street Bridge	11	4	(1)
	12th St. (extended)	12	14	(1)
	North corporate limit	13	20	(1)
Crum Creek	Pennsylvania Route 291	10	(1)	21
	Boeing County Bridge (Culvert)	12	(1)	8
	United Engineers & Constructors Co. Bridge.	14	(1)	6
	Penn Central Railroad Bridge	15	(1)	8
	Dam No. 1	18	(1)	26
	North corporate limit	19	(1)	38
Delaware River	Eddystone Ave. (extended)	10	(1)	125
	300 ft from southwest corporate limits	10	(1)	128
	125 ft from west corporate limits	10	(1)	75

[1] Corporate limits.

(National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective Jan. 28, 1969 (33 F.R. 17804, Nov. 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, Feb. 27, 1969, as amended by 39 F.R. 2787, Jan. 24, 1974.)

Issued: July 22, 1976.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Milesburg, Centre County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Milesburg, Centre County, Pennsylvania under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in floodprone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Borough Hall, Milesburg, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Bald Eagle	Catherine St. (extended)	693	(1)	580
	Grove St. (extended)	700	700	(1)
Spring Creek	Commercial St.	698	1,200	30
	Smith St. (extended)	700	1,060	700

[1] Corporate limit.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Painesville, Lake County, Ohio

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Painesville, Lake County, Ohio under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the City Manager's office, City Hall, 7 Richmond Street, Painesville.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Tiber Creek	Jackson St.		40	60
	Newell St.	646	270	455
	Hayer Dr.	643	(1)	240

[Docket No. FI-900]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Wooster, Wayne County, Ohio

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Wooster, Wayne County, Ohio under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Mayor's office, 538 North Market Street, Wooster.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Tributary 1	Corporate limits east of Route 76		20	11
Tributary 2	Long Rd.		5	5

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 662-76]

PART 20—CRIMINAL JUSTICE INFORMATION SYSTEMS

Appendix—Commentary on Selected Sections of the Regulations on Criminal History Record Information Systems

CRIMINAL HISTORY RECORD INFORMATION SYSTEMS; COMMENTARY

This order provides for permanent publication in the Code of Federal Regulations of the commentary accompanying the Justice Department regulations on criminal justice information systems (28 CFR Part 20). The commentary to Subparts A and B is identical to that published in the FEDERAL REGISTER on March 19, 1976 (41 FR 11717). The commentary to Subpart C is the same as that published in the May 20, 1975, FEDERAL REGISTER (40 FR 22119), except that with respect to the commentary on § 20.36 (relating to requirements for participation in the Computerized Criminal History Program), the requirement that equipment utilized for the handling of criminal justice data be dedicated to the criminal justice function is eliminated.

By virtue of the authority vested in me by 28 U.S.C. 509, 510, 534, and Pub. L. 92–544, 86 Stat. 1115, and (5 U.S.C. 301), Chapter I of Title 28, Code of Federal Regulations, is amended by adding an Appendix to Part 20 immediately after Part 20, as set forth below.

EDWARD H. LEVI,
Attorney General.

Dated: August 7, 1976.

APPENDIX—COMMENTARY ON SELECTED SECTIONS OF THE REGULATIONS ON CRIMINAL HISTORY RECORD INFORMATION SYSTEMS

Subpart A—§ 20.3(b). The definition of criminal history record information is intended to include the basic offender-based transaction statistics/computerized criminal history (OBTS/CCH) data elements. If notations of an arrest, disposition, or other formal criminal justice transactions occur in records other than the traditional "rap sheet" such as arrest reports, any criminal history record information contained in such reports comes under the definition of this subsection.

The definition, however, does not extend to other information contained in criminal justice agency reports. Intelligence or investigative information (e.g., suspected criminal activity, associates, hangouts, financial information, ownership of property and vehicles) is not included in the definition of criminal history information.

§ 20.3(c). The definitions of criminal justice agency and administration of criminal justice of 20.3(c) must be considered together. Included as criminal justice agencies would be traditional police, courts, and corrections agencies as well as subunits of noncriminal justice agencies performing a function of the administration of criminal justice pursuant to Federal or State statute or executive order. The above subunits of noncriminal justice agencies would include for example, the Office of Investigation of the U.S. Department of Agriculture which has as its principal function the collection of evidence for criminal prosecutions of fraud. Also

V 41 161 AUG 18 76 UMI

included under the definition of criminal justice agency are umbrella-type administrative agencies supplying criminal history information services such as New York's Division of Criminal Justice Services.

§ 20.3(e). Disposition is a key concept in section 524(b) of the Act and in 20.21(a)(1) and 20.21(b). It, therefore is defined in some detail. The specific dispositions listed in this subsection are examples only and are not to be construed as excluding other unspecified transactions concluding criminal proceedings within a particular agency.

§ 20.3(k). The different kinds of acquittals and dismissals as delineated in 20.3(e) are all considered examples of nonconviction data.

Subpart B—§ 20.20(a). These regulations apply to criminal justice agencies receiving funds under the Omnibus Crime Control and Safe Streets Act for manual or automated systems subsequent to July 1, 1973. In the hearings on the regulations, a number of those testifying challenged LEAA's authority to promulgate regulations for manual systems by contending that section 524(b) of the Act governs criminal history information contained in automated systems.

The intent of section 524(b), however, would be subverted by only regulating automated systems. Any agency that wished to circumvent the regulations would be able to create duplicate manual files for purposes contrary to the letter and spirit of the regulations.

Regulation of manual systems, therefore, is authorized by section 524(b) when coupled with section 501 of the Act which authorizes the Administration to establish rules and regulations "necessary to the exercise of its functions * * *."

The Act clearly applies to all criminal history record information collected, stored, or disseminated with LEAA support subsequent to July 1, 1973.

Limitations as contained in Subpart C also apply to information obtained from the FBI Identification Division or the FBI/NCIC System.

§ 20.20 (b) and (c). Section 20.20 (b) and (c) exempts from regulations certain types of records vital to the apprehension of fugitives, freedom of the press, and the public's right to know. Court records of public judicial proceedings are also exempt from the provisions of the regulations.

Section 20.20(b)(2) attempts to deal with the problem of computerized police blotters. In some local jurisdictions, it is apparently possible for private individuals and/or newsmen upon submission of a specific name to obtain through a computer search of the blotter a history of a person's arrests. Such files create a partial criminal history data bank potentially damaging to individual privacy, especially since they do not contain final dispositions. By requiring that such records be accessed solely on a chronological basis, the regulations limit inquiries to specific time periods and discourage general fishing expeditions into a person's private life.

Subsection 20.20(c) recognizes that announcements of ongoing developments in the criminal justice process should not be precluded from public disclosure. Thus, announcements of arrest, convictions, new developments in the course of an investigation may be made. It is also permissible for a criminal justice agency to confirm certain matters of public record information upon specific inquiry. Thus, if a question is raised: "Was X arrested by your agency on January 3, 1975" and this can be confirmed or denied by looking at one of the records enumerated in subsection (b) above, then the criminal justice agency may respond to the inquiry. Conviction data as stated in 20.21(b) may be disseminated without limitation.

§ 20.21. The regulations deliberately refrain from specifying who within a State should be responsible for preparing the plan. This specific determination should be made by the Governor. The State has 90 days from the publication of these revised regulations to submit the portion of the plan covering 20.21(b) and 20.21(f).

§ 20.21(a)(1). Section 524(b) of the Act requires that LEAA insure criminal history information be current and that, to the maximum extent feasible, it contain disposition as well as current data.

It is, however, economically and administratively impractical to maintain complete criminal histories at the local level. Arrangements for local police departments to keep track of dispositions by agencies outside of the local jurisdictions generally do not exist. It would, moreover, be bad public policy to encourage such arrangements since it would result in an expensive duplication of files.

The alternatives to locally kept criminal histories are records maintained by a central State repository. A central State repository is a State agency having the function pursuant to a statute or executive order of maintaining comprehensive statewide criminal history record information files. Ultimately, through automatic data processing the State level will have the capability to handle all requests for in-State criminal history information.

Section 20.20(a)(1) is written with a centralized State criminal history repository in mind. The first sentence of the subsection states that complete records should be retained at a central State repository. The word "should" is permissive; it suggests but does not mandate a central State repository.

The regulations do require that States establish procedures for State and local criminal justice agencies to query central State repositories wherever they exist. Such procedures are intended to insure that the most current criminal justice information is used.

As a minimum, criminal justice agencies subject to these regulations must make inquiries of central State repositories whenever the repository is capable of meeting the user's request within a reasonable time. Presently, comprehensive records of an individual's transactions within a State are maintained in manual files at the State level, if at all. It is probably unrealistic to expect manual systems to be able immediately to meet many rapid-access needs of police and prosecutors. On the other hand, queries of the State central repository for most noncriminal justice purposes probably can and should be made prior to dissemination of criminal history record information.

§ 20.21(b). The limitations on dissemination in this subsection are essential to fulfill the mandate of section 524(b) of the Act which requires the Administration to assure that the "privacy of all information is adequately provided for and that information shall only be used for law enforcement and criminal justice and other lawful purposes." The categories for dissemination established in this section reflect suggestions by hearing witnesses and respondents submitting written commentary.

The regulations distinguish between conviction and nonconviction information insofar as dissemination is concerned. Conviction information is currently made available without limitation in many jurisdictions. Under these regulations, conviction data and pending charges could continue to be disseminated routinely. No statute, ordinance, executive order, or court rule is necessary in order to authorize dissemination of conviction data. However, nothing in the regulations shall be construed to negate a State law limiting such dissemination.

After December 31, 1977, dissemination of nonconviction data would be allowed, if authorized by a statute, ordinance, executive order, or court rule, decision, or order. The December 31, 1977, deadline allows the States time to review and determine the kinds of dissemination for non-criminal justice purposes to be authorized. When a State enacts comprehensive legislation in this area, such legislation will govern dissemination by local jurisdictions within the State. It is possible for a public record law which has been construed by the State to authorize access to the public of all State records, including criminal history record information, to be considered as statutory authority under this subsection. Federal legislation and executive orders can also authorize dissemination and would be relevant authority.

For example, Civil Service suitability investigations are conducted under Executive Order 10450. This is the authority for most investigations conducted by the Commission. Section 3(a) of 10450 prescribes the minimum scope of investigation and requires a check of FBI fingerprint files and written inquiries to appropriate law enforcement agencies.

§ 20.21(b)(3). This subsection would permit private agencies such as the Vera Institute to receive criminal histories where they perform a necessary administration of justice function such as pretrial release. Private consulting firms which commonly assist criminal justice agencies in information systems development would also be included here.

§ 20.21(b)(4). Under this subsection, any good faith researchers including private individuals would be permitted to use criminal history record information for research purposes. As with the agencies designated in § 20.21(b)(3) researchers would be bound by an agreement with the disseminating criminal justice agency and would, of course, be subject to the sanctions of the Act.

The drafters of the regulations expressly rejected a suggestion which would have limited access for research purposes to certified research organizations. Specifically "certification" criteria would have been extremely difficult to draft and would have inevitably led to unnecessary restrictions on legitimate research.

Section 524(a) of the Act which forms part of the requirements of this section states:

"Except as provided by Federal law other than this title, no officer or employee of the Federal Government, nor any recipient of assistance under the provisions of this title shall use or reveal any research or statistical information furnished under this title by any person and identifiable to any specific private person for any purpose other than the purpose for which it was obtained in accordance with this title. Copies of such information shall be immune from legal process, and shall not, without the consent of the person furnishing such information, be admitted as evidence or used for any purpose in any action suit, or other judicial or administrative proceedings."

LEAA anticipates issuing regulations, pursuant to Section 524(a) as soon as possible.

§ 20.21(c)(2). Presently some employers are circumventing State and local dissemination restrictions by requesting applicants to obtain an official certification of no criminal record. An employer's request under the above circumstances gives the applicant the unenviable choice of invasion of his privacy or loss of possible job opportunities. Under this subsection routine certifications of no record would no longer be permitted. In extraordinary circumstances, however, an individual could obtain a court order permitting such a certification.

§ 20.21(c)(3). The language of this subsection leaves to the States the question of who among the agencies and individuals listed in § 20.21(b) shall actually receive criminal records. Under these regulations a State could place a total ban on dissemination if it so wished. The State could, on the other hand, enact laws authorizing any member of the private sector to have access to non-conviction data.

§ 20.21(d). Non-criminal justice agencies will not be able to receive records of juveniles unless the language of a statute or court order, rule, or court decision specifies that juvenile records shall be available for dissemination. Perhaps the most controversial part of this subsection is that it denies access to records of juveniles by Federal agencies conducting background investigations for eligibility to classified information under existing legal authority.

§ 20.21(e). Since it would be too costly to audit each criminal justice agency in most States (Wisconsin, for example, has 1075 criminal justice agencies) random audits of a "representative sample" of agencies are the next best alternative. The term "representative sample" is used to insure that audits do not simply focus on certain types of agencies. Although this subsection requires that there be records kept with the names of all persons or agencies to whom information is disseminated, criminal justice agencies are not required to maintain dissemination logs for "no record" responses.

§ 20.21(f). Requirements are set forth which the States must meet in order to assure that criminal history record information is adequately protected. Automated systems may operate in shared environments and the regulations require certain minimum assurances.

§ 20.21(g)(1). A "challenge" under this section is an oral or written contention by an individual that his record is inaccurate or incomplete; it would require him to give a correct version of his record and explain why he believes his version to be correct. While an individual should have access to his record for review, a copy of the record should ordinarily only be given when it is clearly established that it is necessary for the purpose of challenge.

The drafters of the subsection expressly rejected a suggestion that would have called for a satisfactory verification of identity by fingerprint comparison. It was felt that States ought to be free to determine other means of identity verification.

§ 20.21(g)(5). Not every agency will have done this in the past, but henceforth adequate records including those required under 20.21(e) must be kept so that notification can be made.

§ 20.21(g)(6).—This section emphasizes that the right to access and review extends only to criminal history record information and does not include other information such as intelligence or treatment data.

§ 20.22(a). The purpose for the certification requirement is to indicate the extent of compliance with these regulations. The term "maximum extent feasible" acknowledges that there are some areas such as the completeness requirement which create complex legislative and financial problems.

NOTE: In preparing the plans required by these regulations, States should look for guidance to the following documents: National Advisory Commission on Criminal Justice Standards and Goals, Report on the Criminal Justice System; Project SEARCH: Security and Privacy Considerations in Criminal History Information Systems, Technical Reports No. 2 and No. 13; Project SEARCH: A Model State Act for Criminal Offender Record Information, Technical Memorandum No. 3; and Project SEARCH: Model Administrative Regulations for Criminal Offender Record Information, Technical Memorandum No. 4.

Subpart C—§ 20.31. Defines the criminal history record information system operated by the Federal Bureau of Investigation. Each state having a record in the Computerized Criminal History (CCH) file must have a fingerprint card on file in the FBI Identification Division to support the CCH record concerning the individual.

Paragraph b is not intended to limit the identification services presently performed by the FBI for Federal, state and local agencies.

§ 2032. The grandfather clause contained in the third paragraph of this Section is designed, from a practical standpoint, to eliminate the necessity of deleting from the FBI's massive files the non-includable offenses which were stored prior to February, 1973.

In the event a person is charged in court with a serious or significant offense arising out of an arrest involving a non-includable offense, the non-includable offense will appear in the arrest segment of the CCH record.

§ 2033. Incorporates the provisions of a regulation issued by the FBI on June 26, 1974, limiting dissemination of arrest information not accompanied by disposition information outside the Federal government for non-criminal justice purposes. This regulation is cited in 28 CFR 50.12.

§ 20.34. The procedures by which an individual may obtain a copy of his manual identification record are particularized in 28 CFR 16.30–34.

The procedures by which an individual may obtain a copy of his Computerized Criminal History record are as follows:

If an individual has a criminal record supported by fingerprints and that record has been entered in the NCIC CCH File, it is available to that individual for review, upon presentation of appropriate identification, and in accordance with applicable state and Federal administrative and statutory regulations.

Appropriate identification includes being fingerprinted for the purpose of insuring that he is the individual that he purports to be. The record on file will then be verified as his through comparison of fingerprints.

Procedure. 1. All requests for review must be made by the subject of his record through a law enforcement agency which has access to the NCIC CCH File. That agency within statutory or regulatory limits can require additional identification to assist in securing a positive identification.

2. If the cooperating law enforcement agency can make an identification with fingerprints previously taken which are on file locally and if the FBI identification number of the individual's record is available to that agency, it can make an on-line inquiry of NCIC to obtain his record on-line or, if it does not have suitable equipment to obtain an on-line response, obtain the record from Washington, D.C., by mail. The individual will then be afforded the opportunity to see that record.

3. Should the cooperating law enforcement agency not have the individual's fingerprints on file locally, it is necessary for that agency to relate his prints to an existing record by having his identification prints compared with those already on file in the FBI, or, possibly, in the State's central identification agency.

4. The subject of the requested record shall request the appropriate arresting agency, court, or correctional agency to initiate action necessary to correct any stated inaccuracy in his record or provide the information needed to make the record complete.

§ 20.36. This section refers to the requirements for obtaining direct access to the CCH file.

§ 20.37. The 120-day requirement in this section allows 30 days more than the similar provision in Subpart B in order to allow for processing time which may be needed by the states before forwarding the disposition to the FBI.

Title 32—National Defense

CHAPTER VII—DEPARTMENT OF THE AIR FORCE

SUBCHAPTER C—PUBLIC RELATIONS

PART 832—EMPLOYMENT OF CIVIL AIR PATROL

Cadet Program

Part 832 of Subchapter C, Title 32 CFR, is revised by designating the existing part as Subpart A—General Information (Sections 1 through 6) and adding Subpart B—Cadet Program (Sections 10 through 16), to read as follows:

Subpart B—Cadet Program

Sec.
832.10 Cadet program.
832.11 Eligibility requirements.
832.12 Recognition of achievement.
832.13 Encampments and conferences.
832.14 Cadet special activities and programs.
832.15 Orientation visits.
832.16 Air Force support.

AUTHORITY: Sec. 8012, 9441, 70A Stat. 488, 572; 10 U.S.C. 8012, 9441.

Subpart B—Cadet Program

§ 832.10 Cadet program.

The CAP is responsible for providing aerospace education and training to its cadet members. The cadet program is designed to give each cadet:

(a) An aerospace education, including:

(1) The social, political, economic, scientific, vocational, educational, and international facets of aerospace.

(2) An introduction to a variety of aerospace matters (such as meteorology, theory of flight, navigation, aircraft power plants, rockets, and missiles) as necessary to develop an informed and aerospace-minded citizenry.

(b) Training in citizenship, character development, leadership, customs and courtesies of the Service, and exercise of command through self-government in the cadet organization.

§ 832.11 Eligibility requirements.

Any boy or girl 13 years of age (or enrolled in the seventh grade) through 17 years of age, who meets such prerequisites as the CAP corporation may from time to time establish, is eligible for cadet membership. Cadets may retain their cadet status until age 21. Eligibility for special activities or training may vary according to the type of activity or training being conducted.

§ 832.12 Recognition of achievement.

(a) Under the provisions of Part 888, this chapter, any cadet who successfully completes all the requirements and is awarded the CAP General Billy Mitchell Award can enlist in the Air Force, Air Force Reserve, or Air National Guard as

V 41 161 AUG 18 76 UMI

an airman, pay grade E–2, provided he meets all other Air Force requirements.

(b) A cadet who receives the CAP General Mitchell Award or higher achievements can be afforded training credit when applying for enlistment in the ROTC program as provided for in Part 870 of this chapter.

§ 832.13 Encampments and conferences.

(a) Type A encampments are conducted under supervision of CAP personnel with Air Force advice, assistance, and cooperation. They are conducted annually at selected Air Force bases and do not last more than 14 days. They enable cadets to live in the environment of an active Air Force installation; to acquire firsthand knowledge of Air Force activities; and to learn of career opportunities in the Air Force.

(1) The encampment commander (a CAP officer) prescribes the uniforms the CAP members wear during the encampment. He is responsible for the conduct of CAP personnel, and for compliance with the directives issued by the commander of the host base.

(2) The National Commander, CAP, establishes the encampment attendance quota for each CAP wing.

(b) Type B encampments are conducted under the same type of supervision as Type A encampments, and their staff composition is the same. However, these encampments are conducted at community, state, or Federal facilities (including other Department of Defense Installations). They are scheduled for a series of weekends, or during a continuous encampment period. The program may include training in emergency services, moral leadership, general leadership, and briefings at nearby aerospace facilities.

(c) CAP regional conferences are held annually in each of the eight CAP regions, at a location within each region. These conferences are conducted to assess progress during the current year, to establish goals for the coming year, and to present briefings by Air Force representatives on programs or activities which relate to CAP's role as an auxiliary of the Air Force. Selected cadets participate in these conferences to advise on the cadet program, and to gain further understanding of the overall CAP program in preparation for leadership positions within their unit or wing.

§ 832.14 Cadet special activities and programs.

(a) *International Air Cadet Exchange.* Originated in 1948, this annual exchange fosters international understanding, goodwill, and friendship among the youth of the participating countries through a common interest in aerospace. The CAP exchanges cadets with similar organizations in Canada, Central and South America, Europe, and the Middle and Far East.

(b) *Cadet Officer's School.* This school is designed to increase the effectiveness of cadet officers. The curriculum includes psychology of leadership, problem-solving techniques, public speaking, physical fitness, and orientation trips. Instruction is divided between seminars, lectures, and field exercises.

(c) *Air Force Academy Survival Course.* This course is planned and conducted by Air Force personnel at the Air Force Academy. Its purpose is to acquaint the cadets with techniques and methods of survival.

(d) *Communications and Electronics Course.* This course is designed for outstanding cadets who have demonstrated an interest in the field of electronics. The course is planned and conducted by Air Force personnel at selected Air Force bases. The curriculum includes communications principles, radio operating training, tours, and practical laboratory exercises.

(e) *Federal Aviation Administration (FAA) Cadet Orientation Program.* This program is conducted at the FAA Academy. The course is designed to acquaint cadets with the history and organization of FAA, and to develop an understanding of FAA functions and responsibilities.

(f) *Space Flight Orientation Course.* This course is held annually at an outer-space-oriented facility. It is designed to further the aerospace education of cadets, and to motivate them toward careers in aerospace and allied sciences. The course includes history, philosophy, and objectives of space guidance, navigation instrumentation, and communication and system engineering.

(g) *Air Training Command (ATC) Familiarization Course.* This familiarization program for cadets is conducted at selected ATC undergraduate pilot and navigator training bases. It is designed to stimulate interest in an Air Force career. Each cadet receives training in the flight simulator, attends physiological training, and is briefed on the overall operation of the Air Force pilot training program.

(h) *Air Force Logistics Command (AFLC) Orientation Course.* This course is held annually at an AFLC Air Logistics Center. It is designed to further the aerospace education of cadets through an understanding of the Air Force logistics system. The curriculum may include acquisition, storage, distribution, maintenance repair and modification, data processing support, instrumentation, communications, and practical application of the logistics system.

(i) *Medical Services Orientation Program.* This program is planned and supervised by Air Force medical personnel, and is designed to acquaint cadets with the various fields of medical services available in the Air Force and civilian life.

(j) *Cadet Competitions.* Regional and national competitions, including drill and other aerospace-oriented competitive events, may be held annually at selected Air Force installations. Each region selects a team as its representative at the national competition.

(1) The National Commander, CAP, designates the location at which the national competition will be conducted.

(2) Air Force commanders provide suitable facilities and competent judges, if available, when requested by the Commander, CAP–USAF.

(k) *Chaplain Sponsored Conferences.* These annual conferences, (Christian Encounter Conferences) sponsored by the USAF Chief of Chaplains, are designed to stimulate the moral and spiritual development of the CAP cadet. Personnel and career counseling and spiritual guidance are provided by prominent clergymen, laymen, and national leaders who discuss problems of youth, marriage, home life, and other topics of interest. Cadets also participate in a well-rounded program of social and recreational activities.

(l) *Cadet Flying Programs.* The CAP corporation provides funding annually to help defray costs for cadet flight training and flight orientation programs. Flight training may be to solo level in glider or powered aircraft. Orientation flights are to motivate cadets through exposure to flying operations.

§ 832.15 Orientation visits.

Selected groups of cadets may participate in orientation visits to enhance or supplement the cadet training program. Examples are visits to Air Force installations, the Air Force Academy, the Air Force Museum, and FAA Air Traffic Control facilities. These visits are intended to serve as motivational activities, as well as to provide educational exposure to supplement academic instruction within the cadet training program.

§ 832.16 Air Force support.

The authority for Air Force support to CAP is outlined in AFR 46–4, Civil Air Patrol, Auxiliary of the Air Force. The Air Force is authorized to provide services and facilities to the CAP which include, but are not limited to; available billeting, messing, emergency medical care, limited exchange privileges, and transportation. DOD and Air Force directives provide guidance as to the scope of such services and facilities that are authorized for CAP. Air Force installation commanders should contact the appropriate USAF–CAP wing or region liaison officer for assistance on CAP programs or activities conducted on their installation.

JAMES L. ELMER,
Major USAF Executive,
Directorate of Administration.

SUBCHAPTER I—MILITARY PERSONNEL

PART 889—DESERTION AND UNAUTHORIZED ABSENTEEISM

Part 889, Subchapter I of Chapter VII of Title 32, Code of Federal Regulations, is revised to read as follows:

Sec.
889.1 Purpose.
889.2 Terms explained.
889.3 Criteria for administrative classification of deserters.
889.4 Apprehension of absentees and deserters.
889.5 Authority to apprehend.
889.6 Return to military control.
889.7 Rewards and reimbursements.
889.8 Cooperation of armed forces and civil law enforcement agencies.
889.9 Deserter information system.
889.10 Responsibilities.
889.11 Specific responsibilities when a member is absent.
889.12 Required actions following absence or desertion of member.
889.13 Actions required when a member is absent.
889.14 Amplification of actions required.
889.15 Actions required when member fails to report to Personnel Support agency.
889.16 Action required in special cases.
889.17 Actions required to return member to duty.
889.18 Transfer from civilian to military jurisdiction.
889.19 Return to military control by other than unit of assignment.
889.20 Disposition when authorized absence has been terminated.
889.21 Enlisted personnel authorized absences, RCS:HAF–DPM(Q) 7137.
889.22 List of armed forces police detachments.
889.23 List of Army areas.
889.24 Sample format message (confirmation of deserter status).
889.25 Sample format message (notification of return of absentee or deserter to military control).

AUTHORITY: The provisions of this Part 889 issued under 10 U.S.C. 8012.

§ 889.1 Purpose.

(a) This part establishes uniform policies and standard procedures for the management of desertion and unauthorized absenteeism to: (1) Minimize the occurrence of desertion and unauthorized absenteeism, (2) foster the development of effective deterrent programs, (3) enhance apprehension efforts, and (4) provide for accurate and timely reporting of cases of desertion and unauthorized absenteeism. This part applies to all military personnel serving on or ordered to report to active duty in the U.S. Air Force and members of the Reserve components serving on active duty or active duty for training.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 889.2 Terms explained.

(a) Absentee—Absent Without Leave (AWOL). Any member of the Air Force not classified administratively as a deserter who is absent without authority from the unit, organization, or other place of duty at which member is required to be. This does not include members in confinement.

(b) Action Unit. The unit which will administer the member's unauthorized absence.

(c) Deserter. A member of the Air Force who has been administratively classified a deserter in accordance with the criteria in § 889.3.

(d) Deserter Information Point (DIP). A HQ USAF focal point to provide for the control, accounting, and dissemination of information concerning Air Force members administratively classified as absentees or deserters. For the purpose of this part, all correspondence and communications will be with AFMPC/DPMAKE, Randolph AFB TX 78148.

(e) Detaining Unit. The unit to which a member turns himself or herself in; the unit which apprehends the absentee; or the first Air Force unit to accept custody of the absentee.

(f) Dropped From Rolls (DFR) of the Organization. An administrative procedure which drops a member from the strength accountability of the organization to which assigned, but does not terminate the member's military status.

(g) Effective Date of Termination of Absence.

(1) Date an absentee or deserter returns to military control, as explained in (l) below, or

(2) Date when information is received that he or she reentered the same or entered another branch of the United States Armed Forces.

(h) Effective Date of Unauthorized Absence or Desertion. The actual date and hour commencing the unauthorized absence. For administrative purposes, the effective date of desertion is the actual date the member is administratively classified as a deserter in accordance with the criteria of § 889.3.

(i) Gaining Unit. The unit to which an absentee while en route in permanent change of station (PCS) or temporary duty (TDY) status) was originally scheduled to report.

(j) Losing Unit. The unit from which a member is absent. When an unauthorized absence occurs during a PCS or TDY, the unit from which the member departed is the losing unit.

(k) Major Command (MAJCOM). Refers to all major commands and separate operating agencies (AFM 26–2).

(l) Return to Military Control. The change of an absentee's or deserter's status when the member:

(1) Voluntarily surrenders to, is delivered to, or is apprehended by, military authorities;

(2) Apprehended by civil authorities at the request of military authorities; or

(3) Is in the hands of civil authorities for other reasons and these authorities make him or her available for return to military control (absence terminates when military authorities are advised of availability); or

(4) Comes under the control of military authorities who have knowledge of the true status; or

(5) Is determined by AFMPC/DPMAKE.

§ 889.3 Criteria for administrative classification of deserters.

For administrative purposes, an absentee will be classified as a deserter and a DD Form 553, Absentee Wanted by the Armed Forces, will be prepared and a message (includes MINIMIZE) dispatched in accordance with § 889.24 when a member:

(a) Is absent without authority regardless of the length of absence, and the facts and circumstances include:

(1) Duty or travel restrictions which have been imposed under the provisions of AFR 205–32; or,

(2) Access within the past 12 months to Top Secret information or to Secret or Confidential information for which special access authority and procedures have been established. (See § 889.16)

(b) Has been absent without leave for 30 consecutive days. (For administrative purposes, date of departure is first day of AWOL and AWOL status continues through 2400 hours on 30th day of continued absence. Desertion starts at 0001 hours on the 31st day of continued absence.)

(c) Has been absent without authority without regard to length of absence and has gone to, or remains in, any foreign country and while in such foreign country has requested or applied for, or accepted any type of, asiyum or residence permit from such country or any governmental agency thereof. (See § 889.16).

(d) Becomes absent without leave or escapes from custody before appropriate action is taken as a result of previous unauthorized absence.

(e) Who is a prisoner escapes.

(f) Who as a result of preliminary inquiry has been charged in accordance with the UCMJ for a serious offense in addition to being AWOL.

§ 889.4 Apprehension of absentees and deserters.

Every practicable effort will be made to apprehend absentees and deserters as expeditiously as possible. To achieve this end, vigorous efforts will be made at the unit level and other appropriate levels to investigate the facts and circumstances surrounding absences, to initiate apprehension actions, and to expedite appropriate notification procedures.

§ 889.5 Authority to apprehend.

Apprehension of absentees and deserters may be accomplished by the following personnel as specified below:

(a) Members of Armed Forces. Absentees and deserters may be apprehended by members of the Armed Forces under the circumstances prescribed by Article 7(b) of the Uniform Code of Military Justice (UCMJ) and paragraph 19 of Manual for Courts-Martial, 1969 (Revised Edition).

(b) Civil Officers. Any civil officer having authority to apprehend offenders under the laws of the United States or of a State, Territory, Commonwealth, or Possession, or the District of Columbia may summarily apprehend and deliver a deserter into the custody of the Air Force.

(c) United States Authorities. United States authorities may apprehend absentees and deserters in foreign countries only when authorized by an international agreement with the country concerned or by agreement with appropriate local authorities when such an agreement is within the purview of an existing international agreement. In these cases, careful consideration must be given to possible international implications and adverse foreign reaction. Where apprehension cannot be accom-

V 41 161 AUG 18 76 UMI

plished under these circumstances, or in any case where doubt exists, as to apprehension authority, a report of the facts will be made to AFMPC/DPMAKE, with an information copy to the major command, for submission through channels to the Assistant Secretary of Defense (M&RA) for resolution.

§ 889.6 Return to military control.

This return may be effected as follows:

(a) Within the Jurisdiction of the United States. Absentees and deserters will be received at any military installation which is manned by active duty personnel. Immediate action will be taken to transfer an individual to the nearest installation of his or her branch of service having facilities to process absentees and deserters.

(b) Outside the Jurisdiction of the United States. Military attaches or mission chiefs in foreign countries will not accept the offer of a deserter or absentee to return to military control unless the United States is directly responsible for the presence of the individual in the country where assistance is requested.

(1) Normally, such deserters and absentees will be advised and assisted to report, at their own expense, to an appropriate US military installation within the United States or overseas.

(2) Unless they are citizens of the country in which assistance is requested, absentees and deserters will be reported to the appropriate authorities of such foreign country with a view toward deportation.

(3) If the individual departs the foreign country or is deported, the military attache or mission chief will make arrangements, if possible, when such departure is known, to have the individual taken into custody upon arrival within a territory where US military officers have authority to apprehend.

§ 889.7 Rewards and reimbursements.

(a) Any authorized communication, oral or written, from a military or federal law enforcement official or agency, requesting active cooperation in the apprehension or delivery to military control of an absentee or deserter wanted by the Air Force, will constitute the basis for a reward. Subsequent to such communication, persons or agencies apprehending, detaining, or delivering absentees, deserters, or escaped military prisoners to military control will be rewarded or reimbursed (but not both) as follows:

(1) Payment of a reward of $15 for the apprehension and detention of absentees, deserters, or escaped military prisoners until the military authorities take them under control.

(2) Payment of a reward of $25 for the apprehension and delivery to military control of absentees, deserters, or escaped military prisoners.

(3) Under circumstances where persons or agencies who apprehend or return absentees and deserters to military control may not be paid a reward, reimbursement for reasonable and actual expenses may be made not to exceed $25 for any one case.

(b) Payments authorized by (a) above and cost of travel of guards assigned to the absentees or deserters will be charged to the military personnel appropriation of the Air Force. These costs will not be reimbursed by the absentee or deserter. Costs associated with an absentee's or deserter's own transportation for return to military control will be charged to the pay accounts of the individual member as prescribed in the Joint Travel Regulation, volume I, chapter 5.

§ 889.8 Cooperation of armed forces and civil law enforcement agencies.

(a) Notices about members wanted for unauthorized absence or desertion from a command located in the jurisdiction of the United States will be given expeditious selective circulation among Armed Forces and civil law enforcement agencies deemed most useful in apprehending a particular absentee. Notification to the Federal Bureau of Investigation and the Selective Service System or any branch thereof, and Department of State (in the case of noncitizen deserters) will be made only by AFMPC/DPMAKE. The standard format of this notice will be the DD Form 553.

(b) Major commands located outside the jurisdiction of the United States will take initial actions such as the local situation may warrant, within the primacy of international agreements, to secure cooperation in apprehension of members absent without leave.

(c) In the absence of other specific prearrangements among Military Service Commands, when one of the military services makes a pickup of absentees or deserters from civil authorities anywhere in the Continental United States, all such individuals—regardless of the military service to which they belong—will be picked up when practicable, at the same time and delivered to the nearest military installation having facilities to process absentees or deserters. When such pickup is not accomplished, the apprehending authorities will notify the military service(s) of the individuals remaining in civilian custody preferably prior to these authorities' departure from the civilian confinement facility.

(d) Apprehension of Absentees Who Seek Sanctuary in a Church or Other Public Building:

(1) When AFMPC/DPMAKE has furnished the Federal Bureau of Investigation (FBI) with a request to locate a deserter (DD Form 553), for return to military control, the FBI will assume responsibility and apprehend a deserter.

(2) When a number of airmen are involved, some of whom are absent without leave and some in a deserter status, responsibility will remain with the US Air Force since it has the authority to apprehend both categories of personnel.

(3) In all other situations, the US Air Force will assume responsibility for apprehending its absentees.

(4) Maximum cooperation will be solicited from local civil authorities in the apprehension of absentees not falling under FBI jurisdiction. If civil authorities decline to apprehend a US Air Force absentee seeking sanctuary in a church or public building, all facts will be reported to HQ USAF/IGS, via OPREP 3 Report, in accordance with JCSPUB 6, volume V, before military apprehension is attempted.

NOTE: This does not preclude the US Air Force from continuing to exercise its responsibility in "nonsanctuary" situations. For example, it does not preclude Air Force personnel from entering a building to apprehend an absentee in a "hot pursuit" situation or in other instances in which an absentee happens to be in a church or public building but is making no claim of sanctuary.

§ 889.9 Deserter information system.

(a) AFMPC/DPMAKE is the central focal point to provide for the control, accounting, and dissemination of information concerning Air Force members administratively classified as deserters and as warranted for those absent without leave for less than 30 days.

(b) The National Crime Information Center (NCIC) is a computerized information system established by the FBI as a service to law enforcement agencies. It operates through the use of computers, data transmission over communication lines, and terminal devices. To provide the means for making timely and complete deserter information available to civil law enforcement agencies, the Air Force has access to a terminal for direct entry to the computer. Every deserter must be listed with the NCIC no later than 7 days after being administratively declared a deserter. Minimizing this time interval and increasing the reliability and utilization of this information source will be a primary consideration.

(c) The primary source of information to the NCIC will be from the DD Form 553, and DD Form 616, Report of Return of Absentee Wanted by the Armed Forces. Upon initial receipt of deserter information, AFMPC/DPMAKE will make, as soon as possible, the requisite entries to the NCIC. Subsequently, AFMPC/DPMAKE will make the necessary adjustments to update and purify NCIC records of deserter information. On the 60th day of continuous absence, AFMPC/DPMAKE will forward a copy of DD Form 553 to the FBI. (Distribution to the FBI will not be made by any other Air Force agency.)

(d) Notification of returned AWOL or DFR members must be furnished to AFMPC/DPMAKE at the very earliest possible date in order to clear the NCIC files of the wanted notice. This is necessary to preclude apprehension of member after discharge has been effected. In the event a member is apprehended after discharge has been effected, such an incident could result in extreme embarrassment to the Air Force and other agencies concerned.

§ 889.10 Responsibilities.

It is the responsibility of all members to fully support the mission of the Air Force by being present for duty at the time and place prescribed. Positive action must be taken by supervisors and commanders at all echelons to insure that this responsibility is understood and assumed by all personnel and that prompt

action is taken when a member is not present for duty as required.

§ 889.11 Specific responsibilities when a member is absent.

(a) Immediate Supervisor. When a member is not present for duty as required and cannot otherwise be officially accounted for, the immediate supervisor will immediately notify the unit commander or squadron section commander. Any information which may be helpful in determining the reason for the absence and possible whereabouts of the member will be furnished also.

(b) Unit Commander (or Squadron Section Commander). The commander's interest in the welfare of assigned personnel dictates that the highest priority be assigned to locating an absent member, determining the cause of the absence, and effecting an early return to duty. This responsibility is in no way abridged by the actions required or assistance provided by others. The commander must:

(1) Promptly notify concerned agencies of member's duty status in accordance with this regulation; and

(2) Periodically prepare reports to all echelons advising them of member's current status (§ 889.14(e)) and

(3) Determine whether court-martial charges should be preferred against the member for unauthorized absence, desertion, or another offense in violation of the UCMJ. If charges should be preferred, the command must initiate action immediately since the preferring of charges precludes the running of the statute of limitations in bar of trial.

NOTE: When considering preferring of charges, the commander should consult with the Staff Judge Advocate for advice as to the propriety of such action and whether the statute of limitations bars the proposed action. The commander will also consult with the Staff Judge Advocate to insure that DD Form 458, Charge Sheet, is properly prepared and to insure that the officer who exercises summary court-martial jurisdiction over the absentee receives, and acknowledges receipt of, the charges. The charge sheet will be filed with the Unit Personnel Records Group. Statements of known witnesses, summaries of expected testimony, available evidence, or notations indicating where evidence is held should be attached to the change sheet.

(c) Consolidated Base Personnel Office (CBPO). CBPOs are responsible for prompt notification to the unit of assignment when a member has not reported in by the time specified from PCS, TDY travel, or is a member of the Air Reserve Forces (USAFR or ANGUS) ordered to active duty (this does not include Reservists ordered to perform their annual active duty tour for training). Necessary personnel information will be provided the member's commander as required to assist in his responsibilities. The CBPO acts as coordination agency and monitors actions required of the unit commander to insure promptness. Upon absentee's return to the detaining unit, the CBPO will coordinate as to the disposition of the member. (Detailed CBPO instructions and responsibilities are contained in AFM 30-130, volume I.)

(d) Security Police. The local Security Police unit is responsible for assisting the unit commander in returning an absent member to duty and will assist the CBPO in determining distribution of DD Form 553, when requested.

(e) Personnel Support Agency. These agencies at aerial ports are responsible for notifying the gaining and losing units of assignment whenever a member fails to report at the time prescribed for onward movement. Notification will be accomplished as prescribed in § 889.15.

(f) Accounting and Finance Office (AFO). This office is responsible for suspensing and taking prompt pay actions on receipt of AF Form 2098, Duty Status Change.

(g) Base Commanders and Higher Echelon Commanders. Commanders at all echelons will insure that continuing emphasis is placed upon the Air Force position regarding unauthorized absenteeism and desertion. Development of management practices and programs to deter and minimize absenteeism and desertion should be encouraged. MAJCOM will insure that CBPOs and units comply with this part.

§ 889.12 Required actions following absence or desertion of member.

Section 889.13 outlines the principal actions which must be accomplished by responsible personnel of the action unit following the absence of a member. Losing unit remains the action unit during PCS movement until the member physically reports in at the gaining unit, except for reservists ordered to active duty (see § 889.11(c)). In the case of reservists ordered to active duty, the gaining unit and gaining CBPO are responsible for all actions. When the member fails to report by the report-not-later-than date (RNLTD), action will be taken in accordance with AFM 30-130, Volume I. It is imperative that the required actions be accomplished, even if it is suspected that the absence might later be excused Upon notification of member's return to duty or military control, further accomplishment will cease and actions will immediately be taken to retract previous actions, as appropriate. Generally, this will require notification of all persons previously notified of the absence and appropriate record corrections to reflect the revised duty status of member.

NOTE: At any time when the circumstances of a member's absence indicate that the criteria of § 889.3 are met, he or she will immediately be classified as an administrative deserter and all applicable actions of § 889.13 accomplished immediately without regard to time sequence—except that he or she will not be dropped from rolls until the 180th day.

V 41 16 1
AUG 18 76
UMI

§ 889.13 Actions required when a member is absent.

Item	A	B	C	D
	Time following absence	Responsibilities (see AFM 30-130, vol. I, for CBPO actions)		
		Immediate supervisor will—	Unit commander will—	Servicing security police will—
1	Immediately	Notify unit commander of member's absence; make inquiries among associates and other subordinates as to whereabouts and habits of absent member; and attempt to contact the member at his or her local residence.	Interview all personnel who may have information relative to member's absence; utilize all available resources in attempting to locate and return member to the military control; accomplish special processing when necessary as required by par. 14; and notify security police and request assistance (see notes 1 and 2).	Assist unit commander in attempting to locate member and return to military control.
2	24 hr	Recheck member's residence, associates, and other sources for possible contact with absent member.	Prepare AF form 2098 reflecting member's duty status from time and date of absence, and forward to servicing CBPO; if GSU, take action IAW AFM 30-130, vol. II; and continue maximum efforts to locate and return members, using own resources.	Follow up on any new leads developed by commander or supervisor.
3	Within 72 hr	Assist the commander in preparing the inquiry.	Prepare the inquiry and forward copies to the security police and to CBPO for dissemination.	Follow up on any new leads developed by the commander's inquiry.
4	On 10th d		Notify security police and CBPO of member's continued absence; assist CBPO in determining the distribution of DD form 553; and prepare and forward letter to next of kin (see note to par. 12b(2)(b)).	Assist CBPO and commander in determining proper distribution of DD form 553.
5	On 15th d			Contact security police, Armed Forces police detachments or civil authorities, as applicable, in the local area of addresses shown in items 31, 32, 34, and 37 of DD form 553, and ask assistance in locating and apprehending member; and assist CBPO in documenting authority to apprehend absent member.
6	On 31st d		Notify security police and CBPO of member's continued absence; (see par. 12e); and retrieve dependent ID cards as required by AFR 30-20.	Notify all agencies contacted after 15th d and confirm deserter status; and report actions taken to CBPO.
7	On 60th d		See par. 12e	Review case file, contact police agencies near member's home of record, and recheck any local leads; and forward final notices of actions taken to unit comdr and CBPO.
8	On 180th d (airmen) and as directed by SAF (officers).		Notify security police of status change; and IAW par. 12e indicate that these actions have been accomplished.	

NOTES.—(1) For TDY personnel, notify member's unit of assignment and servicing CBPO of member's absence. (2) A member will not be reported to the servicing security police until it is clear that the member has absented himself or herself from his or her unit, as opposed to a member simply failing to repair or being late for duty. Immediate notification of the security police is not required in cases where the absence is the result of failure on the part of the member to report in from PCS or TDY, unless there is reason to believe that the member is in the local area.

§ 889.14 Amplification of actions required.

The actions in § 889.13 which require possible further amplification are explained below. Where a specific guidance is contained in another directive, only a reference is provided.

(a) **Preparation of AF Form 2098.** Refer to AFM 30–130, volumes I and II, and AFR 35–40.

(b) Notification to Next of Kin or Payees of Allotments.

(1) A letter, signed by the unit commander or the squadron section commander, must be forwarded without delay at the time required to the absentee's next of kin (including those who are aliens residing in a foreign country) under the following circumstances, whichever occurs first:

(i) When substantial information exists which shows that the member had planned or announced intent to absent himself or herself without authorization, or

(ii) When the member has been in an unauthorized absence status for 10 consecutive days, or

(iii) When the member is administratively declared a deserter.

(2) The letter will state that:

(i) The member is considered in an administrative status of an unauthorized absentee (or deserter, if appropriate), as his or her whereabouts is unknown to military authorities.

(ii) Continued absence may result in conviction of desertion; loss of pay, allowances, and Government insurance; reduction in grade; bad conduct or dishonorable discharge (dismissal, if he or she is a commissioned officer); and confinement at hard labor.

NOTE: At the time the commander notifies next of kin, the dependent (or his fiduciary or custodian), of the member's unauthorized absence, the dependent, on behalf of whom BAQ may be claimed, will be advised of the right to apply for payment of BAQ, of the conditions under which payment may be made, and to whom to apply. If the member is in pay grade E–4 (4 years or less service) and below, the dependent will be advised that temporary financial relief can be provided if required, when the sponsor remains absent for more than 29 consecutive days. Such assistance is limited to the amount of BAQ to which the sponsor would be entitled as a member with dependents, for maximum of two consecutive 30-day periods, providing the sponsor remains absent during the entire period. Advise the dependent to contact the Accounting and Finance Officer (AFO) which services the sponsor. Application must be made within three months after the commencement of the member's absence (P.L. 93–64, 9 July 73).

(iii) They should urge the absentee to return to military control.

(iv) They should notify the nearest military installation if they have knowledge of the whereabouts.

(v) Dependents will become ineligible for medical care and other benefits and privileges when the sponsor's status changes to desertion.

(vi) The payee of allotments must be notified that continued absence will result in benefits being discontinued.

(3) A copy of the letter to the next of kin will be furnished the CBPO records unit.

(c) Unit Commander's Inquiry. The losing unit commander (or first sergeant) will prepare the inquiry, based on the actions which have been taken, and will include information as to whether member was pending administrative discharge or court-martial action prior to AWOL. Include duty status prior to AWOL. If leave, furnish leave address, or if reassigned, furnish gaining unit and delay en route leave address. If member has previously been AWOL or DFR, include dates and what disposition action was taken in each offense. The inquiry (original and copies) will be submitted to Security Police and CBPO for distribution.

(d) Preparation and distribution of DD Form 553. In remarks section of DD Form 553 show leave address or gaining unit (§ 889.14c). In block 4, following name, type in "SEX" and annotate: "male" or "female." This form will be prepared and distributed (all copies will reflect the complete distribution) to:

(1) AFMPC/DPMAKE—An original, suitable for reproduction, and three legible copies.

(2) MAJCOM of absent member, MAJCOM of CBPO.

(3) Base commander.

(4) Commander of the Army Area where unit of assignment is located (§ 889.23).

(5) Security Police of base near member's hometown and/or city where member is likely to go.

(6) Law enforcement agencies for addresses listed on DD Form 553, items 31 and 33, and to the place where absentee is likely to go.

(7) Air Force and Army finance and base exchange officers in the unit area and area where absentee is likely to go.

(8) Armed Forces Police Detachment, if such agency is located in geographical area where absentee is likely to go (§ 889.22).

(9) Law enforcement agencies of foreign countries only where apprehension can be effected when absence occurs within the oversea command, and limited to countries within the area as determined by the oversea commander.

(10) Field Record Group of absentee.

(11) AFAFC/MPSB 3800 York St., Denver CO 80205.

NOTE: When the Field Record Group is not available, information required to complete DD Form 553 must be requested by message from AFMPC/DPMDR, Randolph AFB TX, with information copy to AFMPC/DPMAKE.

(e) Status. On the 31st, 60th, 90th, 120th, 150th, and 180th day of continued absence, unit commander will confirm status to AFMPC/DPMAKE, MAJCOM, and servicing CBPO. (include any new information received relative to member's absence and actions taken toward his location and return to military control). On the 31st and 60th day include input from the security police. Additional DD Forms 553 should be dispatched if information from the inquiry warrants.

(f) Consolidation of Absentee's Field Record Group. Member's Field Record Group will be withdrawn from active files and a charge or reference sheet placed in the file to indicate where the record is filed and the date it was relocated. The record will be held and controlled by the servicing CBPO of unit of assignment and filed in a separate and safe location to preclude loss and permit filing action until the 180th day of continued absence (airmen) or as directed by the Secretary of the Air Force (officers). AF Forms 2098, correspondence relating to absence, and other applicable documents will be placed in the member's record pending disposition upon return to duty status or as directed by higher headquarters.

§ 889.15 Actions required when member fails to report to Personnel Support Agency.

When a member has failed to report to the Personnel Support Agency of the appropriate aerial port within 72 hours of the time prescribed, both gaining and losing CBPO of assignment will be notified and requested to provide information regarding the status of member. (Gaining and losing MAJCOMs will be information addresses. If information received indicates that the member is in absentee or desertion status, the losing CBPO will be advised and requested to take actions required by this directive. (The gaining CBPO; MAJCOM; AFMPC/DPMAKE, Randolph AFB TX 78148; and AFAFC/MPSB, Denver CO 80205, will be information addressees.) Necessary administrative actions will be accomplished by coordination between gaining and losing units to regain member to strength of losing unit. Required additional actions will be accomplished as outlined in § 889.12.

NOTE: Members reporting to the Personnel Support Agency within 30 days of the time prescribed will be continued to gaining unit of assignment for disposition regarding late reporting. Members reporting after 30 days following the time prescribed will be detained and action taken in accordance with § 889.19.

§ 889.16 Action required in special cases.

When an unauthorized absence occurs and the individual falls within the criteria of § 889.3(a) or (c), the following action must be taken:

(a) The commander must refer the matter for investigation to the Office of Special Investigation (OSI) unit servicing the base of assignment. This referral will be made when the individual has been absent without authority for a 48-hour period. The commander must also immediately conduct an inventory of all classified material to which the absentee had access. At the earliest opportunity, the commander will furnish OSI an assessment of the degree of damage to national security which would result from an unauthorized disclosure of information to which the absentee had access.

(b) The servicing CBPO will prepare and distribute DD Form 553 based on information as outlined in c below.

(c) The commander will immediately notify CSAF/IN; AFOSI/IVG, Washington DC; Servicing CBPO; and AFMPC/DPMAKE, Randolph AFB TX, with information copy to MAJCOM of absent member, by message (includes MINIMIZE) which must include the following:

(1) All available information as required on DD Form 553.

(2) Type of classified information to which the absentee had access (COM SEC, CRYPTO, SIOP, SSIR, Space Programs, etc.).

(3) Any indication that the absentee has defected or possibly compromised classified information.

(4) Other significant information the commander deems appropriate.

(d) The commander will insure that follow-on procedures are taken as outlined in § 889.13.

(e) When AFMPC/DPMAKE receives initial notification of absenteeism falling within these criteria, it will immediately prepare and forward DD Form 553 to the FBI.

(f) AFOSI will coordinate with the FBI to expedite an investigation to locate and apprehend absentees.

§ 889.17 Actions required to return member to duty.

Air Force policy dictates that every possible effort be expended to effect the earliest return of an absent member to duty. Return to military control is a necessary first step in this process, but frequently additional actions will be necessary and must be accomplished with equal tenacity. Upon return of absentee or deserter to unit of assignment or notification that member has been returned to military control or in civil confinement, the unit commander will submit AF Form 2098 reflecting member's changed duty status from time of return to military control or inception date of confinement and will assist CBPO and security police in completing required forms and record corrections. On day of notification of return to military control or confinement status, the servicing CBPO of the unit to which he or she was assigned prior to this unauthorized absence will dispatch message as outlined in § 889.25, provided DD Form 553 has been submitted, and distribute DD Form 616 to all agencies which were provided DD Form 553 in accordance with paragraph 12d. Distribution of DD Form 616 will not be delayed pending receipt of AF Form 2098 from unit commander. Furnish original DD Form 616, suitable for reproduction, and 3 legible copies to AFMPC/DPMAKE. Request Field Record Group from AFMPC/DPMDRR3 when airman has been dropped from the rolls. The CBPO will post the records in accordance with AFR 35–44, update the PDS, and return the Field Record Group to the appropriate file.

§ 889.18 Transfer from civilian to military jurisdiction.

(a) Absentees and deserters being detained temporarily in the hands of civil

V 41 161 AUG 18 76 UMI

authorities will be returned to military control as soon as possible after responsible military officials are informed of their whereabouts and the civil authorities are ready to release them. After receiving notification of the absentee or deserter's whereabouts, military authorities must make every reasonable effort to accomplish return to military control within 48 hours. Apprehension and detention of absent members by civil authorities are accomplished as a service to the military departments. Continuation of this essential support from civil authorities requires mutual cooperation.

(b) The commander of the unit to which the individual was assigned prior to his unauthorized absence is responsible for completing the required action when report of arrest is received. Actions as outlined in AFM 39–12, paragraph 2–23, apply when an absentee is serving a sentence to confinement imposed by a civil court. Actions as described in AFM 39–12, paragraph 2–32, apply when an absentee is reported to be in civil confinement and is not available for immediate return to military control. The commander is also responsible for lodging a detainer with civil authorities, and preparing AF Form 2098 to reflect the changed status. If member is under suspended sentence to punitive discharge which has been affirmed, General Court-Martial (GCM) authority should make a determination to:

(1) Vacate the suspension and execute the discharge; or

(2) Have member returned to military control for disposition of AWOL or DFR, or any other pending charges (see AFM 39–12, chap 2).

§ 889.19 Return to military control by other than unit of assignment.

(a) When a member's return to military control is effected by other than the unit of assignment, the CBPO servicing the unit detaining the member will:

(1) Ascertain from absentee or deserter the last unit of assignment at time absence began. If this information cannot be obtained from member, immediately contact AFMPC/DPMAKE for the necessary information.

(2) Contact CBPO servicing last unit of assignment by message (includes MINIMIZE) in accordance with § 889.25, with information copy to addressees indicated, requesting disposition instructions. (If unit has been deactivated, all further coordination will be with and actions accomplished by a responsible unit designated by the MAJCOM of unit prior to deactivation.) AFOSI will not be an addressee for AWOL returnees.

(3) Take immediate action to effect disposition in accordance with instructions provided in accordance with (b) or (c) below. If a member in PCS status is being returned to the losing unit, notify the losing CBPO to insure that PCS orders are amended or rescinded in accordance with AFR 10–7.

(b) The last unit of assignment must determine appropriate disposition of returned member. Any action which will not require member's return to unit from which absent will be accomplished only with the concurrence of the MAJCOM of assignment from which absent and the MAJCOM of the detaining unit. The following guidelines may be used as normal disposition for the circumstances that follow:

(1) Absent While in PCS Travel status—Returned to Military Control in CONUS:

(i) Reassignment is from CONUS to CONUS base: return to losing unit unless member's return is by voluntary reporting to gaining unit.

(ii) Reassignment is from CONUS to overseas: continue to gaining unit if member's absence has been less than 30 days and member voluntarily returns to military control at the post of embarkation.

(iii) Reassignment is from overseas to CONUS base: continue to gaining unit.

(iv) Reassignment is from overseas to oversea base: continue to gaining unit.

(2) Absent While in PCS Travel Status—Returned to Military Control Overseas:

(i) Reassignment is from CONUS to overseas: continue to gaining unit.

(ii) Reassignment is from oversea base to oversea base: continue to gaining unit.

(iii) Reassignment is from oversea base to CONUS: continue to gaining base unless member returns to losing base.

(3) Absent With PCS Travel Not Involved:

(i) Assignment CONUS—detained CONUS: return to base of assignment.

(ii) Assigned overseas — detained overseas: return to base of assignment.

(iii) Assigned overseas — detained CONUS or oversea area different from unit of assignment: return to unit of assignment if member had 90 days or more of oversea tour remaining as of inception day of AWOL. If less than 90 days remain, member should be reassigned in accordance with any previous assignment instruction or accepted by detaining unit as an unprojected gain.

(4) Members of the Air Reserve Forces ordered to active duty who fail to report to initial base of assignment and are detained by other than the base specified in active duty order: CBPO of detaining unit will immediately request disposition instructions by message (includes MINIMIZE) to AFMPC/DPMAKE with information to ARPC/DPRP, Denver CO 80205, and base of assignment. The following information will be furnished:

(i) Member's name, grade, SSAN, and AFSC.

(ii) Active duty special order number and date.

(iii) Unit of assignment specified in active duty order.

(iv) Date of inception of AWOL.

(v) Date of return to military control.

(vi) How returned to military control (voluntary) (involuntary).

(vii) Name, grade, office symbol, and telephone number of contact at detaining unit.

(viii) Authorization does or does not exist at detaining base for airman's AFSC.

(ix) Any other information that should be considered in determining disposition of individual.

(c) Circumstances may indicate that normal disposition is not appropriate. For example, if at time of the unauthorized absence the member was on administrative hold or there was a pending investigation or judicial action against the member by host country authorities, assignment disposition should be made by the losing or last unit of assignment irrespective of DEROS. In this case, the losing or last unit of assignment will, by the most expeditious means, notify AFMPC/DPMAKE, Randolph AFB TX, of the circumstances and provide information necessary for reassignment selection:

(d) The unit of assignment will determine whether escorts are required. The responsible commander will be guided by the following considerations:

(1) If the member is an escaped prisoner or has been charged with other serious offense(s), the use of escorts will normally be appropriate.

(2) If it is indicated that the member is a repeated offender and has involuntarily been returned to military control and confinement is anticipated upon return to his unit, escorts will normally be appropriate.

(3) If the member is a first time offender and has voluntarily returned to military control and confinement is not indicated, escorts will not normally be appropriate.

(4) Consideration will be given to using unescorted travel when nonstop transportation can be utilized between the unit of detention and the gaining unit and proper coordination for delivery and pickup from carrier can be arranged.

NOTE.—To insure expeditious return of the absentee for disposition, members serving as escorts will not be permitted to take leave or a delay en route in connection with performance of escort duty.

(e) The unit commander of returned absentee or deserter must determine proper disposition of absence in accordance with § 889.20.

§ 889.20 Disposition when unauthorized absence has been terminated.

Upon termination of unauthorized absence, disposition may be taken as follows:

(a) The immediate commander will make an administrative determination as to whether the absence was avoidable or unavoidable. In making this determination, commanders will be guided by the instructions in DOD Pay Manual, table 1–3–3, and AFMs 30–130 and 177–373. Absences that are determined to have been unavoidable will be excused. In these cases the previously reported absence will be revoked by AF Form 2098 and the absence charged as leave unless otherwise authorized.

(b) Absences are not chargeable to leave when caused by the member's mental incapacity, or when the member is detained, tried, and acquitted by civil authorities and the absences are later excused as unavoidable.

(c) When a member dies during a period of unauthorized absence, the commander of member's unit of assignment will make a new administrative determination, based on the facts which have become available, as to whether the member was in absence without leave, absence over leave, desertion, or duty status (DODPM, para 10212 and 40505c).

(d) When an absence is excused as unavoidable, it will not be counted as time lost. Appropriate entries on AF Form 1226 must be made, as provided in AFR 35–44.

(e) When it is determined that a person has been erroneously reported as an unauthorized absentee or deserter, the servicing CBPO will void all record entries pertaining to the alleged absence and will forward a DD Form 616 to all addressees of the original DD Form 553 and will include a full explanation of the erroneous report in the Remarks section. If a letter has been forwarded previously to the next of kin or allotment payee in regard to the member's absence, another letter will be forwarded immediately to all previous addressees explaining the erroneous report in full.

(f) Upon a determination that an absence was avoidable, the immediate commander must consider the appropriateness of disciplinary action.

§ 889.21 Enlisted personnel unauthorized absences, RCS: HAF–DPM (Q)7137.

(a) The following unclassified report is necessary to provide statistical data to DOD and Air Force Staff offices and to evaluate the effectiveness of the Absentee and Deserter Program.

(b) Servicing CBPOs will prepare and forward, within 15 days after the end of each quarter, separate reports to their MAJCOM and other MAJCOM of each organization serviced. Members whose absence was caused solely as a result of confinement will not be included in this report. Negative reports are required. Content of the reports will be as follows:

(1) Number of unauthorized absences commenced this period, by month.

(2) Number of absentees (not deserters) at large at end of last quarter.

(3) Number of absentees (not deserters) returned to military control:

Duration of absence	Number and method of return	
	Voluntary	Involuntary
(a) Less than 3 d		
(b) 3 through 9 d		
(c) 10 through 19 d		
(d) 20 through 30 d		
Total		

(4) Duty status at time of AWOL:

Present for duty	Delay en route	Ordinary leave	Other

(5) Number of absentees departing during this period who are repeat offenders regardless of time of previous AWOL.

(i) Times and number:

2d time	3rd time	4th time	5th time	6th time or more

(ii) Total number who departed AWOL for the second or more times and were awaiting disposition of charges for previous AWOL or deserter incident at time of departure.

(6) Number of absentees administratively declared deserters.

(7) Total number of man-days lost during current quarter due to unauthorized absences and desertion. (Do not count days after member is dropped from unit rolls or include escorts' time.)

(8) Required utilization of escorts:

(i) Total number of instances where escorts were utilized.

(ii) Total number of man-days utilized for escort duty.

(9) CBPOs will forward reports to parent MAJCOM. The MAJCOM will furnish consolidated report to AFMPC/DPMAKE, Randolph AFB TX 78148, no later than 21 days after the termination of the reporting period. Report submitted for quarter 1 April through 30 June each year will also include the following, based upon experience encountered during the Fiscal Year ending with this quarter:

(i) Causes of absenteeism and desertion.

(ii) Description or profiles of the "typical deserter" and "absentee."

(iii) Steps taken and planned to eliminate causes of absenteeism and desertion.

(iv) Programs aimed at motivating personnel to refrain from absenting themselves without authority.

§ 889.22 List of armed forces police detachments.

SUBCHAPTER Q—MEDICAL SERVICE

PART 968—POLICY FOR DRUG COMPANY REPRESENTATIVES

A new Subchapter Q—Medical Service, is added to Title 32 CFR, and a new part under that Subchapter, consisting of §§ 968.1–968.2, is added as follows:

Sec.
968.1 Purpose.
968.2 Responsibilities.

AUTHORITY: Sec. 8012, 70A Stat. 448; 10 U.S.C. 8012.

§ 968.1 Purpose.

This part establishes policies and procedures that will accomplish the mutual objectives of the Medical Center Staff and the Drug Company Representatives.

§ 968.2 Responsibilities.

(a) Pharmacy Department.

(1) Furnish information and liaison between the staff and the Drug Company Representatives.

(2) Inform the representatives of any change in Medical Center policies that affect them.

(3) Accept and relay messages from the staff to the drug company representatives.

(4) Schedule pharmaceutical displays and inform the representatives of display procedures. Displays will only be conducted in the Officer's Dining Room, Wilford Hall USAF Medical Center, or in the library at Building 6612.

(5) Be the custodian of drug samples that are dispensed on prescription.

(b) Service Chiefs.

(1) Inform the Pharmacy Department of any policy or procedure that the representatives must follow while visiting their service.

(2) Inform the Pharmacy of policy or procedural infractions that the salesmen might commit.

(3) Must complete a "Drug Sample Control" letter listing the doctors that are authorized to use from his supply of samples.

(c) Drug Company Representatives.

(1) Register with the Chief, Modular Medical Clinic Pharmacy, Room 37A, Building 3, Modular Medical Clinic.

(2) Receive medical staff communication and policy change information.

(3) Check out with the Chief, Modular Medical Clinic Pharmacy when leaving the Medical Center. This may be accomplished by telephone (Extension 7209).

(4) Have limited access by appointment to the Base Dispensary.

(5) Will contact the Chief, Modular Medical Clinic Pharmacy to schedule displays.

(6) Will refrain from distributing controlled substance medications. This practice of sampling controlled substance medications in this Medical Center is prohibited.

SEE: Wilford Hall Medical Center Regulation 160–16, 24 January 1974.

SUBCHAPTER W—AIR FORCE PROCUREMENT

PART 1008—FUNDING CONTRACT OVERRUNS

A new Part is added to Subchapter W, Chapter VII, Title 32, CFR, consisting of Sections 1 through 5, as follows:

PART 1008—FUNDING CONTRACT OVERRUNS

Sec.
1008.1 Purpose.
1008.2 Overrun criteria.
1008.3 Funding contract cost overruns.
1008.4 Office of primary responsibility (OPR)
1008.5 Disposition of documentation.

AUTHORITY: Sec. 8012, 70A Stat. 488; 10 U.S.C. 8012.

§ 1008.1 Purpose.

This Part establishes the policy and procedures for funding contract overruns resulting from Air Force Wright Aeronautical Laboratories funded contracts and is applicable to all staff agencies and assigned Laboratories.

§ 1008.2 Overrun criteria.

Overruns are defined as any increase in contract funding requirements on cost type contracts which result from technical, schedule, estimating errors, or direct/indirect actions taken by government agencies or persons. Determination of which contract financing requirements are to be considered overruns is the responsibility of the procuring contracting officer based on the recommendations of the administrative contracting officer.

§ 1008.3 Funding contract cost overruns.

(a) Contract overruns should be funded with appropriations of the same type and year as those originally cited on the contract involved. Contract overruns on contracts citing program control years (current and first prior) appropriations will use locally available funds when available. All requests for funds for contract overrruns will be documented with a 12 point letter to Assistant for Operations, Air Force Wright Aeronautical Laboratories, from the Laboratory programming office.

(1) Program element, project, task.

(2) Total contract funding and distribution by year and appropriation.

(3) Total amount of overrun and distribution by year and appropriation.

(4) Contractor and location.

(5) Contract number.

(6) Date of original contract.

(7) Date of change applying last fiscal year funds.

(8) Date funds required.

(9) Forecast obligation date.

(10) Statement of funds available and source (reprogramming or expired appropriations.)

(11) Auditors report on Contract Funds Status Report.

(12) Reason for overrun, background, impact, steps taken to avoid or correct situations, etc.

(b) For overruns larger than $50,000 or overruns which exceed locally available funds, the letter described in § 1008.3(a) above must be forwarded to Air Force Systems Command, Programs and Budget, Andrews Air Force Base, Washington, D.C. 20331.

(c) All requests for overrun funding and associated documentation/justification will be reviewed and coordinated by Assistant for Operations, Air Force Wright Aeronautical Laboratories before funding or review by Air Force Systems Command, Programs and Budget.

§ 1008.4 Office of primary responsibility (OPR).

Assistant for Operations, Air Force Wright Aeronautical Laboratories is designated the OPR for managing the funding of contract overruns.

§ 1008.5 Disposition of documentation.

(a) Correspondence and related information maintained by Asssitant for Operations, Air Force Wright Aeronautical Laboratories pertaining to the funding of contract overruns will be incorporated with other supporting data and will be destroyed after final payment or when purpose has been served, but no later than one year after final payment. (Authority: Air Force Manual 12–50, Disposition of Air Force Documentation, Table 70–1, Rule 7.)

(b) Correspondence and related information applicable to contract cost overruns forwarded to the appropriate program manager will be incorporated into the official Research and Development case file and retired with the contract to which it relates. (See: Air Force Manual 12–50, Table 80–2, Rule 1.)

Title 47—Telecommunications

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20681; FCC 76–747]

PART 76—CABLE TELEVISION SERVICE

Cable Television System Regular Subscriber Rates

Report and order—Proceeding terminated. In the matter of: amendment of Subpart C of Part 76 of the Commission's rules and regulations regarding the regulation of Cable Television System regular subscriber rates, Docket No. 20681.

INTRODUCTION

1. On December 22, 1975, the Commission adopted a notice of proposed rulemaking in the above-captioned proceeding, FCC 75–1422, 41 FR 1606, 57 FCC 2d 368 (1975), wherein comment was elicited on the proposed modification or deletion of § 76.31(a)(4) of the Commission's cable television rules. § 76.31(a)(4) of the rules provides as follows:

Section 76.31 Franchise standards. (a) In order to obtain a certificate of compliance, a proposed or existing cable television system shall have a franchise or other appropriate authorization that contains recitations and provisions consistent with the following requirements:

• • • • •

(4) The franchising authority has specified or approved the initial rates that the franchisee charges subscribers for installation of equipment and regular subscriber services. No increases in rates charged to subscribers shall be made except as authorized by the franchising authority after an appropriate public proceeding affording due process;

• • • • •

2. In adopting the rules in 1972 the Commission recognized that some aspects of cable television service were properly matters of primary federal concern while others were best regulated by local authorities. The Commission reasoned that, because the individual cable system is a local operation making use of streets and ways, local authorities were inescapably involved in the regulatory process and could, moreover, bring a special expertise to regulation of certain matters. One of these matters was determined to be the regulation of basic subscriber rates, which the Commission felt could best be reviewed by the local franchising authority.[1] The Commission further found it appropriate to assure that the public be given notice and an opportunity to be heard where rate increases are proposed. "Cable Television Report and Order", FCC 72–108, 36 FCC 2d 143, 209 (1972); "Notice of Inquiry into the Manner in Which Cable Television Regular Subscriber Rates are Established," (Docket No. 20767, FCC 76–314, 58 FCC 2d —— (1976).

3. In the four years following the issuance of the Report and Order, supra, several unintended but significant problems became apparent in requiring local authorities to regulate basic subscriber rates and mandating that they hold full public proceedings prior to approving rate increases. We alluded to several of these in the Notice in the instant proceeding, supra at 369. It was noted that the mandatory aspect of the rule posed problems for those local authorities not having the jurisdiction to grant cable television franchises or regulate rates. Similarly, the rule also caused difficulties for those franchising authorities that found subscriber rate regulation to be either onerous or unnecessary. The prerequisite of due process in a public proceeding was perceived to be unnecessary because some states already have procedural safeguards for public decisionmaking, and its advisability was questioned because it effectively precluded experimentation in other methods of rate regulation such as arbitration, automatic rate escalator clauses, and so forth. To correct these problems and to allow greater flexibility at the nonfederal level, we proposed either (a) to modify § 76.31(a)(4) to specify its applicability only to those entities having the jurisdiction and desire to regulate regular subscriber rates—and simply to require public notice and an opportunity to be heard in rate increase deliberations—or (b) to delete the section in its entirety.

SUMMARY OF COMMENTS AND PROPOSALS

4. A majority of those commenting favor deletion of § 76.31(a)(4). These parties, which are cable operators and cable industry associations, concur with the Commission's assessment of the problems arising from the rule and recommend its deletion as the preferable means of solving them. A number of the proponents argue strongly that deletion of the rule, however, immediately advisable, is but the first step in addressing the critical problems involved in subscriber rate regulation. Several commenters prefer making subscriber rate regulation optional, but do not indicate which rule amendment they prefer. Still others oppose any amendment to § 76.31(a)(4).

COMMENTS OPPOSING RULE AMENDMENT

5. A minority of those commenting oppose amending § 76.31(a)(4). The American Broadcasting Company maintains that the rule is part of the comprehensive regulatory program for cable television adopted in the Report and Order and explicated in the Clarification, both supra, and ABC opposes piecemeal abandonment of the 1972 Rules absent compelling evidence of the need for rule amendment. ABC argues that the need for amending § 76.31(a)(4) has not been shown. To substantiate this argument ABC cites the Commission's response to a request made pursuant to the Freedom of Information Act[2] by the firm of McKenna, Wilkinson and Kittner, wherein disclosure of documents substantiating the need for rulemaking as stated in the Notice, supra, was requested. ABC maintains that the Commission's response citing, inter alia, conversations by Commission staff members with local officials, general research on the laws applicable to cable television franchising and regulation, and accumulated experience gained from the certificating process, is insufficient because no documents or other factual or empirical data could be produced indicating the extent to which nonfederal authorities indicated they support the views of the Commission. ABC therefore recommends that the Commission retain § 76.31(a)(4) and proceed on an ad hoc basis to grant waivers in those instances where franchising authorities cannot regulate rates. Alternatively, ABC suggests that rate regulation on the state level be encouraged. Twenty other television station licensees, filing jointly, generally concur with ABC's observations. The National Citizens Committee for Broadcasting (NCCB) agrees with the licensees that the Commission's response demonstrates an inadequate basis for rulemaking, and states that the public interest requires retention of the due process safeguards of the rule. Thus, NCCB urges either

[1] The subscriber rates whose regulation is at issue in this proceeding are rates charged for services regularly provided to all cable subscribers: that is, charges for installation, disconnection and reconnection as well as charges for broadcast signal carriage and all required access channels, including origination programming. It does not include subscriber rates for specialized programming for which a per-program or per-channel charge is made. The Commission has preempted jurisdiction of subscriber rates for such specialized programming and has determined that rates for these services should not be regulated by any governmental entity. Clarification of rules and notice of proposed rulemaking, FCC 74–384, 46 FCC 2d 175, 199–200, 202 (1974); Notice, supra at para. 10. Nonfederal regulation of two-way, point-to-point, intrastate nonvideo cable transmissions is not preempted. National Association of Regulatory Utility Commissioners v. Federal Communications Commission, 525 F.2d 630 (D.C. Cir., 1976). See also Report and Order in Docket No. 20508, FCC 76–313, 59 FCC 2d —— (1976).

[2] 5 U.S.C. 552, and § 0.441 of the Commission's rules. The request was filed on January 23, 1976.

VOL 41 NO 161 AUG 18 1976 UM

that the proceeding be terminated or that § 76.31(a)(4) be modified to require those local authorities having the necessary jurisdiction to regulate rates and to require public notice and a public proceeding affording due process.

6. Other commenters object to deleting the Rule's provision requiring public proceedings or to making subscriber rate regulation optional. Citizens for Cable Awareness in Pennsylvania (CCAP) and the Legislative Committee of the Philadelphia Community Cable Coalition vigorously oppose any amendment to the Rule which would eliminate the public proceeding requirement. Instead, CCAP urges that the Commission establish the elements of an appropriate public proceeding. CCAP has submitted copies of newspaper articles to show that rate increase proceedings serve as a useful vehicle for disclosing and correcting service deficiencies. CCAP maintains that in many cases rate increase proceedings afford the only opportunity for review and improvement of the franchisee's service during the term of the franchise. To aid local officials in discharging their rate regulation responsibilities, CCAP urges the Commission to adopt uniform accounting procedures and require this information to be provided to the regulatory authority. CCAP also recommends that the Commission adopt rules governing situations where the system operator and the franchising authority cannot agree on a rate increase. Ms. Brigitte L. Kenney shares the concern of CCAP over deletion of the public proceeding requirement of the rules.[3] Ms. Kenney views the public hearings on proposed rate increases as both productive and informative. Harry First, Esq., opposes amending the Rule to make regulation of basic subscriber rates optional.[4] Mr. First cites his studies of subscriber rate regulation in Bowling Green and Toledo, Ohio, as indicating that lack of local interest and expertise in rate regulation, coupled with good local over-the-air television service, have resulted in no rate regulation in either community. Mr. First states that if local authorities are given a choice on regulating rates they will choose not to regulate, and therefore urges the Commission to examine the benefits of local rate regulation before conferring that option on local authorities.

COMMENTS SUPPORTING RULE AMENDMENT

7. Several of the proponents of rule amendment, such as the cities of Eugene, Oregon and San Diego, California, and the Arizona Cable Television Association, favor modification of § 76.31(a)(4) to make subscriber rate regulation optional, but do not specify which of the alternatives proposed in the Notice is preferred.[5] The City of San Diego catalogues the myriad problems involved in rate regulation and observes that in many instances these result in rates being set too high rather than too low. To offset this possibility, the City notes that many franchising authorities set maximum rates and permit the system operator to charges less, if necessary, to attract subscribers. For these reasons the City concludes that subscriber rate regulation, at least in the urban cable markets, is unnecessary and that rates can be set effectively in the marketplace.

8. The majority of those seeking some change specifically recommend deletion of § 76.31(a)(4) in its entirety. Their reasons for doing so are varied. The New York State Commission on Cable Television maintains that subscriber rate regulation is properly a matter of state and local, rather than federal, concern. The New Jersey Cable Television Association notes that the state Public Utilities Commission has issued a Notice of Inquiry on the subject of subscriber rate regulation and that the Association has proposed a plan for rate setting based on classifying systems by market, construction, and service characteristics. Maximum allowable rates would be specified for each class, with full public hearings required only where the rate levels applied to each class are changed. Because the Association's plan would be inconsistent with either the present Rule or the proposed amendment, the Association maintains that only by deleting the Rule in its entirety can the Commission assure that federal policymaking will not impair experimentation in finding the method of subscriber rate regulation that best serves the public interest. The Community Antenna Television Association (CATA) concurs, and asserts that the Commission lacks the necessary jurisdiction to impose any standard for non-federal subscriber rate regulation. The Pennsylvania Cable Television Association maintains that certain Pennsylvania municipalities lack jurisdiction to regulate subscriber rates but nevertheless do so under color of § 76.31(a)(4), and advocates deletion of the Rule to remedy this situation. Several sets of problems identified by commenters, together with proposed solutions, are set out below.

SUBSCRIBER RATE REGULATION UNNECESSARY

9. Many of the parties favor deletion of § 76.31(a)(4) because they believe the marketplace is in most cases an adequate determinant of subscriber rates, thus making rate regulation unnecessary. Verto Corporation, Universal Television Cable System, National Cable Communications Corporation, the California Community Television Association and Tele-Cable, among others, argue that although cable television may constitute a natural monopoly in a given community with respect to other cable systems, it is neither a necessity like a public utility nor, in the vast majority of cases, a true monopoly for whose product there is no substitute. Cable television, they maintain, is a medium of entertainment that competes with over-the-air television, movie theatres, sporting events, concerts, plays, books, and numerous other diversions for the discretionary entertainment dollars of its potential subscribers. Only in a small number of rural communities, they contend, can the cable system arguably be said to constitute a true monopoly.

10. A number of commenters recommend either deletion or more substantial amendment of § 76.31(a)(4) than that proposed in the Notice because they perceive serious problems in the manner in which local authorities regulate subscriber rates. Specifically, it is argued that local rate regulation is inherently and unavoidably a political rather than an economic exercise performed for the most part by persons lacking any background or expertise in rate matters. The result, it is charged, is arbitrary and capricious action by local officials against which the Commission's rules contain no safeguard. For these reasons, several of the commenters, including Warner Cable Company, Cablecom-General, Inc., and the National Cable Television Association (NCTA), term non-federal regulation of basic subscriber rates the foremost regulatory problem facing the industry today.

PROBLEMS INHERENT IN SUBSCRIBER RATE REGULATION

11. *Lack of Expertise.* Many of the commenters emphasize that local authorities lack the expertise, personnel, and background necessary to evaluate the complex financial data submitted to substantiate the need for a rate increase. In a comment filed jointly with several other cable system operators, Cox Cable Communications urges the Commission to recognize the fact that many local officials simply do not understand the economics of cable operations. The joint commenters declare that it is not uncommon for local officials to demand that discriminatory rate schedules be established for certain classes of subscribers, or to forbid charging for initial installation, or to apply unprecedented accounting procedures to system operations. Liberty Communications states that local franchising officials have expressed to Liberty personnel their inability to understand, or cope with, subscriber rate making. CATA observes that in the smaller communities served by CATA members local authorities simply do not have the time or expertise to decide complex rate questions, and Eastern Telecom adds that in such small communities

[3] Ms. Kenney is Associate Professor of Library and Information Science at Drexel University and co-editor of the newspaper Cable Libraries.

[4] Mr. First is Assistant Professor of Law at the University of Toledo College of Law.

[5] We note that in a short statement the City of Seattle Board of Public Works Office of Cable Communications, commenting for itself and as agent of King County, Washington, favors retention of subscriber rate regulation authority by local governments. Whether amendment of § 76.31(a)(4) along the lines proposed is recommended is not specified.

there is often no inclination to seek out expert advice. Although not specially recommending deletion of § 76.31(a)(4) the City of San Diego also notes the complexity of subscriber rate regulation, citing especially the lack of a uniform accounting system. It maintains that, although most city council members try to do a conscientious job, "a city council is a terrible place to try a complicated rate matter," because of the lack of council expertise. The City further avers that the average council member, burdened as he is with other matters of equal or greater importance, lacks time for the patient finding of fact and application of rate-making theory and law necessary for the proper setting of rates.

12. *Political nature of rate proceedings.* Although the absence of training, time and expert advice is a problem, many of the commenters present the politicization of rate regulation as the crucial difficulty in local regulation of basic subscriber rates. It is argued that rate regulation at the local level is bound up inextricably with politics and that rate increase requests often become a political football, with arbitrary and unfortunate results. Most of the officials regulating rates are popularly elected, or are political appointees, with the result that they are acutely sensitive to voter reaction to proposed subscriber rate increases. Eastern Telecom notes that cable rate increase requests are often caught between regular tax increases, which local officials must approve, and increases in utility rates over which they may or may not have any control. To placate constituents, local officials attempt to draw the line when subscriber rate increase requests are presented, no matter how meritorious they may otherwise be. Cablecom-General points out that franchising authorities resort to such practices as postponing rate increases indefinitely, summarily refusing to consider any action, delaying consideration of rate increases by raising unassociated matters and requiring their resolution, and denying any rate increase at all or granting one far less than that requested without evaluating the financial data presented. Some local authorities even hint at retaliatory action, such as refusing to renew the franchise, when presented with a rate increase request. Warner and Liberty echo these concerns and state that they have had the same experiences. Liberty emphasizes the frequency with which delaying tactics are employed, stating that this has caused it to spend substantial sums to satisfy endless requests for studies, reports, and surveys. In one instance Liberty notes it was forced to spend over $25,000 to secure a monthly rate increase of fifty-six cents on one of its conglomerate systems. The City of San Diego notes that, from its experience, ratemaking is likely to be an attenuated process due in part to attempts by local officials "to prolong the issue of higher rates with the hope that the political problem it creates will soon go away."

13. The comments of the various parties are replete with specific examples of how lack of local expertise and the politicization of rate increase requests can lead to arbitrary and unfair results. Community Tele-Communications, Inc. offers what is said to be a typical situation. CTCI states that one of its systems has experienced a negative cash flow and rate of return since the system was energized. Investment in the system totals $3,000,000 and the system is 97 percent constructed. The franchise requires wiring of the entire franchise area. For two years the system and the franchising authority have been at an impasse over a requested rate increase. CTCI insists that the increase is needed to make the system viable and enable it to extend service to the remaining three percent of the franchise area; nevertheless, the franchising authority refuses to grant any increase until the remaining three percent of the franchise area is served. Several of the parties note that such situations are exacerbated where the system operator is attempting to secure rate increases in several communities served by a conglomerate system. Mr. Lawrence Flinn, President of National Cable Communications Corp., avers that he built up a conglomerate system that served seventeen communities in New York State. Attempts to get rate increases from some of these communities proved so frustrating that Mr. Flinn states he finally sold the systems. The Pennsylvania Cable Television Association (PCTA) notes that this problem is also acute in Pennsylvania, where there are many small communities and consequently numerous conglomerate systems. Eastern Telecom has submitted documentation of its efforts to secure uniform rate increases throughout all portions of its Pennsylvania conglomerate systems. In one instance, Eastern Telecom readily secured a requested rate increase from one of the two communities served by one of its systems. The other community, however, which included 85 percent of the systems' total subscribers, refused to grant the increase until a certain signal was added to the systems' signal complement. Upon being informed by the Commission that carriage of the desired signal would be inconsistent with the rules, the franchising authority denied the requested rate increase. Although a renewed request was made and extensive financial data showing continuing and growing losses were submitted, no action had been taken by February 1976, over a year after the first community had granted the requested rate increase.

14. *No safeguards against arbitrary disposition of rate increased requests.* Several of the commenters make the point that, although the Commission's Rules impose rate regulation responsibilities on local authorities who are inexperienced and reluctant to grant increases, the Rules contain no safeguard against arbitrary and unfair decisions. The only redress is costly and time-consuming judicial action. PCTA states that in Pennsylvania there are at least six instances in which legal proceedings are being contemplated or are presently pending, and Warner Cable notes that it has been forced to litigation in several cases to secure proper rate increases. CTCI notes that it had to bring suit to obtain a rate increase needed to save a system in California from bankruptcy, and CATA notes that one large multiple system owner was forced to bring suit against two California cities—one of which refused to act on a rate increase request for sixteen months while the other arbitrarily denied the full increase requested.

15. *Effects of problems in non-federal rate regulation.* The commenters offer statisitcs and examples to show the effects of local regulation of subscriber rates. NCTA states that the results of a survey it conducted on the general topic of subscriber rate regulation disclosed that final action on subscriber rate increases occurs between six and eighteen months after the initial request, with an average interval of approximately one year. The average cost to the system operator of obtaining a rate increase is approximately $2900, but NCTA avers that this figure is misleading because many systems do not properly allocate the costs normally attributable to such proceedings. The California Cable Television Association estimates that the time consumed in obtaining a rate increase varies between nine and twenty months with costs of $10,000 to $100,000. Cablecom states that the costs generated by prolonged and contentious rate regulation are passed along to subscribers. The commenters emphasize, however, that the adverse effects of such local rate regulation are not felt by subscribers alone. The ability of the cable industry to attract necessary venture capital depends on the rates the system operator can charge subscribers for service. Warner Cable emphasizes that it is absolutely essential for the cable industry's rates, like those of any other industry, to reflect changes in the cost of living and in annual costs of obtaining capital needed to maintain proper service. When an industry cannot recover its operating or capital costs, its financial viability and growth potential are seriously threatened. Allen's TV Cable Service, in a comment jointly filed with 68 other cable systems, agrees that the inability of many system operators to obtain necessary rate increases has made compliance with the Commission's technical and channel capacity Rules difficult at times, and occasionally has delayed implementation of service that could add to the diversity of programming available to subscribers either because microwave transmission cannot be afforded to import distant signals or because origination equipment for locally-produced programming cannot be bought. Moreover, an insufficient rate base may make it impossible to expand cable service into new areas. Thus, ill-advised local rate regulation redounds to the detriment of the industry as a whole, the individual system and the programming and services it can provide, and potential as well as current subscribers.

V41161 AUG 18 76 UMI

PROPOSED SOLUTIONS

16. *Substantial Amendment of § 76.31 (a) (4).* As noted at Paragraph 10 above, several of the proponents of change recommend that § 76.31(a) (4) be substantially amended to correct the perceived deficiencies in local subscriber rate regulation. These commenters focus on the absence of standards governing the procedure to be followed in making rate decisions as the crucial problem, and suggest the adoption of standards to cure the defect. Based on the difficulties it has experienced in securing rate increases, Eastern Telecom recommends that § 76.31(a) (4) be amended to incorporate a specific procedure providing for the system's submission of a rate increase request to a local commission, which would thereupon give the public an opportunity to comment in writing as well as in a public hearing. The commission would then issue its findings, and the franchising authority would act upon them. A time limit would be set for accomplishment of each step in this procedure, and disputes would be submitted to arbitration. Mr. Robert A. Brooks[6] faults the Commission not only for having failed to adopt procedural safeguards against unfair rate setting but also for failure to provide for an appellate or arbitration board to facilitate resolution of rate increase disputes Thus, in addition to proposing adoption of a described rate review procedure that includes guidelines to be followed by the parties in requesting and evaluating rate increases, Mr. Brooks suggests that the Commission create an appellate or arbitration board to decide rate increase disputes.

17. *Deletion of §76.31(a) (4).* The majority of the commenters remarking upon the inherent problems in local subscriber rate regulation favor deleting § 76.31 (a) (4). Several of these commenters further suggest adoption of standards to be followed by those local authorities continuing to regulate basic subscriber rates. To offset the problem of politically-motivated delays in rate increase decisions, Warner Cable advocates adoption of a rule providing that proposed rate increases would become effective within 30 days after service of notice on the franchising authority. The latter would retain the right to review and, if necessary, roll back the increase. The California Community Television Association would require the setting of a rate that is just and reasonable, as defined in "D.C. Transit System v. Washington Metro Area Transportation Commission," 350 F.2d 753 (D.C. Cir., 1965),[7] and adequate to insure revenues sufficient to comply with the Commission's rules, and would have rates declared null and void if they fail to meet these standards. Procedurally, CCTA's suggested amendment would provide that requested rate increases would become effective 90 days after notification of the franchising authority. If the latter failed to act within that time and notified the system operator that it wished to review the proposed increase, it would be required to reach a decision within 180 days of the initial proposal to increase the rate. Finally, while Cablecom-General favors deletion of the Rule, it urges the Commission to extensively investigate and gather information on the entire area of local ratemaking procedures. Cablecom-General believes this advisable because it doubts that regulation of basic subscriber rates at any level of government is needed and because there is presently no repository of organized and documented experience on ratemaking policies and practice upon which a sound regulatory policy can be based. Allen's TV Cable et al. favors deletion of the rule but fears that the political pressure to regulate rates would render most local authorities unwilling to abandon rate regulation; therefore, these commenters urge the Commission to impose a moratorium on non-federal rate regulation. A provision for waiver would be incorporated which would enable a community to regulate rates upon a showing of good cause therefor; however, any rate regulation would be conditioned upon the implementation of procedures assuring due process and timely action on rate increase requests. The Pacific Northwest Cable Communications Association also favors deletion of § 76.31(a) (4) coupled with imposition of a moratorium on non-federal subscriber rate regulation to determine whether subscriber rate regulation by any level of government is necessary.

18. A number of the commenters urge the Commission to recognize that the problems arising from the manner in which local authorities regulate basic subscriber rates are much more crucial than whether or not such regulation is mandatory. Therefore, these commenters regard deletion of § 76.31(a) (4) as only a first step in addressing the problems of local subscriber rate regulation and perhaps not even a major step because, as NCTA states, political pressures will make it unlikely that even disinclined franchising authorities will forego subscriber rate regulation. Accordingly, Verto Corporation and Universal Television Cable System Inc., conclude there is a need for the Commission to preempt the field, as it has done in the area of auxiliary services (e.g. pay-cable) rate regulation for non-basic subscriber services and preclude rate regulation at any level of government. American Television and Communications Corporation and NCTA agree in this assessment. Cox Cable et al. and the Florida CATV Association favor deletion of the Rule and, if necessary, declaration of a moratorium on local or state rate regulation pending the formulation of preemptive federal regulations. Conversely, Viacom International, the New England Cable Television Association, and CTCI favor preemption but do not recommend deletion of § 76.31(a) (4) as an intermediate step. As an interim measure CTCI recommends modifying the rule in a fashion similar to the proposal contained in the Notice but would amplify the Rule by providing that proposed rate increases would become effective automatically within 60 days of service of notice of the increase on the franchisor unless within that period the franchisor determines to the contrary. Viacom and the New England Cable Television Association apparently regard either revision or deletion of § 76.31(a) (4), even as interim measures, to be inadequate. NCTA's preemption proposal would preclude non-federal rate regulation and allow the marketplace to control in competitive markets in which over-the-air television reception is good; CTCI, Cox Cable et al. and the Florida CATV Assocation would allow local rate regulation in communities served by two or fewer Grade B signals, but would allow rates to become automatically effective within a stated number of days following service of notice of the proposed increase on the franchising authority. As an alternative to deletion of the Rule and preemption, Liberty recommends that a rule be adopted requiring franchising authorities to set a fair rate which, if conditioned upon provision of extra services, is sufficient to cover their cost plus a reasonable profit. Liberty would require arbitration where rates cannot be agreed upon and preclude rate regulation in small communities served by a portion of a larger conglomerate system.

DISCUSSION

19. When we adopted the "Cable Television Report and Order" in 1972 we expressed our belief that it was important for cable television subscriber rates to be set in a manner that would assure they were both fair to the system and to the subscribing public. Although we did not then believe it either appropriate or practical to displace state and local authorities from the role they had traditionally played in this area, we did believe that the matter of subscriber rates was an appropriate area of federal concern. Rate levels and the perceived fairness and efficiency of the process whereby they are set are likely to have a direct bearing on the growth of the cable television industry and the types and diversity of services it provides. Rates inappropriately high may limit the availability of service to members of the public. Rates too low may limit investment in the industry and its growth on a

[6] Mr. Brooks is senior vice president of Telecom Engineering, Inc., and President of the Board of Aldermen of the City of Manchester, Missouri.

[7] "A just and reasonable rate is one that assures that all the enterprise's legitimate expenses will be met, and enables it to cover interest on its debt, pay dividends sufficient to attract investors, and retain sufficient surplus to permit it to finance downpayments on new equipment and generally to provide both the form and substance of financial strength and stability." 350 F.2d at 778.

nationwide basis. Rates too low could also impede cable operators in their ability to comply with the requirements of the Commission's rules. Accordingly, § 76.31(a) (4) of the rules was adopted to require, as a condition for obtaining a Certificate of Compliance from the Commission, that each cable system have a franchise or other appropriate local authorization providing for the regulatory supervision of subscriber rates.

20. Because it appeared that some local authorities did not have the authority to comply with this standard, in order to facilitate experimentation with differing types of rate control procedures, and because it appeared that there were areas where such rate control was not necessary in light of market forces restraining rate increases even in the absence of governmental control, we proposed in this proceeding to amend our rules so as to make rate regulation at the local level optional and subject to decision at the local level. Some commenting parties have suggested that we take an additional step and act to preclude regulation of rates at the local level. These parties regard the local rate regulation process as both burdensome and unnecessary. We stated in our recently issued Notice of Inquiry in Docket 20767, *supra*, paragraph 4 that "the Commission contemplates no federal preemption of the local regulation of subscriber rates and no regulation of subscriber rates by the federal government." Nothing in the comments submitted herein has persuaded us to alter this view. Moreover, even were we so persuaded, the scope of this proceeding is not sufficiently broad to admit of that outcome.

21. Our review of the comments filed and our further consideration of the issues raised has convinced us that deletion of § 76.31(a) (4) would be advisable.[8] This will enable local authorities to decide whether subscriber rates should be regulated, and will best facilitate experimentation in the types of rate controls exercised. It now appears to us that there are areas or circumstances in which the regulation of regular subscriber rates may be neither desirable nor necessary and that local authorities should be permitted to decide for themselves whether they will undertake such regulation. Several types of situations may be involved. First, there are those mentioned in the Notice where there appears to be no local authority to control rates. Second, there are those situations where competitive alternatives to cable television service alone or when combined with particularly risky or expensive installations appear to render the rate regulatory process superfluous. In view of the other forces acting to keep rates at an appropriate level, rates allowable after careful consideration of the facts involved in these situations could easily exceed those which the market situation would allow to be charged. There are many areas of the country where cable television now appears to be a marginal investment for a prudent businessman. It would be perfectly sensible for a franchise authority in such an area to seek to reduce the risks involved and so attract franchise applicants by offering potential operators independent control over service charges. Other reasons may also exist for foregoing rate controls: Minor subdivisions served by large systems from adjoining communities may wish to defer to their larger neighbors on the rate question, small municipalities may find, given their level of expertise on questions of this type, that any formal rate proceeding is more expensive to the community as a whole than increased cable rates. In view of these considerations, we now no longer believe it appropriate to mandate through our rules that rate regulation be undertaken in every community where there is a cable television system. Moreover, it appears logical to us, having left to local authorities the decision as to what level of rates should be charged where they are regulated, to also leave to them the decision as to whether this process is desirable at all.

22. As the comments of the New Jersey Cable Television Association demonstrate, deletion of the Rule in its entirety, rather than adoption of the alternative amendment proposed in the Notice, will also permit nonfederal authorities the widest range of flexibility with which to establish procedures for handling rate increases. By not requiring public proceedings prior to implementation of rate increases, we not only will enable local authorities to implement certain acceptable forms of rate regulation such as arbitration, automatic escalator clauses, maximum rate setting, which the public proceeding requirement might otherwise preclude, but also will facilitate the implementation of procedures that are tailored to the extent of the perceived need for rate regulation in the individual cable community.

23. We note the concern of several of the commenters that elimination of the rule or of the public proceeding requirement would deprive the public of all due process safeguards in rate regulation, but we find this unlikely to occur. Any particular mode of rate regulation established will be stipulated in the franchise granted the system operator. Section 76.31(a) (1) of our rules further specifies that a cable television franchise shall be granted only after an evaluation of the proposed cable operation has been made in the context of a full public proceeding affording due process. Many states and localities also have statutes and ordinances requiring that the public be given notice and an opportunity to be heard in the granting of franchises. Therefore, the provisions of state and local law and of our rules will assure that the public has participated in any consented ab initio to the adoption of any procedural mechanism whereby subscriber rates are determined.

24. We note also the argument of several of the public interest commenters that public proceedings to evaluate rate increase requests serve as a useful forum for identifying and resolving service complaints and even for obtaining desired new services from the system operator. There is concern that, were we to delete this existing requirement, there would be no mechanism for the public or the franchising authority to redress service complaints or otherwise review and require changes in existing service. In this respect we should observe that, although rate increase hearings may offer an opportune time to address these problems, they do not provide the only opportunity to do so. The franchising authority can include in the franchise provisions for periodic public review of the franchisee's performance, along with specified penalties or remedies in the event the franchisee fails to comply. Introducing numerous tangential service complaints and requests into what would ordinarily be an economic and financial inquiry can needlessly prolong and obscure the rate proceeding. Moreover, withholding a requested rate increase until the system operator supplies desired services may, depending on the exigency for the requested increase and the extent of service required, seriously injure the system economically either because of the delay or because the increase, once granted, may be insufficient to cover the cost of a service not anticipated when the initial request was made. In such instances the interests of the parties involved—the system operator, subscribing public, and franchising authority—may be adversely, rather than beneficially, affected.

25. Consistent with these findings, we shall amend our Rules to delete § 76.31 (a) (4) in its entirety. In so doing, however, we note the virtual unanimity of the cable parties in asserting that there have been instances wherein local rate regulation has not been performed in a consistent and dispassionate manner. We agree that, where the franchising authority retains the prerogative of prior approval of rate increases but does not discharge its duty responsibly, every party having an interest in a reasonable decision is an ultimate loser. The system operator is obviously and immediately affected because his ability to expand, or even to continue, service may be imperiled. As a result, current subscribers suffer by being precluded from receiving new services that might otherwise be offered and in some exacerbated situations may sustain a diminution of service previously provided. Potential subscribers can also be affected because unjustifiably limited revenues may make it impossible to extend cable service to successive areas

[8] We do not concur with the comments of ABC, the television licensees, and NCCB that this proceeding should be terminated because there was insufficient hard data available to the Commission to suggest that it should have been commenced. That a rule making proceeding may appropriately be commenced based on data gathered informally by the staff and as a result of our own expertise, views, and opinions, as well as on information more formally gathered, is not, we think, open to question. See, e.g. Flying Tiger Line, Inc. v. Boyd, 244 F. Supp. 889 (D.D.C., 1965)

V41161 AUG 18 76 UMI

that the operator might otherwise wish to serve. To the extent that any or all of these results occur, the franchising authority may have caused a harmful effect far outweighing the intended beneficence of its action.

26. As a cure or partial cure for problems in this area it has been suggested that we preempt regulation in this area. As indicated in paragraph 20 above, we are not persuaded that this would be either feasible or appropriate. Moreover, it would be most difficult at this time to follow the suggestions of the NCTA and of Cox Cable et al., paragraph 18 above, and frame a rule of general application defining those situations wherein an exception to the general preemption should apply and rate regulation be permissible or even mandatory. Differences in size of community, age and technical sophistication of the system, services offered, and so forth, when added to the variations in degree and type of off-the-air television service and available entertainment alternatives, make it most difficult to predict on the basis of the information before us which systems should, and which should not, be rate-regulated. Nor do we agree that a general preemption on rate regulation for a moratorium period is necessary to identify those instances wherein rate regulation is presumptively not needed. As a result of the action we will take today, a number of communities may decide not to regulate rates and the experience of a cross-section of these may well supply a modicum of the information needed on this point.

27. With respect to those communities that continue subscriber rate regulation, we believe that several measures now pending or soon to be submitted to the Commission may be of some aid in solving some of the problems alleged to exist in local rate regulation. We anticipate issuing for comment in the near future a proposed uniform reporting and accounting system for cable television systems which, hopefully, will clarify and unify accounting practices throughout the industry. This should be of help to local authorities needing a systematized and comprehensive set of financial data with which to evaluate rate increase requests, and should eliminate the necessity for repeated solicitations of relevant financial data from the system operator. This, we trust, will remedy one of the causes of delay in granting needed rate increases. For those local authorities still unsure of how to regulate subscriber rates, the body of information submitted in response to the Notice of Inquiry in Docket 20767, supra, will hopefully enable the Commission to prepare a report which will aid in answering some questions about subscriber rate regulation and supply further guidance to those local authorities requesting it.

28. Cable television performs a unique and important function in the national communications network. We are assuming that local authorities who exercise the option to set basic subscriber rates will act responsibly in discharging their duties. We urge them to avoid needlessly prolonging decisions on rate changes, demanding that the system operator fulfill unrealistic conditions as a quid pro quo, or otherwise disposing of rate change requests in an arbitrary and capricious manner. We strongly encourage franchising authorities and prospective franchisees to fully consider all aspects of the rate making procedure and, where possible, anticipate the problems that may arise and provide the means of resolving them in the franchise itself. If the franchising authority elects to regulate rates, we encourage the parties to the franchise to not only stipulate any mechanism for rate setting but also to specify what documentation will be deemed relevant and reasonably capable of being produced, which of the parties will bear the cost of providing it, a period of time within which the franchising authority will reach its decision, procedures to be used to resolve any disputes arising in the course of this process, and so forth. This will enhance the effect of our action today, by assuring that most, if not all, subscriber rate problems may be effectively settled through local processes.

29. Authority for the rule change adopted today is contained in sections 2, 3, 4(i) and (j), 301, 303, 307, 308, 309, 315 and 317 of the Communications Act of 1934, as amended.

30. *Accordingly, it is ordered,* That Part 76 of the Commission's rules and regulations, is amended, effective September 23, 1976, as set forth below.

31. *It is further ordered,* That this proceeding is terminated.

(Secs. 2, 3, 4, 301, 303, 307, 308, 309, 315, 317, 48 Stat., as amended, 1064, 1065, 1066, 1081, 1082, 1083, 1084, 1085, 1088, 1089; (47 U.S.C. 152, 153, 154, 301, 303, 307, 308, 309, 315, 317).)

Adopted: July 29, 1976.

Released: August 13, 1976.

FEDERAL COMMUNICATIONS COMMISSION,*
VINCENT J. MULLINS,
Secretary.

Part 76 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

§ 76.31 [Amended.]

1. In § 76.31, paragraph (a)(4) is deleted.

[FR. Doc.76-24178 Filed 8-17-76;8:45 am]

Title 49—Transportation

CHAPTER III—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER B—FEDERAL MOTOR CARRIER SAFETY REGULATIONS

[Docket No. MC-71; Notice No. 76-18]

PART 390—FEDERAL MOTOR CARRIER SAFETY REGULATIONS: GENERAL

Photographic Copies of Records or Documents

• Purpose. This document amends the Federal Motor Carrier Safety Regulations (FMCSR) to allow safety-related records and documents that are required to be maintained by motor carriers to be suitably reproduced on microfilm in lieu of the original record for the required retention period. •

Section 390.45 of the FMCSR is being added to permit the use of microfilm in lieu of the original record for the required retention period.

Several requests had been made for permission to microfilm records in order to reduce costly filing and storage space. In order to be consistent with current practices and help minimize the paperwork burden upon businesses who provide information to the Federal Government, a notice of proposed rulemaking was issued inviting interested persons to give their data, views and comments pertaining to the revision under consideration.

Three comments were received. Two comments were totally in favor of this rule and felt each stipulation would be acceptable.

The American Trucking Associations, Inc., commented that, in general, they felt the proposal was satisfactory and would afford motor carriers a worthwhile alternative to storage of records as now prescribed. But, they did have several comments on a few limitations.

First, they feel a full variety of maintenance record systems should be determined since many motor carriers rely on data processing techniques in the conduct of their daily operations. One such system is the Vehicle Maintenance Reporting System (VMRS) developed by the Management Systems Department of the American Trucking Associations, Inc. They do not want this § 390.45 to rule out the present system, or inhibit the development of new data storage systems that could meet the regulatory recordkeeping requirements equally as well. We are not advocating, in this rule, that any particular system be used, or ruled out, just that if the carrier feels that microfilming would benefit his operation it may now be used.

They objected to the requirement that each roll of film include a microfilm of a certificate stating that photographs are direct and facsimile reproductions of the original, and, further objected that it would not be feasible for the person doing the microfilming to have thorough knowledge of all of the contents of the records that he films.

We do not feel it unreasonable to ask that each roll of film include this certificate. In regard to the comment that the person doing the microfilming needs to have thorough knowledge of the contents, this requirement was not intended to mean that any person who does the copying would need to have in-depth knowledge of the information being filmed. The person making the microfilm would not necessarily have to be the person executing the certificate. The intention is that the person who normally handles the records should execute the certificate stating that the photographs are direct and facsimile reproductions of the original record.

Several comments were received regarding the provision of the proposed regulation which would have required any person who takes advantage of the microfilming provisions to waive all right to demand the production of the original document. This provision has been deleted from the final regulation because the provision was intended to apply in a very limited number of cases and it is believed that other means could be used to prevent abuses in such situations.

Accordingly, 49 CFR Part 390 (Part 390 of the Federal Motor Carrier Safety Regulations) is amended by adding § 390.45 to read as follows:

§ 390.45 Photographic copies of records or documents.

All records and documents required to be maintained under Subchapter B, Chapter III of this Title must be preserved in their original form for the periods specified, unless the records and documents are suitably photographed and the microfilm is retained in lieu of the original record for the required retention period, subject to the limitations indicated below:

(a) All records and documents required to be maintained under Subchapter B, Chapter III of this Title may be destroyed after they have been suitably photographed for preservation.

(b) To be acceptable in lieu of original records, photographic copies of records must meet the following minimum requirements:

(1) Photographic copies shall be no less readily accessible than the original record or document as normally filed or preserved would be and suitable means or facilities shall be available to locate, identify, read and reproduce such photographic copies.

(2) Any significant characteristic, feature or other attribute of the original record or document, which photography in black and white will not preserve, shall be clearly indicated before the photograph is made.

(3) The reverse side of printed forms need not be copied if nothing has been added to the printed matter common to all such forms, but an identified specimen of such form shall be on the film for reference.

(4) Film used for photographing copies shall be of permanent record type meeting in all respects the minimum specifications of the National Bureau of Standards, and all processes recommended by the manufacturer shall be observed to protect it from deterioration or accidental destruction.

(5) Each roll of film include a microfilm of a certificate or certificates stating that the photographs are direct and facsimile reproductions of the original records. Such certificate or certificates shall be executed by a person or persons having personal knowledge of the material covered thereby.

(Sec. 204, Interstate Commerce Act (49 U.S.C. 304); sec. 6, Department of Transportation Act (49 U.S.C. 1655); and the delegations of authority at 49 CFR 1.48 and 389.4, respectively)

Effective date: October 1, 1976.

Issued on July 28, 1976.

ROBERT A. KAYE,
Director,
Bureau of Motor Carrier Safety.

[FR Doc.76-24127 Filed 8-17-76;8:45 am]

Title 50—Wildlife

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

National Wildlife Refuges, North Dakota

The following special regulations are issued and are effective on August 18, 1976.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

NORTH DAKOTA

ARROWWOOD NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Arrowwood National Wildlife Refuge, North Dakota, is permitted only on the area designated by signs as open to hunting. This open area, comprising 15,900 acres, is delineated on a map available at the refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following conditions:

(1) Hunting with guns is not permitted.

(2) Bows only may be used and must conform to state regulations.

(3) The open season for hunting deer on the refuge is from 12:00 noon to sunset August 27, 1976, and from ½ hour before sunrise to sunset thereafter thru October 1, 1976. Bow hunting will be permitted again on November 23, 1976 and remain open until December 12, 1976.

The provisions of this special regulation supplement the regulations which govern hunting in wildlife refuge areas generally are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 12, 1976.

CHASE LAKE NATIONAL WILDLIFE REFUGE

Public hunting of deer on Chase Lake National Wildlife Refuge, North Dakota; is closed for the 1976 season.

JAMES W. MATTHEWS,
Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, North Dakota 58476.

AUGUST 10, 1976.

[FR Doc.76-24190 Filed 8-17-76;8:45 am]

PART 32—HUNTING

Kirwin National Wildlife Refuge, Kansas

The following special regulation is issued and is effective on August 18, 1976. The limited time ensuing from the date of the adoption of the Federal migratory game bird regulations to and including the establishment of State hunting seasons makes it impracticable to give public notice of proposed rule making.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

KANSAS

KIRWIN NATIONAL WILDLIFE REFUGE

Public hunting of teal ducks on the Kirwin National Wildlife Refuge, Kansas, is permitted from September 11 through September 19, 1976, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,700 acres, is delineated on maps available at refuge headquarters, 5 miles west of Kirwin, Kansas, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225.

Hunting shall be in accordance with applicable State and Federal regulations covering the hunting of teal ducks subject to the following special condition:

(1) Blinds—Temporary blinds constructed above ground from natural vegetation are permitted. Digging of holes or pits to serve as blinds is prohibited.

The Provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 19, 1976.

KEITH S. HANSEN,
Refuge Manager, Kirwin National Wildlife Refuge, Kirwin, Kansas.

JULY 30, 1976.

[FR Doc.76-24101 Filed 8-17-76;8:45 am]

PART 32—HUNTING

Big Stone National Wildlife Refuge, Minnesota

The following special regulations are issued and are effective on August 18, 1976.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

MINNESOTA

BIG STONE NATIONAL WILDLIFE REFUGE

The public hunting of pheasants, Hungarian partridge, cottontail rabbits, and grey and fox squirrels on the Big Stone National Wildlife Refuge, Minnesota is permitted only on the area designated by signs as open to hunting. This open area, comprising 3,300 acres, is delineated on maps available at refuge headquarters; 25 NW 2nd Street, Ortonville, Minnesota and from the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of pheasants, Hungarian partridge, cottontail rabbits, and grey and fox squirrels subject to the following special conditions:

(1) The open season for hunting cottontail rabbits, and grey and fox squirrels

• Commissioner Hooks dissenting.

V41161 AUG 18 76 UMI

extends from September 18, 1976 to November 30, 1976 inclusive.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 30, 1976.

CHARLES W. GIBBONS,
Refuge Manager, Big Stone National Wildlife Refuge, Ortonville, Minnesota.

AUGUST 10, 1976.

[FR Doc.76-24100 Filed 8-17-76;8:45 am]

PART 32—HUNTING

Big Stone National Wildlife Refuge, Minnesota

The following special regulations are issued and are effective on August 18, 1976.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

MINNESOTA

BIG STONE NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Big Stone National Wildlife Refuge, Minnesota, is permitted only on the area designated by signs as open to hunting. This open area, comprising 3,300 acres, is delineated on maps available at refuge headquarters, 25 NW 2nd Street, Ortonville, Minnesota or from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111. Hunting shall be in accordance with all applicable State regulations concerning the hunting of deer subject to the following special conditions:

(1) Construction of permanent hunting blinds is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 30, 1976.

CHARLES W. GIBBONS,
Refuge Manager, Big Stone National Wildlife Refuge, Ortonville, Minnesota.

AUGUST 10, 1976.

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 217—GENERAL PROVISIONS

PART 222—ENDANGERED FISH OR WILDLIFE

Certificates of Exemption for Pre-Act Endangered Species Parts and Products Held in United States on December 28, 1973, in Course of Commercial Activity; Interim Regulations

The purpose of these regulations is to implement the Endangered Species Act Amendments of 1976 (Pub. L. 94-359) by the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce. The Secretary of Commerce delegated his responsibility to implement the Endangered Species Act to the Administrator of the National Oceanic and Atmospheric Administration (NOAA). The Administrator of NOAA redelegated his responsibility to the Director of the National Marine Fisheries Service (NMFS).

More specifically, the amendments make a number of changes to clarify certain ambiguities, avoid lapses of coverage, eliminate unnecessary administrative burdens, and create greater consistency with other similar conservation legislation (i.e. Marine Mammal Protection Act of 1972 as amended (Pub. L. 92-522, 16 U.S.C. 1361 et seq.)).

In 1973 Congress passed the Endangered Species Act of 1973 which strengthened its 1969 predecessor by prohibiting not only the importation but also the sale of endangered species and their parts and products in interstate and foreign commerce. The Endangered Species Act, however, contained no exemptions for the interstate sale of parts of endangered marine mammals which were held for commercial purposes. Under the Marine Mammal Protection Act of 1972, a limited exemption was provided for parts and products held for commercial purposes. As a result of this inconsistency between the two laws, an economic hardship was inflicted upon those individuals who were engaged in commercial activities and who were holding inventories of sperm whale oil and scrimshaw prior to the passage of the Endangered Species Act. In order to alleviate the economic hardship caused by the inconsistency, the amendments allow holders of pre-Act, legally-obtained sperm whale oil and scrimshaw to apply to the Director, NMFS, for a certificate of exemption that will allow them to dispose of these pre-Act endangered species parts commercially for a limited period of time.

The NMFS is publishing herewith interim regulations implementing the Endangered Species Act Amendments of 1976. Comments are invited through September 20, 1976. Comments should be addressed to the Director, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Washington, D.C. 20235. Following the close of this comment period, these interim regulations at the discretion of the Director will be amended so as to reflect any such comments. The Director shall then publish final regulations in the FEDERAL REGISTER.

As authorized by 5 U.S.C. 533(d)(3), these interim regulations are effective on August 18, 1976, in order to afford immediate relief from the severe economic hardship caused by the legislative inconsistencies referred to above.

These regulations are effective August 18, 1976.

Signed in Washington, D.C., on August 13, 1976.

ROBERT W. SCHONING,
Director,
National Marine Fisheries Service.

50 CFR Parts 217 and 222 are hereby amended as follows:

Amend 50 CFR Part 217, Subpart B—Definitions, § 217.12 as follows:

§ 217.12 [Amended]

1. Insert the following definition before the definition of "commercial activity":

"Act" means the Endangered Species Act of 1973, as amended, (Pub. L. 93-205).

2. Insert the following definition before the definition of "country of exportation":

"Commercial Activity" means all activities of industry and trade, including, but not limited to, the buying or selling of commodities and activities conducted for the purpose of facilitating such buying and selling: *Provided, however,* That it does not include the exhibition of commodities by museums or similar cultural or historical organizations.

3. Delete the definition of "permit" and substitute in lieu thereof the following definition:

"Permit" or "Certificate of Exemption" means any document so designated by the National Marine Fisheries Service and signed by an authorized official of the National Marine Fisheries Service.

4. Insert the following definition after the definition of "possession":

"Pre-Act Endangered Species Part" means any sperm whale oil, including derivatives and products thereof, which was lawfully held within the United States on December 28, 1973 in the course of a commercial activity; or any finished scrimshaw product, if such product or the raw material for such product was lawfully held within the United States on December 28, 1973, in the course of a commercial activity.

5. Insert the following definition after the definition of Pre-Act Endangered Species Part:

"Scrimshaw Product" means any art form which involves the etching or engraving of designs upon, or the carving of figures, patterns, or designs from, any bone or tooth of any marine mammal of the order Cetacea."

Amend 50 CFR Part 222, Subpart C, § 222.24 by adding a new § 222.24(e), to read as follows:

§ 222.24 Procedures for issuance of permits.

* * * * *

(e) The Director may waive the thirty-day period in an emergency situation where the health or life of an endangered animal is threatened and no reasonable alternative is available to the applicant, but notice of any such waiver shall be published by the Director in the FEDERAL REGISTER within ten days following the issuance of the certificate of exemption or permit. The requirements of this section pertain solely to the permits issued pursuant to § 222.23.

Amend 50 CFR Part 222 by incorporating a new Subpart B as follows:

Subpart B—Certificates of Exemption for Pre-Act Endangered Species Parts

Sec.

222.11-1 General certificate of exemption requirements.
222.11-2 Application procedure.
222.11-3 Application requirements.
222.11-4 Procedures for issuance of certificates of exemption.
222.11-5 Application for modification of certificate of exemption by holder.
222.11-6 Amendment of certificates of exemption.
222.11-7 Procedures for suspension or revocation of certificates of exemption.
222.11-8 Subsequent purchaser provisions.
222.11-9 Duration of certificate of exemption.
222.12 Locations covered by certificate of exemption.
222.12-1 Certificate of exemption not transferable; exception.
222.12-2 Change of address.
222.12-3 Certain continuances of business.
222.12-4 Change in trade name.
222.12-5 State or other law.
222.12-6 Right of entry and examination.
222.12-7 Records.
222.12-8 Record of receipt and disposition.
222.12-9 Importation.
222.13 Exportation.
222.13-1 Procedure by exporter.
222.13-2 [Reserved]
222.13-3 Transportation to effect exportation.
222.13-4 Contracts with the General Services Administrator.
222.13-5 Documentation requirements for applicants for certificates of exemption.
222.13-6 Burden of proof; presumption.

Subpart B—Certificates of Exemption for Pre-Act Endangered Species Parts

§ 222.11-1 General certificate of exemption requirements.

(a) The Director, pursuant to the provisions of the Endangered Species Act, and pursuant to the provisions of this subsection, except for importation, may exempt any pre-Act endangered species part from one or more of the following:

(1) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States;

(2) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship to interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(3) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate of foreign commerce any such species part.

(b) No person shall engage in any of the above activities involving any pre-Act endangered species part without a valid certificate of exemption, or evidence of a right thereunder, issued pursuant to this Subpart B.

§ 222.11-2 Application procedure.

(a) Any person desiring to obtain such a certificate of exemption may make application therefor to the Director. The sufficiency of the application shall be determined by the Director in accordance with the requirements of this part and, in that connection, he may waive any requirement for information, or require any elaboration for further information deemed necessary.

(b) An original and one copy of the completed application shall be submitted to the Director, National Marine Fisheries Service, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, Washington, D.C. 20235.

(c) The outside of the envelope should be marked "Certificate of Exemption Request." Assistance may be obtained by writing the Director, or calling the Law Enforcement Division, NMFS, in Washington, D.C. (AC202 634-7521). At least 45 days should be allowed for processing. An application for a certificate of exemption shall provide the information contained in § 222.11-3 (when the information requested is not applicable, put "N.A.") and such other information that the Director may require.

(d) All applications for certificates of exemption must be received by the Director before August 18, 1977.

§ 222.11-3 Application requirements.

(a) The following information will be used as the basis for determining whether an application for a certificate of exemption is complete:

(1) Title: Application for Certificate of Exemption Under Pub. L. 94-359.

(2) The date of application.

(3) The identity of the applicant including complete name, address, and telephone number. If the applicant is a corporation, partnership, or association set forth the details.

(4) The period of time for which a certificate of exemption is requested; however, no certificate of exemption, or right claimed thereunder, shall be effective after the close of the three-year period beginning on the date of the original issuance of the certificate of exemption.

(5) The prohibitions in section 9(a) of the Act for which an exemption is requested.

(6) A complete and detailed inventory of all pre-Act endangered species parts for which the applicant seeks exemption.

(7) Documentation to prove that any endangered species part claimed by the applicant to be a pre-Act endangered species part is in fact such a part. The documentation requirements are set forth in § 222.13-5 of this Subpart B.

(8) A certification in the following language:

I hereby certify that the foregoing information is complete, true, and correct to the best of my knowledge and belief. I understand that this information is submitted for the purpose of obtaining a certificate of exemption under the Endangered Species Act of 1973 Amendments (Pub. L. 94-359, 90 Stat. 911) and regulations issued thereunder, and that any false statement may subject me to the criminal penalties of 18 U.S.C. 1001, or to the penalties under the Endangered Species Act of 1973.

(9) Signature of the applicant.

(b) Upon receipt of an incomplete or improperly executed application, the applicant shall be notified by Certified Mail of the deficiency in the application. If the application is not corrected and received by the Director within 30 days following the date of receipt of notification, the application shall be considered as having been abandoned.

§ 222.11-4 Procedures for issuance of certificates of exemption.

(a) Whenever application for a certificate of exemption is received by the Director which the Director deems sufficient, he shall, as soon as practicable, publish a notice thereof in the FEDERAL REGISTER. All information received by the Director as a part of the application shall be available to the public as a matter of public record at every stage of the proceeding. An interested party may within 30 days after the date of publication of such notice, submit to the Director his written data, views, or arguments with respect to the action proposed in the application.

(b) As soon as practicable after the end of the 30 days succeeding publication of the notice referred to in paragraph (a) of this section, the Director shall issue or deny issuance of the certificate of exemption. Notice of the decision of the Director shall be published in the FEDERAL REGISTER within 10 days after the date of the issuance or denial and indicate where copies of the certificate of exemption, if issued, may be examined.

§ 222.11-5 Application for modification of certificate of exemption by holder.

Where circumstances have changed so that an applicant or certificate of exemption holder desires to have any material term or condition of his application or certificate modified, he must submit in writing full justification and supporting information in conformance with the provisions of this part. Such applications for modification are subject to the same issuance criteria as are original applications, as provided in § 222.11-3.

§ 222.11-6 Amendment of certificates of exemption.

All certificates are issued subject to the condition that the Director reserves the right to amend the provisions of a certificate of exemption for just cause at any time. Such amendments take effect on the date of notification, unless otherwise specified.

§ 222.11-7 Procedures for suspension or revocation of certificates of exemption.

(a) Any violation of the applicable provisions of Parts 217-222 of this chapter, or of the Act, or of a condition of the certificate of exemption may subject the certificate holder to the following penalties:

(1) The penalties provided in the Act; and

(2) Temporary suspension of the certificate of exemption for a specified period; and/or

V 41 161 AUG 18 76 UMI

(3) Revocation of the certificate of exemption. When revoked, the certificate must be surrendered to the Director on demand.

(b) Except in cases of willfulness or those in which the public health, safety, or interest requires, prior to any suspension or revocation of a certificate of exemption, the certificate of exemption holder shall be given:

(1) Notice by the National Marine Fisheries Service in writing of the facts or conduct which may warrant the suspension or revocation; and

(2) Opportunity to demonstrate or achieve compliance with all certificate of exemption requirements.

§ 222.11–8 Subsequent purchaser provisions.

(a) Any person granted an exemption pursuant to this subpart, upon an interstate sale of any exempted pre-Act endangered species part, shall supply a copy of the certificate of exemption as well as a signed written certification to each purchaser that such part may lawfully be sold, transported, or exported pursuant to the terms of an exemption granted under the Act and the regulations promulgated thereunder.

(b) Any subsequent purchaser, unless an ultimate user, shall upon an interstate sale supply a copy of the certificate of exemption as well as a signed written certification to each purchaser of such part that such part may lawfully be sold, transported, or exported pursuant to the terms of a certificate of exemption granted under the Act and the regulations promulgated thereunder. An ultimate user, for the purposes of this subsection, shall mean any person who has acquired such endangered species part for his own consumption.

(c) Any interstate purchaser or pre-Act endangered species parts shall, within 90 days after the receipt of such parts, submit to the Director a report specifying the quantity of such parts or products received, the name and address of the seller, a copy of the certification supplied pursuant to paragraph (a) of this section, the date on which such parts were received, and the intended use of such parts by the purchaser.

§ 222.11–9 Duration of certificate of exemption.

A certificate of exemption shall not be issued for a period exceeding three years from the date of issuance. The certificate of exemption shall entitle any person having a right thereunder to engage in the business or activity specified in the certificate of exemption, within the limitations of the Act and the regulations contained in this subpart, for the period stated in the certificate of exemption, unless sooner terminated.

§ 222.12 Locations covered by certificate of exemption.

The certificate of exemption covers the business or activity specified in the certificate of exemption at the address described therein. Accordingly, any change in business address must be reported to the Director. Upon such notification, the Director will record the change of address on the certificate of exemption. No certificate of exemption is required to cover a separate warehouse or similar facility used by the certificate of exemption holder solely for storage of pre-Act endangered species parts, if the records required by this subpart are maintained at the address specified in the certificate of exemption and which is served by such warehouse or storage facility.

§ 222.12–1 Certificate of exemption not transferable; exception.

Certificates of exemption issued under this subpart are not transferable; *Provided*, That in the event of the lease, sale or other transfer of the operations or activity authorized by the certificate of exemption the successor is not required by this subpart to obtain a new certificate of exemption prior to commencing such operations or activity. In such case, the successor will be treated as a subsequent purchaser and must comply with the record and reporting requirements set forth in § 222.11–8.

§ 222.12–2 Change of address.

A certificate of exemption holder may during the term of the certificate of exemption move his business or activity to a new location at which he intends regularly to carry on such business or activity, without obtaining a new certificate of exemption. However, in every case, notification of the new location of the business or activity must be given not less than 10 days prior to such move to the Director. In each instance, the certificate of exemption must be submitted for endorsement to the Director. After endorsement of the certificate of exemption the Director will return same to the person to whom issued.

§ 222.12–3 Certain continuance of business.

A certificate of exemption holder who furnishes his certificate of exemption to the Director for corrections or endorsement in compliance with the provisions contained in this subpart, may continue his operations while awaiting its return.

§ 222.12–4 Change in trade name.

A certificate holder continuing to conduct business at the location shown on his certificate of exemption is not required to obtain a new certificate of exemption by reason of a change in trade name under which he conducts his business: *Provided*, That such certificate of exemption holder furnishes his certificate of exemption for endorsement of such change of name to the Director within 30 days from the date the certificate of exemption holder begins his business under the new name.

§ 222.12–5 State or other law.

A certificate of exemption issued under this subpart confers no right or privilege to conduct a business or an activity contrary to State or other law. Similarly, compliance with the provisions of any State or other law affords no immunity under any Federal laws or regulations of any other Federal Agency.

§ 222.12–6 Right of entry and examination.

Any person authorized to enforce the Act may enter during business hours the premises, including places of storage, of any holder of a certificate of exemption or of any subsequent purchaser for the purpose of inspecting or examining any records or documents required to be kept by such certificate of exemption holder or successor under this subpart, and any endangered species parts at such premises or location.

§ 222.12–7 Records.

The records pertaining to pre-Act endangered species parts prescribed by this subpart shall be in permanent form, and shall be retained at the address shown on the certificate of exemption, or at the principal address of a subsequent purchaser in the manner prescribed by this subpart.

§ 222.12–8 Record of receipt and disposition.

(a) Each holder of a certificate of exemption shall maintain records of all pre-Act endangered species parts he receives, sells, transfers, distributes or disposes of otherwise. Each subsequent purchaser of the pre-Act endangered species parts shall similarly maintain records of all such parts or products he receives or distributes for the purpose of sale, distribution or industrial use.

(b) Such records as referred to in paragraph (a) of this section may consist of invoices or other commercial records which shall be filed in an orderly manner separate from other commercial records maintained, and be readily available for inspection. Such records shall (1) show the name of the seller or other transferor, (2) show the type, quantity, and identity of the part or product, (3) show the date of such acquisition, and (4) be retained, in accordance with the requirements of this subpart, for a period of not less than three years following the date of the acquisiton, or transfer.

(c) Each certificate of exemption holder and each subsequent purchaser shall, when required by letter issued by the Director, submit for the periods and times specified in the letter, all record information required by this subpart, or such other record information as the Director may specify in this letter.

(d) The Director may authorize the record information to be submitted in a manner other than that prescribed in paragraph (b) of this section when it is shown by the record holder that an alternate method of reporting is reasonably necessary and will not hinder the effective administration or enforcement of this subpart.

§ 222.12–9 Importation.

No pre-Act endangered species part shall be imported into the United States, and a certificate of exemption issued in accordance with the provisions of this subpart confers no right or privilege to import into the United States any such part.

§ 222.13 Exportation.

(a) Any person desiring to export from the United States any pre-Act endangered species part or scrimshaw product, must file with the Director an application for a certificate of exemption in accordance with the provisions of this subpart.

(b) In addition to other information required by this subpart, such application shall show the name and address of the foreign consignee, the intended port of exportation, and a complete description of the parts to be exported. When this information is unknown at the time application is made for a certificate of exemption, a certificate of exemption may be issued by the Director which shall require the submission of such information not less than 10 days prior to shipment.

§ 222.13–1 Procedure by exporter.

Shipment may not be made until the requirements of § 222.13 are met by the exporter. A copy of the certificate of exemption, and any endorsements thereto, must be sent by the exporter to the District Director of Customs at the port of exportation, and must precede or accompany the shipment in order to permit appropriate inspection prior to lading.

§ 222.13–2 [Reserved].

§ 222.13–3 Transportation to effect exportation.

Notwithstanding any provision of this subpart, it shall not be required that authorization be obtained from the Director for the transportation in interstate or foreign commerce of pre-Act endangered species parts to effect an exportation of such parts authorized under the provisions of this subpart.

§ 222.13–4 Contracts with the General Services Administrator.

Any person who has entered into a valid contract with the Administrator of the United States General Services Administration, prior to January 9, 1973, for the sale of government-owned pre-Act endangered species parts shall not be required to obtain a certificate of exemption prescribed by this subpart: *Provided*, That the purchaser is able to claim a right under a certificate of exemption issued to the Administrator of the General Services Administration: *Provided further*, That if such pre-Act endangered species parts are commingled, amalgamated, or otherwise combined with such person's current inventory or stockpile, so as to preclude a reasonable determination of one stock from the other, it may not be further sold or transferred without a certificate of exemption first having been granted therefor.

§ 222.13–5 Documentation requirements for applicants for certificates of exemption.

Any person desiring to obtain a certificate of exemption in accordance with the provisions of this subpart, shall in addition to other requirements of this subpart, submit the following documentation and information together with each application for a certificate of exemption:

(a) Any invoice, contract, bill of sale, or other document, relating to the applicant's purchase or other acquisition of any pre-Act endangered species part and which shows quantities obtained, from whom obtained and when obtained; or

(b) Any shipping record, including bills of lading, way-bills, transit lists, cargo manifests, or other document of whatever kind relating to shipment showing from whom shipped, quantity and dates of shipment; or

(c) Any other record or document which would reasonably tend to prove that any endangered species part claimed by the applicant to be a pre-Act endangered species part is in fact such a part.

§ 222.13–6 Burden of proof; presumption.

Any person claiming the benefit of any exemption or certificate of exemption under the Act or regulations, shall have the burden of proving that the exemption or certificate is applicable, has been granted, and was valid, and in force at the time of the alleged violation.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Avocado Reg. 18, Amdt. 1]

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

Maturity Requirements

This amendment revises the maturity requirements for the Ruehle and Biondo varieties of avocados. Ruehle avocados can be shipped two weeks earlier on August 16 at a lower minimum weight or smaller diameter. Biondo avocados can be shipped on August 16 at a lower minimum weight. Currently, Biondo avocados must meet the specified higher minimum weight until December 27. Recently completed maturity studies on both varieties indicate they will be mature at the hereinafter specified dates, minimum weights, or diameters. Weight or diameter and picking dates are indices used at harvest to assure that avocados are mature and will ripen satisfactorily after picking.

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendation of the Avocado Administrative Committee, established under the aforesaid marketing agreement and order, and upon other available information, it is hereby found that the maturity requirements for the handling of avocados, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for the amendment stems from the current avocado crop maturity situation. Maturity studies on the specified varieties completed recently indicate that avocados of such varieties will be mature at the hereinafter specified dates, minimum weights, or diameters.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that the time intervening between the date when information upon which this amendment is based became available and the

V 41 161
AUG 18 76
UMI

time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of specified varieties of avocados.

§ 915.318 [Amended]

Order. (1) The provisions of paragraph (a) (2) of § 915.318 (Avocado Regulation 18; 41 FR 21336) are amended by revising in Table I the dates and minimum weights applicable to the Biondo variety and by deleting therefrom the variety Ruehle and the dates and minimum weights or diameters specified for such variety so that after such revision the portion of Table I relating to Biondo avocados reads as follows:

(a) (1) • • •

Variety	Date	Minimum weight or diameter (ounces)	Date	Minimum weight or diameter (ounces)	Date	Minimum weight or diameter (ounces)	Date
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Biondo	Aug. 2, 1976	15	Aug. 16, 1976	12	Oct. 4, 1976		

• • • • •

(2) Paragraph (a) (6) of § 915.318 is redesignated as subparagraph (6) (ii) and a new subparagraph (6) (i) to read as follows is inserted after subparagraph (5) in such section:

(a) (1) • • •

(6) (i) No handler shall handle (*a*) prior to July 19, 1976, any Ruehle variety, avocados, (*b*) during the period July 19, 1976, through July 25, 1976, any Ruehle variety avocados unless the individual fruit in each lot of such avocados weighs at least 18 ounces, or is at least 3 11/16 inches in diameter, or (*c*) during the period July 26, 1976, through August 1, 1976, any Ruehle variety avocados unless the individual fruit in each lot of such avocados weighs at least 16 ounces, or is at least 3 9/16 inches in diameter, or (*d*) during the period August 2, 1976, through August 15, 1976, any Ruehle variety avocados unless the individual fruit in each lot of such avocados weighs at least 14 ounces, or is at least 3 7/16 inches in diameter, or (*e*) during the period August 16, 1976, through August 30, 1976, any Ruehle variety avocados unless the individual fruit in each lot of such avocados weighs at least 12 ounces, or at is at least 3 5/16 inches in diameter.

(6) (ii) • • •

• • • • •

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

Dated, August 13, 1976, to become effective August 16, 1976.

DAVID A. PATTON,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.76–24235 Filed 8–17–76;8:45 am]

PART 982—FILBERTS GROWN IN OREGON AND WASHINGTON

Identification of Certified Mechantable Filberts

Notice was published in the July 16, 1976, issue of the FEDERAL REGISTER (41 FR 29411), on a proposal recommended by the Filbert Control Board to permit an alternate means of identifying merchantable filberts that have been inspected and certified. The proposal is in accordance with the provisions of the marketing agreement, as amended, and Order No. 982, as amended (7 CFR Part 982; 40 FR 53226, 55829), regulating the handling of filberts grown in Oregon and Washington, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Interested persons were afforded an opportunity to submit written data, views, or arguments on the proposal. None were received.

Section 982.46(a) of the order requires each handler, at his own expense, to cause filberts to be inspected and certified by the Federal-State Inspection Service as meeting the then effective grade and size regulations before or upon handling such filberts, or before they may be credited in satisfaction of a restricted obligation. Section 982.46(b) requires all filberts so inspected and certified to be identified by seals, stamps, tags or other identification prescribed by the Filbert Control Board. Identification of certified merchantable filberts is necessary to enable the Board to administer the order, including the identification of certified merchantable filberts which are to be sold in normal market channels as inshell filberts, and certified merchantable filberts withheld as restricted filberts.

This action establishes an alternative means of identifying certified merchantable filberts which are to be handled as inshell filberts, commonly referred to in the industry as "free filberts" and restricted filberts. Currently, the identification requirements for certified merchantable filberts are set forth in § 982.446 of Subpart—Administrative Rules and Regulations (7 CFR 982.432–982.471).

The alternate identification consists of an outline of the combined States of Oregon and Washington with the words "This Product Inspected and Certified Per Federal Marketing Order No. 982" appearing within the outline. This identification may be imprinted directly on the bag or cartons (25 pounds, or more, capacity) used to package merchantable filberts that have been inspected and certified as such. When this imprint is used on these containers it must be placed in the upper right quarter of the printed side of the bag or the upper right quarter of any one side panel of the carton. The Board is to exercise control against unauthorized use of this alternative means of identification by approval of handler application for this method.

This action also establishes a new paragraph—§ 982.446(d)—defining the term "free filberts" to mean merchantable filberts which have been inspected and certified and will be handled. The term is used in the newly established paragraph (c) but currently has not been defined in the order or the administrative rules and regulations. The term "restricted filberts" is already defined in § 982.14.

After consideration of all relevant material presented, including that in the notice, the information and recommendation submitted by the Filbert Control Board and othe ravailable information, it is found that identification of inspected and certified merchantable filberts is authorized by § 982.46(b) and that the alternate means provided for in this action should be established to accomplish the purposes of the act and the efficient administration of the order.

Therefore, § 982.446 of Subpart—Administrative Rules and Regulations (7 CFR 982.432–982.471) is amended by adding new paragraphs (c) and (d) reading as follows:

§ 982.446 **Inspection documentation.**

• • • • •

(c) In lieu of the identification requirements prescribed in paragraph (b) of this section for free and restricted filberts, any handler may, upon application to and approval by the Board, use the following identification on bags (25 pounds, or larger, capacity) and cartons:

(1) The words "This Product Inspected and Certified Per Federal Marketing Order No. 982" shall be contained within an outline of the combined States of Oregon and Washington; and

(2) This identification shall be printed on the upper right quarter of the printed side of a bag; or

(3) This identification shall be printed on the upper right quarter of one of the side panels of a carton.

(d) As used in this section, the term "free filberts" means merchantable filberts which have been inspected and certified and will be handled.

Dated August 12, 1976, to become effective September 20, 1976.

FLOYD F. HEDLUND,
Director,
Fruit and Vegetable Division.

[FR Doc.76–24149 Filed 8–17–76;8:45 am]

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 76–227]

PART 153—ANTIDUMPING

Tapered Roller Bearings and Certain Components From Japan

Section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), gives the Secretary of the Treasury responsibility for determination of sales at less than fair value. Pursuant to this authority the Secretary of the Treasury has determined that tapered roller bearings, and certain components thereof from Japan are being, or are likely to be, sold at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)). (Published in the FEDERAL REGISTER of September 6, 1974 (39 FR 32337)).

In a clarification of the determination of sales at less than fair value, the Secretary stated that the term "tapered roller bearings" includes inner race or cone assemblies and outer races or cups, either sold as a unit or separately. (Published in the FEDERAL REGISTER of October 29, 1974 (39 FR 38116)).

Section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), gives the United States International Trade Commission responsibility for determination of injury or likelihood of injury. The United States International Trade Commission has determined, and on January 23, 1975, it notified the Secretary of the Treasury that an industry in the United States is likely to be injured by reason of the importation of tapered roller bearings, including inner race or cone assemblies and outer races or cups, exported to and sold in the United States, either as a unit or separately, from Japan sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (Published in the FEDERAL REGISTER of January 29, 1975 (40 F.R. 4366)).

On behalf of the Secretary of the Treasury, I hereby make public these determinations, which constitute a finding of dumping with respect to tapered roller bearings, including inner race or cone assemblies and outer races or cups, exported to and sold in the United States, either as a unit or separately, from Japan. Publications of this finding was delayed pending the completion of certain litigation (*The Timken Co. v. William E. Simon, et al.*, C.A.D.C., No. 75–1127, decided July 9, 1976) which affected the scope of the finding.

§ 153.46 [Amended]

Section 153.46 of the Customs Regulations is amended by adding the following to the list of findings of dumping currently in effect:

Merchandise	Country	T.D.
Tapered roller bearings, including inner race or cone assemblies and outer races or cups, exported to and sold in the United States, either as a unit or separately.	Japan	76–227

(Secs. 201, 407, 32 Stat. 11, as amended, 18; (19 U.S.C. 160, 173).)

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

AUGUST 13, 1976.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF DEFENSE

Department of the Air Force

[32 CFR Part 832]

EMPLOYMENT OF CIVIL AIR PATROL

Function and Organization

The existing part is designated as Subpart A—General Information, of Part 832, Sections 1 through 6. A new Subpart B—Cadet Program, was proposed in 41 FR 23971, June 14, 1976, consisting of Sections 10 through 16. The Department of the Air Force proposes to add a new Subpart C—Function and Organization, consisting of §§ 832.20–832.29.

This new Subpart describes the purposes, activities and organization of Civil Air Patrol (CAP), and sets forth Air Force policy in regard to it.

Interested persons are invited to comment on the proposed rulemaking on or before September 20, 1976. Written data, views, arguments concerning the proposal must be submitted in writing to Headquarters, USAF/REV, Washington, D.C. 20330. Comments and suggestions submitted will be available for public inspection and copying at the above address.

The proposed Subpart will read as follows:

Subpart C—Function and Organization

Sec.

832.20 Background information.
832.21 Purpose of CAP.
832.22 Membership categories.
832.23 Military status.
832.24 Uniform and grade structure of CAP, senior and cadet.
832.25 Organization.
832.26 CAP governing body.
832.27 Air Force liaison function.
832.28 Air Force policy.
832.29 Communications between Air Force commanders and Air Force liaison personnel.

Subpart C—Function and Organization

§ 832.20 Background information.

CAP was formed in December 1941 under the office of Civilian Defense to enlist and train civilian volunteers to aid in the national defense. In May 1943, CAP was transferred to the War Department for the remainder of World War II. CAP civilian volunteers, using light aircraft, flew numerous support and emergency missions throughout the war. In recognition of its wartime contributions and in realization of its future potential, CAP was established as a nonprofit, civilian corporation in 1946 (Pub. L. 79–476: 36 U.S.C. 201, et seq). Two years later it was made an auxiliary of the Air Force (Pub. L. 80–557: 10 U.S.C. 9441).

§ 832.21 Purpose of CAP.

(a) Congress stipulated that the purposes of CAP are:

(1) To provide an organization to encourage and aid American citizens in the contribution of their efforts, services and resources in the development of aviation and in the maintenance of air supremacy, and to encourage and develop by example, the voluntary contribution of private citizens to the public welfare;

(2) To provide aviation education and training especially to its senior and cadet members; to encourage and foster civil aviation in local communities and to provide an organization of private citizens with adequate facilities to assist in meeting local and national emergencies.

(b) To accomplish the purposes for which it was chartered, CAP:

(1) Conducts a continuous nationwide internal and external program of aerospace education, including the coordination of workshops conducted at colleges and universities.

(2) Conducts a comprehensive cadet program, including an International Air Cadet Exchange, special activities, and supervision of encampments at Air Force installations as described in Subpart B of this part.

(3) Maintains an emergency service capability to meet the requests of the Air Force for search and rescue, disaster relief, and other noncombat missions as described in Subpart A of this part.

(4) Conducts a comprehensive Senior Training Program to provide qualified personnel at all levels of CAP.

(5) Assists local, state, and other Federal agencies in emergency operations or activities.

(6) Conducts a flight management program for assigned aircrew members and a maintenance management program for corporate possessed aircraft.

(7) Maintains a nationwide communications capability to support emergency services operations and to conduct official CAP business.

(8) Assists the Air Force recruiting program.

§ 832.22 Membership categories.

CAP members are private citizens who volunteer without compensation, their time, services, and resources to accomplish CAP objectives and purposes. There are several categories of CAP membership; however, the majority of the members fall into one of the following:

(a) Cadets. Boys and girls 13 years of age (or having satisfactorily completed the sixth grade) through 17 years of age who met such prerequisites as the CAP corporation may establish from time to time. Cadet status may be retained until age 21.

(b) Seniors. Adults 18 years of age (there is no maximum age) who meet such prerequisites as the CAP corporation may establish from time to time.

§ 832.23 Military status.

CAP is not a military service. CAP members are not entitled to armed service veterans' benefits. Neither CAP membership nor grade confer upon the individual any of the rights, privileges or prerogatives, or benefits of military personnel, active, reserve or retired.

§ 832.24 Uniform and grade structure of CAP, senior and cadet.

Members wear a uniform and employ a grade structure similar to that of the Air Force; however, distinctive emblems, buttons, insignia and badges are employed to clearly identify the wearer as a member of CAP. Any changes to the currently approved uniforms, badges, insignia, or grade structure, must be approved by HQ USAF/DP before being tested or implemented by CAP.

§ 832.25 Organization.

The organizational structure of CAP is similar to that of the Air Force:

(a) National Headquarters. CAP National Headquarters is located at Maxwell AFB, Alabama.

(b) Regions. The United States is geographically divided into eight CAP regions. The composite boundaries of the eight regions include all of the 52 wings of CAP. Each region is supervised by a regional commander.

(c) Wings. Each of the eight regions is subdivided into wings, one for each of the 50 states, the District of Columbia and the Commonwealth of Puerto Rico. Each wing is supervised by a wing commander.

(d) Groups. If the geographical composition of its area and the number of its members so warrant, each wing may be subdivided into groups.

(e) Squadrons. Each wing, or each group, if a wing is subdivided into groups, is subdivided into squadrons.

(f) Flights. A unit is designated as a flight if the membership is insufficient to constitute a squadron.

§ 832.26 CAP governing body.

(a) National Board. CAP is governed by a National Board. The National Board consists of the National Commander who is the principal corporate officer, the National Vice Commander, Executive Director, National Finance Officer, National Legal Officer, all regional commanders, and all wing commanders. The Board meets annually to set corporate policy. When the Board is not in session, the National Executive Committee determines corporate policy.

(b) National Executive Committee. The National Executive Committee consists of the same members as the National Board, except that the Wing Commanders are not included. The committee meets quarterly, or as directed by the National Commander.

(c) National Commander. The National Commander is elected by the National Board and in addition to serving as Chairman of the National Board and NEC, functions as commander of CAP.

(d) Executive Director. The Executive Director generally administers the day-to-day activities of CAP. The Commander of the Air Force liaison function (CAP-USAF) assigned to CAP, serves as the Executive Director under authority provided in the corporate by-laws.

(1) As the Executive Director, this officer acts in his private capacity and not as an officer of the United States.

(2) In his military capacity, he commands all Air Force personnel assigned to duty with CAP.

§ 832.27 Air Force liaison function.

(a) Air Force personnel are assigned to liaison duty at the national, regional, and state (wing) levels of CAP. The liaison function is assigned under the major command responsibility of Air University.

(1) CAP–USAF. The headquarters of the liaison function is designated CAP–USAF. It is collocated with National Headquarters, CAP on Maxwell AFB, Alabama and the Commander is the senior Air Force officer assigned to liaison duty with CAP.

(2) Liaison Offices. Liaison offices at the region and wing levels are designated USAF–CAP–RLO and USAF–CAP–LO respectively.

(3) The purpose of the liaison function is:

(i) To advise and assist CAP in the fulfillment of its statutory objectives.

(ii) To provide liaison between CAP, the Air Force and other Department of Defense departments or agencies.

§ 832.28 Air Force policy.

(a) Air Force policy regarding CAP is derived from 10 U.S.C. 9441, which defines the status, support and employment of CAP with respect to the Air Force. The objectives and purposes of CAP are essential to the Air Force and the public welfare, and are to receive the maximum support possible, consistent with law and Air Force capability.

(b) Commanders of Air Force organizations and installations should be fully aware of the CAP program and the support that may be made available for the activities of this program. Personnel at all levels of the Air Force should be familiar with the purposes of CAP and its relationship to the Air Force. In this regard, Air Force liaison personnel assigned to duty with CAP should be contacted for information and assistance relative to CAP activities and the support authorized for these activities. To assist liaison personnel, a field grade officer should be designated at each Air Force installation to effect coordination of CAP activities. The name, rank, office symbol and telephone number of the designee will be provided to CAP–USAF/CV, Maxwell AFB, Alabama 36112.

(c) Commanders should establish contact with nearby CAP units as a matter of further communication and understanding of CAP activities as well as providing authorized support and assistance for their program. CAP provides an effective medium for contact with the public. Commanders may coordinate public affairs activities with nearby CAP units and will inform the public about CAP and its relationship to the Air Force.

§ 832.29 Communications between Air Force commanders and Air Force liaison personnel.

Communication between Air Force commanders and liaison personnel is authorized and encouraged on a direct basis, to coordinate matters relating to the function of the CAP.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[43 CFR Part 2800]

RIGHTS-OF-WAY

Principles and Procedures Terms and Conditions

This proposal revises 43 CFR 2801.2–5(f). It is designed to resolve the problem of the assumption of liability for the use of a right-of-way issued to a State or other government agency with statutorily limited indemnification authority. The amendment provides that State or local governments, whose power to assume liability by agreement is limited by law, shall indemnify the United States to the extent they may legally do so.

It is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)) is required.

In accordance with the Department's policy on public participation in rulemaking (36 FR 8336) interested parties may submit written comments, suggestions, or objections with respect to the proposed rules to the Director (210), Bureau of Land Management, Washington, D.C. 20240 until September 18, 1976.

Copies of comments, suggestions, or objections made pursuant to this notice will be available for public inspection in the Office of Legislation and Regulatory Management, Bureau of Land Management, Room 5555, Interior Building, Washington, D.C., during regular business hours (7:45 a.m.—4:15 p.m.).

It is therefore proposed to revise 43 CFR Part 2800 in the manner set forth below.

Paragraph (f) of § 2801.1–5 is revised to read as follows:

§ 2801.1–5 Terms and conditions.

* * * * * *

(f) To pay to the United States the full value for all damages to the lands or other property of the United States caused by him or by his employees, contractors, or employees of the contractors, and to indemnify the United States against any liability for damages to life, person or property arising from the occupancy or use of the lands under the right-of-way; except that where a right-of-way is granted hereunder to a state or other governmental agency whose power to assume liability by agreement is limited by law, such agency shall indemnify the United States as provided above to the extent that it may legally do so.

AUGUST 11, 1976.

JACK O. HORTON,
Assistant Secretary of the Interior.

LIMITATION ON IMPORTS OF MEAT

Regulations With Respect to Meat Processed in Foreign Trade Zones

Correction

In FR Doc. 76–24261 appearing on page 34777 in the issue of Tuesday, August 17, 1976 make the following changes:

1. On page 34778, column 1, the date in the last line of the second complete paragraph should read: "August 17, 1976."

2. Also on page 34778, column 2, the date in the last line of § 16.20 should read: "August 17, 1976."

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing

[24 CFR Part 205]

[Docket No. R–76–413]

MORTGAGE INSURANCE FOR LAND DEVELOPMENT (TITLE X)

Computation of Maximum Mortgage Amount Application and Commitment Procedures

Notice is hereby given that the Department proposes to amend Part 205 of Title 24 of the Code of Federal Regulations (1) to change the loan-to-value ratio used in determining the maximum mortgage which will be available to developers applying for Title X land development mortgage insurance; (2) to change the application and commitment processing procedures for the Title X land development program so that they will more closely parallel the processing procedures in the multifamily mortgage insurance programs; and (3) to change the surety bonding requirements in order to

V 41 161 AUG 18 76 UMI

permit 50 percent performance and 50 percent payment bonds instead of 100 percent bonds which are presently required. The rationale behind the first change is that it is undesirable, from an underwriting standpoint, for the Department's insurance risk to be based on a land value which includes a profit to the developer resulting from an increase in value subsequent to acquisition. For that reason, the proposed regulation limits the land value included in the mortgage amount to the lesser of (1) 80 percent of the Commissioner's estimate of the value of the land before development, or (2) the acquisition cost of the land or the outstanding indebtedness against the land, whichever is greater, provided, that, any indebtedness incurred within two years prior to the date of the application for a Site Appraisal and Market Analysis (SAMA) letter shall not be treated as an indebtedness.

The second change establishes an application fee for issuance of a SAMA letter of $1 per thousand dollars of the requested mortgage amount. The effect and terms of the SAMA letter and conditional commtiment are specified.

Interested persons are invited to participate in this proposed rulemaking by submitting written data, views and suggestions. Communications should identify the subject matter by title and docket number and should be filed with the Rules Docket Clerk, Office of the Secretary Room 10141, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. All relevant material received on or before September 16, 1976, will be considered before adoption of the final rule. Copies of comments received will be available for examination during business hours at the above address.

The Department has determined that an Environmental Impact Statement is not required with respect to this rule. The Finding of Inapplicability, in accordance with HUD's environmental procedures handbook (HUD Handbook 1390.1), is available for inspection at the Office of the Rules Docket Clerk, at the above address.

Accordingly, the Secretary proposes to amend Part 205 of Title 24 of the Code of Federal Regulations to read as follows:

1. Subpart A of the Table of Contents to Part 205 is amended by changing the second centered heading and the section headings thereunder, by adding a new § 205.9 and heading, and by deleting § 205.12 and the heading, as follows:

APPLICATIONS, SAMA LETTER AND COMMITMENTS

205.5 Applications.
205.7 Effect and terms of SAMA Letter.
205.9 Effect and terms of commitments.
• • • • •
205.12 [Deleted].
• • • • •

2. The centered heading, "Preliminary Examination and Application," and § 205.5 are amended to read as follows:

APPLICATIONS, SAMA LETTER AND COMMITMENTS

§ 205.5 Applications.

(a) An application for the issuance of a site appraisal and market analysis (SAMA) letter must be submitted by the project sponsor. An application for a conditional or firm commitment for insurance of a mortgage shall be submitted by the project sponsor and an approved mortgagee. An applicant may initially elect to submit an application to the local HUD office for a SAMA letter, conditional pending upon the completeness of the drawings, specifications and other required exhibits. An applicant also may elect to proceed directly to the firm commitment processing stage after issuance of a SAMA letter.

(b) All applications shall be submitted to the local HUD field office on HUD approved forms. No application shall be considered unless the information, documents and exhibits required in connection with the application form are submitted with it.

3. Section 205.7 is amended to read as follows:

§ 205.7 Effect and term of SAMA letter.

(a) *Effect of SAMA letter.* The issuance of a SAMA letter indicates that HUD has completed the site appraisal and market analysis stage of processing to determine initial acceptability of the site and recognition of a specific market need. The SAMA letter is not a commitment to insure a mortgage for the proposed land development and does not bind HUD to issue either a conditional or a firm commitment to insure. The SAMA letter precedes the later submission of acceptable plans, specifications and other data for the proposed land development and is limited to advising the applicant as to the following determinations of the Commissioner which shall not be changed to the detriment of an applicant if the application for a conditional or firm commitment is received before expiration of the SAMA letter:

(1) The "as-is" value of the land;

(2) The value of typical lots (in the first stage, if a staged land development project) after development;

(3) The acceptability of the type of project proposed; and

(4) The acceptability of any community improvements proposed or required (in the first stage, if a staged land development project);

(5) The completion of an environmental assessment and clearance (including Environmental Impact Statement, if necessary) pursuant to Departmental instructions and regulations.

Where the application is not acceptable as submitted, but can be made acceptable by a change in the size or nature of the development, the SAMA letter may establish an acceptable alternative plan based on such changed land development project.

(b) *Term of SAMA letter.* A SAMA letter shall be effective for whatever term is specified in the letter.

4. A new section numbered 205.9 is added as follows:

§ 205.9 Effect and terms of commitments.

(a) *Effect of conditional commitment.* The issuance of a conditional commitment indicates completion of technical processing involving:

(1) The market for the proposed land development project and the estimated absorption period;

(2) The acquisition cost of the land;

(3) The acreage, number of lots and community improvements;

(4) The estimated development cost of the project and the estimated construction period;

(5) The financial requirements and the mortgage amount;

(6) The financial and credit capacity of the sponsorship; and

(7) The Development Report for the proposed project, which is prepared by the field offices, and which incorporates the construction schedule, the building program, land uses, and all required development improvements that are to be installed in the project.

(b) *Effect of firm commitment.* The issuance of a firm commitment indicates HUD's approval of the application for insurance and sets forth the terms and conditions upon which the mortgage will be insured.

(c) *Rejection of an application.* A significant deviation in an application from the terms or findings arrived at in an earlier stage, as evidenced by the SAMA letter or conditional commitment, shall be grounds for rejection of an application for conditional or firm commitment, respectively. The fees paid to such date shall be considered as having been earned notwithstanding such rejection.

(d) *Types of firm commitment.* The firm commitment may provide for the insurance of advances of mortgage money made during construction or may provide for the insurance of the mortgage after completion of the improvements.

(e) *Terms of commitments.* (1) A conditional commitment shall be effective for whatever term is specified in the text of the commitment.

(2) A firm commitment to insure advances shall be effective for a period of not more than 180 days from the date of issuance.

(3) A firm commitment to insure upon completion shall be effective for a designated term within which the mortgagor is required to begin construction, and, if construction is begun as required, the commitment shall be effective for such additional period, estimated by HUD, as will allow for completion of construction.

(4) The term of either a conditional or firm commitment may be extended in such a manner as HUD may prescribe.

(f) *Reopening of expired commitments.* An expired conditional or firm commitment may be reopened if a request for reopening is received by HUD within 90 days of the expiration of the commitment. The reopening request shall be accompanied by a fee of 50 cents per thousand dollars of the amount of the expired commitment. If the reopening request is not received by HUD within the required 90-day period, a new application, accompanied by the required application and commitment fees must be submitted.

5. Section 205.10 is amended to read as follows:

§ 205.10 Application and commitment fees.

(a) *Application fee—SAMA letter.* An application fee of $1 per thousand dollars of the requested mortgage amount to be insured shall accompany the application for a SAMA letter.

(b) *Application fee—conditional commitment.* An application fee of $1 per thousand dollars of the requested mortgage amount to be insured shall accompany the application for conditional commitment in cases in which the application fee for an unexpired SAMA letter has been collected. A fee of $2 per thousand dollars of the requested mortgage amount to be insured shall accompany the application for conditional commitment in cases in which the SAMA application fee has been paid but the SAMA letter has expired or in cases in which a SAMA application fee has not been paid.

(c) *Application fee—firm commitment.* An application for firm commitment shall be accompanied by an application fee which, when added to prior fees received in connection with applications for the SAMA letter and the conditional commitment, will aggregate $4.50 per thousand dollars of the requested mortgage amount to be insured.

§ 205.12 [Deleted]

6. Section 205.12 is hereby deleted.

7. Section 205.55 is revised to read as follows:

§ 205.55 Maximum mortgage amount—loan-to-value limitation.

A mortgage shall involve a principal obligation not in excess of the lesser of the following:

(a) 90 percent of the Commissioner's estimate of the development cost plus 80 percent of the Commissioner's estimate of the value of the land before development; or

(b) 100 percent of the Commissioner's estimate of the development cost plus the greater of the acquisition cost or outstanding indebtedness against the land; *Provided, however,* That any indebtedness incurred within two years prior to the date of the SAMA application shall not be treated as an indebtedness for the purpose of this section.

8. Section 205.82(a)(1) is revised to read as follows:

§ 205.82 Assurance of completion.

(a) • • •

(1) Performance and payment bonds issued by a surety company satisfactory to the Commissioner on forms approved by the Commissioner. Such bonds shall be in the amount of 50 percent of the cost of improvements as estimated by the Commissioner.

• • • • • •

(Sec. 7(d), Department of Housing and Urban Development Act; (42 U.S.C. 3535 (d)))

NOTE.—It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-1-07.

Issued at Washington, D.C, August 9, 1976.

JAMES L. YOUNG,
Assistant Secretary for Housing.

[FR Doc.76-24161 Filed 8-17-76;8:45 am]

CIVIL AERONAUTICS BOARD

[14 CFR Ch. II]

[SPDR-30A; Docket No. 24636; Dated August 13, 1976]

DISCRIMINATION OF AIRLINE EMPLOYMENT

Notice Terminating Proceeding

By advance notice of proposed rulemaking SPDR-30, dated July 27, 1972,[1] the Board gave notice that it was considering whether it should issue a notice of proposed rulemaking concerning racial, sexual, religious, and ethnic discrimination in airline employment practices. The Board invited comment on the question of whether it had constitutional or statutory responsibility or jurisdiction to adopt rules prohibiting discrimination in airline employment, or to consider air carriers' employment practices as an element of the public interest when passing upon various types of applications. In addition, the Board sought suggestions as to how it should exercise such discretion as it might have to act in these areas.

Comments in response to the Advance Notice were filed by the Air Line Pilots Association, International (ALPA); the Air Transport Association of America, on behalf of certain of its members;[2] American Airlines, Inc.; jointly by the American Civil Liberties Union, Center for Community Change, National Urban League, Inc., and Women's Equity Action League;[3] the American Jewish Congress; the Aviation Consumer Action Project; the Equal Employment Opportunity Commission (EEOC); the Department of Justice; jointly by the Office of Communication of the United Church of Christ, Barbara W. McCall, and the National Organization of Women;[4] the Office of Federal Contract Compliance of the Department of Labor (OFCC); the Mexican-American Legal Defense and Educational Fund; Southern Air Transport, Inc.; the U.S. Civil Rights Commission; the Department of Transportation; and World Airways, Inc.

In general, the carriers and ALPA contended that the Board may not, and in any event should not, adopt regulations with regard to employment discrimination by air carriers.[5] The other comments argued generally that the Board has the authority, and even an affirmative obligation, to take action against discrimination in airline employment, and that it should do so.

Further action in this proceeding was duly deferred pending the final outcome of judicial proceedings which had been instituted by the National Association for the Advancement of Colored People (NAACP) against the Federal Power Commission (FPC) seeking determination of the same legal issue which is here involved, viz., whether a Federal regulatory agency has the authority or duty to adopt rules prohibiting employment discrimination practices of those businesses over which it has economic regulatory jurisdiction. That issue has now been finally resolved by the Supreme Court, in *NAACP* v. *FPC*, U.S. 44 Law Week 4659 (1976), in a decision which seems clearly applicable to this proceeding. Specifically, the Court held that the FPC has no authority to prohibit discriminatory employment practices, since the broad references to the "public interest" in its enabling statute only relate to its mission of promoting orderly development of power sources at reasonable rates, and are "not a directive to the Commission to seek to eradicate discrimination." (44 Law Week 4662). On the other hand, the Court concluded that the FPC could "consider the consequences of employment discrimination in performing its mandated regulatory functions." (44 Law Week 4659, 4660, n. 2.)

Upon consideration of the comments, in light of the Supreme Court's decision in *NAACP* v. *FPC*, supra, the Board has concluded that, for the reasons hereinafter set forth, no regulations should be adopted in this proceeding.

The statutory mandate of the Civil Aeronautics Board, under the Federal Aviation Act of 1958, as amended, can-

[3] The Women's Equity Action League also filed a separate comment.

[4] The Task Force on Women of the United Presbyterian Church in the U.S.A., and the United Church of Christ Task Force on Women in Church and Society, filed documents expressing concurrence in the comments of Office of Communication, et al.

[5] American said that the Board may have the power to regulate air carriers' employment practices, but cautioned that any such regulation should be designed to avoid duplication of the efforts of other agencies.

V41|161
AUG 18 76
UMI

not be significantly distinguished from the FPC's enabling statutes, as discussed and analyzed by the Supreme Court in *NAACP v. FPC*, insofar as it was there held that such legislative authority does not empower a regulatory agency to adopt rules prohibiting its regulatees from engaging in discriminatory employment practices. Consequently, there is no doubt that the Board should not proceed to consider adoption of rules specifically intended to eliminate such practices by its regulatees. Similarly, there is no doubt that our enabling legislation is sufficiently similar to that of the FPC so as to make applicable to the Board the Supreme Court's further holding that costs attributable to a carrier's discriminatory employment practices must be disallowed for ratemaking purposes (44 Law Week 4659, 4661).

However, it should be noted that we do not understand the Supreme Court's decision in *NAACP v. FPC* to preclude the Board from considering, as a relevant factor in appropriate proceedings, the consequence of a carrier's or other applicant's noncompliance with laws that are not within our primary regulatory jurisdiction, including those barring discrimination in employment. Thus, for example, in Order 73-10-2, there was an express finding as to the compliance of South African Airways with Title VII of the Civil Rights Act of 1964, prohibiting discrimination in employment; and we shall continue to regard evidence of unlawful employment discrimination (and other kinds of unlawful conduct) as relevant in such matters as applications for operating authority or approval of mergers,[6] as well as in considering the manner in which an applicant's past violations of such laws reflect on its fitness to properly perform its obligation under the Federal Aviation Act and our rules.[7]

There is narrow language in *NAACP v. FPC* casting some doubt on whether the FPC must, or may, consider a regulatee's discriminatory employment practices for any purpose other than as a factor having direct ratemaking consequences.[8] However, we believe that, in context, the Supreme Court did not intend to express disagreement with the Court of Appeals' broader statement, which it quoted (44 Law Week 4659, 4660), to the effect that: "the Commission does have 'power to take into account, in the performance of its regulatory functions, *including licensing and rate review*, evidence that the regulatee is a demonstrated discriminator in its employment relations.'" (Emphasis added)

In the absence of unambiguous judicial disapproval, we are loath to conclude that the Supreme Court's opinion in *NAACP v. FPC* must be read as compelling the Board to abandon its willingness to receive evidence relevant to weighing the consequences of unlawful employment practices—like any other unlawful conduct violative of major national policies—in appropriate proceedings.

Although, as stated above, discriminatory employment practices of our regulatees are relevant for some Board purposes, there appears to be no need for any new rule to be promulgated at this time with respect to their appropriate consideration, since our existing procedures[9] have not been shown to be inadequate.

In reaching this conclusion, the Board notes that while the Board itself has not been authorized to regulate airline employment, the Federal Government has nevertheless provided ample other means for requiring and monitoring affirmative action equal opportunity programs to eradicate discrimination in airline employment. The carriers are subject to the antidiscrimination provision of Title VII of the Civil Rights Act and are under the civil enforcement cognizance of the Equal Employment Opportunity Commission for their employment practices in regard to discrimination. In addition, they are liable to suit by the Department of Justice to compel compliance with Title VII of the Civil Rights Act where a pattern or practice of discrimination is found. As contractors with the Federal Government, they are also subject to the affirmative action requirements of Executive Order 11246, and their activities in this regard are guided by policies of the Office of Federal Contract Compliance and regularly monitored for compliance specifically by the Federal Aviation Administration.

Accordingly, the Board hereby terminates the rulemaking proceeding in Docket 24636.[10]

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20889]

FM BROADCAST STATIONS IN MARKSVILLE, LA.

Table of Assignments

In the matter of Amendment of § 73.202(b), Table of assignments, FM Broadcast Stations. (Marksville, Louisiana), Docket No. 20889, RM-2683.

1. *Petitioner, Proposal and Comments.*—(a) Notice of proposed rulemaking is hereby issued concerning the amendment of the FM Table of Assignments (§ 73.202(b) of the Commission's rules and regulations) with regard to Marksville, Louisiana.

(b) A petition for rule making was filed by Clifton Mayeux (petitioner) proposing the assignment of Channel 221A to Marksville, Louisiana. No opposition responses to the filing have been received.

2. *Community Data.*—(a) *Location.* Marksville, the seat of Avoyelles Parish, is located approximately 62 miles north of Lafayette, Louisiana.

(b) *Population.* Marksville, 4,519; Avoyelles Parish, 37,751.[1]

(c) *Local Broadcast Service.* Marksville is served by an AM-FM combination—KAPB and KAPB-FM (Channel 249A), Marksville, licensed to Avoyelles Broadcasting Corp.

3. *Economic Data.*—Petitioner describes the Marksville area as the "Shangri-La of the South" which attracts sportsmen and campers from all over the United States. He states that some of the materials produced in the area are pulp, soybeans, cotton, cottonseed oil, potatoes, and many other food products. Petitioner also submitted information with respect to education, recreation, medical and religious facilities, transportation, and public organizations.

4. Preclusion Studies.—Preclusion on commercial channels is limited to Channel 221A. Seven communities (Ville Platte, Oakdale, Glenmora, Mamou; Basile, Bunkie, and Oberlin), with populations greater than 1,000 would be precluded as a result of the proposed assignment of Channel 221A to Marksville. Two of these communities (Ville Platte and Oakdale) each has an AM daytime-only station and a Class A FM station. The remaining five have no local aural broadcast service. A study indicates that Channel 292A is available for assignment to the latter five communities. Channel 292A could not be assigned to Marksville because of separation considerations. Although preclusion would also occur on Channels 218, 219 and 220, Marksville and Avoyelles Parish are sufficiently removed from the service areas of Channel 6 television stations at New Orleans, Louisiana, and Beaumont, Texas, that the assignment of Channel 221A to Marksville would not preclude assignment of FM stations on the lower end of the educational band if need should arise.

5. Petitioner states that, in view of the population of the community and surrounding areas, another Class A station is needed at Marksville. He adds that another FM station would stimulate the economy and better serve the people. Since, under our population criteria, one or two assignments could be assigned to Marksville, we believe consideration of the above proposal in a rulemaking proceeding is warranted.

6. In view of the foregoing, we propose the following revision in the FM Table of Assignments (§ 73.202(b) of the rules) with respect to the city listed below:

City	Channel No.	
	Present	Proposed
Marksville, La.	249A	221A, 249A

7. Authority to institute rulemaking proceedings; showings required; cut-off procedures; and filing requirements are contained below and are incorporated herein.

8. Interested parties may file comments on or before September 20, 1976, and reply comments on or before October 12, 1976.

Adopted: August 6, 1976.

Released: August 12, 1976.

WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, 73.202(b) of the Commission's rules and regulations, as set forth above.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rule making. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420 (d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth above. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Office of the Secretary

AUTOMOBILES FROM BELGIUM

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from Belgium were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 FR 33755).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, as set forth in the proceeding notice, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from Belgium. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secretary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Proceeding Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3490).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20188). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation."

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from Belgium The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to section 153.33(d), Customs Regulations (19 CFR 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of the investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from Belgium were manufactured and exported by General Motors Continental, N.V., Saab Europe, N.V., and Volvo Europe, N.V. Therefore, the investigation was limited to these three manufacturers.

b. *Bases of Comparison.* For purposes of this discontinuance, the proper basis of comparison is between the exporter's sales price and the home market price of such or similar merchandise. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used since the information gathered indicates that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exporter. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports of automobiles from Belgium during the period January 1, 1975, through August 31, 1975, and appropriate home market sales.

c. *Exporter's sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duty, ocean freight, marine insurance, handling costs and freight, as appropriate.

d. *Home market price.* Home market price was calculated on the basis of the price from an independent distributor to related and unrelated dealers for Saab, on the basis of Volvo Europe, N.V. price to unrelated dealers for Volvo, and on the basis of General Motors Corporation price to independent franchised dealers for General Motors Continental. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise and differences in packing, as appropriate.

e. *Results of comparisons.* Information was collected on virtually 100 percent of the automobiles sold to the United States during the period of investigation and has indicated that during the period of investigation sales to the United States were made at prices below those of comparable models sold in the Belgian home market. This investigation is being discontinued due to the receipts of certain specialized commitments from the automobile exporters in Belgium who had sales to the United States at prices lower than comparable Belgian home market prices.

The particular commitments were devised in accordance with the data collected from the Belgian automobile manufacturers and reflect the steps, as appropriate, which have been taken by said manufacturers since the initiation of the investigation to reduce or eliminate the extent to which prices to the United States were lower than Belgian home market prices.

The described procedures are intended to make this discontinuance responsive to certain unique circumstances found to exist in this investigation which must be taken into account. In the system of floating exchange rates and rapid currency fluctuations which existed during the period of investigation, it was recognized that the automobile industry could not constantly change prices to reflect short term variations in currency. Therefore an average of the fluctuating exchange rates over a longer period was utilized to reflect the actual long-term effects on setting prices. This conversion method eliminates margins created by factors beyond the control of the Belgian automobile manufacturers and reflects more realistically, for fair value purposes, the commercial environment in which prices are determined.

A second element concerns the costs of pollution and safety equipment required to be put on automobiles sold in the United States, but not required on automobiles sold in the home market. Since the foreign manufacturers have shorter production runs over which to allocate the costs of such equipment, special consideration has been given to this situation, especially in view of the recessionary nature of the U.S. auto market during the period of the investigation as the result of general economic conditions.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from Belgium is discontinued in accordance with section 201(b)(1)(C), of the Act (19 U.S.C. 160(b)(1)(C)), and § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

This notice is published pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

AUGUST 13, 1976

[FR Doc.76-24197 Filed 8-17-76;8:45 am]

AUTOMOBILES FROM CANADA

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from Canada were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). The information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 FR 33755).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, as set forth in the proceeding notice, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from Canada. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secretary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Proceeding Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3488).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20189). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation."

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from Canada. The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of the investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from Canada were manufactured and sold by American Motors (Canada) Ltd., Chrysler Canada, Ltd., Ford Motors Canada Ltd., General Motors of Canada, Ltd., and Volvo Canada, Ltd.

b. *Basis of comparison.* For purposes of this discontinuance, the proper basis of comparison is between the exporter's sales price and the home market price of such or similar merchandise. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used since the information gathered indicates that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exporter. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports of automobiles from Canada during the period January 1, 1975, through August 31, 1975, and appropriate home market sales.

c. *Exporter's sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duties, ocean freight, wharfage, marine insurance, handling costs, U.S. federal excise tax, and freight, as appropriate. Additions have been made for drawback of Canadian import duties, and Canadian federal sales tax, as applicable.

d. *Home market price.* Home market price was calculated on the basis of the billing price or wholesale price to unrelated dealers, as appropriate. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise and differences in packing, as appropriate.

e. *Results of comparisons.* Information collected in the Customs investigation indicates that sales to the United States were made at prices below those of comparable models sold in the Canadian home market. (The margins of sales at less than fair value for American Motors, however, were minimal.) However, this investigation is being discontinued due to the receipt of certain specialized commitments from the automobile manufacturers and exporters in Canada which had sales to the United States at prices below Canadian home market prices. These commitments reflect the integrated North American automobile industry which has developed under the auspices of the United States—Canadian Automobile Agreement.

V 41 161 AUG 18 76 UMI

The agreement, implemented by Congress in the Automotive Products Trade Act of 1965, fostered the integration of the United States and Canadian automobile industries through various mechanisms, most importantly, the duty-free treatment of automobiles imported from Canada, with similar treatment given to certain United States automotive products imported into Canada. In 1965, due to inefficiencies in the respective industries and the marketing situation prior to the Agreement, price differentials between the United States and Canadian models ranged from 21 percent to 45 percent. Since that time, however, there has been a constant and significant reduction in wholesale price differentials. There is good reason to believe that this trend will continue, and that a discontinuance of this investigation will promote that trend. It is anticipated that the United States and Canadian governments and automobile manufacturers will continue to cooperate in achieving this objective.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from Canada is discontinued in accordance with section 201(b)(1)(C), of the Act (19 U.S.C. 160(b)(1)(C)), and § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

This notice is published pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

AUGUST 13, 1976.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

[FR Doc.76-24198 Filed 8-17-76;8:45 am]

AUTOMOBILES FROM FRANCE

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from France were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 FR 33756).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, as set forth in the proceeding notice, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from France. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secretary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Proceeding Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3488).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20193). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation."

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from France. The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of the investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from France were manufactured and exported by Automobiles Peugeot and Regie Nationale des Usines Renault. Therefore, the investigation was limited to these two manufacturers.

b. *Basis of comparison.* For purposes of this tentative discontinuance, the proper basis of comparison is between the exporter's sales price and the home market price of such or similar merchandise. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used since the information gathered indicates that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exporter. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports of automobiles from France during the period January 1, 1975, through August 31, 1975, and appropriate home market sales.

c. *Exporter's sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duty, ocean freight, marine insurance, handling costs and freight, as appropriate.

d. *Home market price.* Home market price was calculated on the basis of the appropriate price to dealers for Peugeot and Renault. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise and differences in packing, as appropriate.

e. *Results of comparisons.* Information was collected on virtually 100 percent of the automobiles sold to the United States during the period of investigation in the Customs investigation and has indicated that during the period of investigation sales to the United States were made at prices below those of comparable models sold in the French home market. This investigation is being discontinued due to the receipt of certain specialized commitments from the automobile exporters in France who had sales to the United States at prices lower than comparable French home market prices.

The particular commitments were devised in accordance with the data collected from the French automobile manufacturers and reflect the steps, as appropriate, which have been taken by said manufacturers since the initiation of the investigation to reduce or eliminate the extent to which prices to the United States were lower than French home market prices.

The described procedures are intended to make this discontinuance responsive to certain unique circumstances found to exist in this investigation which must be taken into account. In the system of floating exchange rates and rapid currency fluctuations which existed during the period of investigation, it was recognized that the automobile industry could not constantly change prices to reflect short term variations in currency. Therefore an average of the fluctuating exchange rates over a longer period was utilized to reflect the actual long-term effects on setting prices. This conversion method eliminates margins created artifically by factors beyond the control of the French automobile manufacturers and reflects more realistically, for fair value purposes, the commercial environment in which prices are determined.

A second element concerns the costs of pollution and safety equipment required to be put on automobiles sold in the United States, but not required on automobiles sold in the home market. Since the foreign manufacturers have shorter production runs over which to allocate the costs of such equipment, special consideration has been given to this situation, especially in view of the recessionary nature of the U.S. auto market during the period of the investigation as the result of general economic conditions.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from Franch is discontinued in accordance with section 201(b)(1)(C), of the Act (19 U.S.C. 160(b)(1)(C)), and § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

This notice is published pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

AUGUST 13, 1976.

[FR Doc.76-24199 Filed 8-17-76;8:45 am]

AUTOMOBILES FROM ITALY

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from Italy were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 FR 33756).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from Italy. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secertary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Proceeding Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3489).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20192). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation.

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from Italy. The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to § 153.33(d), Customs Regulations (19 C.F.R. 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of the investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from Italy were manufactured and exported by Fiat, S.p.A., and Alfa Romeo, S.p.A. Therefore, the investigation was limited to these two manufacturers.

b. *Basis of comparisons.* For purposes of this discontinuance, the proper basis of comparison is between the exporter's sales price and the home market price of such or similar merchandise. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used since the information gathered indicated that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exporter. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports of automobiles from Italy during the period January 1, 1975, through August 31, 1975, and appropriate home market sales.

c. *Exporter's sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duty, brokerage, ocean freight, marine insurance, handling costs and freight, as appropriate. An addition was made for the rebate of taxes upon export.

d. *Home market price.* Home market price was calculated on the basis of the retail price, with appropriate wholesale discounts, for both manufacturers. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise, in packing, and in level of trade, as appropriate.

e. *Results of comparisons.* Information was collected on more than 80 percent of the automobiles sold to the United States during the period of investigation and has indicated that during the period of investigation sales to the United States were made at prices below those of comparable models sold in the Italian home market. However, this investigation is being discontinued due to the receipt of certain specialized commitments from the automobile exporters in Italy who had sales to the United States at prices lower than comparable Italian home market prices.

The particular commitments were devised in accordance with the data collected from the Italian automobile manufacturers and reflect the steps, as appropriate, which have been taken by said manufacturers since the initiation of the investigation to reduce or eliminate the extent to which prices to the United States were lower than Italian home market prices.

The described procedures are intended to make this discontinuance responsive to certain unique circumstances found to exist in this investigation which must be taken into account. In the system of floating exchange rates and rapid currency fluctuations which existed during the period of investigation, it was recognized that the automobile industry could not constantly change prices to reflect short term variations in currency. Therefore an average of the fluctuating exchange rates over a longer period was utilized to reflect the actual long-term effects on setting prices. This conversion method eliminates margins created by factors beyond the control of the Italian automobile manufacturers and reflects more realistically, for fair value purposes, the commercial environment in which prices are determined.

A second element concerns the costs of pollution and safety equipment required to be put on automobiles sold in the United States, but not required on automobiles sold in the home market. Since the foreign manufacturers have shorter production runs over which to allocate the costs of such equipment, special consideration has been given to

this situation, especially in view of the recessionary nature of the U.S. auto market during the period of the investigation as the result of general economic conditions.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from Italy is discontinued in accordance with section 201(b)(1)(C) of the Act (19 U.S.C. 160(b)(1)(C)), and § 153–33(d), Customs Regulations (19 CFR 153.33(d)).

This notice is published pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

AUGUST 13, 1976.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

[FR Doc.76–24220 Filed 8–17–76;8:45 a.m.]

AUTOMOBILES FROM JAPAN

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from Japan were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq., (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 FR 33756).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, as set forth in the proceeding notice, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, or reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from Japan. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secretary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Proceeding Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3489).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20193). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation."

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from Japan, other than those manufactured and sold by Honda Motor Co., Ltd., Nissan Motor Co., Ltd., and Toyota Motor Co., Ltd. For the reasons stated below, Honda, Nissan, and Toyota are excluded from the investigation and were not required to submit the commitments described hereinafter. The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from Japan were manufactured and exported by Fuji Heavy Industries, Ltd., Honda Motor Co., Ltd., Mitsubishi Motors, Ltd., Nisson Motor Co., Ltd., Toyo Kogyo Co., Ltd., and Toyota Motor Co., Ltd. Therefore the investigation was limited to these six manufacturers.

b. *Bases of comparison.* For purposes of this discontinuance, the proper basis of comparison is between either the purchase price or exporter's sales price as appropriate, and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used where export sales appeared to be made to nonrelated prices in the United States. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used where the information gathered indicated that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exporter. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 C.F.R. 153.31(b)), pricing information was obtained concerning imports of automobiles from Japan during the period January 1, 1975 through August 31, 1975, and appropriate home market sales.

c. *Purchase price.* Purchase price was calculated on the basis of the f.o.b. Japanese port packed price of the exporting firm to unrelated distributors in the United States. Deductions were made for inland freight and insurance, f.o.b. charges, royalty payments, ocean freight, marine insurance, and handling charges, as appropriate. An addition was made for Japanese commodity taxes.

d. *Exporters' sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duty, ocean freight, marine insurance, handling costs and freight, as appropriate. An addition was made for Japanese commodity taxes.

e. *Home market price.* Home market price was calculated on the basis of the adjusted ex-factory prices to related and unrelated dealers, as appropriate. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise and differences in packing, as appropriate.

f. *Results of comparison.* Information was collected on virtually 100 percent of the automobiles sold to the United States during the period of investigation and has indicated that during the period of investigation some sales to the United States were made at prices below those of comparable models sold in the Japanese home market. Less than fair value margins for Fuji and Mitsubishi were determined to be minimal during the period of investigation. This investigation is being discontinued as to Fuji, Mitsubishi and Toyo Kogyo due to the receipt of certain specialized commitments from the three automobile exporters in Japan who had sales to the United States at prices lower than comparable home market prices.

The particular commitments were devised in accordance with the data collected from the Japanese automobile manufacturers and reflect the steps, as appropriate, which have been taken by said manufacturers since the initiation of the investigation to eliminate the extent to which prices to the United States were lower than Japanese home market prices.

The discontinuance, as to Toyo Kogyo, has been determined to be the appropriate procedure because of the unique circumstances found to exist in the auto industry during the period of investigation. In particular, extensive end of model year discounts, necessitated by extremely depressed conditions in the industry were given consideration as the Secretary deemed appropriate.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from Japan is discontinued in accordance with section 201(b)(1)(C) of the Act (19 U.S.C. 160(b)(1)(C)), and § 153.33(d), Customs Regulations (19 C.F.R. 153.33(d)).

Insofar as automobiles manufactured and sold by Honda Motor Co., Ltd., Nissan Motor Co., Ltd., and Toyota Motor Co., Ltd., are concerned, virtually all export sales to the United States by these three companies during the representative period were examined and, but for an insignificant number of sales with de minimus margins, no sales at less than fair value were found on sales to the United States by Honda, Nissan, and Toyota. Accordingly, these three companies were not requested to submit commitments, nor will imports from these companies be subject to monitoring by the Treasury Department.

This notice is published pursuant to § 153.33(d), Customs Regulations (19 C.F.R. 153.33(d)).

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

AUGUST 13, 1976.

[FR Doc.76–24200 Filed 8–17–76;8:45 am]

AUTOMOBILES FROM SWEDEN

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from Sweden were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 FR 33757).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, as set forth in the proceeding notice, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from Sweden. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secretary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Procedure Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3490).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20194). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation."

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from Sweden. The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to § 253.33(d), Customs Regulations (19 CFR 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of the investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from Sweden were manufactured and exported by Saab Scania, A.B., and A.B. Volvo. Therefore, the investigation was limited to these two manufacturers.

b. *Basis of comparison.* For purposes of this discontinuance, the proper basis of comparison is between the exporter's sales price and the home market price of such or similar merchandise. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used since the information gathered indicates that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exporter. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports of automobiles from Sweden during the period January 1, 1975, through August 31, 1975, and appropriate home market sales.

c. *Exporter's sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duty, ocean freight, marine insurance, handling costs and freight, as appropriate.

d. *Home market price.* Home market price was calculated on the basis of the price from a wholly owned distributor to related and unrelated dealers for Saab and on the basis of Volvo prices to unrelated dealers for Volvo. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise and differences in packing, as appropriate.

e. *Results of comparisons.* Information was collected on virtually 100 percent of the automobiles sold to the United States during the period of investigation and has indicated that during the period of investigation sales to the United States were made at prices below those of comparable models sold in the Swedish home market. This investigation is being discontinued due to the receipt of certain specialized commitments from the automobile exporters in Sweden who had sales to the United States at prices lower than comparable Swedish home market prices.

The particular commitments were devised in accordance with the data collected from the Swedish automobile manufacturers and reflect the steps, as appropriate, which have been taken by said manufacturers since the initiation of the investigation to reduce or eliminate the extent to which prices to the United States were lower than Swedish home market prices.

The described procedures are intended to make this discontinuance responsive to certain unique circumstances found to exist in this investigation which must be taken into account. In the system of floating exchange rates and rapid currency fluctuations which existed during the period of investigation, it was recognized that the automobile industry could not constantly change prices to reflect short term variations in currency. Therefore an average of the fluctuating exchange rates over a longer period was utilized to reflect the actual long-term effects on setting prices. This conversion method eliminates margins created by factors beyond the control of the Swedish automobile manufacturers and reflects more realistically, for fair value purposes, the commercial environment in which prices are determined.

A second element concerns the costs of pollution and safety equipment required to be put on automobiles sold in

V 41 161
AUG 18 76
UMI

the United States, but not required on automobiles sold in the home market. Since the foreign manufacturers have shorter production runs over which to allocate the costs of such equipment, special consideration has been given to this situation, especially in view of the recessionary nature of the U.S. auto market during the period of the investigation as the result of general economic conditions.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from Sweden is discontinued in accordance with section 201(b)(1)(C), of the Act (19 U.S.C. 160(b)(1)(C)), and § 153.33(d), Customs Regulations (19 C.F.R. 153.33(d)).

This notice is published pursuant to § 153.33(d), Customs Regulations (19 C.F.R. 153.33(d)).

DAVID R. MACDONALD,
Assistant Secretary of the Treasury,

AUGUST 13, 1976.

[FR Doc.76-24201 Filed 8-17-76;8:45 am]

AUTOMOBILES FROM THE UNITED KINGDOM

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from the United Kingdom were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 F.R. 33757-58).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, as set forth in the proceeding notice, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from the United Kingdom. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secretary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Proceeding Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3488).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20195). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation."

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from the United Kingdom, other than those manufactured and sold by Rolls Royce Motors, Limited. For the reasons stated below Rolls Royce is excluded from the investigation and was not required to submit the commitments described hereinafter. The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to §153.33(d), Customs Regulations (19 CFR 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of the investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from the United Kingdom were manufactured and exported either by British Leyland, Limited, and its subsidiaries, or by Rolls Royce Motors, Limited, and its subsidiaries. Therefore, the investigation was limited to these two manufacturers.

b. *Basis of comparison.* For purposes of this tentative discontinuance, the proper basis of comparison is between the exporter's sales price and the home market price of such or similar merchandise. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used since the information gathered indicates that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exporter. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports of automobiles from the United Kingdom during the period January 1, 1975, through August 31, 1975, and appropriate home market sales.

c. *Exporter's sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duty, federal excise tax, brokerage, ocean freight, insurance, handling costs and freight, as appropriate. Addition was made for U.K. duty remission, as appropriate.

d. *Home market price.* Home market price was calculated on the basis of the price from British Leyland, Limited, to both unrelated and independent distributors and on the basis of Rolls Royce, Limited, price to unrelated dealers for Rolls Royce. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise and differences in packing, as appropriate.

e. *Results of comparisons.* Information was collected on virtually 100 percent of the automobiles sold to the United States during the period of investigation and has indicated that during the period of investigation sales to the United States by British Leyland were made at prices below those of comparable models sold in the United Kingdom home market. However, this investigation is being discontinued due to the receipt of certain specialized commitments from British Leyland.

The particular commitment was devised in accordance with the data collected from British Leyland, Ltd., and reflects the steps, as appropriate, which have been taken by said manufacturer since the initiation of the investigation to eliminate the extent to which prices to the United States were lower than United Kingdom home market prices.

The described procedures are intended to make this discontinuance responsive to certain unique circumstances found to exist in this investigation which must be taken into account. In the system of floating exchange rates and rapid currency fluctuations which existed during the period of investigation, it was recognized that the automobile industry could not constantly change prices to reflect short term variations in currency. Therefore an average of the fluctuating exchange rates over a longer period was utilized to reflect the actual long-term effects on setting prices. This conversion method eliminates margins created artificially by factors beyond the control of the United Kingdom automobile manufacturers and reflects more realistically, for fair value purposes, the commercial environment in which prices are determined.

A second element concerns the costs of pollution and safety equipment required to be put on automobiles sold in the United States, but not required on autobiles sold in the home market. Since the foreign manufacturers have shorter production runs over which to allocate the costs of such equipment, special consideration has been given to this situation, especially in view of the recessionary nature of the U.S. auto market during the period of the investigation as the result of general economic considerations.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from the United Kingdom is discontinued in accordance with 201(b)(1)(C) of the Act (19 U.S.C. 160(b)(1)(C)), and § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

Insofar as automobiles manufactured and sold by Rolls Royce Motors, Limited, are concerned, all export sales to the United States by this company during the representative period were examined and no sales at less than fair value were found on sales to the United States by Rolls Royce. Accordingly, this company was not requested to submit commitments, nor will imports from Rolls Royce be subject to monitoring by the Treasury Department.

This notice is published pursuant to 153.33(d), Customs Regulations (19 CFR 153.33(d)).

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

AUGUST 13, 1976.

[FR Doc.76-24203 Filed 8-17-76;8:45 a.m.]

AUTOMOBILES FROM WEST GERMANY

Discontinuance of Antidumping Investigation

On July 8, 1975, information was received in proper form alleging that automobiles from West Germany were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of August 11, 1975 (40 F.R. 33758).

The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. However, the evidence on record, as set forth in the proceeding notice, was such that the Secretary of the Treasury concluded that substantial doubt existed as to whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Accordingly, the United States International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)).

On September 8, 1975, the United States International Trade Commission notified the Secretary of the Treasury that, on the basis of its inquiry it did not determine that there was no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automobiles from West Germany. Accordingly, the Customs investigation in this proceeding was not terminated.

During the course of the investigation, the Secretary determined that a tentative determination could not reasonably be made within the normal 6-month investigatory period. Accordingly, the investigatory period in this case was extended to no more than 9 months from the date of publication of the "Antidumping Proceeding Notice" and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of January 23, 1976 (41 FR 3489).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of May 17, 1976 (41 FR 20196). The tentative discontinuance was made in accordance with the provisions of § 153.33(a)(3), Customs Regulations (19 CFR 153.33(a)(3)), which provide that a discontinuance may be published "whenever the Secretary concludes that there are other circumstances on the basis of which it may no longer be appropriate to continue an antidumping investigation."

FINAL DISCONTINUANCE

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby announce a discontinuance of the antidumping investigation concerning automobiles from West Germany, other than those manufactured by Porsche, A.G. For the reasons stated below, Porsche is excluded from the investigation and was not required to submit the commitments described hereinafter. The special considerations set forth below reflect the unique circumstances found to exist in the automobile industry, during the investigative period, and are indicative of why it has been determined that the usual procedures would be modified in this investigation. In accordance with these special considerations, this "Notice of Discontinuance of Antidumping Investigation" is issued pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

STATEMENT OF CONDITIONS ON WHICH THIS DISCONTINUANCE IS BASED

The conditions and bases for the above discontinuance are as follows:

a. *Scope of the investigation.* The Customs investigation indicates that virtually all imports of the subject merchandise from West Germany were manufactured and exported by Audi NSU Autounion A.G., Bayerische Motoren Werke, A.G., Daimler Benz, A.G., Ford-Werke, A.G., Porsche, A.G., and Volkswagen Werk, A.G. Therefore, the investigation was limited to these six manufacturers.

b. *Basis of comparison.* For purposes of this discontinuance, the proper basis of comparison is between either the purchase price or exporter's sales price, as appropriate, and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used where export sales appeared to be made to non-related parties in the United States. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used where the information gathered indicated that all of the subject merchandise was sold or agreed to be sold in the United States before or after the time of importation, by or for the account of the exported. Home market price, as defined in § 153.2, Customs Regulations (19 C.F.R. 153.2), was used since such or similar merchandise is sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

In accordance with § 153.31(b), Customs Regulations (19 C.F.R. 153.31(b)), pricing information was obtained concerning imports of automobiles from West Germany during the period January 1, 1975, through August 31, 1975, and appropriate home market sales.

c. *Purchase price.* Purchase price was calculated on the basis of the ex-factory price, or the price from the unrelated purchaser in West Germany, as appropriate, to an unrelated importer in the United States. Adjustments were made for differences in merchandise, and inland freight, as appropriate.

d. *Exporter's sales price.* Exporter's sales price was calculated on the basis of the resale price of the related firm to unrelated purchasers in the United States. Deductions were made for selling expenses, United States duty, ocean freight, marine insurance, handling costs and freight, as appropriate.

e. *Home market price.* Home market price was calculated on the basis of the adjusted home market price to related and unrelated dealers, or retail purchasers, as appropriate. Adjustments were made for credit terms, advertising, discounts, rebates, warranty, selling expenses, inland freight, differences in merchandise and differences in packing, as appropriate.

f. *Results of comparisons.* Information was collected on virtually 100 percent of the automobiles sold to the United States during the period of investigation in the Customs investigation and has indicated that during the period of investigation some sales to the United States were made at prices below those of comparable models sold in the West German home market. This investigation is being discontinued due to the receipt of certain specialized commitments from the automobile exporters in West Germany who had sales to the United States at prices lower than comparable West German home market prices.

The particular commitments were revised in accordance with the data collected from the West German automobile manufacturers and reflect the steps, as appropriate, which have been taken by

V 41 161 AUG 18 76 UMI

said manufacturers since the initiation of the investigation to reduce or eliminate the extent to which prices to the United States were lower than West German home market prices.

The described procedures are intended to make this discontinuance responsive to certain unique circumstances found to exist in this investigation which must be taken into account. In the system of floating exchange rates and rapid currency fluctuations which existed during the period of investigation, it was recognized that the automobile industry could not constantly change prices to reflect short term variations in currency. Therefore an average of the fluctuating exchange rates over a longer period was utilized to reflect the actual long-term effects on setting prices. This conversion method eliminates margins created by factors beyond the control of the West German automobile manufacturers and reflects more realistically, for fair value purposes, the commercial environment in which prices are determined.

A second element concerns the costs of pollution and safety equipment required to be put on automobiles sold in the United States, but not required on automobiles sold in the home market. Since the foreign manufacturers have shorter production runs over which to allocate the costs of such equipment, special consideration has been given to this situation, especially in view of the recessionary nature of the U.S. automarket during the period of the investigation as the result of general economic conditions.

After consideration of all views and arguments and for the reasons stated above, the antidumping investigation of automobiles from West Germany is discontinued in accordance with section 201(b)(1)(C) of the Act (19 U.S.C. 160(b)(1)(C)), and § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

Insofar as automobiles manufactured and sold by Porsche are concerned, no sales at less than fair value were found on sales to the United States by Porsche. Accordingly, this company was not requested to submit commitments, nor will imports from this company be subject to monitoring by the Treasury Department.

This notice is published pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

AUGUST 13, 1976.

[FR Doc.76-24202 Filed 8-17-76;8:45 am]

INDUSTRIAL VEHICLE TIRES FROM CANADA

Antidumping; Determination of Sales at Not Less Than Fair Value

Information was received on November 13, 1975, from counsel acting on behalf of the Bearcat Tire Company of Chicago, Illinois, alleging that industrial vehicle tires from Canada were being sold in the United States at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act").

On the basis of this information and subsequent investigation by the Custom Service, a "Notice of Tentative Negative Determination" was published in the FEDERAL REGISTER of May 27, 1976 (41 F.R. 21654).

A statement of reasons was published in the above-mentioned notice, and interested persons were afforded an opportunity to make written submissions and present oral views.

For purposes of this notice, the term "industrial vehicle tires" means press-on, solid, rubber tires, cured or bonded to steel base bands, used on off-the-highway work vehicles, whether or not self-propelled.

DETERMINATION OF SALES AT NOT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, industrial vehicle tires from Canada are not being, nor are likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS OF WHICH THIS DETERMINATION IS BASED

The reasons and bases for the above determination are as follows:

a. *Scope of the investigation.* It appears that all, or virtually all, imports of the subject merchandise from Canada were manufactured by Industrial Tires, Limited, of Mississauga, Ontario. Therefore, the investigation was limited to this manufacturer.

b. *Basis of comparison.* For the purpose of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between the purchase price and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales during the period of investigation were made to unrelated purchasers in the United States. Home market price as defined in § 153.2 of the Customs Regulations (19 CFR 153.2) was used since such or similar merchandise was sold in the home market in sufficient quantities to provide a basis of comparison for fair value purposes.

c. *Purchase price.* For the purpose of this final determination of sales at not less than fair value, adjustments have been made on the following bases. In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports of industrial vehicle tires from Canada during the period July 1 through December 31, 1975.

In the import transactions, all of the merchandise was purchased, prior to the time of exportation, by the person by whom or for whose account it was imported, within the meaning of section 203 of the Act. Purchase price has been calculated on the basis of the f.o.b. delivered, packed price to a private brand account purchaser in the United States, with deductions for U.S. Customs duty, brokerage and transportation expenses. An addition has been made for remission of Canadian import duties, as appropriate.

d. *Home market price.* For purposes of this final determination of sales at not less than fair value, adjustments have been made on the following bases. The home market price was calculated on the basis of the weighted average, f.o.b. factory, packed price to original equipment manufacturers. Adjustments were made for warranty expenses, differences in packing expenses, and differences in merchandise, as appropriate. Differences in costs of the merchandise were in relation to rubber components, base bands, tooling assists, and the process of manufacture.

Counsel for petitioner has claimed that allowance for differences in the costs of rubber components, base bands and the process of manufacture are in error. Documentation having been received to adequately support the existence and amount of such differences in merchandise, adjustment therefor has been made.

Counsel for petitioner has claimed that sales to Canadian dealers should be the basis for home market price. Contract sales terms and quantities involved in sales to home market original equipment manufacturers were essentially identical to those involved in sales to a private brand account purchaser in the United States. The terms and quantities involved in sales to Canadian dealers were not found to be comparable to those involved in above-mentioned sales to the United States. It has thus been determined that home market original equipment manufacturers constitute the appropriate level of trade for comparison purposes.

e. *Results of fair value comparisons.* Using the above criteria, purchase price was found to be not less than the home market price of such or similar merchandise on all comparisons made. Comparisons were made on approximately 75 percent of all industrial vehicle tires sold to the United States during the period of investigation.

This determination and statement of reasons therefor are published to § 153.34(c) of the Customs Regulations (19 C.F.R. 153.34(c)).

PETER O. SUCHMAN,
Acting Assistant Secretary of the Treasury.

Office of the Secretary

EXECUTIVE COMMITTEE OF THE DEFENSE ADVISORY COMMITTEE ON WOMEN IN THE SERVICES

Meeting; Change of Date

The notification of meeting was published in FEDERAL REGISTER, Volume 41, No. 146, Wednesday, July 28, 1976, page 31409. Pursuant to Public Law 92-463, notice is hereby given that the date for the Executive Comimttee of the Defense Advisory Committee on Women in the Service (DACOWITS) has been changed from August 22, 23, 1976 to September 10, 11, 1976. The meeting will be held at the Pentagon on September 10, 1976 from 8:30 a.m. to 4:00 p.m. and if necessary continued on Saturday, September 11, 1976 at the Hotel Washington, 15th and Pennsylvania Ave from 8:30 a.m. to 10:00 a.m. The session will be open to the public.

The purpose of this meeting is to plan the program for the semi-annual meeting of the full Committee and for the 25th Anniversary celebration of the Committee on November 14-18, 1976. Composed of 25 civilian women, DACOWITS provides the Department of Defense with assistance and advice on matters relating to women in the Armed Forces.

Interested persons desiring to make oral presentations, submit written statements for consideration, attend the meeting or receive additional information must contact Lucille B. Dion, Consultant to DACOWITS Secretariat, OASD (Manpower and Reserve Affairs), Room 2B257, The Pentagon, Washington, D.C. 20301, telephone (202) 695-5153 no later than September 1, 1976.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

COLORADO 24128

Pipeline Application Northwest Pipeline Corporation

AUGUST 11, 1976.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Northwest Pipeline Corporation, P.O. Box 1526, Salt Lake City, Utah 84110, has applied for a right-of-way C-24128 for a 6⅝-inch pipeline and a 4½-inch pipeline in the following location in Rio Blanco County, Colorado:

T. 2 S., R. 101 W., 6th P.M.S
Sec. 4: SW¼SE¼, SE¼SE¼S
Sec. 3: SW¼SW¼, SE¼SW¼, SW¼SE¼, NW¼SE¼, SE¼NE¼, NW¼SW¼, NE¼SE¼S
Sec. 2: SW¼NW¼S

The facilities will be an addition to the applicant's existing gathering systems.

The purposes of this notice are: to inform the public that the Bureau of Land Management will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved and, if so, under what terms and conditions; to allow interested parties to comment on the application, and to allow any persons asserting a claim to the lands or having bona fide objections to the proposed natural gas gathering pipeline right-of-way to file their objections in this office. Any person asserting a claim to the lands or having bona fide objections must include evidence that a copy thereof has been served on the applicant.

Any comment, claim, or objections must be filed with the Chief, Branch of Land Operations, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202, as promptly as possible after publication of this notice.

ALAN D. CAMPBELL,
Acting Chief, Branch of Land Operations.

AUGUST 11, 1976.

[OR 11517]

OREGON

Proposed Withdrawal and Reservation of Lands

The Bureau of Sport Fisheries and Wildlife, U.S. Department of the Interior, has filed application, OR 11517, for withdrawal of the lands described below, from all forms of appropriation under the mining laws (30 U.S.C., Ch. 2) but not from leasing under the mineral leasing laws, subject to valid existing rights.

The applicant desires the land as an addition to the Oregon Islands National Wildlife Refuge.

All persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing no later than September 16, 1976, to the undersigned officer of the Bureau of Land Management, Department of the Interior (729 N.E. Oregon Street), P.O. Box 2965, Portland, Oregon 97208.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. He will also undertake negotiations with the ap-

V 41 161 AUG 18 76 UMI

plicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, to eliminate lands needed for purposes more essential than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

He will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the applicant agency.

The determination by the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in the application are islands, rocks, and reefs above the line of mean high tide off the Oregon Coast as shown on maps labeled "Exhibit B" submitted by the Bureau of Sport Fisheries and Wildlife with the withdrawal application and on file in this office. The maps are based upon U.S.G.S. 15-minute series topographical maps. The islands are unsurveyed and are described as follows:

WILLAMETTE MERIDIAN, OREGON

(Legal descriptions appearing in parentheses indicate unsurveyed lands and are tentative. The numbers appearing to the left of the names are for identification purposes only.)

Number	Name	Acres	Description
1	Unnamed rocks	5	(T. 5 N., R. 11 W., Sec. 12) 45°56'07" to 45°56'20" N., 123°59'11" to 123°59'28" W.
2	The Needles	3	(T. 5 N., R. 10 W., Sec. 30) 45°52'56" N., 123°58'06" W.
3	Unnamed rock (off Silver Point, north of Jockey Cap).	1	(T. 4 N., R. 11 W., Sec. 1) 45°51'27" N., 123°57'52" W.

Fish and Wildlife Service

ENDANGERED SPECIES PERMITS

Official Action

Notice is hereby given that the U.S. Fish and Wildlife Service has taken the following action with regard to permit applications received under section 10 of the Endangered Species Act of 1973, 16 U.S.C. 1539. Each permit was issued only after it was determined that it was applied for in good faith; that by granting the permit it will not be to the disadvantage of the endangered species; and that it will be consistent with the purposes and policy set forth in the Endangered Species Act of 1973.

Notice of Application Published in FEDERAL REGISTER March 8, 1976 (41 FR 9899–9900).

Applicant: Bombay Hook National Wildlife Refuge, R.D. 1, Box 147, Smyrna, Delaware 19977. Donald R. Perkuchin, Refuge Manager.

Official Action: Issued permit July 2, 1976: "Authorized to collect abandoned Southern Bald Eagle (*Haliaeetus leucocephalus*) Eggs, as specified in Block 10 (at Bombay Hook National Wildlife Refuge), for the purpose of scientific research."

Notice of Application Published in FEDERAL REGISTER May 13, 1976 (41 FR 19663).

Applicant: Walter B. Sturgeon, Jr., R.F.D. #1, James Farm, Durham, New Hampshire 03824.

Official Action: Issued permit July 2, 1976: Authorized to receive interstate, in the course of a commercial activity, one (1) male, and one (1) female Nene—Hawaiian Goose (*Branta sandvicensis*), as specified in Block 10 (from Long Island, New York, to Durham, New Hampshire), for the purpose of propagation, from Mr. Winston Guest, Oyster Bay, Long Island, New York.

Notice of Application Published in FEDERAL REGISTER March 16, 1976 (41 FR 11043–44).

Applicant: Mr. Lee A. Hedge, Route 1, Compton, Illinois 61318.

Official Action: Issued permit July 2, 1976: Authorized to receive interstate, in the course of a commercial activity, as specified in Block 10 (from Wisconsin to Illinois), the following numbers and species of endangered pheasants, from the following sources:

Mr. Elmer Heft, Green Lake, Wisconsin:
- 1.2 Brown-Eared Pheasants (*Crossoptilon mantchuricum*).
- 1.2 Edward's Pheasants (*Lophura edwardsi*).
- 1.2 Swinhoe's Pheasants (*Lophura swinhoii*).
- 1.2 Bar-Tailed Pheasants (*Syrmaticus humiae*).

and—Mr. Poppel, Wenega, Wisconsin:
- 1.2 Mikado Pheasants (*Syrmaticus mikado*).

Notice of Application Published in FEDERAL REGISTER April 12, 1976 (41 FR 15353).

Applicant: St. Louis Zoological Park, Forest Park, St. Louis, Mo. 63110. Richard D. Schultz, Director.

Official Action: Issued permit July 6, 1976: Authorized to import, as specified in Block 10 (from France—to St. Louis, through a port of entry specified in 50 CFR 14.12),

three (3) male, and three (3) female Mayottensis LEMURS (*Lemur fulvus*), for the purposes of scientific research and propagation.

Notice of Application Published in FEDERAL REGISTER April 30, 1976 (41 FR 18113).

Applicant: Nick and Gerda Ramstetter, 3216 East Road (Route 1), Clifton, Colo. 81520.

Official Action: Issued July 14, 1976: "Authorized to receive interstate, in the course of a commercial activity, as specified in Block 10 (Texas to Colorado), the following numbers and species of endangered pheasants from the following source, for the purpose of propagation,

- 1.1 Brown-Eared Pheasants (*Crossoptilon mantchuricum*).
- 1.1 Edward's Pheasants (*Lophura edwardsi*).
- 1.1 Mikado Pheasants (*Symaticus mikado*).

From—Bob Riley, Windy Hills Bird Farm, Route 4, Box 160, Robstown, Tex. 78380."

Notice of Application Published in FEDERAL REGISTER June 2, 1976 (41 FR 22284).

Applicant: Environmental Management Office, Directorate of Facilities Engineering, Fort Benning, Georgia 31905. Gary W. Robinson.

Official Action: Issued permit July 16, 1976: Authorized to conduct activities as specified in Block 10 (at Fort Benning, Georgia), with Red-Cockaded Woodpeckers (*Dendrocopus borealis*), for the purpose of scientific research.

Notice of Application Published in FEDERAL REGISTER May 19, 1976 (41 FR 20598).

Applicant: Division of Life Sciences, University of Alaska, Fairbanks, Alaska 99701. Alan M. Springer.

Official Action: Issued permit July 16, 1976: Authorized to conduct activities, as specified in Block 10 (at Porcupine and lower Yukon Rivers, Alaska), with Peregrine Falcons (*Falco peregrinus anatum*), for the purpose of scientific research.

Notice of Application Published in FEDERAL REGISTER May 13, 1976 (41 FR 19680–81).

Applicant: Colonel Charles K. Darling, 141 Fox Run, San Antonio, Texas 78233.

Official Action: Issued permit July 19, 1976: "Authorized to receive interstate, in the course of a commercial activity, two (2) male, and two (2) female Palawan Peacock Pheasants (*Polyplectron emphanum*), as specified in Block 10 (from New York to Texas), for the purpose of propagation, from the following source, Joseph Kulina, Carmel, New York."

Notice of Application Published in FEDERAL REGISTER May 10, 1976 (41 FR 19143).

Applicant: Wildlife Ecology Laboratory, School of Forest Resources and Conservation, University of Florida, Gainesville, Fla. 32611. Dr. David H. Hirth.

Official Action: Issued permit July 20, 1976: Authorized to conduct activities with Southern Bald Eagles (*Haliaeetus leucocephalus leucocephalus*), as specified in Block 10 (Lake Marion, Putnam and Alachua Counties of Florida), for the purpose of scientific research.

Notice of Application published in FEDERAL REGISTER April 30, 1976 (41 FR 18111).

Applicant: International Crane Foundation, City View Road, Baraboo, Wisconsin 53913. Ronald T. Sauey, President.

Official Action: Issued permit July 20, 1976: "Authorized to import, as specified in Block 10 (from the Soviet Union to Baraboo, Wisconsin, through a Customs port of entry, as specified in 50 CFR 14.12), not to exceed eight (8) Japanese Crane eggs (*Grus japonensis*),—and not to exceed eight (8) Siberian Crane eggs (*Grus leucogeranus*), for the purpose of propagation."

Notice of Application Published in FEDERAL REGISTER March 26, 1976 (41 FR 12723–24–25).

Applicant: Northwest Fisheries Research, Inc., 3361 G Road, Clifton, Colo. 81520. Mr. George T. Kidd.

Official Action: Issued permit July 20, 1976: Authorized to conduct activities with Colorado River Squawfish (*Ptychochelius lucius*), and Humpback Chub (*Gila cypha*), as specified in Block 10 (Upper Colorado Basin), for the purpose of scientific research.

Notice of Application Published in FEDERAL REGISTER May 20, 1976 (41 FR 20723–24).

Applicant: San Antonio Zoological Gardens, 3903 North St. Mary's Street, San Antonio, Tex. 78212. Louis R. DiSabato, Director.

Official Action: Issued permit July 22, 1976: "Authorized to import, as specified in Block 10 (from Sao Paula, Brazil, to San Antonio, Texas, through a U.S. Customs port of entry, as specified in 50 CFR 14.12), one (1) male Maned Wolf (*Chrysocyon brachyurus*), for the purpose of propagation."

Notice of Application Published in FEDERAL REGISTER May 27, 1976 (41 FR 21657).

Applicant: College of Physicians and Surgeons, Ophthalmology Research, Columbia University, New York, N.Y. 10032. Dr. Joseph C. Besharse.

Official Action: Issued permit July 22, 1976: "Authorized to receive interstate as specified in Block 10 (from Texas to New York), two (2) Texas Blind Salamanders (*Typhlomolge rathbuni*), from the following endangered species permit holder, for the purpose of scientific research, Glenn Longley, Southeast Texas State University, San Marcos, Texas."

Notice of Application Published in FEDERAL REGISTER April 30, 1976 (41 FR 18113).

Applicant: Steven R. Lorenz, 2710 Stevens Street, La Crescenta, California 91214.

Official Action: Issued permit July 26, 1976, "Authorized to import, as specified in Block 10 (from Holland to La Crescenta, California, through a U.S. Customs Port of Entry, as specified in 50 CFR 14.12), one male/one female Brown-Eared Pheasant (*Crossoptilon mantchuricum*), for the purpose of propagation."

Notice of Receipt of Request for Amendment Published in FEDERAL REGISTER, April 15, 1976 (41 FR 15879).

Applicant: Director, Texas Parks and Wildlife Department, John H. Reagan Building, Austin, Tex. 78701. Clayton T. Garrison, Executive Director.

Official Action: Issued permit July 17, 1975. The permit and Amendments Nos. 1 and 2 are superseded by Amendment No. 3—issued July 16, 1976, as follows:

Authorized to conduct activities in the State of Texas for purposes of scientific research (and/or banding) and enhancement of survival of the affected species:

- Peregrine Falcon (*Falco peregrinus anatum*)—and (*Falco peregrinus tundrius*).
- Red-Cockaded Woodpecker (*Dendrocopos borealis*).
- Southern Bald Eagle (*Haliaeetus leucocephalus leucocephalus*).
- Black-Footed Ferret (*Mustela nigripes*).
- American Alligator (*Alligator mississippiensis*).
- Houston Toad (*Bufo houstonensis*).
- Red Wolf (*Canis rufus*).
- Attwater's Prairie Chicken—and eggs (*Tympanuchus cupido attwateri*).
- Pecos Gambusia (*Gambusia nobolis*).

NOTICE OF RECEIPT OF REQUEST FOR AMENDMENT PUBLISHED IN FEDERAL REGISTER JUNE 18, 1976 (41 FR 24739).

Applicant: Mississippi Game and Fish Commission, Post Office Box 451, Jackson,

V 41 161 AUG 18 76 UMI

Mississippi 39205. Mr. **Avery Wood, Director of** Conservation.

Official Action: **Issued permit May 6, 1975: Activities authorized by this permit have** been completed.

Amendment No. 1—**issued July 20, 1976,** supersedes all conditions of the original permit. Permittee is authorized to capture in Louisiana and transport to **Mississippi, for** release into the wild, an additional five hundred (500) American Alligators (*Alligator mississippiensis*), for the purposes of scientific research and propagation.

Each permit is available for public inspection during normal business hours at the U.S. Fish and Wildlife Service's office in Suite 600, 1612 K Street, NW., Washington, D.C.

Dated: August 12, 1976.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

ENDANGERED SPECIES PERMIT

Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: St. Louis Zoological Park, Forest Park, St. Louis, Missouri 63110. Richard D. Schultz, Director.

OMB NO. 42-R1870

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE
FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (*Indicate only one*)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
To export one (1) male Black Lemur, Lemur macaco macaco endangered species, born 18 March, 1974 in St. Louis Zoological Park to "Les Cypris", Cap Martin France.

3. APPLICANT. (*Name, complete address and phone number of individual, business, agency, or institution for which permit is requested*)
St. Louis Zoological Park
Forest Park
St. Louis, Missouri 63110
1-314-781-0900 .

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:
☐ MR. ☐ MRS. ☐ MISS ☐ MS.
HEIGHT: WEIGHT:
DATE OF BIRTH: COLOR HAIR: COLOR EYES:
PHONE NUMBER WHERE EMPLOYED: SOCIAL SECURITY NUMBER:
OCCUPATION:

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
City and county owned public zoo, USDA licensed, engaged in conservation and propagation of wildlife, education, exhibits, research and recreation.

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT:
NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.
Richard D. Schultz, Director
IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED:

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
St. Louis Zoological Park
Forest Park
St. Louis, Missouri 63110
1-314-781-0900

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☒ YES ☐ NO
(*If yes, list license or permit number(s)*)
ES-14, ES-311, ES-156, ES-331, 6-SP-77, PRI-7-172-P-2 (K.C.) 6-SC-78

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☐ NO
(*If yes, list jurisdictions and type of documents*)
N.A.

9. CERTIFIED CHECK OR MONEY ORDER (*if applicable*) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF: $ N/A

10. DESIRED EFFECTIVE DATE:

11. DURATION NEEDED: Until terminated

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (*See 50 CFR 13.12(a)*) MUST BE ATTACHED, IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED:
50 CFR, Section 17.22 - Permits for scientific purposes or for the enhancement of propagation or survival.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (*In Ink*): Charles H Hoessle for D Schultz — DATE: July 6 1976

July 6, 1976.

Mr. Lynn A. Greenwalt, Director,
U.S. Fish & Wildlife Service,
Law Enforcement Division,
U.S. Department of the Interior,
Washington, D.C.

Dear Mr. Greenwalt: The St. Louis Zoological Park hereby applies for an Endangered Species Permit under Section 10(a) of the Endangered Species Act of 1973. We submit the following information pursuant to Sections 13.12 of Volume 39, No. 3 and 17.22 of Volume 40, No. 188 of the Federal Register.

1. The request is for permit to export one (1) male Black Lemur *Lemur macaco macaco* for breeding purposes.

2. (iii) The permit is for a male Black Lemur born 18 March 1974 at the St. Louis Zoological Park.

3. Not applicable.

4. Born at St. Louis Zoological Park, St. Louis, Missouri, U.S.A.

5. "Les Cypris" 06190 Roque Brune—Cap Martin, France, Tel: Menton 3580 6I.

6. (i) "Les Cypris" is a well known European breeding facility. Please refer to our previous permit entered as FR Doc. 76-10432 filed 4/9/76.

(ii) Same as above.

(iii) Same as above.

(iv) The lemur will be shipped in a crate exceeding the minimum standards of the I.A.T.A. Live Animal Regulations (see enclosure).

(v) Same as (i), (ii), (iii).

7. See enclosed letters.

8. Same as 6(i).

A completed form 3-200 as well as other documents regarding this request are enclosed. We sincerely hope that we can receive your consideration on our request at your earliest convenience.

Sincerely yours,

CHARLES H. HOESSLE,
General Curator, Deputy Director.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. This application has been assigned File Number PRT 2-287-07; please refer to this number when submitting comments. All relevant comments on or before September 17, 1976.

Dated: August 12, 1976.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

Office of Hearings and Appeals

[Docket No. M 76-528]

DEAN JONES COAL COMPANY, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Dean Jones Coal Company, Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 5, Lee County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines have mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of the foregoing standard as it applies to all electric and self-propelled electric face equipment presently in its Mine No. 5 and any of the same purchased in the future for use in this underground mine. The Mine No. 5 is a bituminous coal mine with an average coal height of 30 inches.

2. Petitioner states that installation of canopies would confine the equipment operator and impair his mobility, thus creating a safety hazard in the mine.

3. Petitioner states that due to the low coal height, a canopy or cab would prevent the miner operator from having the necessary peripheral vision of equipment and surroundings to permit safe operation.

4. Petitioner states that it has a roof control plan, approved by the Virginia Division of Mines and by the Mining Enforcement and Safety Administration, which is adequate for roof support in this mine.

5. Petitioner states that its accident record for roof falls is clean. No fatalities or injuries by roof falls have occurred in any of its underground mines since their opening in 1967.

6. Petitioner employ a Wilcox Continuous Miner which has a height of 26 inches. Its coalbed has some dips and nonuniform slopes. The continuous miner operator feels that it would be impossible to operate the continuous miner safely with a canopy or cab installed, as it would diminish peripheral vision and limit operator movement to the point of creating a safety hazard.

7. It is Petitioner's position that canopies or cabs installed on its electric face equipment would be a far greater hindrance than a help in its continuous miner operation due to its coal height, the impaired peripheral vision created by said installation, and the confinement of miner operator movement. Petitioner maintains that this required safety standard presents more of a safety hazard, if complied with, than would the lack of canopies or cabs in the circumstance of its mining operation.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 10, 1976.

[FR Doc.76-24105 Filed 8-17-76;8:45 am]

[Docket No. M 76-481]

DYNA-CARB COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Dyna-Carb Coal Co. has filed a petition to modify the application of 30 CFR 75.1710 to its No. 2 Mine, Hurley, Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches.• • •

The substance of Petitioner's statement is as follows:

1. In its mine Petitioner operates the following equipment:

Name	Type	Height	Length	Width
		Inches	*Feet*	*Feet*
Epling	Spinner	25	16	5
Royal	Cutting machine.	25	16	5
Paul Elswick	Roof bolter	28	8	4½
Mescher	Tractor	29	9	5

2. Petitioner employs eight men to mine coal in the Blair seam which is 30 to 32 inches thick. The top and the floor of the mine are in fair condition.

3. Petitioner feels there are two reasons why cabs or canopies should not be installed on its equipment. The canopies limit the vision of the equipment operators by half because the canopies have to be built too close to the machine body. The canopies also limit the mobility of the equipment operators making it more difficult for them to handle the machine. Also, the canopy striking the top in places could damage the roof bolts or half-headers holding the top. The impact of the canopy striking the top could injure the operator.

4. Petitioner proposes an alternative consisting of additional and supplemental training on proper inspections of roof support, periodic inspections of safety devices on equipment, utilization of the equipments' safety devices by remaining on the equipment in case of a rock fall, and regular drills in handling equipment. Petitioner also proposes to roof bolt the haulageway up to within 10 feet of the face.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015

V 41 161 AUG 18 76 UMI

Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Director, Office of Hearings and Appeals.

[FR Doc.76-24106 Filed 8-17-76;8:45 am]

[Docket No. M 76-520]

EAS COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Eas Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 1, Perry County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner requests modification of the application of the mandatory safety standard 30 CFR 75.1710–1(a) for the reason that the application of such standard will result in diminution of safety to the miners in its Mine No. 1.

2. The average height of the seam of coal in the Mine No. 1 ranges between 35 inches to 50 inches.

3. The face equipment currently in use at the Mine No. 1 includes two Joy shuttle cars (21SC), one Joy cutter (16RB), one Joy loader (14BU10), one Galis coal drill (450) and two Galis roof bolters (300). Petitioner states that this equipment was not designed for the use of canopies.

4. Petitioner states that due to the close confinement of the canopy, the operator's head must extend beyond the protection of the canopy in order to observe in front of, or behind each piece of machinery, resulting in the danger of being crushed between the canopy and rib.

5. Petitioner states that ingress to and egress from the cab is so limited that the operator might be held captive, preventing escape when such action is clearly warranted. The operator, according to Petitioner, could also be held captive for indefinite periods in case of machine malfunction or power failure.

6. Petitioner states that installation of canopies and/or cabs on the currently used mining equipment, under present mining conditions, would create hazards to the miners in its Mine No. 1.

REQUEST FOR HEARING OF COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 9, 1976.

[FR. Doc. 76-24107 Filed 8-17-76; 8:45 am]

[Docket No. M 76X639]

EASTERN COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Eastern Coal Corporation has filed a petition to modify the application of 30 CFR 75.1403–9 to its Stone No. 7 Mine, Stone County, Kentucky.

30 CFR 75.1403–9 provides:

(a) Shelter holes should be provided on track haulage roads at intervals of not more than 105 feet unless otherwise approved by the Coal Mine Safety District Manager(s).

(b) Shelter holes should be readily accessible and should be at least 5 feet in depth, not more than 4 feet in width (except crosscuts used as shelter holes) and at least the height of the coal seam where the coal seam is less than 6 feet high and at least 6 feet in height where the coal seam is 6 feet or more in height.

(c) Shelter holes should be kept free of refuse and other obstructions. Crosscuts used as shelter holes should be kept free of refuse or other materials to a depth of at least 15 feet.

(d) Shelter holes should be provided at all manually operated doors and at switch throws except: (1) At room switches, or (2) at switches where more than 6 feet of side clearance is provided. The Coal Mine Safety District Managers(s) may permit exemption of this requirement if such shelter holes create a hazardous roof condition.

(e) At each underground slope landing where men pass and cars are handled, a shelter hole at least 10 feet in depth, 4 feet in width, and 6 feet in height should be provided.

The substance of Petitioner's statement is as follows:

1. Petitioner states that it is the operator of bituminous coal mines which are subject to the Mandatory Safety Standards for Underground Mines, in particular 30 CFR 75.1403–9.

2. Petitioner states that because the mining life of this mine is less than 5 years and the age of this mine varies from 11 to 64 years in the affected areas and for the reasons set forth below, the above standard requiring shelter holes at a specific distance and of certain size cannot be applied without resulting in a diminution of safety.

3. Petitioner states that the major parts of both the haulway and mainline were driven very narrow (16 to 18 feet), and solid barrier pillars were left on one side or another for roof support. Petitioner further states that the mainline and haulway are well-supported; but that many crosscuts are caved tight and additional roof support has been provided in these areas. Of necessity, this additional roof support must be removed to clean the crosscuts, which will create exposure to hazardous roof, and, according to Petitioner, likely cause additional roof problems which in turn may weaken ventilation brattices.

4. Petitioner maintains that the only possible shelter hole is on the trolley wire side in many locations. Many locations in the haulway and mainline have been shot out to raise the track to a level position to eliminate dips in the track. In these areas, shelter holes would have to be shot out of the sandstone ribs instead of the coalbed. This could greatly affect the general ground conditions in these areas. Even if the shelter holes are cut into the coalbed, disturbing top or pillars that have stood for many years would, Petitioner contends, be an unwise mining technique .

5. Petitioner states that since the primary purpose of shelter holes is to protect personnel working or traveling along the haulage track from haulage equipment, the exposure of personnel to this potential hazard is most important. Almost all maintenance of the track, avers Petitioner, is done on a non-producing shift, so the exposure to haulage equipment is minimal; and when emergency repairs and other work, such as work on telephone cables, pumps, or firebossing is done, individual transportation is used because over 6 miles of haulage track is involved. This equipment must be moved to a side track before haulage units may pass. The location of all equipment and personnel along the mainline or haulway is closely monitored by the Dispatcher who directs the speed, travel and movement of all equipment and personnel in these areas. This control allows the Dispatcher to notify all concerned to safety position themselves when haulage equipment is passing.

6. Petitioner states that a thorough review of its past injury data indicates that no recorded injuries which may have been prevented by shelter holes, as described in the Federal Regulations, have occurred.

7. Petitioner requests, since the standard involved herein will result in a diminution of safety at its mine, that the standard be modified to not require Petitioner to provide shelter holes.

REQUESTS FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments within 30 days from the date of publication of this notice in the FEDERAL REGISTER. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 9, 1976.

[FR Doc.76-24108 Filed 8-17-76;8:45 am]

[Docket No. M 76X640]

EASTERN COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Eastern Coal Corporation has filed a petition to modify the application of 30 CFR 75.1403–8 to its Stone No. 7 Mine, Stone County, Kentucky.

30 CFR 75.1403–8 provides:

(a) The speed at which haulage equipment is operated should be determined by the condition of the roadbed, rails, rail joints, switches, frogs, and other elements of the track and the type and condition of the haulage equipment.

(b) Track haulage roads should have a continuous clearance on one side of at least 24 inches from the farthest projection of normal traffic. Where it is necessary to change the side on which clearance is provided, 24 inches of clearance should be provided on both sides for a distance of not less than 100 feet and warning signs should be posted at such locations.

(c) Track haulage roads developed after March 30, 1970, should have clearance on the "tight" side of at least 12 inches from the farthest projection of normal traffic. A minimum clearance of 6 inches should be maintained on the "tight" side of all track haulage roads developed prior to March 30, 1970.

(d) The clearance space on all track haulage roads should be kept free of loose rock, supplies, and other loose materials.

(e) Positive stopblocks or derails should be installed on all tracks near the top and at landings of shafts, slopes, and surface inclines.

The substance of Petitioner's statement is as follows:

1. Petitioner is the operator of bituminous coal mines which are subject to the Mandatory Safety Standards for Underground Mines, in particular 30 CFR 75.1403–8.

2. Petitioner states that because the mining life of its Stone No. 7 Mine is less than 5 years and the age of this mine varies from 11 to 64 years old in the affected areas, and for the reasons set forth below, the above standard requiring track clearance of at least 24 inches from the farthest projection of normal traffic cannot be applied without resulting in a diminution of safety.

3. Petitioner states that the major parts of both the haulway and mainline were driven very narrow (16 to 18 feet) in order to utilize the large barrier pillars for roof support, and that providing clearance on the trolley wire side would expose workers to an unnecessary hazard.

4. In several locations, states Petitioner, the track has been raised to provide for a level track. In these instances, the non-trolley wire side is provided with a water drainage ditch which minimizes the possibility of providing proper track clearance. In numerous other locations, according to Petitioner, cribbing and similar suplemental roof support restricts the ability to provide the proper track clearance.

5. Petitioner maintains that since one of the primary purposes of providing track clearances is to allow safe passage of a unit of haulage equipment where an individual may be working, the exposure of personnel to this potential hazard is most important.

6. Petitioner states that almost all maintenance of the track is done on a non-producing shift, so that the exposure to haulage equipment is minimal; and when emergency repairs and other work, such as work on telephone cables, pumps, or fire-bossing is done, individual transportation is used because over 6 miles of haulage track is involved. According to Petitioner, such equipment must be moved to a side track before haulage units may pass.

7. Petitioner states that the location of all equipment and personnel along the mainline or haulway is closely monitored by the Dispatcher who directs the speed, travel and movement of all equipment and personnel in these areas. This control allows the Dispatcher to notify all concerned to safety position themselves when haulage equipment is passing. A thorough review of its past injury data, Petitioner avers, indicates that no recorded injuries, which may have been prevented by track clearance of 24 inches as described in the Federal Regulations, have occurred.

8. Petitioner requests, since the standard involved herein will result in a diminution of safety at its mine, that the standard be modified to not require Petitioner to obtain full clearance at the aforementioned locations.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 9, 1976.

[FR Doc.76-24109 Filed 8-17-76;8:45 am]

[Docket No. M 76-523]

G & A COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), G & A Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Deep Mine, Wyoming County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

VOL 41 NO 161 AUG 18 76 UM

The substances of Petitioner's statement is as follows:

1. Petitioner states that by memorandum to all District Managers dated September 20, 1973, the Mining Enforcement and Safety Administration's Acting Assistant Administrator further interpreted these actions to mean that the mining heights listed in 30 CFR 75.1710–1 were "the distance from the floor to the finished roof *less 12 inches*." (Emphasis added.)

2. The coalbed height in Petitioner's No. 1 Deep Mine varies between 47 and 48 inches.

3. Petitioner states that the design characteristics of the electrical face equipment presently in use at the subject mine will not permit the installation of cabs or canopies which consistently will clear the top in areas where the equipment must operate in this mine. The wedging of electrical face equipment against the top, moreover, would result in damage to overhanging cables and in weakened roof support.

4. According to Petitioner, the design characteristics of the electrical equipment presently in use at the subject mine will not permit the installation of cabs or canopies which will allow the operator proper visibility for safe operation of the equipment while remaining under the cab or canopy. Impaired visibility would interfere with mining operations, Petitioner states, making strict compliance with the roof control plan more difficult and thereby increasing the danger of roof falls. Impaired visibility, moreover, would endanger all personnel working in the vicinity of the electrical face equipment. To avoid these situations, Petitioner maintains, the operator may attempt to run the equipment while leaning out of the cab, thereby exposing himself to the danger of being crushed between the equipment and ribs.

5. The design characteristics of the electrical face equipment presently in use at the subject mine, according to Petitioner, will not permit the installation of cabs or canopies which will allow the operator to work under comfortable conditions. A cramped or unnatural position not only hampers an operator's effective control of the equipment but also induces fatigue, and therefore carelessness on his part.

6. Petitioner states that the design characteristics of the electrical face equipment presently in use at the subject mine will not permit the installation of cabs or canopies which will allow the operator to escape rapidly from the confines of such cabs or canopies in the event of an emergency.

7. Petitioner is a small operator who leases its No. 1 Deep Mine, a one-section mine with five entries, employing 12 miners. After reasonable investigation of available technology, Petitioner has concluded that no cab or canopy, either prefabricated or of experimental design, compatible with its presently existing equipment, would alleviate the dangers set forth herein.

8. Petitioner contends, therefore, that application of 30 CFR 75.1710 and 75.1710–1 to its present electrical face equipment, operating in the coalbed height shown above, will result in a diminution of safety to the miners at its No. 1 Deep Mine.

9. Petitioner proposes the following alternative method in lieu of compliance with 30 CFR 75.1710 and 75.1710–1:

(a) Petitioner's present electrical face equipment will be replaced, as that equipment wears out, with smaller equipment with cabs or canopies installed to the extent that the cabs or canopies on such smaller equipment may satisfy the human and physical engineering problems identified herein;

(b) Petitioner will retrofit its present electrical face equipment with any cab or canopy, later developed, which will satisfy the human physical engineering problems identified herein; and

(c) In addition to complying with the roof control plan in effect at the subject mine, Petitioner will reinstruct all face workers and section supervisory and inspection personnel in roof and rib fall recognition and prevention techniques as well as safe equipment operation.

10. Petitioner requests that its petition for modification be granted until such time as it is able to acquire cabs or canopies configured for safe operation in the coalbed height at the No. 1 Deep Mine.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 9, 1976.

[FR Doc.76–24110 Filed 8–17–76;8:45 am]

[Docket No. M 76–506]

HARMAN MINING CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861 (c) (1970), Harman Mining Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its No. 5–A Mine (1st left area), Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner Harman Mining Corporation has not applied to the Assistant Administrator—Technical Support for approval of devices to be used in lieu of cabs or canopies as permitted by 30 CFR 75.1710–1 since the Petitioner is without knowledge of any alternate devices which would be safe and otherwise suitable for use in its mine.

2. The Petitioner submits, however, that both canopies and cabs are incompatible with the present operations in the 1st left area of its No. 5–A Mine (primarily because of the size of the equipment in relation to the seam height) and that installation of canopies, cabs or any similar device would result in such a serious diminution of safety that the mine would not be able to continue to operate.

3. Petitioner's mine is located in Jesse Fork, Buchanan County, Virginia. The coal seam being mined is the Eagle seam.

4. The mine operates two production shifts per day utilizing conventional mining methods. Approximately 800 tons of coal are produced each day.

5. On the basis of present projections it is estimated that there is enough coal for this area of the mine to continue operating for no more than 36 months.

6. The height of the coal seam in this area of the mine averages 42 inches and varies from 39 to 48 inches.

7. For purposes of the regulation at 30 CFR 75.1710–1, the present mining height in this area of the mine (as measured in accordance with official instructions set forth in Exhibit A[1]) is 27 inches.

8. The regulatory requirement for installation of canopies or cabs became applicable to this mine on January 1, 1976.

9. The electric face equipment for which modification of the regulations is hereby sought consists of the following:

1—14 BU10—11AE Joy loader
1—16 R. B.—3A.E. Joy cutter
1—300 Galis roof bolting machine
1—460 Galis coal drill
1—16 S.C.—6P.E.—12 Joy shuttle car
1—18 S.C.—6P.X.E. 12 M.S. 2 Joy shuttle car
1—AR4 Elkhorn scoop
1—F 145–128 Kersey scoop
1—BM 120 S & S battery tractor

10. This equipment operates in entries which are 19 feet wide; there are no adverse rib conditions and there is no history of roof falls in any of the face areas.

11. A full roof bolting plan is used employing 30-inch roof bolts on 48-inch centers in all working areas, and elsewhere as required.

12. The Petitioner has attempted various methods of installing canopies or cabs, without encountering a single method which would be safe at this mine.

13. There are 25 underground employees in the 1st left area of Petitioner's mine; these employees are members of the United Mine Workers of America.

14. Each of the employees at the mine has been consulted regarding his ideas and feelings concerning operation of equipment in this particular area of the mine with canopies or cabs installed and each of these employees has expressed strenuous objections for reasons of safety.

15. The safety record of the employees in this area of the mine is excellent and not one lost time accident has occurred in this area of the mine in the 2 years that the mine has been in existence.

16. The Petitioner does not have an alternate method for achieving the safety results intended by 30 CFR 75.1710–1, but Petitioner maintains that application of 30 CFR 75.1710–1 to Petitioner's mine will result in a diminution of safety to the miners in the mine.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 10, 1976.

[FR Doc.76–24111 Filed 8–17–76;8:45 am]

[1] Exhibit A is available for inspection at the address contained in the last paragraph of the notice.

[Docket No. M 76–524]

HI JACKER COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Hi Jacker Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 2 Mine, Grundy County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, be employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of the application of the foregoing mandatory safety standard to haulage equipment and two roof bolting machines in its No. 2 Mine.

2. Petitioner's haulage equipment consists of one (1) Elkhorn Scoop (AR–4), one (1) Mescher Motor; and the other equipment involved is one (1) Paul's Repair Shop Bolter and one (1) Wilcox Bolter.

3. Petitioner states that the installation of canopies on this equipment is creating a hazard to the equipment operators.

4. Petitioners' No. 2 Mine is in the Clintwood seam and ranges from 35 to 45 inches in height. The coal seam has consistent ascending and descending grades, creating dips in the coalbed. As a result of these dips, the canopies have to be installed in such a manner as to prevent the canopies from hitting against the roof and possibly destroying roof support. This allows only a 25-inch vertical operating compartment, thus limiting the visibility of the equipment operator and creating a hazard to them as well as to the other employees in the mine.

5. Petitioner maintains that since the equipment operator's visibility is limited in the position required in order to be seated in the operating decks, that the installation of canopies could be a contributing factor in accidents which may arise in the mine.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 10, 1976.

[FR Doc.76–24112 Filed 8–17–76;8:45 am]

[Docket No. M 76–525]

JIM-K MINING, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 816(c) (1970), Jim-K Mining, Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its Jim-K No. 3 Mine, Clintwood County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed

V 41 161
AUG 18 76
UMI

canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner contends that installation of canopies on face equipment in its Jim-K No. 3 Mine, would result in unsafe working conditions.

2. Petitioner states that the height of the coal seam at the Jim-K No. 3 Mine varies from 40 to 66 inches. The equipment is, on the average, about 36 inches in height. The top at this mine is irregular, and the miners are working in rolls. It is often necessary to cut bottom in order to let the machines pass.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comment on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 10, 1976.

[FR Doc.76-24113 Filed 8-17-76;8:45 am]

[Docket No. M 76X632]

KENTLAND-ELKHORN COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Kentland-Elkhorn Coal Corporation has filed a petition to modify the application of 30 CFR 75.1403-8 to its Kentland No. 2 Mine, Mouthcard County, Kentucky.

30 CFR 75.1403-8 provides:

(a) The speed at which haulage equipment is operated should be determined by the condition of the roadbed, rails, rail joints, switches, frogs, and other elements of the track and the type and condition of the haulage equipment.

(b) Track haulage roads should have a continuous clearance on one side of at least 24 inches from the farthest projection of normal traffic. Where it is necessary to change the side on which clearance is provided, 24 inches of clearance should be provided on both sides for a distance of not less than 100 feet and warning signs should be posted at such locations.

(c) Track haulage roads developed after March 30, 1970, should have clearance on the "tight" side of at least 12 inches from the farthest projection of normal traffic. A minimum clearance of 6 inches should be maintained on the "tight" side of all track haulage roads developed prior to March 30, 1970.

(d) The clearance space on all track haulage roads should be kept free of loose rock, supplies, and other loose materials.

(e) Positive stopblocks or derails should be installed on all tracks near the top and at landings of shafts, slopes, and surface inclines.

The substance of Petitioner's statement is as follows:

1. Petitioner states that it is the operator of bituminous coal mines which are subject to the Mandatory Safety Standards for Underground Mines, in particular 30 CFR 75.1403-8.

2. Petitioner states that the location of the areas with inadequate clearance are as follows:

(a) Kentland No. 2 East Mine at No. 4 belt drive 1 break inby spad No. 414 (16-inch clearance); and

(b) Kentland No. 2 East Mine at No. 5 belt drive 1 break inby spad No. 314 (16-inch clearance).

3. Petitioner maintains that to obtain the proper clearance at the aforementioned locations it would be necessary to slab the left rib which would make an excessively wide place and that this creates a danger of a roof fall in an area of already unstable roof conditions.

4. Petitioner states that the standard involved herein will result in a diminution of safety at its mines, and requests that the standard be modified to not require Petitioner to obtain full clearance at the aforementioned locations.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 9, 1976.

[FR Doc.76-24114 Filed 8-17-76;8:45 am]

[Docket No. M 76-237]

K AND S COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), K and S Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 9-C Underground Mine located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner feels that having canopies installed on the equipment will create a hazard to the equipment operators.

2. Petitioner's equipment consists of two Epling battery-powered haulage motors and one Epling loader ranging in height from 24 to 30 inches. This equipment was manufactured in 1974, is permissible, U.S. Bureau of Mines approved, and was not designed to have canopies installed.

3. The above mine is in the Clintwood seam of coal, ranging from 32 to 48 inches in height. In this seam Petitioner is constantly running into ascending and descending grades resulting in dips in the coalbed. Installing canopies on the equipment would limit the vision of the operators and also cause them to work in a cramped, inflexible position thereby creating a hazard to them as well as to other employees in the mine. Petitioner feels that the installation of these canopies could be a contributing factor to accidents that may arise.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 10, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc.76-24115 Filed 8-17-76;8:45 am]

[Docket No. M 76-506]

McCOY ELKHORN COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, (30 U.S.C. § 861(c) (1970)), McCoy Elkhorn Coal Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 4, located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which is pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. McCoy Elkhorn Mine No. 4 is in the lower Pond Creek seam and its thickness ranges from 38 to 52 inches in height. The coal seam lies in consistently ascending and descending grades creating dips and hills in the coalbed over which the equipment must travel. As a result of these conditions, the canopies, as installed, strike the roof knocking out roof bolts and creating hazardous conditions. Furthermore, the vertical operating compartment is so limited as to seriously affect the vision of the equipment operators thereby creating a hazard to them as well as other employees in and around the equipment.

2. Canopies have been installed in this mine on 1 6RB Cutter, 1410 Joy Loader, 2 Joy 21SC Shuttle Cars, 2 Galis 300 Pinners, 2 S&S Scoops, 2 Elkhorn Scoops, and a Galis Coal Drill.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 10, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc.76-24116 Filed 8-17-76;8:45 am]

[Docket No. M 76X619]

NATIONAL MINES CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), National Mines Corporation has filed a petition to modify the application of 30 CFR 75.1405 to its National Pocahontas Mine, Wyoming County, West Virginia.

30 CFR 75.1405 provides:

All haulage equipment acquired by an operator of a coal mine on or after March 30, 1971, shall be equipped with automatic couplers which couple by impact and uncouple without the necessity of persons going between the ends of such equipment. All haulage equipment without automatic couplers in use in a mine on March 30, 1970, shall also be so equipped within 4 years after March 30, 1970.

The substance of Petitioner's statement is as follows:

1. Petitioner states that its track haulage equipment was purchased prior to March 30, 1970.

2. Petitioner states that the modification of the subject track haulage equipment to an automatic coupler would result in a major overhaul of said equipment.

3. According to Petitioner, based upon results of studies conducted by ACF Industries Engineering Department and the National Casting Company, it was advised of the possibility of accidental automatic coupling disengagement as the haulage equipment is hoisted over the vertical curve on its slope track.

4. Petitioner states that its alternate method will allow couplings to be made without the necessity of persons going between the ends of such equipment and that said method consists of the following:

(a) A lever attached to the coupling pin that will enable miners to raise and/or lower the coupling pin without going between the equipment;

(b) Locking devices that will lock the coupling pin in a raised position so that miners will not be near the ends of the equipment upon impact during the coupling process;

(c) Slotted pipe for the travel of the chain links and the coupling pin in order to maintain proper alignment; and

(d) Hand link aligner that will enable miners to align the chain and coupling links without going between the equipment.[1]

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 9, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc.76-24117 Filed 8-17-76;8:45 am]

[Docket No. M 76-517]

NEW RIVER CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), The New River Company has filed a petition to modify the application of 30 CFR 75.1710 to its Siltix Mine, Fayette County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners

[1] A drawing, showing Petitioner's alternate method, is attached to its petition, and is available for inspection and copying at the Hearings Division address provided herein.

V 41 161 AUG 18 76 UMI

operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. The New River Company requests that Section 317(j) of the Act and specifically Section 75.1710–1, subparagraph (4) be modified until further technology is developed for its equipment mining in seams of 36 inches to 48 inches, as the installation of canopies in their height creates a diminution of safety to the employees at its Siltix Mine.

2. Petition states that the Siltix Mine is a three-section coal mine producing coal on two 8-hour shifts per day, with one 8-hour shift being used for supply and maintenance of equipment. Mining is accomplished by Lee-Norse CM32 continuous mining machines, Joy 21SC shuttle cars, Jeffrey MT66 shuttle cars and Galis 300 roof bolting machines. S & S Machinery Company UAT74 and UAT86 Un-a-tracs are used to supply and clean up the sections. Coal is mined in the Sewell Seam which coal is loaded into shuttle cars, transported to and dumped into a belt feeder which dumps onto a belt conveyor, and transported to the surface by a series of belt conveyors.

3. Petitioner states that the Sewell Seam of coal at the Siltix Mine is a difficult seam to mine due not only to the undulating seam conditions, but also to the variable height of the coal seam, the weak shale top and water from the mine roof. The water, according to Petitioner, makes the mine floor very slick at times, especially when adverse grades are encountered.

4. Petitioner states that canopies have been installed on all of the self-propelled electric face equipment in the Siltix Mine with its best good faith efforts to comply, but that it is not able to obtain satisfactory compliance with this requirement. Stationary canopies have been installed that may be manually raised or lowered; hydraulically operated canopies have been tried on some of the equipment; canopies purchased from the equipment manufacturers have been installed; and canopies designed and manufactured by Petitioner have been installed. With all of these, Petitioner avers, it is not able to comply with the requirement.

5. Petitioner states that Mr. Donald Rice, a member of the United Mine Workers of America Local No. 1353, was off from work from January 2, 1976 to March 3, 1976, due to pulling a muscle in his back by trying to get into the deck of a Lee-Norse CM32 continuous miner as the deck area was restricted due to the canopy that had been installed. According to Petitioner, the canopy must be lowered in order to get under 4-inch by 8-inch headers, and in so doing, the visibility of the operator is restricted, causing the operator to have to lean out in order to see, thereby creating a diminution of safety to the continuous miner operator.

6. Petitioner states that the canopy on the continuous mining machine knocks installed roof bolts which loosens them, thereby creating another diminution of safety for all of the employees on the section.

7. Petitioner states that Mr. Paul Garrett, a member of the United iMne Workers of America Local No. 1353, was the operator of an S & S Machinery UAT86 Un-A-trac on February 23, 1976, in which Mr. Garrett went to pick up supplies. Because of the restricted visibility caused by the canopy on his equipment, he slid against the rib and knocked the breaker on the equipment by hitting the panic bar which deenergized the Un-a-trac. Mr. Garrett was unable to get out of the Un-a-trac, due to restricted area, in order to reset the breaker to energize the equipment. He was found in this position some two and a half hours later. After a conference with the Mining Enforcement and Safety Administration on February 25, 1976, the canopy was removed.

8. According to Petitioner, the canopies on both the Jeffrey MT66 shuttle car and Joy 21SC shuttle car result in a diminution of safety to the employees in trying to comply with the requirement. Petitioner states that it has been able to provide 27 inches between the seat of the shuttle car and the canopy for the operator; but that this does not give the operator of the opposite standard shuttle car enough visibility to get under the boom of the continuous miner to be loaded. He must get out of the deck and out from the protection of the canopy in order to operate the controls of the shuttle car. It becomes necessary, Petitioner maintains, for the operators of both the opposite standard and standard shuttle cars to stick their heads out from under the canopy in order to steer the cars because of the limited visibility.

9. Petitioner states that the operators of the roof bolting machines are experiencing the same difficulty with canopies as the operators of other equipment in trying to met the requirement.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 9, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc. 76-24118 Filed 8-17-76; 8:45 am]

[Docket No. M 76-526]

NORMA A COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Norma A Coal Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its Norma A No. 1 Mine, Clintwood County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner states that installation of canopies on face equipment would result in unsafe working conditions.

2. Petitioner states that the height of the coal seam at its Norma A No. 1 Mine varies from 34 to 42 inches. The equipment is, on the average, about 30 inches in height, and the bottom of the mine is untrue.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 10, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc.76-24119 Filed 8-17-76;8:45 am]

[Docket No. M 76-299]

PIKE BUCHANAN COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Pike Buchanan Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 3 Mine located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner feels that the installation of canopies on this equipment is creating a hazard to the equipment operator.

2. The haulage equipment consists of two Mescher Tractors AR20 and Wise Push-out cars. The roof bolting machine is a Lee-Norse TD–2 and also included is one Lee-Norse Continuous Miner. The No. 3 Mine is in the lower Elkhorn seam and ranges from 38 to 44 inches in height. This coal seam has consistent ascending and descending grades creating dips in the coalbed. As a result of these dips, the canopies have to be installed in such a manner as to prevent the canopies from coming into contact with the roof and possibly destroying roof support. The canopies allow only a 23-inch vertical operating compartment thus limiting the vision of the equipment operators and creating a hazard to them as well as the other employees in the mine.

3. We feel that since the equipment operators' vision is limited and the position required in order to be seated in the decks is cramped, that the installation of canopies could be contributing factors in any accidents which may arise.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 10, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc.76-24120 Filed 8-17-76;8:45 am]

[Docket No. M 76-521]

RAY COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Ray Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 1, Perry County, Kentucky.

30 CFR 75.1710 provides:

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner requests modification of the application of the mandatory safety standard 30 CFR 75.1710(a) for the reason that the application of such standard will result in a diminution of safety to the miners in its Mine No. 1.

2. The average height of the seam of coal in the Mine No. 1 ranges between 35 to 55 inches. The average coal height is 45 inches.

3. The face equipment currently in use at the Mine No. 1 includes one 14 CM Joy Miner (265), two Joy Shuttle Cars (21SC), one Lee-Norse Twin Roof Bolter, one Galis Roof Bolter (300), and one Joy Loader (14 BU10). Petitioner states that this equipment was not designed for the use of canopies.

4. Petitioner states that due to the close confinement of the canopy, the operator's head must extend beyond the protection of the canopy in order to observe in front of, or behind each piece of machinery, resulting in the danger of being crushed between the canopy and rib.

5. Petitioner states that ingress to and egress from the cab is so limited that the operator might be held captive, preventing escape when such action is warranted. The operator, according to Petitioner, could also be held captive for indefinite periods in case of machine malfunction or power failure.

6. Petitioner states that installation of canopies and/or cabs on the currently used mining equipment, under present mining conditions, would create hazards to the miners in its Mine No. 1.

[FR Doc. 76-24121, Filed 8-17-76; 8:45 am]

[Docket No. M 76-522]

RAY COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Ray Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 20 Mine, Perry County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of les than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner requests modification of the application of the mandatory safety standard 30 CFR 75.1710–1 for the reason that the application of such standard will result in diminution of safety to the miners in its No. 20 Mine.

2. The average height of the seam of coal in the No. 20 Mine ranges between 17 inches to 45 inches.

3. The face equipment currently in use at the mine includes two Joy Shuttle cars (21 SC), one Galis coal drill (460), one Joy cutting machine (16RB), one Joy loader (14 BU 10), and two roof bolters (Galis) (300).

4. According to Petitioner the following hazards are created by installation of canopies:

(a) Due to the close confinement of the canopy, the operator's head must extend beyond the protection of the canopy in order to observe in front of or behind each piece of machinery, resulting in the danger of being crushed between the canopy and rib; and

(b) Ingress to and egress from the cab is so limited that the operator might be held captive preventing escape when such action is clearly warranted. The operator could also be held captive for indefinite periods in case of machine malfunction or power failure.

5. For the foregoing reasons, Petitioner feels that installation of canopies and/or cabs on the currently used mining equipment, under present mining conditions, would create a hazard to the miners.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 10, 1976.

Director, Office of Hearings and Appeals.

[FR Doc.76-24122 Filed 8-17-76;8:45 am]

[Docket No. M 76-541]

ROADSIDE COAL CO., INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Roadside Coal Company, Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine, Burnwell, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner is the operator of bituminous coal mine No. 1 that is subject to the Mandatory Safety Standards for Underground Mines, and in particular 30 CFR 75.1710–1.

2. Petitioner states that operations are proceeding in said mine in seam heights which, when mined, do not permit clearance between the top of operated equipment and the roof sufficient to allow installation of canopies for protection of operators without the creation of additional hazards.

3. Petitioner states that its Mine No. 1 seam height varies significantly within all entries. Therefore, hazards from roof contract exist at areas where low seams or rolls, dips and other seam variations drop to the vicinity of equipment height.

4. Petitioner states that its primary problem in extending the use of canopies has been operator acceptance, and that it has been able to gain no significant experience with prototype canopies at the mine because of the refusal of miners to operate equipment so equipped. This reaction, according to Petitioner, is difficult to deal with because of the provisions of Article III, Section (i) of the National Bituminous Coal Wage Agreement of 1974, which allows an individual miner to withdraw by following certain procedures from conditions which he believes to be abnormal and dangerous.

5. Petitioner states that its No. 1 Mine operates one working section in seam heights of 44 to 54 inches, using conventional equipment with heights ranging from 32 to 42 inches.

6. Petitioner asserts that to apply the mandatory standard set forth in 30 CFR 75.1710–1 to its No. 1 Mine would result in a diminution of safety to its employees as follows:

(a) Petitioner is constantly encountering undulations in the height of its coal seam, as a result of which the likelihood of jamming the Canopy against the roof its increased, increasing the hazards of damaging cross beams or equipment. Moreover, safe clearance from the room is not assured in that roof bolts have been and will continue to be sheared or dislodged, thereby creating a greater risk of roof fall and injury to employees than would exist otherwise;

(b) Technology in the industry is not available to design and install canopies on existing equipment which will protect the operators in the conditions described herein, and insure visibility and safe operability. Crammed and awkward operator positions cause operators to leave cabs more frequently, and in situations which expose them to hazards of mining equipment. Poor visability causes operators to put their heads outside of the equipment, which exposes them to hazards of moving equipment.

7. In an effort to solve problems of equipment modification, Petitioner states that it knows of consultations with the Mining Enforcement and Safety Administration Technical Support Center, which it believes to be considering the type of problems described herein. Petitioner does not know the results of such consultations. In addition, Petitioner, as is common in the industry, states that it is in repeated and frequent consultation with vendors on equipment problems, and knows that vendors with whom it has consulted are unable to solve the problems described herein.

8. Petitioner states that the existence of the cab itself becomes a hazard in seams, or in portions of seams, in which the Petitioner operates, because present equipment known to the Petitioner limits the paths of escape to an operator forced by a roof or rib fall into a confined space.

9. Much of the equipment used in the No. 1 Mine, Petitioner states, was not manufactured or designed for the installation of canopies, and Petitioner has been unable to construct or purchase suitable canopies without encountering all of the problems identified herein.

10. Petitioner states that the mandatory standard prescribes time limits for the use of canopies based upon maximum height within a mine. If the standard becomes immediately applicable throughout the mine, Petitioner shall be forced to install canopies in the lower reaches of coal before other coal mine operators in like situations. If the different time limits are to apply to the separate mining sections or other areas in the mines, according to Petitioner, then it is faced with a vague situation as mining uncovers new conditions and it is forced to comply within a short period of time. Further, where compliance is impossible, Petitioner states that its mine may be rendered worthless.

11. Petitioner states that the standard involved herein will result in a diminution of safety at its No. 1 Mine and that technology is not available at the present time to satisfactorily accomplish the desired result of increased safety.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 2203. Copies of the petition are available for inspection at that address.

Dated: August 10, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc. 76-24123 Filed 8-17-76; 8:45 am]

[Docket No. M 76-502]

VICTORY DEEP MINE, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Vitcory Deep Mine, Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Underground Mine located in McDowell County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner conducts a mining operation in a coal seam which ranges from 28 inches to 34 inches in height.

2. Petitioner conducts its coal mining operations through the use of a Wilcox Mark 20 P.J. Continuous Miner and a Bridge Conveyor, a Wilcox Model W.R.D.A.–J6 roof bolter and a battery Kersey supply motor.

3. The coal seam which Petitioner is presently mining is subject to extensive rolls and undulations which cause the equipment to become jammed between the roof and the floor of the active workings of the coal mine. The use of protective devices on Petitioner's mining equipment further reduces the safety of the operation of said equipment by unduly confining them and diminishing their ability to escape rapidly from the equipment in the event of an emergency.

4. Petitioner has contacted its equipment suppliers to determine if any forms of cabs or canopies are available for installation on the electric face equipment operated in its mine, which will not produce the safety hazards above-mentioned. Petitioner has been advised that such devices do not exist at the present time for use on said equipment. Furthermore, Petitioner is unable to develop an adequate design for a cab and canopy for said equipment which will alleviate these problems.

5. It is Petitioner's position that the application of Section 75.1710 and 75.1710–1 to the electric face equipment used at the mine in the coal seam heights above-mentioned will in fact result in a diminution of safety in said mine.

6. Petitioner submits as an alternate method to provide for the safety of its miners the following program for use in connection with its electric face equipment presently in operation in the subject mine.

a. Petitioner will undertake steps through its equipment suppliers to purchase a suitable form of cabs and canopies for use in connection with its electric face equipment in said mine.

b. Petitioner will conduct classes for the employees working on said equipment concerning the various aspects of the roof and rib control plan approved by MESA at its mine. Furthermore, Petitioner will regularly instruct its personnel in the safe use and operation of the electric face equipment used by the Petitioner in said mine.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 17, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Depart-

COMBINED FOREST PEST R&D PROGRAM BOARD

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the Combined Forest Pest R&D Program Board will be held Wednesday, September 15, 1976, beginning at 1 p.m. in Room 218-A, Administration Building, U.S. Department of Agriculture.

The purpose of this Program Board is to advise and make recommendations to the Assistant Secretary for Conservation, Research and Education, U.S. Department of Agriculture, regarding activities pertaining to the Combined Forest Pest R&D Program concerning the gypsy moth, Douglas fir tussock moth, and southern pine beetle. Subjects to be discussed include the Plan of Work and Budget for October 1, 1976 to September 30, 1977, program progress and accomplishments, adjustments or changes in program direction, plans for phasedown of the gypsy moth and tussock moth programs, and other matters related thereto.

This meeting is open to the public, but space and facilities are limited. Comments of interested persons may be filed with the Program Board before or after the meeting.

Information pertaining to the meeting may be obtained from Keith R. Shea, Room 307-A, Administration Building, Department of Agriculture, 14th and Independence Avenue, SW., Washington, D.C. Telephone area code (202) 447-6827.

KEITH R. SHEA,
Executive Secretary.

NATIONAL ARBORETUM ADVISORY COUNCIL

Renewal

Notice is hereby given that the Secretary of Agriculture has renewed the National Arboretum Advisory Council. The purpose of the Council is to provide the Secretary of Agriculture with an independent over-view of the work of the Arboretum by a body of qualified individuals who represent national organizations. The National Arboretum was created by Act of Congress (Pub. L. 799-69th Congress 20 U.S.C. 191-194) on March 4, 1927, for purposes of research and education concerning tree and plant life.

The Council meets annually at the National Arboretum, Washington, D.C., to receive reports from the Arboretum staff on research progress with trees and environmental plants, educational activities, site development, and long-range goals. The Council's findings are reported in writing to the Secretary of Agriculture.

This notice is given in compliance with Public Law 92-463.

Done at Washington, D.C., this 13th day of August 1976.

J. PAUL BOLDUC,
Assistant Secretary For Administration.

ELECTRONIC INSTRUMENTATION TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that a meeting of the Electronic Instrumentation Technical Advisory Committee will be held on Tuesday, September 28, 1976, at 9:30 a.m. in Room 3708, Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

The Electronic Instrumentation Technical Advisory Committee was initially established on October 23, 1973. On October 7, 1975, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to electronic instrumentation, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The committee meeting agenda has six parts:

GENERAL SESSION

(1) Opening remarks by the Chairman, Mr. Donald B. Bruck.

(2) Presentation of papers or comments by the public.

(3) Technical discussion of analog to digital and digital to analog converters.

(4) General discussion on the question of programability.

(5) Discussion of microprocessors.

EXECUTIVE SESSION

(6) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The public will be permitted to attend the General Session, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1975, pursuant to section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3100, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The Complete Notice of Determination to close portions of the series of meetings of the Electronic Instrumentation Technical Advisory Committee and of any subcommittees thereof was published in the FEDERAL REGISTER on December 15, 1975 (40 FR 58162).

Dated: August 12, 1976.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.76-24130 Filed 8-17-76;8:45 am]

Economic Development Administration

HONEY INDUSTRY

Study of Producers and Processors

SUMMARY

The Department of Commerce has conducted a study of the producers and processors of honey pursuant to section 264 of the Trade Act of 1974. Such a study is to be made and its results reported to the President whenever the International Trade Commission makes an import relief investigation of an industry under section 201 of the Act.

In its report to the President of June 29, 1976, the Commission determined (by a 3 to 2 vote, with one abstention) that honey is being imported into the United States in such increased quantities as to be a substantial cause of the threat of serious injury to the domestic honey industry. The Commission's finding applies to the commercial beekeepers producing honey and, therefore, excludes beekeeping hobbyists, part-time beekeepers, and honey processors who are not also producers. The Commission found that a tariff rate quota system was the remedy necessary to prevent the threatened injury.

A familiar liquid sweetener with a distinctive flavor, honey is produced by bees from the nectar of flowers. Most honey in the United States goes for table use, although a small proportion is used industrially, principally by bakers.

Three principal groups of producers are recognized in the domestic honey industry: (1) About 1,600 large commercial beekeepers with 300 or more colonies (hives) each, which collectively account for the bulk of the honey entering U.S. commercial markets; (2) some 10,000 part-time beekeepers, with from 25 to 299 colonies apiece, whose honey may enter commercial markets but who generally do not depend on honey as their sole source of income; and (3) as many as 200,000 hobbyists maintaining fewer than 25 colonies apiece, producing honey for their own use or for friends and relatives, and selling it directly to consumers or to small retail outlets. Hobbyists and part-time beekeepers have about half the 4.2 million colonies of bees in the United States and account for about 40 percent of domestic production.

Many companies process domestic and imported honey, but the fifteen largest firms handle 80 to 95 percent of the honey sold to wholesalers; the remainder is sold by fewer than 50 firms. In addition, unknown numbers of firms process mostly their own production which never enters the wholesale or industrial market. Rarely does a processor handle anything except honey.

Since 1970, annual production levels in this country have fluctuated widely. Annual honey imports have also varied considerably in recent years, and the United States has been both a net exporter and a net importer of honey. Most imported honey consists of bulk shipments which, since 1972, have shifted from dark industrial grades to the lighter table grades. The leading foreign suppliers of honey in 1975 were Mexico, Argentina, Canada, Australia and Brazil.

To be certified eligible to apply for trade adjustment assistance, a firm must demonstrate that increased imports of articles like or directly competitive with those produced by the firm contributed importantly to declines in sales or production, or both, and separation, or threat of separation, of the firm's workers. Following certification, a firm may apply for technical and financial assistance to aid its economic recovery. For firms in the honey industry that are considering petitioning the Department of Commerce for certification, the first requirement of the qualifying criteria has been met, since U.S. imports of honey increased steadily from 1973 through 1975. A trade-impacted producing firm may petition the Department at any time regardless of the results of a Commission finding.

As of the date of this report, no petitions have been submitted by firms in the honey industry seeking certification to apply for trade adjustment assistance. Probably very few, if any, of the hobbyists and part-time beekeepers could be considered as "firms" for the purpose of petitioning for certification, and not many would be able to demonstrate decreasing employment if beekeeping is an individual's hobby or only a spare-time occupation. Even many of the commercial honey producers may be too marginal as employers to be capable of meeting the statutory criteria for certification.

The small processing firms that produce and process their own honey for direct retail sale might find it difficult to attribute any sales or production declines to increasing imports. Other types of processors include the cooperative marketing organizations that receive member producers' crops and either bottle and distribute them, or pool and market honey in bulk containers; and the large, well-organized firm purchasing honey from various domestic and foreign sources, processing and packaging it with automated equipment and selling advertised brands.

The Department is unable to determine with any reasonable degree of accuracy the number of petitions likely to be submitted by producing or processing firms in the honey industry, but probably not more than ten firms would consider submitting petitions and be able to qualify for certification.

Under the program of trade adjustment assistance for firms authorized by the Trade Act, financial assistance to a certified firm may take the form of direct loans and loan guarantees, and technical assistance, to enable a firm to establish a competitive position in the same or a different industry. Financial assistance may be used for the acquisition, construction, installation, modernization, expansion or conversion of fixed assets, or for working capital necessary for a firm to implement its adjustment plan. Technical assistance may be used for management and operational assistance, feasibility studies and related research to aid in developing and implementing a firm's recovery plan.

Firms may also benefit indirectly from financial assistance available to trade-impacted communities under provisions of the Trade Act in a manner similar to the public works, business development and Title IX programs administered by the Department's Economic Development Administration ("EDA") pursuant to the Public Works and Economic Development Act of 1965, as amended. These other programs of EDA provide business development loans to assist firms in certain designated places identified on the basis of economic distress such as unemployment; loans and grants to states, redevelopment areas and other nonprofit local entities for public works projects and development facilities and for a comprehensive program of adjustment to an actual or threatened economic dislocation or adjustment problem.

The Small Business Administration ("SBA") administers three programs of potential assistance to small producers: a business loan program of direct, participating, and guaranteed loans; a loan program for local development companies; and a management assistance program for small business. Eligibility for SBA business loans is limited to independently owned and operated firms that are not dominant in their field and do not have over 250 average employment. The amount of the guaranteed loan, however, cannot exceed $500,000, and participating and direct loans have even lower limits.

The Farmers Home Administration ("FmHA") of the Department of Agriculture has programs of both farm ownership loans and farm operating loans that could benefit beekeepers which operate family farms. Honey processors may be able to participate in a program of loan guarantees to businesses located in areas other than cities of over 50,000 population. As with EDA business loans, however, these guarantees are not available to firms in industries characterized by long-term overcapacity. FmHA also can make grants and loans to public bodies, such as local governments and development organizations, in areas other than cities of over 10,000 population. These funds can be used for public works projects, such as utility extensions and access roads, that would benefit industry.

Additional information about the adjustment assistance program and copies of the report, "Prospects for Adjustment Assistance for Producers and Processors of Honey," are available from the Office of Public Affairs, Economic Developemnt Administration, Room 7019, U.S. Department of Commerce, Washington, D.C. 20230 (telephone 202/377-5113).

JACK W. OSBURN, JR.,
Chief, Trade Act Certification Division, Office of Planning and Program Support.

Maritime Administration

PERMANENT CAPITAL CONSTRUCTION FUND AGREEMENT APPLICATIONS

Possible Public Availability Under Freedom of Information Act

In Doc. 76-22489 appearing in the FEDERAL REGISTER on August 3, 1976 (41 FR 32460) notice was given that in the course of administering the Capital Construction Fund (CCF) program under section 607, Merchant Marine Act, 1936,

V 41 161 AUG 18 76 UMI

as amended (46 USC 1177), the Maritime Administration had determined that applications for permanent CCF Agreements would be subject to disclosure upon request under the Freedom of Information Act (FOIA) (5 USC 552), unless such applications (or specific parts thereof) can be shown to come within one of the enumerated exemptions under the FOIA (5 USC 552).

All applicants, both past and future, for either interim or permanent CCF Agreements, were requested to submit justification for claimed exemptions and/or comments as appropriate by September 7, 1976.

On the basis of requests received from interested parties, good cause having been shown, the time for submission of responses is hereby extended to close of business on October 13, 1976.

Authority by Order of the Assistant Secretary for Maritime Affairs.

Dated: August 13, 1976.

JAMES S. DAWSON, Jr.,
Secretary,
Maritime Administration.

[FR Doc.76-24250 Filed 8-17-76;8:45 am]

REQUIREMENT THAT CERTAIN VESSELS FINANCED UNDER THE FEDERAL SHIP FINANCING PROGRAM BE INSPECTED AND CERTIFICATED BY THE U.S. COAST GUARD

Policy

Notice is hereby given that the Maritime Administration is confirming that all vessels which carry freight and/or passengers (including tugs, tug/supply and supply vessels and crew boats) in order to qualify to be financed under the Federal Ship Financing Program shall be deemed to be carrying such freight and/or passengers for hire and shall be inspected and certificated in accordance with the applicable rules and regulations issued by the United States Coast Guard. In addition, pursuant to Section 298.4(g) of Title 46 of the Code of Federal Regulations (General Order 29) all vessels financed under the Federal Ship Financing Program are required to meet (1) all requirements to entitle the vessel to the highest classification and rating of the American Bureau of Shipping for vessels of the same age and type except in those cases where such requirements are not applicable to the type of vessel involved, and (2) all requirements of applicable laws, treaties and conventions, and the rules and regulations issued thereunder, including, without limitation thereto, the International Convention for Safety of Life at Sea, and all laws, rules and regulations administered by the United States Coast Guard, the Bureau of Customs, Treasury Department, the Federal Communications Commission, the Public Health Service, Department of Health, Education, and Welfare, or their successors.

The notice amends the notice published June 24, 1976 (41 FR 26055).

Authority: Sections 204(b) and 1109, Merchant Marine Act, 1936, as amended (46 USC 1114), Reorganization Plans No. 21 of 1950 (64 Stat. 1273) and No. 7 of 1961 (75 Stat. 842) as amended by P.L. 91-469 (84 Stat. 1036), and Department of Commerce Organization Order 10-8 (38 FR 19707, July 23, 1973).

By order of the Assistant Secretary for Maritime Affairs.

Dated: August 13, 1976.

JAMES S. DAWSON, Jr.,
Secretary.

National Oceanic and Atmospheric Administration

NATIONAL MARINE FISHERIES SERVICE

Receipt of Application for a Scientific Research Permit: Clarification

On July 12, 1976, notice was published in the FEDERAL REGISTER (41 F.R. 28566) that Kenneth S. Norris, University of California, Santa Cruz, California, had applied for a permit to take by radio tagging up to 30 spotted dolphins (*Stenella attenuata*), 30 spinner dolphins (*Stenella longirostris*), 30 whitebelly dolphins (*Delphinus delphis*); and to take up to 500 animals of these species by tagging with dorsal fin roto tags, to conduct research on the behavior of porpoises in the yellowfin purse seine fishery; and to collect specimen materials from dead animals.

The Applicant has requested to clarify the application in the following manner:

In the course of the behavioral research it is planned to conduct 20 experimental seine net sets which may result in the inadvertent killing of up to 340 animals.

With the above clarification, the application remains as described in the July 22, 1976, Notice of Receipt of Application.

Documents submited in connection with this application are available in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Secretary of Commerce is informing the Marine Mammal Commission and its Committee of Scientific Advisors of this clarification.

Written views or data or requests for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before September 17, 1976. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this notice in support of this application are those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Dated: August 13, 1976.

HARVEY M. HUTCHINGS,
Acting Associate Director for Resource Management, National Marine Fisheries Service.

Office of the Secretary

PROPOSED CREATION OF "SCIENCE COURT"

Colloquium

A Colloquium on a proposal made to the Commerce Technical Advisory Board for creation of a "Science Court" will be held at the Xerox International Center for Training and Management Development on Route 7, near Leesburg, Virginia, about 35 miles northwest of Washington, D.C. Registration will begin at 5:00 p.m., Sunday, September 19, 1976, and the Colloquium will commence at 9:00 a.m. Monday, September 20, and conclude at 5:00 p.m. on Tuesday, September 21, 1976.

The Colloquium is sponsored jointly by the Commerce Technical Advisory Board of the U.S. Department of Commerce, the National Science Foundation, and the American Association for the Advancement of Science. The sponsoring organizations take no position on the merits of the proposal.

The Science Court, as proposed, would pass judgment on the state of scientific and technical knowledge in cases where controversy exists at a time when the best factual basis is needed for decisionmaking on important, controversial public policy issues. The Court's fact finding procedure would be consistent with society's techniques for resolving controversies and would utilize experience of both the legal and the scientific communities.

The purpose of the Colloquium is to expose the concept of the Court to an organized forum in order to offer proponents and others the opportunity to generate enough understanding to decide whether further consideration for implementation of the concept is justified.

Agenda is as follows:

AGENDA

SEPTEMBER 19

5:00 to 10:00 p.m. Registration—Xerox Center, Leesburg, Virginia.

6:00 p.m. Informal Mixer.

7:00 to 8:00 p.m. Buffet Dinner.

SEPTEMBER 20

8:00 a.m. Registration continues.

9:00 a.m. to 5:00 p.m. Sessions.

Introduction

Betsy Ancker-Johnson, Assistant Secretary for Science and Technology, U.S. Department of Commerce

Session I

The Science Court—Its Potentialities and Its Problems

Chairman: Arthur Kantrowitz, Chairman of Avco Everett Research Laboratory

Speakers: Richard O. Simpson, former chairman of U.S. Consumer Product Safety Commission; Margaret Mead, American Museum of Natural History

Luncheon

Chairman: Philip H. Abelson, Editor, Science.

Speaker: Russell E. Train, Administrator, Environmental Protection Agency

Session II

The Science Court—Its Potentialities and Its Problems (Continued).

Chairman: Donald B. Straus, president of research institute, American Arbitration Association

Speakers: Alan Mazur, professor of sociology, Syracuse University; Alan McGowan, President of Scientists Institute for Public Information; John Noble Wilford, N.Y. Times, Robert Cowan, Christian Science Monitor, Phillip Boffey, Science

6:00 p.m. Informal Mixer

7:00 p.m. Dinner

Chairman: Frederick Seitz, president, The Rockefeller University

Speaker: H. Guyford Stever, Science Advisor to the President

SEPTEMBER 21

9:00 a.m. to 5:00 p.m. Sessions

Session III

Science Court Procedures

Chairman: Gerald Piel, Publisher, Scientific American

"The Food Additive Controversy": Howard Bauman, vice president, science technology, Pillsbury Co.; James S. Turner, attorney, Swankin & Turner

"The Nuclear Power Controversy": Hans Bethe, Professor Emeritus, Cornell University; John Holdren, University of California, Berkeley

Luncheon

Chairman: Betsy Ancker-Johnson

Speaker: The Honorable Elliot L. Richardson, Secretary of Commerce

Session IV

Summary Discussion

Chairman: Arthur Kantrowitz

5:00 p.m. Adjournment

Public attendance is invited, but prior registration and payment of a $95 fee is necessary. The fee includes: two night's accommodations (single room, shared bath with one other registrant), two breakfasts (Monday and Tuesday), two lunches (Monday and Tuesday), and two dinners (Sunday and Monday). Each registrant will be provided with a copy of the proceedings when published. Applications for attendance and additional information may be obtained from Mr. Frank Cacciapaglia, Jr., or Mrs. Florence Feinberg, Office of Assistant Secretary for Science and Technology, U.S. Department of Commerce, Washington, D.C. 20230; telephone (202) 377-5065.

Dated: August 12, 1976.

BETSY ANCKER-JOHNSON,
Assistant Secretary for Science and Technology.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 75N-0248]

VITAMIN K ACTIVE SUBSTANCES IN ANIMAL FEEDS

Food Additive Status

The Food and Drug Administration has received a request from Heterochemical Corporation to review and clarify the legal status of several vitamin K substances currently being used as supplements in animal feed. In order to acquire the information necessary to determine whether these products are generally recognized as safe (GRAS) or food additives, the Commissioner is considering whether to propose under the provisions of § 121.41(b) (21 CFR 121.41(b)) to determine that menadione, menadione sodium bisulfite, and menadione sodium bisulfite complex are not GRAS and are food additives subject to section 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348). Before making this determination, he is soliciting comments to be received by October 18, 1976.

Vitamin K was discovered and named by Dam[1] of Copenhagen in 1935, when he observed in newly hatched chicks a fatal hemorrhagic diathesis, which could be cured or prevented by administering a nonsaponifiable nonsterol fraction of hog liver or alfalfa. Later it was observed that the delayed clotting time of the blood was due to low prothrombin content. Physical and chemical differences in the vitamins thus isolated led to the designation of K_1 for the vitamin from green leaves and K_2 for that formed by bacteria. Later, several analogues of vitamin K were synthesized; these have generally been found to be more stable and suitable for use as feed ingredients. Menadione, menadione sodium bisulfite and menadione bisulfite complex have been designated as being in the K_3 series.

By the mid-1950's, FDA had stated on a number of occasions that these Vitamin K active substances were permissible for use in poultry feeds, based upon a recognized need for such supplementation under certain conditions. No such need had been recognized and documented in other animal species. In addition to the various informal opinions thus expressed in early correspondence, an order concerning menadione for human use, published in the FEDERAL REGISTER of July 16, 1963 (28 FR 7262), determined that menadione in animal feed is not a food additive as defined in section 201(s) of the act (21 U.S.C. 321(c)).

However, the history of use of Vitamin K active substances in the possession of FDA does not provide an adequate basis upon which to conclude that such substances for animal use are GRAS under the criteria set forth in § 121.3(b)(2)(iv) (21 CFR 121.3(b)(2)(iv)). The data and information presently available to the Commissioner are on public display and available for public examination at the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852. A period of 60 days is provided within which interested persons may review the data and information and/or file additional data and comments with the Hearing Clerk, Food and Drug Administration. Copies of all comments and data will be made available for examination in the Hearing Clerk's office.

The Commissioner will evaluate all comments received. If it is concluded that there is convincing evidence that the vitamin K active substances are GRAS, a regulation will be published affirming the substances as GRAS. If there is a lack of convincing evidence that the substances are GRAS, a notice will be published that such substances are food additives as defined in section 201(s) of the act.

If he determines that the substances are food additives, the Commissioner may: (1) Promulgate a food additive regulation governing use of the additive; or (2) promulgate an interim food additive regulation governing use of the additive; or (3) require discontinuation of the additive; or (4) adopt any combination of the above approaches.

Interested persons may, on or before October 18, 1976, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this matter. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: August 11, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

Third Report of the Director; Correction

The Director, National Heart, Lung, and Blood Institute wishes to acknowledge an erroneous statement on page 50 of the report indicated above.

The erroneous statement reads as follows:

Establishment of an Interagency Coordinating Committee with the Office of the Assistant Secretary for Health (ASH) for the implementation of National Blood Policy and operation of the American Blood Commission (ABC).

The statement should read:

Implementation of the National Blood Policy involves a multi-agency effort, both within and outside of the Department of Health, Education, and Welfare. The Office of the Assistant Secretary for Health has been assigned the lead responsibility for coordinating the implementation of the Policy.

WORKING GROUP ON SAFER HOSTS AND VECTORS RECOMBINANT DNA MOLECULE PROGRAM ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of a Working Group on Safer Hosts and Vectors of the Recombinant DNA Molecule Program Advisory Committee on September 12, 1976, 12 Noon, at the National Institutes of Health, Building 31, Conference Room 9, Bethesda, Maryland.

The entire meeting will be open to the public to evaluate putative safer hosts and vectors for research involving recombinant DNA molecules. Attendance by the public will be limited to space available.

Dr. William J. Gartland, Executive Secretary, National Institutes of Health, Building 31, Room 4A52, Bethesda, Maryland 20014, telephone (301) 496-2323, will provide summaries of the meeting, rosters of committee members and substantive program information.

Dated: August 11, 1976.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

Office of Education

BILINGUAL EDUCATION

Closing Date for Receipt of Applications for Contracts for Coordination of Technical Assistance by State Educational Agencies for Programs

Pursuant to the authority contained in the Bilingual Education Act, Title VII of the Elementary and Secondary Education Act of 1965, as amended by Pub. L. 93-380 (20 U.S.C. 880b-880-13), notice is hereby given that applications for contracts for the coordination of Technical Assistance are being accepted from State Educational Agencies in the States where programs of bilingual education assisted under the Bilingual Education Act were operated during the fiscal year preceding the fiscal year for which assistance is sought.

Funds made available pursuant to this notice shall be used for the coordination of technical assistance to programs of bilingual education assisted under the Bilingual Education Act and operated by local educational agencies in the State of the applicant.

The amount paid to any State educational agency pursuant to this notice shall not exceed 5 percent of the aggregate of the amounts paid under Part A of the Act to local educational agencies in the State of such agency in the fiscal year preceding the fiscal year for which assistance under this subpart is sought.

Applications must be received by the U.S. Office of Education Application Control Center on or before September 10, 1976.

A. APPLICATIONS SENT BY MAIL

An application sent by mail should be addressed as follows: U.S. Office of Education, Grant and Procurement Management Division, Application Control Center, 400 Maryland Avenue, SW., Washington, D.C. 20202, Attention: 13.-403. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than September 6, 1976 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Services; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare or the U.S. Office of Education.

B. HAND DELIVERED APPLICATIONS

An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, and Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. PROGRAM INFORMATION AND FORMS

Information and application forms may be obtained from the Office of Bilingual Education, Office of Education, 400 Maryland Avenue, SW. (Reporter's Building, Room 421), Washington, D.C. 20202.

D. APPLICABLE REGULATIONS

Grant awards made pursuant to the notice will be subject to the regulations in 45 CFR Part 123, relating to the Bilingual Education Act, and except where inconsistent with Part 123, to the Office of Education General Provisions Regulations in 45 CFR Parts 100, 100a, and 100c. In preparing applications, applicants should be guided by the regulations published in the FEDERAL REGISTER on June 11, 1976. Applicants' attention is directed in particular to Subpart F—§ 123.51-123.60 relating to Coordination of Technical Assistance by State Educational Agencies.

(20 U.S.C. 880b-880b-13)

(Catalog of Federal Domestic Assistance Number 13.403, Bilingual Education)

Dated: August 13, 1976.

WILLIAM F. PIERCE,
Acting U.S. Commissioner of Education.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N-76-605]

BATTLE CREEK AND MOUNTAIN VIEW

Hearing

In the matter of: Battle Creek and Mountain View, Martin Price, President, and First American Land Corporation, 76-168-IS, OILSR No. 0-1244-54-51 Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b).

Notice is hereby given that: 1. Battle Creek and Mountain View, Martin Price, President, and First American Land Corporation, authorized agent and officers, hereinafter referred to as "Respondent" being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706 (d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Battle Creek and Mountain View subdivisions located in Page County, Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 8, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered,* That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on September 21, 1976 at 10 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20210 on or before August 31, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45 (b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

Dated: August 9, 1976.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-76-602]

BEACHES OF NOSARA

Hearing

In the matter of: Beaches of Nosara, Alan D. Hutchison, Inversiones Nicoya, S. A., Y-1103-Is, OILSR NO. 0-0478-60-15.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b).

Notice is hereby given that: 1. Beaches of Nosara, Alan D. Hutchison, Inversiones Nicoya, S.A., authorized agent and officers, hereinafter referred to as "Respondent" being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 17.10, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706 (d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property for Beaches of Nosara located in Province of Guanacaste, Costa Rica, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 3, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered,* That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on September 24, 1976 at 10 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 3, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 11, 1976.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-76-611]

BUNKER HILL HEIGHTS

Hearing

In the matter of: Bunker Hill Heights, Martin Price, President and First American Land Corporation, 76-165-IS, OILSR No. 0-1883-57-11, Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160 (b).

Notice is hereby given that: 1. Bunker Hill Heights, Martin Price, President and First American Land Corporation, authorized agent and officers, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Bunker Hill Heights located in Berkley County, Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 8, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunities for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered,* That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on September 21, 1976 at 10 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before August 31, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 9, 1976.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-76-601]

CALIFORNIA SIERRA HIGHLANDS

Hearing

In the matter of: California Sierra Highlands #1 Tract 2272, Bob C. Gaston, President and Land Dynamics, OILSR No. 0-1657-04-324, 76-199-IS: Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b).

Notice is hereby given that: 1. California Sierra Highlands #1 Tract 2272, Bob C. Gaston, President and Land Dynamics, authorized agent and officers,

V 41 161 AUG 18 76 UMI

hereinafter referred to as "Respondent", being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–488) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for California Sierra Highlands #1 Tract 2272, located in Fresno County, Fresno, California, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 30, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on September 29, 1976 at 2 p.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 8, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45 (b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 11, 1976.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-76-606]

GREENE ACRES

Hearing

In the matter of: Greene Acres, Martin Price, President and First American Land Corporation, 76–167–IS OILSR No. 0–0990–54–32; Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b).

Notice is hereby given that: 1. Greene Acres, Martin Price, President and First American Land Corporation, authorized agent and officers, hereinafter referred to as "Respondent" being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Greene Acres Subdivision located in Greene County, Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 8, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160 ((d), *it is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on September 21, 1976 at 10 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before August 31, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 9, 1976.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-76-604]

HOLIDAY HILL, ET AL.

Hearing

In the matter of: Holiday Hill, Mosby's Raiders, Hideout and Helms Mountain, Martin Price, President and First American Land Corporation, 76–170–IS, OILSR No. 0–1840–54–91; Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b).

Notice is hereby given that: 1. Holiday Hill, Mosby's Raiders, Hideout and Helms Mountain, Martin Price, President and First American Land Corporation, authorized agent and officers, hereinafter referred to as "Respondent" being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and property Report for Holiday Hill, Mosby's Raiders and Helms Mountain located in Page County, Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 8, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on September 21, 1976 at 10 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before August 31, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

Dated: August 9, 1976.

[Docket No. N-76-600]

NATURAL LAKES

Hearing

In the matter of: Natural Lakes, Thomas A. Thiel, President, OILSR No. 0–3219–58–66, 76–195–IS; Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(b).

Notice is hereby given that: 1. Natural Lakes, Thomas A. Thiel, President, authorized agent and officers, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1710, et seq.) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Natural Lakes, located in Vilas County, Wisconsin, contain untrue statements of material facts or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 29, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street SW., Washington, D.C., on October 28, 1976 at 2 p.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before October 7, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

1. Round Head Mountain, Martin Price, President and First American Land Corporation, authorized agent and officers, hereinafter referred to as "Respondent" being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1710, *et seq.*) received a Notice of Proceedings and Opportunity for Hearing issued June 22, 1976, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 C.F.R. 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property for Round Head Mountain Subdivision located in Page County, Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received July 8, 1976, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered* that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on September 21, 1976 at 10 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before August 31, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceeding shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b) (1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 9, 1976.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

CIVIL AERONAUTICS BOARD

[Order 76-8-59; Docket 29580]

ALLEGHENY AIRLINES, INC.

Order Staying Further Procedural Steps in Accordance With Expedited Procedure

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 11th day of August, 1976.

On July 28, 1976, Allegheny Airlines, Inc. (Allegheny) filed an application pursuant to Subpart M of Part 302 of the Board's Procedural Regulations requesting an amendment of its certificate of public convenience and necessity for Route 97 to permit nonstop service, without subsidy eligibility, between Cincinnati and Cleveland. Both points are on segment 1.

Upon consideration of the foregoing and pursuant to section 302.1305(a) of the Board's Procedural Regulations, we have decided to stay further procedural steps with respect to the application pending further order of the Board.

Accordingly, *it is ordered:* 1. That further procedural steps with respect to the application of Allegheny Airlines, Inc., in Docket 29580, be and they hereby are stayed pending further order of the Board; and

2. That this order shall be served upon all parties served by Allegheny in its application.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[1]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-24221 Filed 8-17-76;8:45 am]

[Docket No. 24869; Order 76-8-67]

BAGGAGE ALLOWANCE TARIFF RULES IN OVERSEAS & FOREIGN AIR TRANSPORTATION

Order Denying Petition for Reconsideration

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 12th day of August 1976.

By Order 76-3-81, decided February 25, 1976 and effective March 13, 1976, the Board issued its final opinion in Baggage Allowance Tariff Rules In Overseas & Foreign Air Transportation, Docket 24869, which among other things ordered cancellation of all tariffs for excess-baggage charges in overseas and in foreign air transportation within 90 days (June 10, 1976). The Board, upon request of the Department of State, granted a 30-day deferral of the previously ordered tariff cancellation (Order 76-6-73 June 9, 1976).

By Order 76-7-32, July 8, 1976, the Board denied a further request to delay the cancellation date of various tariffs establishing excess-baggage charges in overseas and foreign air transportation. Accordingly, the excess-baggage rates of one percent of the applicable one-way first-class fare per kiloram were ordered canceled prior to July 11, 1976. On July 16, Lufthansa German Airlines (Lufthansa) filed a petition for reconsideration of Order 76-7-32.

In support of its petition, Lufthansa asks the Board to reconsider its decision on the basis of information which was unavailable to the Board prior to the issuance of its order. Lufthansa notes that the Board's investigation of the baggage rates extended over 3 years, with many conflicting positions being presented. Since the Board's investigation took such a long time, Lufthansa argues that the Board's insistence that carriers resolve the issue within 120 days is unrealistic and unsettling. Further, Lufthansa suggests that the Board had not read, prior to its decision, a communication submitted by the Federal Republic of Germany to the State Department, which urgently requested further delay to resolve the complex issue. Finally, Lufthansa argues that the Board's action places Lufthansa in a position where it will be in violation of either United States or German law, due to conflicting excess-baggage tariff rules.

Donald L. Pevsner, Esq., in an answer in opposition to Lufthansa's petition, asserts that the key arguments presented by Lufthansa are not new, and should not alter the Board's decision. Mr. Pevsner argues that the threat of fines on Lufthansa by the German Government

[1] Minetti and West, members, filed the dissent. Filed as part of the original document.

V 41 161 AUG 18 76 UMI

should be depreciated as the airline is largely owned by the government, making the fines merely "paper transfers."

Upon full consideration of Lufthansa's petition, Mr. Pevsner's reply, and other relevant matters, the Board has decided to deny Lufthansa's petition. Lufthansa has presented no new issues that the Board has not considered previously.

The excess-baggage issue is not new. The Board has stated its objections to the antiquated international excess-baggage rates nearly every year since 1964, and IATA has been discussing the matter for over ten years. All interested persons, including foreign air carriers, who were all made parties, were welcome to participate in the Board's excess-baggage investigation, which as Lufthansa admits was extensive and detailed. There were many other forums and ample time to resolve this issue, e.g., in IATA conferences, but no action has been taken in U.S. foreign air transportation even though optional "piece" systems for the free allowance were introduced in the Caribbean and within-Europe areas. Under these circumstances, we see no new or compelling reasons which would cause us to alter our decision in Order 76–7–32; therefore the petition for reconsideration of Lufthansa will be denied.

Accordingly, it is ordered, that:

The petition of Lufthansa German Airlines for reconsideration of Order 76–7–32 be and hereby is denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76–24223 Filed 8–17–76;8:45 am]

[Docket No. 29871; Order 76–8–75]

HAWAIIAN AIRLINES, INC.

Order Regarding Increased Air Freight Rates

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of August 1976.

By tariff revisions[1] issued May 10 and marked to become effective June 24, 1976, Hawaiian Airlines, Inc. (HAL) proposed to increase general and specific commodity rates and charges, except minimum charges, by an average of 1.3 cents per pound for a 22.7 percent increase in revenue.

By Order 76–6–157, dated June 23, 1976, the Board suspended and instituted an investigation of HAL's proposal in order to afford it an adequate period of time within which to evaluate the proposal. This order is the result of that evaluation.

A joint complaint requesting suspension and investigation of the proposal had been filed by the State of Hawaii, the County of Hawaii, and the County of Maui (the State).[2] The complaint alleges inter alia, that the State of Hawaii is vitally dependent upon air freight and must rely upon air service to an unusual degree; that increases of the proposed magnitude present a serious threat to the farmers, growers, and consumers of Hawaii; that the proposed increase, when coupled with previous increases since May 1974, amounts to an 85 percent increase in two years; that HAL should not compare its rates with those on the Mainland since it has greater density of freight per mile flown than do other local service carriers; that, with the additional freight per scheduled departure, HAL should have substantially lower noncapacity expense per pound than many Mainland local service carriers; that, if the usual elasticity of demand follows the proposed increase, the carrier will have about the same revenue that will occur with the present rate of growth without the increase; and that the computation of revenues and expenses requires investigation and further information with regard to the allocation of expenses to air freight, especially future cost escalations and productivity gains.

The State also alleges, among other things, that since 1968, the carrier's overall rate of return has improved from 7 percent to 15.3 percent in 1974; although costs are up, freight yields have increased an even greater amount; average forecast load factor should be about 56 percent and not 48.8 percent and, consequently, aircraft operating expenses per ton-mile will be reduced; revenue ton-miles for the first quarter 1976 are up significantly; HAL's answer relies upon irrelevant comparisons such as postal rate increases, dollar amount increases in Mainland-Hawaii rates for other carriers, and an allegation that the higher budgets of certain Hawaiian families increase the level of rates the traffic will bear; HAL's freight service is not comparable to that on the Mainland local service carriers since most local service carriers offer no all-cargo service; and, as indicated, since HAL's return in 1974 exceeded the Board's standard of 12.35 percent found for local service carriers, it should not be granted a further increase of 24 percent.

In support of its proposal and in an answer to the complaint HAL asserts, inter alia, that losses in freight operations for 1975 totaled $1.1 million, and, based upon 1975 traffic and revenues, had this proposed increase been in effect during 1975, losses would not have been eliminated but reduced to about $112,000; carrier costs of operation have risen substantially during this period; HAL's low level of rates is demonstrated by comparison with Mainland carriers serving markets of similar distance; and, even after the proposed increases are applied, the rates charged by HAL will continue to be lower than those now in effect in such markets in nearly all instances.

In view of all relevant factors, the Board concludes that the complaint does not set forth facts sufficient to warrant investigation, and consequently, the investigation instituted in Order 76–6–157, supra, will be terminated and the suspension ordered therein vacated.

The rates proposed would reduce but not eliminate HAL's cargo operation losses and are considerably below rates in comparable Mainland markets. The State contends that HAL should have lower noncapacity unit costs than Mainland carriers because of the greater productivity of its ground employees and facilities. As evidence of such productivity, complainant presents data showing that HAL has "greater density" because it generates more freight ton-miles per aircraft-mile flown and per departure and more tons per departure than carriers on the Mainland.[3] However, no demonstration is made as to how "greater density" (as defined in the complaint) translates into lower non-capacity unit costs, since such costs typically vary directly with the volume of traffic handled.

While it is true, as complainant states, that rates have risen substantially in the past two years, these increases represent the total of all requests by Hawaiian for increases in its freight rate level that have become effective since 1968. Thus, spreading the increase over the past eight years amounts to about 8 percent annually, which is not out of line with cost-based rate increases on the Mainland during this period. In general, the rates proposed are significantly below rates in Mainland markets. Furthermore, although complainant refers to the high percentage increases in rates, no evidence is presented as to any actual deleterious effect upon shippers, consumers, and the economy at large.

Although, as the State asserts, freight yields have outstripped cost increases since 1973, freight yield per ton-mile for 1973 was abnormally low, only 82 percent of that for 1968. Since 1968, at a matter of fact, unit operating costs covering HAL's overall operations have increased significantly. Furthermore, costs in 1975 increased substantially (about 15 percent) over the previous year. Between 1968 and 1975, we find that yields have risen about 20 percent while overall unit costs have increased by about 37 percent.

The proposed rates will not result in excess profits for HAL; rather they will help reduce losses. While the complainant alleges that HAL's return on investment (ROI) in recent years has been sufficient and even above the 12.35 percent standard set by the Board for local service carriers, the 15.27 percent quoted for 1974 was based upon a "corporate rate of return" method.

The appropriate measure of the company's profits for the purpose of determining its proper rate level is its regulatory rate of return on investment used by the Board in formal proceedings. HAL's system ROI (covering both passenger and cargo services) for the year ended September 1975, adjusted to reflect a year's effect of the passenger-fare increase effective February 1, 1976, was 6.9 percent,[4] while the ROI for freight-only operations for the year ended December 1975, was −23.79 percent. Reconstructed to reflect a year's effect of the currently proposed freight rate increase, the ROI is estimated to have been −0.15 percent. Furthermore, the complainants' use of 1974 ROI to indicate extreme profitability of the carrier fails to take into account that 1974 apparently was a peak year. During the past eight years the corporate ROI, except for 1974, ranged from 11.34 percent to a low of 2.06 percent. Further, HAL's corporate ROI for the period ended December 1975 was 0.7 percent and for the year ended March 1976 was 4.3 percent, significantly below that reported in 1974. The above data effectively moot the allegations of the complainant which go to the validity of the carrier's forecast, since our evaluation and conclusion is based solely upon the carrier's latest reported experience.

The State also criticizes the carrier for using escalation factors of 14.7 percent (excluding fuel) and 20.6 percent (including fuel) applied to its 1975 costs to develop forecast profit data. The State asserts that HAL, in support of a passenger-fare increase proposal earlier this year, used lower escalation rates, ranging between 10.2 to 10.9 percent for costs excluding fuel expenses and from 8.6 to 9.3 percent including fuel, utilizing the year ended September 30, 1975, as a base. As indicated above, however, in reaching its conclusion that the rate proposal should be permitted to become effective, the Board relied not upon any forecast of cost increases, but upon experienced 1975 costs. The complaint is thus, also to this extent, mooted.

While the State faults HAL's cost justification on the ground that it lacks sufficient detail and backup information to permit proper analysis, it appears to us that the cost data presented are sufficiently detailed as justification of a tariff proposal. The carrier has indicated in considerable detail the allocation factors used for various expense items and our analysis indicates these are, in general, consistent with accepted costing methodology.

Furthermore, the carrier and the State contest the appropriate load factor to be employed in forecasting profitability, particularly in light of a significant increase in traffic volume in the first quarter of 1976. The carrier's use of its 48.8 percent load factor experienced in 1975 does not appear unreasonably low, in view of its actual experience during the past 6 years (which showed load factors as low as 36.5 percent), the fact that the rate of traffic growth for April and May 1976 declined significantly,[5] and the 1975 average Mainland cargo aircraft load factor for combination passenger-cargo carriers of 49.5 percent.[6]

The State also argues that the carrier can obtain the desired increase in revenues from normal traffic growth alone without any increase in rates. This argument, however, ignores the fact that normal traffic growth results in added expenses as well as added revenues.

Finally, as indicated above, although the current proposal would result in an average rate increase of 24 percent, the increase would amount only to 1.3 cents per pound of freight. Thus, the moderate increase per pound appears comparatively high only because of the low level of rates currently in effect.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof:

It is ordered, That:

1. The investigation instituted in Order 76–6–157 be terminated and the suspension ordered therein vacated;

2. The complaint of the State and County of Hawaii and the County of Maui, in Docket 29371, is dismissed;

3. The motion of the State and County of Hawaii and the County of Maui to file an otherwise unauthorized reply to the answer to the complaint is granted;

4. The motion of Hawaiian Airlines, Inc., to file an otherwise unauthorized amendment to its answer to the complaint is granted; and

5. Copies of this order be filed with the tariff and served upon the State and County of Hawaii, the County of Maui, and Hawaiian Airlines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 76–24224. Filed 8–17–76; 8:45 am]

[Docket No. 27573; Order 76–8–64]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Specific Commodity Rates

Issued under delegated authority August 12, 1976.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of Traffic Conference 2 of the International Air Transport Association (IATA). The agreement was adopted at the 37th Meeting of the TC2 Specific Commodity Rates Board in Geneva held July 5–9, 1976.

The agreement would establish several new specific commodity descriptions and change the area of application on several descriptions as well as change the descriptions as shown in the Attachment and establish specific commodity rates for several items to apply between various world markets outside of air transportation (Europe/Africa/Middle East). We will approve the descriptions as shown in the Attachment which have general application within air transportation as defined by the Act but will disclaim jurisdiction with respect to the rates which involve points solely outside of air transportation.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14:

1. It is not found that the specific commodity descriptions incorporated in Agreement C.A.B. 26036, which have general application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act.

2. It is not found that the specific commodity rates incorporated in Agreement C.A.B. 26036 which involve transportation solely between foreign points affect air transportation within the meaning of the Act.

Accordingly, it is ordered, That:

1. Those portions of Agreement C.A.B. 26036 set forth in the Attachment which have general application in air transportation as defined by the Act, be and hereby are approved:

2. Jurisdiction be and hereby is disclaimed with respect to that portion of Agreement C.A.B. 26036 described in finding paragraph 2 above.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

0301----	Fish and Seafood—Excluding Caviar [14]
0301----	Fish and Seafood—Excluding Caviar and/or Fish, Live, Inedible [24]
0302----	Fish and Seafood—Excluding Caviar, Salmon, Shellfish and/or Fish, Live, Inedible [8]

---

[1] Revisions to Tariff C.A.B. No. 4 issued by Hawaiian Airlines, Inc.

[2] The State, on June 28, filed a reply to HAL's answer to the complaint, which was accompanied by a motion for leave to file an unauthorized document. On July 8, HAL filed an amendment to its answer accompanied by a motion to file an unauthorized document in order to reply to the State. In view of the Board's delayed action, both motions are granted.

[3] In its answer, HAL challenges the data used in the State's density analysis.

[4] See Order 76–116, January 30, 1976.

[5] The rates of growth in freight ton-miles for various periods in 1976 over comparable periods of 1975 were as follows: first quarter of 1976, 23.9 percent; April, 10.7 percent; and May, 0.1 percent.

[6] Even if the State's assumption of an appropriate cargo load factor of 56 percent is accepted, arguendo, HAL's return on investment for 1975, after adding the revenue from the rate increase proposed, would have been only 1.5 percent.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN MAN-MADE FIBER TEXTILE PRODUCTS FROM THE REPUBLIC OF CHINA

Amending Import Level

AUGUST 13, 1976.

On December 24, 1975, there was pubished in the FEDERAL REGISTER (40 FR 59475) a letter dated December 19, 1975 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, implementing those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, as amended, between the Governments of the United States and the Republic of China, which establish specific export limitations on certain cotton and man-made fiber textile products, produced or manufactured in the Republic of China and exported to the United States during the twelve-month period which began on January 1, 1976. A correction of certain of the levels of restraint in the letter of December 19, 1975 was published in the FEDERAL REGISTER on January 5, 1976 (41 FR 814).

As set forth in the letter of December 19, 1975, the levels of restraint are subject to adjustment pursuant to paragraph 8(a) (ii) of the bilateral agreement which provides that specific levels of restraint may exceed current-year limits by up to 6 percent, with that same amount being deducted from the applicable levels of the succeeding agreement year.

Accordingly, at the request of the Government of the Republic of China and pursuant to the provision of the bilateral agreement referred to above, there is published below a letter of August 13, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the level of restraint applicable to man-made fiber textile products in Category 221 for the twelve-month period which began on January 1, 1976.

August 13, 1976.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Commissioner of Customs
Department of the Treasury
Washington, D.C. 20229

DEAR MR. COMMISSIONER: On December 19, 1975, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning January 1, 1976 and extending through December 31, 1976 of cotton and man-made fiber textile products in certain specified categories, produced or manufactured in the Republic of China, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to paragraph 8(a)(ii) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, as amended, between the Governments of the United States and the Republic of China, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to amend, effective on August 16, 1976, the level of restraint established for Category 221 to 4,069,382 dozen.[2]

2. The actions taken with respect to the Government of the Republic of China and with respect to imports of man-made fiber textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553.

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, as amended, between the Governments of the United States and the Republic of China which provide, in part, that: (1) within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems.

[2] The level has not been adjusted to reflect any entries made after December 31, 1975.

This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

CONSUMER PRODUCT SAFETY COMMISSION

NORTHWICK MILLS, INC., ENDURO MILLS, AND FRED W. ROSEN

[CPSC 76-6]

Commencement of Enforcement Proceeding and Notice of Prehearing Conference

AUGUST 13, 1976.

On June 7, 1976, by direction of the Commission, the Secretary issued a Notice of Enforcement prepared by the Bureau of Compliance and directed to Northwick Mills, Inc., a corporation doing business as Enduro Mills and Fred W. Rosen, individually and as an officer thereof (Respondents) declaring in substance that Staff believes that the Respondents have violated the provisions of the Federal Trade Commission Act (15 U.S.C. 41 et seq.) (FTCA), the Flammable Fabrics Act (FFA) (15 U.S.C. 1191 et seq.), the rules and regulations promulgated thereunder (16 CFR part 302), and the Standard for the Surface Flammability of Carpets and Rugs (FF 1-70, 35 FR 6211, April 16, 1970) (the Standard). Commission jurisdiction over this matter is based on the transfer of functions under the foregoing Acts contained in Section 30 of the Consumer Product Safety Act (15 U.S.C. 2051, 2079) (CPSA).

The Staff states its charges as follows:

1. Respondent Northwick Mills, Inc., is a corporation organized and doing business as Enduro Mills under the laws of the State of Georgia. Respondent Fred W. Rosen is an officer of the corporation. He formulates, directs, and controls the acts, practices and policies of the corporation.

Respondents are engaged in the manufacture and sale of carpets and rugs with their office and principal place of business located at Rosen Drive, PO Box 949, Dalton, Georgia 30720.

2. Respondents are now and have been engaged in the manufacturing for sale, sale and offering for sale, in commerce, and have introduced, delivered for introduction, transported and caused to be transported in commerce, and have sold or delivered after sale or shipment in commerce, products, as the terms "commerce" and "product," are defined in the FFA. These products fail to conform to the requirements of an applicable standard as required by section 3(a) of the FFA (15 U.S.C. 1192).

Among such products mentioned above was carpeting designed as style "9562" which was not manufactured in conformance with all of the requirements of the Standard.

3. Attached to the Notice of Enforcement are copies of the principal items of written evidence, marked Exhibits 1-12 which the Staff considers to constitute a prima facie case. Briefly described, the exhibits are test reports and invoices relating to samples of carpet manufactured by Respondents which failed the flammability tests contained in the Standard.

4. The aforesaid acts and practices of Respondents were and are in violation of the FFA, as amended, and the rules and regulations promulgated thereunder; and as such constitute unfair methods of competition and unfair and deceptive acts and practices in commerce, within the intent and meaning of the FTCA.

The identification of the exhibits which Enforcement Counsel considers as constituting a prima facie case will not preclude the introduction of further evidence relevant and material to the subject matter.

On June 25, 1976, Counsel for Respondents filed an answer constituting, in effect, a general denial of the substantive allegations in the Notice of Enforcement, and in addition, has included several affirmative defenses alleging as follows:

1. That the procedures utilized by the Commission in concluding that carpet samples failed to meet the requirements of the FFA were improper as not being in accord with permissible procedures promulgated by the Federal Trade Commission or this Commission.

2. That said procedures are neither accurate nor reliable and that the failure of isolated carpet samples to meet the acceptance criteria of the Flammable Fabrics Standard does not constitute a violation of the FFA.

3. That the Commission improperly rejected the results of intervening flammability tests which show compliance with said Standard.

4. That the Commission has misapplied the provisions of section 3(a) of the FFA and the Standards thereunder.

5. That a substantial number of the samples of the carpet tested were not "in commerce" as that term is used in the FFA.

6. That the Respondents have already recalled from commerce unsold rolls of Style 9562 and, therefore, no additional benefits will inure to the public as a result of this proceeding.

7. That this proceeding is unnecessary and should have been terminated by execution of voluntary assurance under Federal Trade Commission rules.

8. That Respondent corporation has previously executed a consent order agreement conforming with the Commission's decision in "Congoleum Industries, Inc." (CPSC Docket No. 75-3), a case involving essentially identical facts and law, with the result that the imposition of a markedly different form of order, would violate Respondents' constitutional rights.

9. That no substantial hazard exists, and that the remedies contained in the proposed Order are unnecessary to adequately protect the public.

10. That the extent of Respondents' failure to comply with the FFA or the Standard, if any was deminimus.

11. That the Respondent company exercised good faith in the production of the carpet in question by utilizing the latest flame retardant materials and by conducting extensive testing to insure continued compliance with the law.

12. That the proposed Order seeks to impose remedies based upon section 15 (c) and (d) of the Consumer Product Safety Act, when in fact, section 30(d) of said Act requires Respondents' conduct to be judged pursuant to the Federal Trade Commission Act and the FFA.

13. That the proposed Order is too broad in that it extends to all products subject to the FFA, although the instant complaint deals only with carpet.

14. That Fred W. Rosen is improperly joined as an individual although he engaged in no acts whatsoever that gave rise to this complaint.

15. That the proposed Order is ambiguous and extends the jurisdiction of the Commission beyond its statutory authority.

16. That the Notice of Enforcement is ambiguous in that it purports to apply only to style 9562. Carpet produced between January 1 and April 30, 1974 while the proposed Order extends to all style 9562 without regard to production dates.

17. That the proposed Order is invalid insofar as it attempts to preclude the export of noncomplying products in contravention of Respondents' rights under 15 U.S.C. section 1202(a).

18. That the proposed Order is invalid as to Respondent Fred W. Rosen, in that it would expose him to public ignominy and could seriously interfere with his ability to earn a livelihood—all in excess of the Commission's authority.

19. That the proposed Order is invalid in that it seeks to impose obligations in violation of regulation which are tantamount to compulsory self-incrimination.

On the basis of the foregoing, Respondents request dismissal of the Notice of Enforcement.

Appearances have been entered as follows:

Enforcement Counsel—Enid Rubenstein, Esquire, Ted Hoppock, Esquire, Jere Glover, Esquire, Legal Division, Bureau of Compliance, Consumer Product Safety Commission, Washington, D.C. 20207 (202) 492-6632.

For the Respondents—Richard H. Gimer, Esquire, Berliner, Mahoney, Gimer & Muir, Suite 420, 1100 Connecticut Ave., Washington, D.C. 20036 (304) 293-1414.

Issue having been joined, it is deemed necessary in order to organize the preparation for, and conduct of, the forthcoming hearings, that a prehearing conference be held at 2:00 P.M., e.d.s.t., Tuesday, August 31, 1976, in the Commission's 6th Floor hearing room, 1750 K St., NW., Washington, D.C. 20207.

Counsel are requested to exchange and file with this office by close of business Monday August 30, 1976, memoranda setting forth (1) a definition of the issues to be heard, (2) requests for discovery, if any, (3) disclosure of the number of witnesses and the approximate length of

V 41 N 161 AUG 18 76 UMI

time each presentation will entail, and (4) a proposal for the time, date and place of the hearing.

This proceeding is governed by the Commission's Interim Rules of Practice, 16 CFR 1025. The docket in this matter is available in the Office of the Secretary of the Commission. Any person, other than the Respondents, who desires to become a party to the proceedings, or to testify at the hearing, may request to do so by contacting the Presiding Officer, Paul N. Pfeiffer, Administrative Law Judge, Consumer Product Safety Commission, Room 825–L, Washington, D.C. 20207, telephone number (202) 634–7171 and giving notice to both parties.

Dated: August 13, 1976.

PAUL N. PFEIFFER,
Administrative Law Judge.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

HEAVY WATER SALES

Temporary Suspension

AUGUST 16, 1976.

Notice is hereby given that, pursuant to the authority of the Atomic Energy Act of 1954, as amended, effective on August 18, 1976 and until further notice, the United States Energy Research and Development Administration (ERDA) is rescinding its sales price of $55.00 per pound for heavy water and temporarily discontinuing all sales of heavy water.

The ERDA has found this action necessary to permit the completion of its consideration of the operating mode and production level of the heavy water plant which will have an effect on the price to be established and quantities of heavy water available for sale. A new price will be established and sales resumed in the near future.

EDMUND F. O'CONNOR,
Acting Assistant Administrator for Nuclear Energy.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20826; File No. BRH–651; FCC 76–732]

BARTELL BROADCASTING OF FLORIDA, INC. WMJX(FM), FORMERLY WMYQ(FM)

Order Designating Application for Hearing on Stated Issues

1. The Commission has before it for consideration: (a) The above-captioned license renewal application, and (b) its inquiry into the operation of Station WMJX(FM), Miami, Florida.

2. Information before the Commission raises serious questions as to whether the applicant possesses the qualifications to be or to remain licensee of WJMX. In view of these questions, the Commission is unable to find that a grant of the application would serve the public interest, convenience and necessity, and must, therefore, designate the application for hearing.

3. *Accordingly, it is ordered,* That the captioned application is designated for hearing pursuant to section 309(e) of the Communications Act of 1934, as amended, at a time and place to be specified in a subsequent order, upon the following issues:

(a) To determine all the facts and circumstances surrounding the broadcast on WMJX(FM) in April 1975 of announcements and newscasts concerning a "Devil's Triangle Trip" by a WMJX(FM) disc jockey and a subsequent "Find Greg Austin Contest";

(b) To determine whether the licensee, in connection with its "Devil's Triangle Trip" and "Find Greg Austin Contest," broadcast false and/or misleading announcements;

(c) To determine whether the licensee distorted and/or falsified newscasts in conjunction with its "Devil's Triangle Trip" and "Find Greg Austin Contest" broadcasts;

(d) To determine all the facts and circumstances surrounding preparation and implementation, if any, of representations contained in a letter dated January 20, 1975, and submitted to the Commission by the licensee.

(e) To determine whether the licensee failed to abide by representations made to the Commission in the letter of January 20, 1975, regarding the broadcast of false, misleading or deceptive matter;

(f) To determine whether and, if so, the extent to which the licensee violated § 73.1205 of the Commission's rules and regulations by failing to exercise reasonable diligence to see that its agents and employees did not issue invoices charging advertisers for commercial announcements not broadcast as purported.

(g) To determine, in light of the evidence adduced under the preceding issues, whether the licensee has the requisite qualifications to be or ot remain a licensee of the Commission and whether a grant of the captioned application would serve the public interest, convenience and necessity.

4. *It is further ordered,* That the Chief of the Broadcast Bureau is directed to serve upon the captioned applicant within thirty (30) days of the release of this order, a Bill of Particulars with respect to issues (a) through (f), inclusive.

5. *It is further ordered,* That the burden of proceeding with the introduction of evidence shall be on the Broadcast Bureau with respect to issues (a) through (f), inclusive, and the applicant shall have the burden of proceeding with respect to issue (g) and the burden of proof with respect to all of the issues herein shall be upon Bartell Broadcasting of Florida, Inc.

6. *It is further ordered,* That to avail itself of the opportunity to be heard, the applicant, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall, within twenty (20) days of the mailing of this order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this order.

7. *It is further ordered,* That the applicant herein, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, shall give notice of the hearing within the time and in the manner prescribed in such rule and shall advise the Commission thereof as required by § 1.594(g) of the rules.

8. *It is further ordered,* That the Secretary of the Commission send a copy of this Order by Certified Mail—Return Receipt Requested to Bartell Broadcasting of Florida, Inc., licensee of Station WMJX(FM), Miami, Florida.

Adopted: July 27, 1976.

Released: August 12, 1976.

Secretary.

[FR Doc.76–24181 Filed 8–17–76;8:45 am]

[Docket Nos. 20882, 20883; File Nos. BPH–9413, BPH–9500; FCC 76–727]

FM 103, INC. AND RADIO, INC.

Memorandum Opinion and Order Designating Applications for Consolidated Hearing on Stated Issues

In the matter of applications of FM 103, Inc., Honea Path, South Carolina, Docket No. 20882, File No. BPH–9413, Requests: 103.1 MHz, Channel No. 276A; 3 kW (H&V); 300 feet; Radio, Inc., Honea Path, South Carolina, Docket No. 20883, File No. BPH–9500, Requests: 103.1 MHz, Channel No. 276A; 3 kW (H&V); 300 feet; for construction permits.

Memorandum Opinion and Order Designating Applications for Consolidated Hearing on Stated Issues

1. The Commission has before it: (i) The above-captioned applications, as amended, for a new FM broadcast station in Honea Path, South Carolina; (ii) a petition to deny the application of Radio, Inc., filed by the competing applicant, FM 103, Inc.; and (iii) pleadings in opposition and reply thereto.

2. In its petition to deny, FM 103, Inc. seeks the addition of a misrepresentation of fact issue concerning Radio, Inc.'s efforts to ascertain the needs and problems of Honea Path, the addition of an issue to determine the efforts made by Radio, Inc. to ascertain the community problems of the area it proposes to serve and the means by which the applicant proposes to meet those problems, and in light thereof, the addition of an issue to determine whether Radio, Inc. is qualified to be a broadcast licensee. In support of these requests, FM 103, Inc. alleges that Radio, Inc.'s application indicates that Mr. Brissey, President of Radio, Inc. made in-person contacts with community leaders in early 1975, and with the assistance of others, made telephone contacts with the general public.[1] However, FM 103, Inc. submitted affidavits from four[2] community leaders listed in Radio, Inc.'s application as being consulted, stating that they "never had been contacted by Mr. Brissey or anyone else on behalf of Radio, Inc., an applicant planning to construct a new FM station at Honea Path, South Carolina, regarding their views on community needs."[3] Further, FM 103, Inc. submitted an affidavit from William K. Williams, the present Mayor of Honea Path, who stated that Tom Tolly's term as mayor ended on January 8, 1974, as did Councilman Carl Ally's and Councilman Grady Kay, Jr.'s. In a second affidavit, William K. Williams stated that Sonny Ashley has not been employed as an officer of the Honea Path Police Department since November 1, 1973, and that Officer E. D. Cooley died on November 6, 1973. Since these individuals are listed in Radio, Inc.'s application as being contacted, FM 103, Inc. maintains that these consultations could not have taken place later than December 1973. In addition, an affidavit from Tommy Leverette was submitted, in which Mr. Leverette stated that he has "never been contacted by a Mr. Bill Brissey or anyone else on behalf of Radio, Inc. * * * regarding my views on community needs." Mrs. Betty Smith, Treasurer of Anderson County, stated in a signed affidavit that she has never been contacted by Mr. Brissey, but she did receive a telephone call from a man who identified himself as "Ken" and questioned her regarding community problems. FM 103, Inc. therefore concludes that at least five people[4] listed as having been contacted were not in fact so contacted, that at least five other people listed as having been contacted "in the winter-spring of 1975" either were not contacted during that time or did not hold leadership positions represented in the application when contacted, and at least one of the leaders listed in the application as having been personally contacted by a named principal of the applicant, was in fact contacted via telephone by someone else.

3. In its opposition, Radio, Inc. acknowledges in an affidavit of Mr. Brissey that some of the individuals listed in its application as being consulted in the "winter-spring 1974–1975" were actually contacted in 1973, by Mr. Ray Ward, the prospective station manager. These 1973 contacts were inadvertently included with the 1974–75 contacts, and Mr. Brissey failed to recognize these when he "glanced" through the application, which was prepared by Washington counsel, before signing it. Radio, Inc. also maintains that the application does not state nor was it intended to state that Mr. Brissey made all the contacts of community leaders personally. In fact, some of the contacts were made by employees of either the Abbeville or Belton stations[5] who were prospective managerial employees in Honea Path. Radio, Inc. submitted 1973 contact reports[6] which indicate the following people were contacted by Ray Ward: E. D. Cooley, Dr. Larry Talbert, Harold McAlister, J. L. Parham, Grady Kay, Jr., Carl Alley, Sonny Ashley, and Rev. Law M. Mobley. Additional 1973 contact reports indicate that Tommy Leverette was contacted by Liland Cox, that Mayor Tom Tolly was contacted by Mr. Brissey and that Betty Smith was contacted by Ken Allison. Also submitted were 1974–1975 contact reports which indicate that Mr. Brissey did contact Carl Alley, J. L. Parham, and Tom Tolly. In addition to the contact reports, Radio, Inc. has submitted affidavits from the following people: Raymond Ward, J. L. Parham and Larry Tallant. In his affidavit, Mr. Ward states that he was to be considered for the manager's position of the proposed station, that he personally contacted J. L. Parham, Harold McAlister and Larry Tallant, and that he contacted by telephone Law M. Mobley. Mr. Parham indicates that he did speak to Mr. Ward regarding his views on community needs, while Mr. Tallant indicates that he "could have talked with Mr. Raymond Ward" but is not sure.

4. In reply, FM 103, Inc. asserts that Radio, Inc.'s description of its ascertainment process in its opposition is entirely different from that described in its application in that it appears that Mr. Brissey conducted less than 10 of the 71 leaders listed in the application, rather than "in excess of 60." In addition, FM 103, Inc. submitted a certified certificate of death indicating that Alfred McClain died on October 8, 1965, concluding that it was impossible for Radio, Inc. to have contacted McClain in 1974–75.

5. It appears that there are significant questions concerning Radio, Inc.'s ascertainment efforts as presented in its application. It appears that some of the individuals were contacted in 1973, as opposed to the winter-spring of 1974–75. It is also clear that Mr. Brissey did not perform the consultations as the application indicates. Further, at least two individuals have stated in valid affidavits that they were not contacted by anyone connected with Radio, Inc. It also appears that at least three individuals listed did not hold positions of leadership during the winter-spring of 1974–75, as one would have been led to believe from a reading of the application. There are also two individuals who were deceased at the time of the alleged consultations. In view of the above, a misrepresentation issue will be specified. "Itawamba County Broadcasting Co., Inc.," 46 FCC 2d 60, 29 RR 2d 1154 (1974).

6. In addition to the allegations presented by FM 103, Inc., Radio, Inc. has failed to comply with the requirements of the "Primer on the Ascertainment of Community Problems by Broadcast Applicants," 27 FCC 2d 650, 21 RR 2d 1507 (1971), in other significant aspects. It appears that Radio, Inc. has failed to survey leaders of significant groups as set forth in its demographic study. "Voice of Dixie, Inc.," 45 FCC 2d 1027, 29 RR 2d 1127 (1974), recon. den., 47 FCC 2d 526, 30 RR 2d 851 (1974). Thus, while Radio, Inc. indicates that 12.8 percent of the families in Anderson County have incomes below the poverty level, it has not interviewed anyone representing or concerned with the poor or unemployed. "A. V. Bamford," 48 FCC 2d 1155. Further, it appears that a significant number of people in Anderson County are employed in agriculture, however, there are

[1] Exhibits 7 and 8 to the Radio, Inc. application set forth the efforts the applicant made to ascertain the community problems of the area it proposes to serve:

Contacts were made by Mr. Brissey throughout the winter-spring of 1975. In addition to community leader contacts, Mr. Brissey made random telephone contacts of over 100 members of the general public utilizing the local telephone directory.

In these random telephone contacts, Mr. Brissey was assisted by several prospective employees who operated under his supervision and direction * * *

Mr. Brissey conducted in excess of 60 personal contacts with community leaders in Honea Path alone * * * Exhibit 7, page 1.

As a result of the applicant's ascertainment of the community structure, the following community leaders were contacted by Mr. Brissey. Exhibit 8, page 1.

[2] The persons submitting affidavits are: J.L. Parham, Harold McAlister, Larry Tallant, and Law M. Mobley.

[3] FM 103, Inc. has filed a pleading "Errata to Opposition to Petition to Deny" in which it indicates that three of these affidavits (Parham, McAlister, and Tallant) were not actually signed before (in the presence of the notary), but were signed first and then notarized in accordance with the affiant's instructions to the notary via the telephone, but outside the affiant's presence. Therefore, these affidavits will not be considered in the foregoing discussion and determination of this issue. Rosemore Broadcasting Co., Inc., 46 FCC 2d 1182, 30 RR 2d 360 (1974).

[4] Footnote 2, supra.

[5] WPHP and WABV are owned by four of the six principals of Radio, Inc.

[6] These contact reports indicate the name and community of organization, name and title of individual representatives or organizations contacted, name of individual(s) making the contact, method of contact, date(s) of contact, needs (problems) of area revealed by contact, and program(s) or announcement(s) proposed by applicant to fulfill discussed need. The reports are not signed by either the community leader or the interviewer.

V41161
AUG 18 76
UMI

no consultations indicated with representatives of agricultural interests.[7] Radio, Inc. submitted in its amendment the names of 13 students, however, they were interviewed in 1973, and there is no indication that any of the individuals qualify as leaders of this significant group. Therefore a "Suburban" issue will be specified.[8]

7. The Commission is presently unable to find Radio, Inc., financially qualified. Analysis of the applicant's financial data shows that $90,700 will be required to construct and operate the station for one year. To meet this cost, applicant primarily relies upon a bank loan from The Citizens and Southern National Bank of South Carolina for $110,000. However, the letter from the bank is not a firm commitment; "This letter will serve to confirm our conversation that our bank will *give favorable consideration* * * *" (emphasis added). Further, the letter does not contain the terms of repayment or the interest to be charged, and therefore, does not comply with FCC Form 301, section III, page 3, paragraph 4(e). Therefore, a financial issue will be specified.

8. FM 103, Inc., has also failed to comply with the requirements of the "Primer," supra, in that it appears that the applicant has failed to survey leaders of significant groups set forth in its demographic data. "Voice of Dixie," supra. The applicant has failed to interview leaders of cultural and agricultural interests. Therefore, an ascertainment issue will also be specified as to FM 103, Inc.

9. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purposes of comparison, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to either of the applicants.

10. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, because the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

11. *Accordingly, it is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order upon the following issues:

1. To determine whether the purported bank loan is available to Radio, Inc. and, in light of that determination, whether the applicant is fiancially qualified to construct and operate as proposed.

2. To determine the efforts made by Radio Inc. to ascertain the community needs and problems of the area to be served and the means by which the applicant proposes to meet those needs and problems.

3. To determine with respect to the application of Radio Inc.:

(a) whether the application contains misrepresentations of fact concerning its efforts to ascertain the needs and problems of Honea Path, South Carolina;

(b) the effect of the facts adduced pursuant to (a) above upon the applicant's requisite and/or comparative qualifications to be a Commission licensee.

4. To determine the efforts made by FM 103, Inc., to ascertain the needs and problems of the area to be served and the means by which the applicant proposes to meet those needs and problems.

5. To determine which of the proposals would, on a comparative basis, better serve the public interest.

6. To determine in light of the evidence adduced pursuant to the foregoing issues, which, if either, of the applications should be granted.

12. *It is further ordered,* That the petition to deny the application of Radio, Inc., filed by FM 103, Inc., is granted to the extent indicated and is denied in all other respects.

13. *It is further ordered,* That to avail themselves of the opportunity to be heard, the applicants herein, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney shall, within twenty (20) days of the mailing of this order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this order.

14. *It is further ordered,* That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

Adopted: July 27, 1976.

Released: August 18, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.76-24183 Filed 8-17-76;8:45 am]

[Docket No. 20884; FCC 76-720]

MOBILE HOME COMMUNITIES, INC. AND WINDMILL VILLAGE MOBILE HOME PARK

Order To Show Cause Regarding Cease and Desist Order

1. On December 10, 1975, the Chief, Cable Television Bureau, received an inquiry from Storer Broadcasting Company requesting a ruling as to whether the type of cable facility operated by Windmill Village Mobile Home Park in Sarasota County, Florida, was subject to the Commission's Cable Television Rules.

2. The Bureau directed an inquiry dated January 16, 1976, to Windmill Village Mobile Home Park to ascertain the nature and scope of any cable television operations at the Park. Mr. Paul L. Baker, Area Manager, Southeast Region, Mobile Home Communities, Inc., responded via letter dated February 13, 1976, indicating that Mobile Home Communities, Inc. has management responsibility for Windmill and that the residents of Windmill Village are provided with television service through a single headend master antenna system. He further stated that the 457 residents pay an installation charge of $25.00 but no other direct or indirect charges. He also asserted that the facility is a master antenna system (MATV) and as such is not subject to Commission regulation.[1] He stated:

> It is a service provided to the residents falling into the same category as the swimming and theraputic pools, village bus, shuffleboard courts, garbage pickup, water and sewer service and lawn mowing. Our rents remain constant throughout the year whether the residents wish to avail themselves of the service provided to them or not and in no way results in a reduction in rents. Just as we do not charge the residents to ride the bus or swim in the pool, we do not place a specific charge on the use of the MATV system.

The facility presently carries the signals of seven television broadcast stations.[2] The system began operation in 1969.

3. Commission staff personnel subsequently contacted Mr. Baker, both by letter and telephone, in an effort to clarify the applicability of the Commission's regulations to the cable operations at Windmill Village. The Commission has provided copies of its relevant decisions and has afforded opportunities for Mobile Home Communities, Inc. to bring its operation into compliance voluntarily. The letters also cautioned against operation in violation of the Commission's rules. Moreover, Commission staff provided ample opportunity for Mobile to request special temporary authority. Yet Mobile continues to maintain that its operation at Windmill Village is not a cable television system.

4. If the purported cable television system at Windmill Village Mobile Home Park falls within our definition of a cable television system,[3] its continued operation would be in violation of § 76.11 of the rules because it was not lawfully carrying television broadcast signals prior to March 31, 1972, and has not obtained a certificate of compliance. At a minimum, former § 74.1105 of the rules—which was deleted with the adoption of the 1972 Cable Television Report and Order—required the operator of a proposed cable television system to notify the licensees of local television stations that cable service would be undertaken. And, of course, no such notifications were ever served. Although our definition excludes master antenna systems serving apartment dwellings, we have not considered cable television facilities to be exempt from our Rules merely because they are located totally within a private mobile home park and because they provide service exclusively to the residents of such a community. "See Pacific Western Mobile Estates, Inc." (San Jose, California), FCC 74-1058, 49 FCC 2d 269 (1974); "Bayhead Mobile Home Park" (Leon County, Florida), FCC 74-589, 47 FCC 2d 763 (1974).[4] Mobile Home Communities also contends, however, that its facility does not have "subscribers who pay for such service," an element of a "cable television system" as defined by § 76.5(a) of our rules. Yet Mobile does admit to the imposition of an installation charge for connection to the system. While Mobile contends that the residents of Windmill Village make neither direct nor indirect payment for the service provided, we have previously held that payment could consist of an unspecified element of a dwelling rental charge. Memorandum Opinion and Order in Docket 18397, FCC 71-258, 28 FCC 2d 13 (1971), at 15. We recently had occasion to restate that interpretation: "For definitional purposes, it does not matter whether the payment is separate or combined with a general service, recreational or rental fee, whether payment is made directly or through some intermediary such as a homeowners association, whether the payment is in the form of a capital contribution or service fee, or whether the bulk payment is made for a number of subscribers rather than an individual payment for each subscriber." *See* paragraph 12, notice of proposed rule making in Docket 20561, FCC 75-896, 54 FCC 2d 824 (1975). It appears that the cost of operating the cable facility at Windmill Village Mobile Home Park is paid for from fees received from occupants of the spaces rented by the mobile home park. Moreover, in "Mobile Park Properties, Inc" (Venice, Florida), FCC 75-1320, 56 FCC 2d 1037 (1975), in facts similar to those in the instant case, we held that "indirect" payment of the kind present here coupled with the admitted imposition of an installation charge for connection to the master antenna was a sufficient indication of "payment" to warrant further exploration of a possible violation of Part 76 of the rules at a hearing.

Accordingly, it is ordered, That pursuant to section 312 (b) and (c) of the Communications Act of 1934, as amended, 47 U.S.C. 312(b) and (c), Mobile Home Communities, Inc., is directed to show cause why it should not be ordered to cease and desist from further violation of Part 76 of the Commission's rules and regulations for its cable television system at Windmill Village Mobile Home Park, Sarasota, Florida.

It is further ordered, That Mobile Home Communities, Inc., is directed to appear and give evidence with respect to the matters described above at a hearing to be held at a time and place to be specified by subsequent order before an Administrative Law Judge, unless the hearing is waived in which event a written statement may be submitted.

It is further ordered, That the Secretary of the Federal Communications Commission shall send copies of this order by certified mail to Mobile Home Communities, Inc.

Adopted: July 27, 1976.

Released: August 16, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.76-24184 Filed 8-17-76;8:45 am]

[7] Radio, Inc. indicates that it intends to serve 60 percent of Anderson County.

[8] Suburban Broadcasters, 30 FCC 1021, 20 RR 951 (1961).

[1] Section 76.5 defines a cable television system to exclude, in effect, a facility which serves only an apartment house.

[2] Signals of the following television broadcast stations have been carried since 1969, with the exception of Station WXLT-TV which was added in 1971:

WTOG, (Ind., Channel 44) St. Petersburg, Florida
WXLT-TV, (ABC, Channel 40) Sarasota, Florida
WEDU, (Educ., Channel 3) Tampa, Florida
WFLA-TV, (NBC, Channel 8) Tampa, Florida
WLCY-TV, (ABC, Channel 10) Tampa, Florida
WINK-TV, (CBS, Channel 11) Fort Myers, Florida
WTVT, (CBS, Channel 13) Tampa, Florida

[3] Section 76.5(a) of the Commission's rules defines a cable system as: Any facility that, in whole or in part, receives directly, or indirectly over the air, and amplifies or otherwise modifies the signals transmitting programs broadcast by one or more television or radio stations and distributes such signals by wire or cable to subscribing members of the public who pay for such service, but such term shall not include (1) any such facility that serves fewer than 50 subscribers, or (2) any such facility that serves only the residents of one or more apartment dwellings under common ownership, control, or management, and commercial establishments located on the premises of such an apartment house.

NOTE.—In general, each separate and distinct community or municipal entity (including unincorporated communities within unincorporated areas and single, discrete unincorporated areas) served by cable television facilities constitutes a separate cable television system, even if there is a single headend and identical ownership of facilities extending into several communities. See e.g., Telerama, Inc., 3 FCC 2d 585 (1966); Mission Cable TV, Inc., 4 FCC 2d 238 (1966).

[4] In paragraph 3 of Bayhead, the Commission stated: We find that Bayhead's proposed facility is a "cable television system" as defined by § 76.5(a) and that Bayhead is consequentially subject to our cable television regulations. We cannot agree that mobile homes can be considered "apartment dwellings." There is a real and effectual difference between a single structure that has been wired to provide antenna services to its component residences, and an externally wired community of individual mobile homes. Moreover, in this particular case Bayhead admits that the individual mobile homes will be owned by the subscribers themselves, and that only the land upon which these residences will rest will be owned by Bayhead. This circumstance must weigh heavily against any attempt to equate these mobile homes with "apartment dwellings" or to show true "common ownership, control, or management."

[Docket No. 20722; File No. BR-1444; FCC 76R-227]

VOGEL-HENDRIX CORP.

Memorandum Opinion and Order Enlarging Issues

1. By Memorandum Opinion and Order, FCC 76-172, 58 FCC 2d 495, released March 8, 1976, the Commission designated for hearing the application of Vogel-Hendrix Corporation (WAMA) for renewal of license for standard broadcast Station WAMA, Selma, Alabama. Now before the Review Board are two petitions to enlarge issues, filed March 30, 1976,[1] and May 26, 1976,[2] by the Broadcast Bureau, requesting the addition of issues to determine whether WAMA has repeatedly or willfully violated § 73.52(a) of the Commission's rules by exceeding the authorized power of Station WAMA,[3] whether WAMA has exercised proper control and supervision over its employees, and whether in light of the foregoing, a grant of WAMA's renewal application would serve the public interest, convenience and necessity.

2. In support of its requested § 73.52 (a) issue, the Broadcast Bureau submits an engineering analysis of WAMA's transmitter logs indicating operation at excessive power on 40 days within a period extending from September 12, 1974 to January 9, 1976. On numerous occasions, the Bureau points out, the applicant's nighttime power reached values far in excess of that permitted by the rules. These repeated violations, the Bureal contends, raise a substantial question as to whether WAMA can carry out its responsibilities as a licensee, and as such, should be explored in this hearing, rather than by instituting a separate forfeiture proceeding.

3. In opposition, WAMA argues that although the transmitter logs in question indicate operation with excessive power, those logs were incorrectly completed by the station engineer due to defective equipment and an incorrect antenna resistance value.[4] Furthermore, WAMA's

[1] Also before the Board are the following related pleadings: (a) Opposition, filed April 28, 1976, by WAMA; (b) reply, filed May 7, 1976, by the Broadcast Bureau; and, (c) erratum to (b), filed May 13, 1976, by the Broadcast Bureau.

[2] Also before the Board are the following related pleadings: (a) Opposition, filed June 23, 1976, by WAMA; (b) reply, filed July 2, 1976, by the Brodcast Bureau; and (c) petition for leave to file supplement and supplement to (a), filed July 9, 1976, by WAMA. While this second petition by the Bureau is untimely filed, it raises substantial public interest questions warranting consideration of the merits. The Edgefield-Saluda Radio Co. (WJES), 5 FCC 2d 148, 8 RR 2d 611 (Rev. Bd. 1966). WAMA's petition for leave to file supplement will also be granted.

[3] Rule 73.52(a) provides, in pertinent part: The actual antenna input power of each station shall be maintained as near as is practicable to the authorized antenna input power and shall not be less than 90 percent nor greater than 105 percent of the authorized power * * *.

[4] In this regard, the applicant has filed with the Commission FCC Form 302 requesting a change in antenna resistance from 37.5 ohms to 41.5 ohms.

V 41 161 AUG 18 76 UMI

consulting engineer asserts that, after the proper repairs and replacements were made,[6] he determined that the transmitter was incapable of producing more than 103.75 percent of its authorized power during the daytime mode and 103.6 percent of its authorized power during the nighttime mode.[8] Thus, he concludes that the station must have been operating within the limitations of § 73.52(a) of the rules. Moreover, WAMA submits that a renewal hearing is not the proper forum for inquiring into alleged operating violations, asserting that a Notice of Apparent Violation should have been issued instead. In reply, the Broadcast Bureau takes exception to the WAMA consulting engineer's conclusion that the transmitter could not have operated in violation of § 73.52(a). Specifically, the Bureau questions whether there is adequate support for establishing 5 amperes as the maximum possible antenna current. The Bureau also argues that even by correcting for the alleged discrepancy found in the antenna base current meter,[7] there would still be 16 log entries of antenna current indicating operation in excess of 105 percent of Station WAMA's authorized power.

4. The Bureau further asserts in its second petition to enlarge issues that WAMA's opposition pleading raises a substantial question regarding the extent to which the applicant has exercised control of its station's operation. Specifically, the Bureau contends that WAMA's concession in its earlier opposition pleading that its transmitter logs indicated operation of excessive power over a continuing period of time warrants addition of an appropriate issue in this proceeding to determine whether WAMA exercised the proper control and supervision over its employees as required by § 73.93 of the rules.[9] In opposition, WAMA states that the two general managers of its station during the period in question both "* * * instituted procedures to be certain that the Station was operating consistent with the FCC's rules and regulations governing good engineering practices."[10] WAMA contends that it would be too severe a sanction to set a licensee for hearing as a result of the inadvertence, negligence, or other failure by its employees to carry out given instructions. Again it is urged that a more appropriate sanction would be the issuance of a Notice of Apparent Liability. In reply, the Bureau, maintaining that WAMA has failed to show that it exercised proper control and supervision by instituting procedures to insure compliance with Commission requirements during the relevant time period, contends that the affidavits of the two general managers do not obviate the need for the requested issue.

5. The Bureau's request for a § 73.52 (a) issue will be granted.[10] As a general matter, absent clear evidence to the contrary, a licensee's log entries are regarded as an accurate reflection of the meter readings taken at the time they are made, and will be considered as such when they are subsequently reviewed by the Commission. Cf. Kalamazoo Broadcasting Co., Inc., 24 FCC 2d 441, 19 RR 2d 805 (1970). Therefore, it is clear that the Bureau's allegations raise a substantial question as to whether WAMA has exceeded its authorized transmitter power. Furthermore, given the dispute between WAMA and the Bureau as to the actual power the licensee employed, any determination with respect to WAMA's compliance with § 73.52(a) requirements, in our view, must be made after an evidentiary hearing, during which time a complete record can be developed.[11] Moreover, we agree with the Bureau that a separate question has been raised concerning WAMA's failure to adequately fulfill the supervisory and control requirements of Rule 73.93 over the extended period of time during which the alleged violations had occurred.[12] Thus, once excessive antenna base current is observed, a station operator is required to take immediate steps to see whether the station was, in fact, exceeding its authorized power, and, if so, to correct the situation. See Pacific Western Broadcasters, Inc., 45 FCC 2d 507, 29 RR 2d 862 (1974); Kalamazoo Broadcasting Co., Inc., *supra*. And, since the Commission has consistently held that its licensees are responsible for the acts or omissions of their employees,[13] inquiry into this matter is also necessary. Accordingly, a second issue will be added in this proceeding so as to determine whether, in light of its operating logs, WAMA has exercised the adequate control and supervision over the operation of Station WAMA, required by § 73.93 of the rules.[14]

6. *Accordingly, it is ordered,* That the petition for leave to file supplemental pleading, filed July 9, 1976, by Vogel-Hendrix Corporation, is granted; and that the supplement is accepted; and

7. *It is further ordered,* That the petition to enlarge issues, filed March 30, 1976, by the Broadcast Bureau, is granted to the extent indicated herein, and is denied in all other respects; and

8. *It is further ordered,* That the petition to enlarge issues, filed May 26, 1976, by the Broadcast Bureau, is granted to the extent indicated herein, and is denied in all other respects; and

9. *It is further ordered,* That the issues in this proceeding are enlarged to include the following issues:

(1) To determine whether Vogel-Hendrix Corporation has violated § 73.52 (a) of the Commission's rules.

(2) To determine whether Vogel-Hendrix Corporation has exercised the adequate control and supervision over the operation of Station WAMA, as required by § 73.93 of the Commission's rules.

10. *It is further ordered,* That the burden of proceeding with the introduction of evidence under the foregoing issues shall be on the Broadcast Bureau, and the burden of proof shall be on Vogel-Hendrix Corporation.

Adopted: August 3, 1976.

Released: August 10, 1976.

FEDERAL COMMUNICATIONS COMMISSION,[15]
VINCENT J. MULLINS,
Secretary.

[FR Doc.76-24185 Filed 8-17-76;8:45 am]

CABLE TELEVISION POLE ATTACHMENT ISSUES

Meeting Scheduled With State Regulatory Commissions

The Federal Communications Commission will meet with the National Association of Regulatory Utility Commissioners, State cable commissioners, and other interested municipal officials, to discuss issues pertaining to the leasing of space on telephone and other utility poles to cable television systems. The meeting will take place on September 7, 1976 from 2:00 to 5:00 PM at the FCC (Room 856, 1919 M Street, NW. Washington, D.C. 20554). In keeping with the Commission's desire to serve as an information clearinghouse on the problem, it is hoped that this discussion will bring interested parties into contact with each other to exchange ideas and information concerning pole attachments.

This meeting will provide a forum on a wide range of issues pertaining to the regulatory authority over utility pole rental charges, and will assist the Commission's staff in its preparation of a forthcoming study on pole attachments. Members of the general public are also invited to attend and observe the discussions.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.76-24385 Filed 8-17-76;10:57 am]

[6] In the attached engineering report submitted with WAMA's opposition, its consulting engineer states that repairs were made to the transmitter, as well as the plate voltage, plate and screen current, and driver plate meters. The remote antenna current meter was also recalibrated to the replaced base current meter and corrected antenna resistance value.

[8] These figures are based on a maximum antenna current value of 5 amperes, obtained when the transmitter was adjusted for maximum power at the 1 kW setting, along with the revised antenna resistance value of 41.5 ohms.

[7] This discrepancy of 8.65 percent was calculated from the reported reduction in the base current meter reading when the defective meter was replaced by WAMA's consulting engineer.

[9] The pertinent sections of § 73.93 deal with a station's operator requirements and the related supervisory responsibilities of its licensee.

[9] In this regard, WAMA submits the affidavits of Harry Bolen (general manager from October, 1971 to January, 1975) and Donnie Harden (general manager from January, 1975 to present.

[10] We note that WAMA's contention that a renewal hearing is an inappropriate forum for inquiring into alleged operating violations must be rejected; thus, in Glenn West, 27 RR 2d 1262 (1973), the Commission stated: * * * that in considering initial and renewal applications, * * * it is * * * the duty of the Commission to examine past misdeeds to determine the nature of the applicant's probable future performance as a licensee and the likelihood that the applicant will operate its broadcast station in the public interest. (27 RR 2d 1262 at 1266).

[11] The Board notes that, based upon its examination of at least 15 of those days in question, it appears that WAMA failed to properly switch its operating mode from either nighttime to daytime, or vice versa, at the times specified on its license. These apparent instances of operating at excessive power as a result of the failure to switch operating modes, rather than the failure to properly adjust the transmitter, would also violate § 73.52(a), and may be explored under the issue being added herein.

[12] In light of the extended time period, we cannot accept, absent evidentiary inquiry, the adequacy of its supervisory procedures.

[13] See e.g. Radio Station KGVL, Inc., 42 FCC 2d 258, 28 RR 2d 24 (1973).

[14] We note that an issue inquiring into whether the public interest, convenience and necessity will be served by a grant of this application has already been designated in this proceeding.

[15] Board Member Emerson absent.

FEDERAL ENERGY OFFICE

REFINER'S BUY-SELL PROGRAM

Crude Oil Allocation

The notice specified in 10 CFR 211.65 (e) for the refiners' crude oil allocation program is hereby published for the allocation quarter of September 1, 1976 through November 30, 1976.

The buy/sell list for refiners is set forth as an appendix to this notice. The provisions of 10 CFR 211.65 apply to all transactions made under the buy/sell list. Included as part of the list, as required by § 211.65(e), are: the quantity of crude oil each refiner-buyer is eligible to purchase, the total allocation obligation for all refiner-sellers, the fixed percentage share for each refiner-seller, and the quantity of crude oil that each refiner-seller is obligated to offer for sale to refiner-buyers, with a specification as to the portions thereof that constitute the primary and secondary sales obligations for each refiner-seller, in accordance with 10 CFR 211.65(d).

The allocations shown on the buy/sell list for refiner-buyers that own and operate second priority refineries (as defined in Part 214 of 10 CFR) reflect two types of adjustments resulting from reductions in Canadian crude oil exports to the United States. Adjustments have been made for the September-November 1976 allocation quarter based on FEO's estimate of Canadian crude oil exports during that allocation quarter. In addition, a further adjustment has been made for certain refiner-buyers that operate second priority refineries and that purchased their entire allocation for the June-August 1976 allocation quarter. This adjustment reflects the difference between FEO's estimates of Canadian crude oil available for July and August, which were used to adjust allocations during the June–August allocation quarter, and the actual export level subsequently announced by the Canadian government.

Adjustments have also been made pursuant to 10 CFR 211.65(a)(4) for refiner-buyers that have recently experienced losses of federal royalty oil. FEO anticipates making corresponding adjustments to refiner-buyers that have gained royalty oil in the buy/sell list for the December 1976–February 1977 allocation quarter.

The buy/sell list covers PAD Districts I through V, and amounts shown are in barrels of 42 gallons each, for the specified period. Pursuant to § 211.65(d), each refiner-seller shall offer for sale, directly or through exchange, to refiner-buyers during an allocation quarter a quantity of crude oil equal to that refiner-seller's primary sales obligation plus any portion of that refiner-seller's secondary sales obligation as to which the FEO directs a sale pursuant to 10 CFR 211.65(h). No refiner-seller shall be required to offer for sale to refiner-buyers, whether by directed sale or otherwise, any portion of its secondary sales obligation until each other refiner-seller (except refiner-sellers with minimal primary sales obligations) has sold at least 80% of its primary sales obligation.

The procedures of 10 CFR 211.65(h) provide that if a sale is not agreed upon on or before September 2, 1976, a refiner-buyer that has not been able to negotiate a contract to purchase crude oil may request FEO to direct one or more refiner-sellers to sell a suitable type of crude oil to such refiner-buyer. Such a request must be made within 30 days of the publication of this notice. Upon such request, FEO may direct one or more refiner-sellers that have not completed their required sales to sell crude oil to the refiner-buyer. If the refiner-buyer declines to purchase the crude oil specified by FEO, the rights of that refiner-buyer to purchase that volume of crude oil are forfeited during this allocation quarter, providing that the refiner-seller in question have fully complied with the provisions of 10 CFR 211.65. Refiner-buyers making such request must provide the FEO with the following information:

1. Name of the refiner-buyer and of the person authorized to act for the refiner-buyer in buy-sell list transactions.

2. Names and locations of the refineries for which crude oil is sought, the amount of crude oil sought for each refinery, and the technical specification range of crude oil that can be processed in each refinery.

3. Statement of any restrictions, limitations or constraints on the refiner-buyer's purchases of crude oil, particularly as to manner or time of deliveries.

4. Names and locations of all refiner-sellers from which crude oil has been sought under the buy/sell list and the volume and specification of the crude oil sought from each.

5. The response of each refiner-seller to which a request to purchase crude oil has been made, and the name and telephone number of the individual contacted at each such refiner-seller.

6. Such other pertinent information as FEO may request.

Each refiner-buyer and refiner-seller will report the details of each transaction under the buy/sell list to FEO on Form FEO P–118–Q–1 within 15 days of the completion of arrangements for the transaction. Each refiner-buyer and refiner-seller is requested to report as promptly as practicable every such transaction to which it is a party.

Refiner-buyers wishing to receive an allocation in the allocation quarter commencing December 1, 1976, with respect to future refining capacity (as defined in 10 CFR 211.62) that is not presently taken into account in determining their respective purchase opportunities, must apply to the FEO for certification of that capacity and provide all necessary information required to enable FEO to evaluate the factors set forth in 10 CFR 211.65(b)(1) no later than October 4, 1976.

All reports and applications made under this notice should be addressed to:

Manager, Crude Oil Allocation Programs, Crude Oil Buy/Sell Program, 20th Street Postal Station, P.O. Box 19028, Washington, D.C. 20036.

Issued in Washington, D.C. August 12, 1976.

MICHAEL F. BUTLER,
General Counsel.

APPENDIX

The list of refiner-sellers and refiner-buyers for the period September 1, 1976 through November 30, 1976 is as follows. The list sets forth the identity of each refiner-seller and refiner-buyer, the fixed percentage share of each refiner-seller and the volumes of crude oil (reflecting all adjustments required under § 211.65) that each such refiner-seller is obligated to offer for sale (with a specification as to primary and secondary sales obligations) or that each such refiner-buyer is eligible to purchase, as the case may be.

FEDERAL POWER COMMISSION

[Docket No. RP76-10; PGA76-1]

ARKANSAS LOUISIANA GAS CO.

Filing of Revised Tariff Sheets

AUGUST 11, 1976.

Take notice that on July 22, 1976, Arkansas Louisiana Gas Company tendered for filing in Docket RP76-10 (PGA76-1) Second Substitute Third Revised Sheet No. 185 in its Rate Schedule X-26, FPC Gas Tariff Original Volume No. 3. This revised tariff sheet is to become *effective as of November 2, 1975.*

The proposed tariff sheet is being filed to reflect the change agreed to in the settlement conference between Arkla and the FPC Staff on July 13, 1976, concerning the base cost of gas in Docket No. RP76-10 (PGA76-1) effective November 2, 1975.

The company states that copies of the revised tariff sheet and supporting data are being mailed to Arkla's jurisdictional customers and other interested parties.

Any person desiring to be heard or to protest said filing should file a Petition to Intervene or Protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 25, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24211 Filed 8-17-76;8:45 am]

[Docket No. RP68-16]

CITIES SERVICE GAS CO.

Filing of Report

AUGUST 11, 1976.

Take notice that on November 8, 1973, Cities Service Gas Company (Cities), tendered for filing a report required by Paragraph (E) of the Commission's order issued on January 30, 1969, in this docket.

The report consists of (1) a letter of explanation to the customers, (2) a computation showing the amount of refund to jurisdictional customers and (3) a tabulation of sales to customer companies and the refund applicable to such sales. Cities states that this report shows that Cities refunded to its jurisdictional customers entitled to refunds a total of $8,865,951.32.

Cities states that copies of the report were mailed to each of the customers receiving a refund together with a refund check. Cities also states that copies of the report were mailed to appropriate state regulatory commissions.

Cities also filed on November 8, 1973, copies of releases received from each of 52 of Cities customers with respect to the refunds mentioned above. Cities states that releases which have not been received from 23 customers will be filed with the Commission upon receipt.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 27, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24212 Filed 8-17-76;8:45 am]

[Docket No. RP76-138]

COLUMBIA GULF TRANSMISSION CO.

Proposed Changes in FPC Gas Tariff

AUGUST 12, 1976.

Take notice that Columbia Gulf Transmission Company (Columbia Gulf) on July 30, 1976 tendered for filing proposed changes in its FPC Gas Tariff, Original Volume Number 2. The proposed changes consist of an increase in transportation rates through the offshore Blue Water System. Columbia Gulf states that its rate schedules are filed in order to: (1) update; (2) bring about consistency; and (3) result in a harmonious relationship with pending Docket No. RP76-94 and that these transportation agreements were therefore prepared using the same applied-for cost of service components as reflected in Docket No. RP76-94 filed April 29, 1976. The proposed effective date is September 1, 1976.

Columbia Gulf further states that copies of the filing were served upon Columbia Gas Transmission Corporation, Consolidated Gas Supply Corporation, Texas Gas Transmission Corporation and Transcontinental Gas Pipe Line Corporation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 25, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24218 Filed 8-17-76;8:45 am]

[Docket Nos. ER76-552 and ER76-131]

KANSAS CITY POWER & LIGHT CO.

Order Accepting for Filing and Suspending, Establishing Procedures, Granting Motion To Consolidate, and Granting Intervention

Electric rates: Suspension. Before Commissioners: Richard L. Dunham, Chairman; Don S. Smith, John H. Holloman III, and James G. Watt. Issued August 11, 1976.

On March 3, 1976, as completed on July 12, 1976, the Kansas City Power & Light Company (KCPL) tendered for filing a Municipal Participation Agreement dated December 19, 1975, between KCPL and the City of Garnett, Kansas (Garnett).[1] KCPL requests an effective date thirty (30) days after filing. The Agreement terminates the Municipal Interconnection Contract, dated December 22, 1969, KCPL Rate Schedule FPC No. 65, and provides for rates and charges for certain wholesale service by KCPL to Garnett. KCPL states that the proposed rates are KCPL's rates and charges for similar service under various schedules previously filed by KCPL with the Federal Power Commission, including those filed in Docket No. ER76-131 for transfer and transmission service to the City of Osawatomie, Kansas (Osawatomie), as well as those filed in Docket No. ER76-184 for general wholesale firm power service. For the reasons hereinafter stated, the Commission shall accept the proposed Agreement for filing, suspend its use for one day, and consolidate the proceedings to determine the lawfulness of the rates and terms and conditions proposed therein for reserve capacity, standby energy, transfer service, and transmission service with those established in Docket No. ER76-131 for purposes of hearing and decision. The Commission shall further make the proposed rates contained in the Agreement for firm power service subject to the outcome of the proceedings in Docket No. ER76-184.

Public notice of KCPL's filing was issued on March 16, 1975, with protests and petitions to intervene due on or before April 1, 1976. On March 31, 1976, Garnett filed a protest and petition to intervene and a motion for consolidation of any proceedings in the instant filing with those established in Docket No. ER76-131.

Garnett's protest and petition to intervene of March 31, 1976, renewed on June 28, 1976, requested a suspension of one day, consolidation of the proceedings with those in Docket No. ER76-131, and that the Commission condition the firm power rates and charges upon those determined to be just and reasonable in Docket No. ER76-184. Garnett alleges that: (1) although the firm power rates included in the proposed agreement are identical to those proposed in Docket No. ER76-184, there is no provision in the instant submittal that would make such rates subject to the outcome of the proceeding in Docket No. ER76-184; (2) KCPL's rate for transmission service, particularly the 55¢/kW/month component of the charge for transmission over KCPL's 34.5 kV Paola-Centerville West Tie Line, is excessive; (3) the 15% minimum reserve power requirement should be eliminated, and (4) the transmission service is not of a general enough nature to allow Garnett to make arrangements for additional types of service from the Kansas City Board of Public Utilities and Southwestern Power Administration.

On July 13, 1976, KCPL filed an objection to Garnett's renewed motion for consolidation. KCPL states that the issues raised in Garnett's petition to intervene far transcend the issues involving Osawatomie in Docket No. ER76-131, as limited by agreement of KCPL and Osawatomie during a conference before the Presiding Administrative Law Judge in that docket. KCPL further argues that although the burden of proof in the instant Section 205 proceeding is upon KCPL, the burden of proof in Docket No. ER76-131, a Section 206 proceeding, is upon Osawatomie. Consolidation of the two dockets, KCPL alleges, would therefore create evidentiary confusion. KCPL apparently has no objection to Garnett's suggested conditioning of KCPL's proposed firm power service rate upon the outcome of Docket No. ER76-184.

The Commision's review indicates that the proposed rates, charges, terms, and conditions of service of the proposed Agreement have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful. Accordingly, we shall accept the proposed Agreement for filing and suspend its effectiveness for one day, until August 13, 1976, subject to refund, and shall consolidate the proceedings to determine the lawfulness of the rates and terms and conditions proposed therein for reserve capacity, standby energy, transfer service, and transmission service with those established in Docket No. ER76-131 for the purposes of hearing and decision. We shall further make the proposed rates for firm power service subject to the outcome of the proceedings in Docket No. ER76-154. With respect to KCPL's objection, the fact that the issues in Docket No. ER76-131 have been limited by agreement of the parties does not in and of itself constitute a bar to consolidation, when, as here, many of the remaining issues are similar in law and fact to those raised in the instant docket. Furthermore, the Commission does not share KCPL's concern over the potential for evidentiary confusion. KCPL's objection is therefore rejected.

The Commission finds: (1) It is necessary and proper in the public interest and to aid in the enforcement of the Federal Power Act, that the Commission enter upon a hearing concerning the lawfulness of the rates, charges, terms and conditions of service contained in KCPL's proposed Agreement, and that such Agreement should be accepted for filing and suspended for one day.

(2) Good cause exists to consolidate the investigation herein ordered with the proceedings in Docket No. ER76-131.

(3) Those firm power service charges associated with the proposed Agreement should be subject to the outcome of the proceedings in Docket No. ER76-184.

(4) The intervention of Garnett may be in the public interest and should be granted.

The Commission orders: (A) Pending a hearing and a decision thereon, KCPL's proposed Municipal Participation Agreement tendered on March 3, 1976 and completed on July 12, 1976, is accepted for filing, suspended for one day, the use thereof deferred until August 13, 1976, subject to refund.

[1] See Attachment A for designations.

V 41 161
AUG 18 76
UMI

(B) Pursuant to the authority of the Federal Power Act, particularly Sections 205 and 206 thereof, and the Commission's Rules and Regulations, an investigation concerning the lawfulness and reasonableness of the rates and terms and conditions proposed in the Agreement for reserve capacity, standby energy, transfer service, and transmission service is hereby initiated.

(C) The proceedings instituted herein shall be consolidated for purposes of investigation, hearing and decision with those established by order issued June 7, 1976, in Docket No. ER76-131, with the procedural schedule as established in that order to govern.

(D) Those firm power service charges proposed by KCPL shall be made subject to the outcome of the proceedings now pending in Docket No. ER76-184.

(E) The above-named petitioner is hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, that the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(F) KCPL shall file monthly with the Commission the report on billing determinants and revenues collected under the presently effective rates and the proposed increased rates to be filed herein, as required by Section 35.19a of the Commission Regulations, 18 CFR Section 35.19a.

(G) The Commission Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

ATTACHMENT A

Rate Schedule Designations—Kansas City Power and Light Company, Docket No. ER76-552

Designation	Description
Rate Schedule FPC No. 78 (supersedes FPC No. 65 as supplemented).	Municipal Participation Agreement.

[Docket No. RP73-97; PGA76-3]

KENTUCKY WEST VIRGINIA GAS CO.

Proposed PGA Rate Increase

AUGUST 11, 1976.

Take notice that on July 14, 1976, Kentucky West Virginia Gas Company (KWG) filed in the above docket a proposed PGA rate increase to be effective September 1, 1976. In its letter of transmittal to the Commission, KWG states as follows:

In support of the Purchase Gas Adjustment proposed herewith, there are also enclosed six copies of Exhibit "A" and Exhibit "B".

Exhibit "A" contains data supporting the unrecovered purchase gas costs recorded by Kentucky West Virginia Gas Company for the six months ended May 31, 1976. The total deviation of purchased gas cost from the base purchased gas cost effective during such period amounts to $145,505.65. From this amount is deducted $7,992.68 reflecting the over amortization of Purchased Gas Costs for the amortization period September 1, 1975 through February 29, 1976. As indicated on Exhibit "A", the deferred cost adjustment required to amortize the net deviation of $137,513.97 during the next six months is a debit of 1.20¢ per MCF.

Exhibit "B" contains data supporting the computation of the projected unit cost of purchased gas for the six months ended February 28, 1977, based upon twelve months ending May 31, 1976, as adjusted. As indicated on Exhibit "B", such projected unit of purchased gas is 6.56¢ per MCF which, compared to the base purchased gas cost of 2.20¢ per MCF, results in an increase in the projected unit cost of gas of 4.36¢ per MCF.

Any person desiring to be heard and to make any protest with reference to said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before August 25, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. KWG's filing is on file with the Commission and available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.76-24214 Filed 8-17-76;8:45 am]

[Docket Nos. RP74-100 and RP76-4; PGA 76-10]

NATIONAL FUEL GAS SUPPLY CORP.

Proposed PGA Rate Adjustment

AUGUST 12, 1976.

Take notice that on August 2, 1976, National Fuel Gas Supply Corporation (National) tendered for filing as part of its FPC Tariff, Original Volume No. 1, Fourth Substitute Seventh Revised Sheet No. 4, proposed to be effective September 1, 1976.

National states that the sole purpose of this revised tariff sheet is to adjust National's rates pursuant to the PGA provisions in Section 17 of the General Terms and Conditions. National further states that such tariff sheet reflects an adjustment in National's rates of .27¢ per Mcf on Fourth Substitute Seventh Revised Sheet No. 4.

It is stated that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before August 25, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.76-24219 Filed 8-17-76;8:45 am]

[Docket No. CP76-461]

TEXAS GAS TRANSMISSION CORP.

Application

AUGUST 11, 1976.

Take notice that on August 2, 1976, Texas Gas Transmission Corporation (Applicant), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP76-461 an application pursuant to Section 7(c) of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing a transportation service for a two-year term for National Steel Corporation and Southwire Company (National-Southwire), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has entered into an agreement, dated July 22, 1976, whereby Applicant has agreed to transport up to 3,317 Mcf of gas per day on an interruptible basis for National-Southwire for Priority 2 end uses at the latter's manufacturing complex in Hawesville, Kentucky. It is indicated that the natural gas would be delivered to Applicant at a meter station to be constructed and installed on Applicant's Sharon-Carthage 20-inch pipeline in Claiborne Parish, Louisiana, and Applicant would simultaneously redeliver volumes of gas up to 3,317 Mcf per day to National-Southwire at a meter station to be constructed and installed in Hancock County, Kentucky. The cost of the facilities to be constructed in Claiborne Parish and Hancock County is estimated to be $57,800 and it is stated that National-Southwire would reimburse Applicant for said cost.

It is indicated that because of curtailments by its intrastate supplier, National-Southwire has contracted to purchase from McGoldrick Joint Venture No. 1-73 (McGoldrick) natural gas to be produced from certain leasehold interests presently owned or controlled by McGoldrick in Leatherman Creek Field, Claiborne Parish, Louisiana. The application shows that National-Southwire would pay McGoldrick $1.43 per Mcf for the first year of a two-year period and $1.46 per Mcf for the second year.

Applicant states that it would not retain any volumes hereunder for its own system supply, but would retain 10 percent of the volumes received for transportation as makeup for compressor fuel and line loss.

The application shows the following information submitted by Applicant:

1. Applicant proposes to transport up to 3,317 Mcf on both a peak day and average day and annual volumes of up to 1,210,705 Mcf.

2. There exists sufficient pipeline capacity to perform the service on a peak day, average day and annual basis.

3. The proposed transportation service would have no impact on Applicant's ability to provide systemwide deliveries for Priority 1 markets.

4. The initial rate for the transportation service would be 17.22 cents per Mcf.

5. Applicant made an offer to purchase the subject gas from McGoldrick at a price of 83.5 cents per Mcf but that the offer was rejected by McGoldrick because, the latter stated, it had been offered a considerably higher price for its gas. As a result, Applicant states that it was unable to secure the gas as part of its system gas supply.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 3, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the National Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.76-24215 Filed 8-17-76;8:45 am]

[Docket No. ES76-64]

UTAH POWER AND LIGHT CO.

Application

AUGUST 11, 1976.

Take notice that on July 30, 1976, Utah Power & Light Company (Applicant) filed an application with the Federal Power Commission seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance and sale of not more than $40,000,000 in principal amount of its First Mortgage Bonds and 1,000,000 additional shares of Common Stock.

The New Bonds and the New Stock are proposed to be offered pursuant to competitive bidding procedures on or about September 22, 1976.

The proceeds from the sale of the New Bonds and the New Stock will be applied to Applicant's construction program and the repayment of short-term indebtedness incurred for construction purposes.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 1, 1976, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

[Docket No. E-9147]

VIRGINIA ELECTRIC AND POWER CO.

Compliance Filing

AUGUST 11, 1976.

Take notice that on July 26, 1976, Virginia Electric and Power Company (VEPCO) tendered for filing a compliance report to ordering paragraph (D) of the Commission's order issued April 12, 1976 in the above-captioned docket requiring a report to be made 15 days after refunds have been made. VEPCO states that refunds were made on June 25, 1976, and that a 15 day extension was granted by the Secretary by letter dated July 13, 1976, making the reports due on or before July 26, 1976.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 27, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Rate Schedule Nos. 136, et al.]

AMOCO PRODUCTION CO., ET AL.

Rate Change Filings

AUGUST 11, 1976.

Take notice that the producers listed in the Appendix attached hereto have filed proposed increased rates to the applicable new gas national ceiling based on the interpretation of vintaging concepts set forth by the Commission in its Opinion No. 699-H, issued December 4, 1974. Pursuant to Opinion No. 699-H the rates, if accepted, will become effective as of the date of filing.

The information relevant to each of these sales is listed in the Appendix.

Any person desiring to be heard or to make any protest with reference to said filings should on or before August 25, 1976 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). A protest will not serve to make the protestant a party to the proceeding. Any party wishing to become a party to a proceeding must file a petition to intervene in accordance with the Commission's rules.

[Docket No. ER76-839]

CENTRAL MAINE POWER CO.

Cancellation of Rate Schedule

AUGUST 11, 1976.

Take notice that on July 12, 1976, Central Maine Power Company (Central Maine) tendered for filing with the Commission a notice of cancellation of Central Maine's FPC Rate Schedule No. 34 Contract between Central Maine and Rangeley Power Company.

Central Maine states that this cancellation was brought about by the acquisition by Central Maine of the utility properties of Rangeley Power Company, pursuant to Federal Power Commission Order issued May 25, 1976, in Docket No. E-9547, and Maine Public Utilities Commission Order issued February 18, 1976. Central Maine requests waiver of the thirty day notice provision to allow the cancellation to become effective on June 30, 1976, which is the date on which Central Maine acquired the Rangeley Power Company properties and is the date after which FPC Rate Schedule No. 34 is no longer effective.

Central Maine states that notice of the proposed cancellation has been served upon Richard N. Berry, Portland, Maine, and upon the State of Maine Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-840]

CENTRAL MAINE POWER CO.

Cancellation of Rate Schedule

AUGUST 11, 1976.

Take notice that on July 12, 1976, Central Maine Power Company (Central Maine) tendered for filing a notice of cancellation of Central Maine's FPC Rate Schedule No. 48—Contract between Central Maine and Squirrel Island Village Corporation.

Central Maine states that this cancellation was brought about by the acquisition by Central Maine of the utility properties of Squirrel Island Village Corporation, pursuant to a Maine Public Utilities Commission Order issued May 6, 1976. Central Maine requests waiver of the thirty day notice provision to allow the cancellation to become effective May 18, 1976, which is the date on which Central Maine acquired the Squirrel Island Village Corporation property and is the date after which FPC Rate Schedule No. 48 is no longer effective.

Central Maine states that notice of the proposed cancellation has been served upon Squirrel Island Village Corporation and State of Maine Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP71-68]

COLUMBIA LNG CORP.

Application To Amend

AUGUST 10, 1976.

Take notice that on July 26, 1976,[1] Columbia LNG Corporation (Applicant), 20 Montchanin Road, Wilmington, Delaware 19807, filed in Docket No. CP71-68 an application to amend the Commission's Opinion No. 622 and order issued June 28, 1972, in said docket (47 FPC 1624), as modified on rehearing by Opinion No. 622-A and order (48 FPC 723), pursuant to Section 3 of the Natural Gas Act by removing the price limitation for liquefied natural gas (LNG) contained in the last sentence of Paragraph (5) of Opinion No. 622-A or, alternatively, by increasing the import price limitation contained in such Paragraph (5) from 77.0 cents per million Btu's of LNG to no less than 124.0 cents per million Btu's delivered by El Paso Algeria Corporation (El Paso) to Applicant at Cove Point, Maryland, all as more fully set forth in the application to amend which is on file with the Commission and open to public inspection.

It is stated that Opinion No. 622, as modified, authorizes Applicant to import LNG from Algeria to proposed facilities in the United States located at Cove Point, Maryland, under a contract with a pricing formula which permits changes in the LNG price. It is indicated that said contract pricing formula was approved but that the import authorization granted Applicant limits the price in the first year of delivery to 77.0 cents per million Btu's at Cove Point. It is further indicated that Opinion No. 622-A provides that the limitation on the price for LNG can be revised when necessary upon a showing that actual costs, reasonably and prudently incurred, exceed the then present estimates.

Applicant asserts that 95 percent of El Paso's costs are now known and that the evidence establishes that based on costs incurred by El Paso to date and estimated costs of completing the LNG tankers and related El Paso facilities plus the cost of LNG purchased under the contract between Sonatrach and El Paso, the delivered price of the LNG in the first year of full deliveries is estimated to be 123.41 cents per million Btu's delivered at Cove Point. Applicant further asserts that in order that all parties may recover the actual costs incurred in connection with deliveries of LNG to Cove Point, it must be authorized to pay at least 124.0 cents per million Btu's delivered.

Any person desiring to be heard or to make any protest with reference to said application to amend should on or before August 30, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a

[1] The application was tendered for filing July 26, 1976; however, the fee required by Section 159.1 of the Regulations under the Natural Gas Act (18 CFR 159.1) was not paid until August 3, 1976. Thus, filing was not completed until the latter date.

protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24138 Filed 8-17-76;8:45 am]

[Docket No. ER76-833]

CONNECTICUT LIGHT & POWER CO.

Purchase Agreement

AUGUST 11, 1976.

Take notice that on August 2, 1976, The Connecticut Light & Power Co. CL&P tendered for filing a proposed rate schedule pertaining to a Purchase Agreement between CL&P, The Hartford Electric Light Co. (HELCO) and Western Massachusetts Electric Light Co. (WMECO and together with CL&P and HELCO, the NU Cos.) and Boston Edison Co. (Edison) dated as of May 14, 1976.

CL&P states that the Purchase agreement provides for a sale to Edison of varying percentages of capacity and energy from the NU Companies' entitlements of Vermont Yankee (the VELCO Contract) and Merrimack Unit No. 2 of the Public Service Company of New Hampshire (the Merrimack Contract) during weekend and holiday periods from May 14, 1976 to October 31, 1976.

CL&P further states that although the Purchase Agreement was agreed upon in principle prior to the contract date, the detailed language of the rate schedule delayed completion of the Purchase Agreement until a date which prevented the filing of such rate schedule more than thirty days prior to the proposed effective date. CL&P, therefore, requests that in order to permit Edison to receive the capacity and energy pursuant to the Purchase Agreement, and to allow the NU Companies to receive payment for such capacity and energy, the Commission, pursuant to Section 35.11 of its regulations, waive the thirty-day notice period and permit the rate schedule to become effective as of May 14, 1976.

CL&P states that the amount of capacity to be purchased during each weekend or holiday period is determined on a weekly basis by mutual agreement of the parties, therefore, the revenues to be received for energy and capacity cannot be accurately estimated for the Term of the Purchase Agreement.

CL&P also states that the rate to be charged under the Purchase Agreement for capacity and energy to be made available to Edison by the NU Companies is based upon the actual charge to the NU Companies as specified in the VELCO Contract and the total cost incurred or expected to be incurred by the NU Companies under the Merrimack Contract.

CL&P states that a copy of the rate schedule has been mailed or delivered to CL&P, Hartford, Connecticut, HELCO, Hartford, Connecticut; WMECO, West Springfield, Massachusetts and Edison, New York, New York.

CL&P states that HELCO and WMECO have filed certificates of concurrenee in this docket.

CL&P states that no facilities are to be installed or modified in order to supply the service to be furnished under the Purchase Agreement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 25, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24142 Filed 8-17-76;8:45 am]

[Docket No. ER76-835]

CONSUMERS POWER CO.

Filing of Service Agreement

AUGUST 11, 1976.

Take notice that Consumers Power Company ("Consumers Power") on August 2, 1976, tendered for filing a Service Agreement for wholesale for resale electric service between Consumers Power and Edison Sault Electric Company ("Edison Sault"). On its proposed effective date, November 6, 1975, the agreement supplanted a prior contract for electric service between the two parties, dated November 21, 1974. Consumers Power states that the Service Agreement incorporates the rates permitted by the Commission to become effective, subject to refund, on September 30, 1975, in Docket No. ER76-45, by order issued August 29, 1975.

Consumers Power further states that Service Agreement was concluded with Edison Sault pursuant to the commitment of Consumers Power to place its wholesale or resale customers on a Schedule of Rates Governing Wholesale for Resale Electric Service and consistent with the Order of the Federal Power Commission in Docket No. ER76-45 dated August 29, 1975. The execution of the Service Agreement is prompted by Consumers Power's desire to have one standard rate schedule for wholesale service.

Consumers Power states that copies of the filing were served on Edison Sault and on the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP76-137]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO INC.

Filing of Proposed Changes in Rates

AUGUST 10, 1976.

Take notice that on July 30, 1976, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) tendered for filing proposed changes in its FPC Gas Tariff to be effective September 1, consisting of the following revised tariff sheets:

Ninth Revised Volume No. 1: Thirteenth Revised Sheet Nos. 12A and 12B.

Sixth Revised Volume No. 2: First Revised Sheet Nos. 246D, 247D, 248D, 249H, and 249I; Second Revised Sheet No. 245D; Third Revised Sheet Nos. 76 and 215; Fourth Revised Sheet Nos. 53, 54, 77 and 141; Seventh Revised Sheet Nos. 11 and 12.

The proposed changes would increase revenues from jurisdictional sales and services by $121,160,266 based on the test period consisting of the twelve months ended April 30, 1976, adjusted for known changes through January 31, 1977.

Tennessee states that the increased rates are required to reflect an increase in rate of return to 11.33 percent and related income taxes, increased plant and related expenses, increased advance payments, increases in the cost of materials, supplies, wages, and taxes, and declining sales due to gas supply curtailment.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Porcedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commis-

Secretary.

[FR Doc.76-24139 Filed 8-17-76;8:45 am]

[Docket No. RP76-136]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Proposed Changes in FPC Tariff

AUGUST 10, 1976.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco), on July 30, 1976, tendered for filing Second Revised Volume No. 1 and certain revised tariff sheets to Original Volume No. 2 of its FPC Gas Tariff. The proposed changes would increase revenues from jurisdictional sales, transportation and storage services by approximately $81.3 million based upon the 12-month period ending April 30, 1976, as adjusted.

Transco states that the principal reasons for the rate increase filing are (1) increase in unit cost of operation of Transco's pipeline system due to the decline in the gas supply and the consequent reduction in annual sales volumes, (2) increased advance payment amounts incurred and to be incurred during the test period and, (3) increased return and related taxes.

Transco has also included in this filing (1) a change in measurement pressure base from 14.7 psia to 14.73 psia, (2) conversion for billing and operating purposes from a volumetric (mcf) basis to an energy basis expressed in dekatherms (dt), and (3) incorporation of miscellaneous changes in Volume No. 1 of its Tariff, as more fully explained in the filing.

In its filing, Transco states that the proposed effective date for the enclosed tariff sheets is September 1, 1976; however, since the Settlement Agreement in Transco's latest rate proceeding in Docket No. RP75-75 provides that a general rate increase shall not be placed into effect prior to October 1, 1976 and because of the Commission's current practice with respect to pipeline rate increase filings, it is anticipated that the Commission will suspend filing for the full 5-month statutory period, or, until February 1, 1977. Transco further states that, at least 30 days prior to January 1, 1977, Transco will make a separate filing to place into effect on that date the changes in form of tariff heretofore enumerated. Having such changes made effective on the first of a calendar year will provide substantial convenience and savings in cost to Transco, and, it is believed, its customers.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-133 (PGA76-3a)]

UNITED GAS PIPE LINE CO.

Filing of Revised Tariff Sheets

AUGUST 11, 1976.

Take notice that on July 20, 1976, United Gas Pipe Line Company (United tendered for filing Thirty-First Revised Sheet No. 4, proposed to become effective July 1, 1976, for one day, and Thirty-Second Revised Sheet No. 4 to become effective July 2, 1976, to its FPC Gas Tariff, First Revised Volume No. 1.)

This filing is being made to reflect (1) the elimination of New Entity Cost from United's base tariff rates, (2) eliminate from the purchased gas cost underlying the rates on Thirty-Second Revised Sheet No. 4 (a) noncertificated producer rate increases which did not become effective by July 1, 1976, (b) proposed purchase from Trans-Ocean Oil, Inc. which did not materialize by July 1, 1976, and (3) a reduction in Sea Robin Pipeline Company's commodity rate.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

FEDERAL RESERVE SYSTEM

BANCORPORATION OF MONTANA

Acquisition of Bank

Bancorporation of Montana, Great Falls, Montana, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company act (12 U.S.C. 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of Bank of Montana, Helena, Montana. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

Bancorporation of Montana is also engaged in the following nonbank activities: engaging in lines of casualty business and administering various insurance programs for all affiliates. In addition to the factors considered under section 3 of the Act (banking factors), the Board will consider the proposal in the light of the company's nonbanking activities and the provisions and prohibitions in section 4 of the Act (12 U.S.C. § 1843).

The application may be inspected at the Offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 13, 1976.

Board of Governors of the Federal Reserve System, August 12, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-24209 Filed 8-17-76;8:45 am]

BANK HOLDING COMPANIES

Review of Grandfather Privileges

Section 4 of the Bank Holding Company Act (12 U.S.C. § 1843) provides certain privileges ("grandfather privileges") with respect to the nonbanking activities of a company that, by virtue of the 1970 Amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such a company was lawfully engaged in on June 30, 1968 (or on a date subsequent to June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, of another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date). However, section 4(a)(2) of the Act requires the Board of Governors of the Federal Reserve System to determine whether such grandfather privileges should be terminated with respect to a company that controls a bank with assets in excess of $60 million on or after December 31, 1970.

In exercising its authority under section 4(a)(2), the Board by order after opportunity for hearing, may terminate the authority granted by said section if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices.

On the basis of the information of record, it appears that the companies listed below are not entitled to grandfather privileges with respect to any activity by virtue of the fact that on June 30, 1968, none of the companies was engaged directly in any activity other than owning stock of their respective banks and none had any subsidiary other than their respective subsidiary banks. Furthermore, it appears that at the present time, none of the companies listed below is engaged, either directly or through a subsidiary, in any non-banking activities.

Bank holding company and subsidiary bank:

Metropolitan Investments Company, Chicago, Ill., Metropolitan Bank and Trust Company, Chicago, Ill.

Selin Corporation, Chicago, Ill., First National Bank of Niles, Niles, Ill.

The Hibshman Trust for the Euphrata National Bank Stock, Euphrata, Pa. Euphrata National Bank, Euphrata, Pa.

To aid the Board in making its determinations with respect to the aforementioned bank holding companies, interested persons are hereby afforded an opportunity to submit relevant data, views, and arguments bearing on the proposed determinations by the Board that the above-mentioned companies are not entitled to grandfather privileges. Any such material should be submitted in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 13, 1976. Such material will be made available for inspection and copying upon request, except as provided in § 261.6(a) of the Board's rules regarding availability of information.

Board of Governors of the Federal Reserve System, August 12, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-2408 Filed 8-17-76;8:45 am]

CITI BANCORP

Order Approving Formation of Bank Holding Company

Citi Bancorp, Lincoln, Nebraska, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 97.8 per cent of the voting shares of Citibank and Trust Co. of Lincoln, Lincoln, Nebraska ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the application and all comments received have been considered in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant is a non-operating company organized for the purpose of becoming a bank holding company through acquisition of Bank (deposits of $16 million).[1] Upon acquisition of Bank, Applicant would control the 80th largest bank in Nebraska, holding .27 per cent of total deposits in commercial banks in the State. Bank is the seventh largest of eighteen banks in the Lincoln banking market, which is approximated by Lancaster County, and controls 2.5 per cent of the total commercial bank deposits therein. Two of Applicant's principals are also principals in two existing bank holding companies located in Nebraska. The subsidiary of one of these holding companies is located in the relevant market and holds approximately 2.9 per cent of deposits in the market; the subsidiary bank of the other affiliated holding company is located in Geneva, Nebraska, approximately 70 miles from Bank. Inasmuch as the subject proposal represents a restructuring of Bank's ownership, and based upon other facts of record, the acquisition of Bank by Applicant would not eliminate any significant existing or potential competition, nor have an adverse effect on other area banks. Accordingly, it is concluded that competitive considerations are consistent with approval of the application.

The financial and managerial resources and prospects of Applicant are primarily dependent on those of Bank. In this regard, Applicant proposes to service the debt that it will assume as a part of this proposal over a twelve-year period through dividends from Bank and the tax benefits derived from filing consolidated tax returns. The projected earnings of Bank appear sufficient to provide Applicant with the necessary financial flexibility to meet its annual debt servicing requirements while maintaining Bank's capital at an acceptable level. Moreover, it appears that the financial and managerial considerations with respect to the other holding companies with which Applicant's principals are involved are generally satisfactory. Therefore, considerations relating to banking factors are regarded as being consistent with approval of the application. Considerations relating to the convenience and needs of the community to be served are also regarded as consistent with approval of the application to acquire Bank. It has been determined that the proposal to form a bank holding company would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Secretary of the Board, acting pursuant to delegated authority from the Board of Governors, effective August 11, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-24253 Filed 8-17-76;8:45 am]

[1] All banking data are as of June 30, 1975.

FIRST SECURITY CORP.

Order Approving Acquisition of Bank

First Security Corporation, Salt Lake City, Utah, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of First Security Bank of Orem, National Association, Orem, Utah ("Bank"), a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the largest banking organization in Utah, controls eight banks in Utah with aggregate deposits of approximately $968.2 million, representing 28.7 per cent of the total deposits in commercial banks in the State.[1] In addition, Applicant controls one bank in Idaho and one bank in Wyoming, each of which was acquired by Applicant prior to the enactment of the Bank Holding Company Act of 1956.[2] Since Bank is a proposed new bank, consummation of the proposed acquisition would not immediately increase Applicant's share of commercial bank deposits in the State nor increase the concentration of banking resources in Utah.

Bank is to be located in the town of Orem, 35 miles south of Salt Lake City. The relevant banking market, which is approximated by the Provo, Utah RMA,[3] is presently served by eleven banking organizations. Applicant has two subsidiary banks operating in the market and controls 29 per cent of the market's total deposits.[4] However, given the fact that Bank is a proposed new bank and will be located in the same office previously occupied by a branch of one of Applicant's banks already in the market, approval of Applicant's acquisition of Bank would produce no adverse effects on existing competition in the market.[5] With respect to potential competition, there are a number of other banking alternatives in the relevant market and the record indicates that two additional banks have recently received permission to enter the market. It does not appear that Applicant's acquisition of Bank

[1] Unless otherwise indicated, all banking data are as of December 31, 1975, and reflect bank holding company formations and acquisitions approved through June 30, 1976.

[2] These two banks and their total deposits are as follows: First Security Bank of Idaho, National Association, Boise, Idaho (deposits of $709.3 million) and First Security Bank of Rock Springs, Rock Springs, Wyoming (deposits of $21.4 million).

[3] Ranally Metro Area.

[4] As of June 30, 1975.

[5] Applicant is prevented by Utah's home-office protection laws from establishing new branches of its existing banking subsidiaries in Orem.

V 41 161 AUG 18 76 UMI

would preclude other banking organizations from entering this growing market, which increased in population from 25,000 in 1970 to 36,000 in 1975. Thus, in view of the above considerations as well as Utah's restrictive branching laws, it appears that the proposed transaction would have no adverse effects on potential competition. Accordingly, competitive considerations are regarded by the Board as being consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are regarded as satisfactory. Therefore, considerations relating to banking factors are consistent with approval of the application. The addition of a new banking alternative to the town of Orem should provide greater banking convenience for the residents of the area. Accordingly, considerations relating to the convenience and needs of the community to be served lend some weight toward approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) First Security Bank of Orem, National Association, Orem, Utah, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of San Francisco pursuant to delegated authority.

By order of the Board of Governors,* effective August 11, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-24254 Filed 8-17-76;8:45 am]

QUIVIRA BANC SHARES, INC.

Formation of Bank Holding Company

Quivira Banc Shares, Inc., Hutchinson, Kansas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 percent or more of the voting shares of The First National Bank of Sterling, Sterling, Kansas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than September 13, 1976.

Board of Governors of the Federal Reserve System, August 12, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

MUSIC ADVISORY PANEL (FOLK/ETHNIC)

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a meeting of the Music Advisory Panel (Folk/Ethnic) to the National Endowment for the Arts will be held on September 8, 9, 10, and 11, 1976 from 9:30 a.m. to 6 p.m. in the 14th floor conference room of the Columbia Plaza office building, 2401 E Street, N.W., Washington, D.C.

A portion of this meeting will be open to the public on September 9 from 2 p.m. to 4 p.m. on a space available basis. Accommodations are limited. The agenda for this portion will be a discussion of Guidelines.

The remaining sessions of this meeting on September 8, 10 and 11 from 9:30 a.m. to 6 p.m. and on September 9 from 9:30 a.m. to 1 p.m. and from 4 p.m. to 6 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of June 16, 1975, these sessions, which involve matters exempt from the requirements of public disclosure under the provisions of the Freedom of Information Act (5 U.S.C. 552 (b), (4), (5), and (6)) will not be open to the public.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 643-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

INTERSTATE COMMERCE COMMISSION

[Notice No. 120]

ASSIGNMENT OF HEARINGS

AUGUST 13, 1976.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 141081, Trailer Car Corp., now assigned September 15, 1976 at New York, N.Y., is canceled and application dismissed.

MC 129387 (Sub-No. 21), Bill Payne, dba Bill Payne Trucking Company, now assigned November 3, 1976, at Washington, D.C., is canceled and application dismissed.

MC-C 8995, Dugan Truck Line, Inc.—Investigation and Revocation of Certificates and Certificates of Registration, now being November 9, 1976 (1 day), at Topeka, Kansas, in a hearing room to be later designated.

ROBERT L. OSWALD,
Secretary.

[Section 5b Application No. 4]

SOUTHERN PORTS FOREIGN FREIGHT AGREEMENT

AUGUST 9, 1976.

The Commission is in receipt of the above-entitled and numbered application for approval of an agreement under the provisions of Section 5b of the Interstate Commerce Act.

Filed May 28, 1976 by:

John J. Dolan, Chairman, Southern Ports Foreign Freight Commitee, Room 1100, 222 South Riverside Plaza, Chicago, IL 60606, (Attorney-in-Fact).

F. R. Birkholz, L. A. Harris, 176 E. Fifth Street, St. Paul, MN 55101, (of counsel).

Agreement involves: Organization and procedure between and among rail common carrier members of the Southern Ports Foreign Freight Committee for the joint consideration, initiation, or establishment of rates, classifications, divisions, allowances, charges, and rules and regulations pertaining thereto, applicable to the transportation of export and import freight traffic, subject to specified commodity exceptions, between Southern ports (Morehead City, N.C., south and west to and including Corpus Christi, Tex.), on the one hand, and, on the other, designated points in Central and Western Territory.

The complete application may be inspected at the Office of the Commission in Washington, D.C.

Any interested person desiring to protest and participate in this proceeding shall notify the Commission in writing on or before September 17, 1976. As provided by the General Rules of Practice of the Commission, persons other than applicants should fully disclose their interest and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion may proceed to investigate and determine the matters involved in such application without further or formal hearing.

ROBERT L. OSWALD,
Secretary.

[Section 5b Application No. 6]

SOUTHERN RAILROADS AGREEMENT

AUGUST 9, 1976.

The Commission is in receipt of the above-entitled and numbered application for approval of an agreement under the provisions of Section 5b of the Interstate Commerce Act.

Filed May 28, 1976 by:

Bates B. Bowers, Chairman, Southern Freight Association, 151 Ellis Street, N.E., Atlanta, GA 30303, (Attorney-in-Fact).

F. R. Birkholz, 908 West Broadway, Louisville, KY 40201, (Attorney for Applicants).

Agreement involves: Organization, practices and procedures between and among rail common carrier members of the Southern Freight Association for the consideration, initiation, or establishment of rates, classifications, charges, divisions, and rules, regulations or practices thereto, governing the transportation of property in interstate or foreign commerce within the Southern Territory.

The complete application may be inspected at the Office of the Commission in Washington, D.C.

Any interested person desiring to protest and participate in this proceeding shall notify the Commission in writing on or before September 17, 1976. As provided by the General Rules of Practice of the Commission, persons other than applicants should fully disclose their in-

V 41 161 AUG 18 76 UMI

terest and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application, without further or formal hearing.

[Notice No. 12]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

AUGUST 18, 1976.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before September 7, 1976. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-76402 By order of August 12, 1976 the Motor Carrier Board approved the transfer to Mike Falcone, Jr. & Sons, Inc., Silver Spring, Maryland of Certificates No. MC 117762 and MC 117762 (Sub-No. 2) issued November 28, 1960 and September 29, 1970, respectively to Mike Falcone, Jr., and Robert Falcone, A Partnership, doing business as Mike Falcone Jr. & Son, Silver Spring, Maryland, authorizing the transportation of Bananas, and fresh fruits, berries, and vegetables, in mixed loads with bananas, from Baltimore, Md., and Philadelphia, Pa., to Washington, D.C., and (1) Bananas, and (2) agricultural commodities exempt from economic regulation under section 203(b)(6) of the Act, when transported in mixed loads with bananas, from Wilmington, Del., to Carlstadt, N.J., Mount Kisco and Waterfore, N.Y., and the District of Columbia. Chester A. Zyblut, 1030 Fifteenth Street, Suite 366, Washington, D.C., 20005, Attorney for Applicants.

No. MC-FC-76433. By order of August 6, 1976 the Motor Carrier Board approved the transfer to Boat Transit, Inc., a California Corporation, Newport Beach, California, of Certificate No. MC 40915, issued March 12, 1968, to Boat Transit, Inc., Newport Beach, California, authorizing the transportation of boats and boat parts, supplies, and equipment, between points in Michigan, Ohio, Illinois, Indiana, New York, Pennsylvania, Delaware, New Jersey, West Virginia, Wisconsin, Kentucky, Virginia and the District of Columbia; between points in Alabama, Arkansas, Connecticut, Florida, Georgia, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, Missouri, New Hampshire, North Carolina, Oklahoma, Rhode Island, South Carolina, Tennessee and Vermont; between the points in the specified states on the one hand, and on the other, points in Michigan, Ohio, Illinois, Indiana, New York, Pennsylvania, Delaware, New Jersey, West Virginia, Wisconsin, Kentucky, Virginia, and the District of Columbia; and between points in Arizona, California, Colorado, Idaho, Louisiana, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming; and between said point on the one hand, and, on the other, points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia. David R. Parker, 2310 Colorado State Bank Building, 1600 Broadway, Denver, Colorado. Representative of applicants.

ROBERT L. OSWALD,
Secretary.

[Notice No. 105]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 13, 1976.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 50307 (Sub-No. 78TA), filed August 6, 1976. Applicant: INTERSTATE DRESS CARRIERS, INC., 247 West 35th St., New York, N.Y. 10001. Send protests to: Richard H. Dawkins, District Supervisor, Interstate Commerce Commission, Room B-400 Federal Bldg., 727 E. Durango, San Antonio, Tex. 78206.

Water Carrier Applications

No. W-1275 (Sub-No. 1TA). Carrier: HOVERTRANSPORT, INC., Bridgeport, Ct. Carrier's representative: Thomas W. Murrett, Esq., 342 North Main Street, West Hartford, Ct. 06117. An order of the Commission, Motor Carrier Board, dated July 2, 1976, granted temporary authority, conditioned upon full compliance with all applicable statutory and Commission requirements concerning tariff publications, and designation of agents upon whom process may be served, to engage in the business of transportation by water vessel, in interstate or foreign commerce, as a common carrier, by water, transporting: Passengers and their baggage and parcels weighing 50 pounds or less, in regular and charter operations, between Bridgeport, Conn. and Huntington Long Island, N.Y., via Long Island Sound for 90 days commencing July 2, 1976. Send protest to: Diane Seavey, Transportation Specialist, 324 U.S. Post Office, 135 High Street, Hartford, Conn. 06101.

No. W-1310TA filed August 11, 1976. Applicant: RIVER EXCURSIONS, INC., 704 South 3rd Street, Stillwater, Minnesota 55082. Applicant's representative: Andrew R. Clark, 1000 1st National Bank Bldg., Minneapolis, Minnesota 55402. Authority sought to operate as a *common carrier*, by water, in the transportation of: *Passengers and their baggage*, over inland waterways in special and charter operations, (1) between St. Paul, Minn. and Winona, Minn., (2) beginning and ending at Redwing, Minn., and extending to Prescott, Wis., (3) beginning and ending at Winona, Minn., and extending to points on the Mississippi river within 25 miles of Winona, Minn., for 180 days. All service will be conducted on the Mississippi and St. Croix rivers in parts 1, 2, and 3 above. Supporting shippers: Barron County Senior Citizens, Barron, Wis., Statemen's Club, Minneapolis, Minn., and Consolidated Tours, Inc., St. Paul, Minn. Send protests to: Marion Cheney, Transportation Assistant, Interstate Commerce Commission, 414 Federal Building and U.S. Courthouse, 110 South Fourth Street, Minneapolis, Minn. 55401. The requirement to publish notice of the application prior to action thereon was waived, based on assurances of a lack of competitive interest, and of an alleged need for immediate service.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[Notice No. 104]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 12, 1976.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

Motor Carriers of Property

No. MC 86247 (Sub-No. 7TA) filed August 4, 1976. Applicant: I.C.L. INTERNATIONAL CARRIERS LIMITED, 1333 College Ave., Windsor, Ontario, Canada. Applicant's representative: Martin J.

V 41 H 61
AUG 18 76

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

AUGUST 13, 1976.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination* Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before August 28, 1976. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 22675 (Sub-No. E43), filed June 4, 1974. Applicant: ALLSTATE VAN LINES, INC., 50–18 97th Place, Corona, N.Y. 11368. Applicant's representative: Robert J. Gallagher, 1000 Connecticut Ave. N.W., Suite 1200, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in New York on, east and south of a line beginning at the United States-Canadian border and extending along New York Highway 374 to junction New York Highway 3, thence along New York Highway 3 to junction New York Highway 73, thence along New York Highway 73 to junction Interstate Highway 87, thence along Interstate Highway 87 to junction New York Highway 8, thence along New York Highway 8 to junction New York Highway 30, thence along New York Highway 30 to junction Thomas Dewey Thruway, thence along the Thomas Dewey Thruway to the New York-New Jersey State line at Suffern, N.Y., on the one hand, and, on the other, points in Maryland.

The purpose of this filing is to eliminate the gateway of Essex County, N.J.

No. MC 92983 (Sub-No. E77), (partial correction), filed June 4, 1974, published in the FEDERAL REGISTER June 23, 1976, and republished, as corrected, in this issue. Applicant: AMERICAN BULK TRANSPORT CO., P.O. Box 2508, Kansas City, Mo. 64142. Applicant's representative: H. B. Foster (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (N) *Lard and animal oils, fats, grease and tallows*, in bulk, in tank vehicles: (1) from points in Montana to points in Alabama, Connecticut, Delaware, District of Columbia, Florida, Georgia, Illinois (except Chicago, Chicago Heights, Decatur, East St. Louis and Rockford), Indiana, Kentucky, Massachusetts, Maryland, Mississippi, Maine, New Hampshire, New Jersey, New York (except New York City and Port Ivory), North Carolina, Ohio (except Cincinnati and Ivorydale), Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia and West Virginia. The purpose of this filing is to eliminate the gateways of: (N) Nebraska and Dubuque, Iowa; The purpose of this correction is to correct the territorial description. The remainder of the letter-notice remains as previously published.

No. MC 112070 (Sub-No. E22), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Wisconsin, on the one hand, and, on the other, points in Arkansas, Oklahoma and Kentucky. The purpose of this filing is to eliminate the gateways of Iowa and Missouri.

No. MC 112070 (Sub-No. E23), filed June 4, 1974. Applicant: GRAY MOVING AND STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Wyoming, on the one hand, and, on the other, points in Kentucky. The purpose of this filing is to eliminate the gateways of Iowa and Illinois.

No. MC 112070 (Sub-No. E24), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Connecticut, on the one hand, and, on the other, points in Texas on, west and south of a line beginning at the Oklahoma-Texas State line and extending along Texas Highway 283 to junction U.S. Highway 277, thence along U.S. Highway to the International Boundary line between the United States and Mexico. The purpose of this filing is to eliminate the gateways of Missouri and Colorado.

No. MC 112070 (Sub-No. E25), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Ohio, on the one hand, and, on the other, points in Ohio to Texas on and west of a line beginning at the Oklahoma-Texas State line and extending along U.S. Highway 87 to junction Texas Highway 349, thence along Texas Highway 349 to junction U.S. Highway 80, thence along U.S. Highway 80 to the International Boundary Line between the United States and Mexico. The purpose of this filing is to eliminate the gateways of Illinois, Missouri and Colorado.

No. MC 112070 (Sub-No. E27), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Kentucky, on, east and north of a line beginning at the Ohio-Kentucky State line and extending along Interstate Highway 75 to junction Interstate Highway 64, and extending along Interstate Highway 64 to the Kentucky-West Virginia State line, on the one hand, and, on the other, points in that part of Texas west and south of a line beginning at the Oklahoma-Texas 83, to junction Interstate Highway 20, to junction Interstate Highway 10, to El Paso County, Tex.; (b) between points in Kentucky, on the one hand, and, on the other, points in Dallam, Sherman, El Paso and Hudspeth Counties, Tex. The purpose of this filing is to eliminate the gateway of Missouri and Colorado.

No. MC 112070 (Sub-No. E30), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting:

Household goods, as defined by the Commission, between points in Connecticut, on the one hand, and, on the other, points in Cimmaron, Texas and Beaver Counties, Okla.

The purpose of this filing is to eliminate the gateway of Missouri, and between points in that part of Colorado on, east, and north of a line beginning at the Colorado-Wyoming State line and extending along U.S. Highway 87 to Wellington, Colo., thence along Colorado Highway 1 (formerly U.S. Highway 87) to junction U.S. Highway 287, thence along U.S. Highway 287 (formerly U.S. Highway 87) to Denver, Colorado, thence along U.S. Highway 36 to the Colorado-Kansas State line, on the one hand, and, on the other, points in Iowa, Kansas, Missouri, Nebraska and Oklahoma.

No. MC 112070 (Sub-No. E31), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Nebraska on and west of a line beginning at the South Dakota-Nebraska State line and extending along U.S. Highway 83 to junction Interstate Highway 80, extending along Interstate Highway 80 to the Nebraska-Colorado State line, on the one hand, and, on the other, points in Cimmarron County, Okla.

The purpose of this filing is to eliminate the gateway between points in that part of Colorado on, east, and north of a line beginning at the Colorado-Wyoming State line and extending along U.S. Highway 87 to Wellington, Colo., thence along Colorado Highway 1 (formerly U.S. Highway 87) to junction U.S. Highway 287, thence along U.S. Highway 287 (formerly U.S. Highway 87) to Denver, Colorado, thence along U.S. Highway 36 to the Colorado-Kansas State line, on the one hand, and, on the other, points in Iowa, Kansas, Missouri, Nebraska and Oklahoma.

No. MC 112070 (Sub-No. E32), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in South Dakota on and west of a line beginning at the North Dakota-South Dakota State line, and extending along the Missouri River to the South Dakota-Nebraska State line, on the one hand, and, on the other, points in Cimmaron and Texas Counties, Okla.

The purpose of this filing is to eliminate the gateway between points in that part of Colorado on, east, and north of a line beginning at the Colorado-Wyoming State line and extending along U.S. Highway 87 to Wellington, Colo., thence along Colorado Highway 1 (formerly U.S. Highway 87) to junction U.S. Highway 287, thence along U.S. Highway 287 (formerly U.S. Highway 87) to Denver, Colorado, thence along U.S. Highway 36 to the Colorado-Kansas State line, on the one hand, and, on the other, points in Iowa, Kansas, Missouri, Nebraska and Oklahoma.

No. MC 112070 (Sub-No. E34), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission between points in Colorado on, north and west of a line beginning at the Colorado-Utah State line and extending along Interstate Highway 70, to junction Interstate Highway 25, to the Colorado-Wyoming State line, on the one hand, and, on the other, points in Oklahoma.

The purpose of this filing is to eliminate the gateway between points in that part of Colorado, on, east, and north of a line beginning at the Colorado-Wyoming State line and extending along U.S. Highway 87 to Wellington, Colo., thence along Colorado Highway 1 (formerly U.S. Highway 87) to junction U.S. Highway 287, thence along U.S. Highway 287 (formerly U.S. Highway 87) to Denver, Colorado, thence along U.S. Highway 36 to the Colorado-Kansas State line, on the one hand, and, on the other, points in Iowa, Kansas, Missouri, Nebraska and Oklahoma.

No. MC 112070 (Sub-No. E35), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Wyoming, on the one hand, and, on the other, points in Oklahoma.

The purpose of this filing is to eliminate the gateway between points in that part of Colorado on, east, and north of a line beginning at the Colorado-Wyoming State line and extending along U.S. Highway 87 to Wellington, Colo., thence along Colorado Highway 1 (formerly U.S. Highway 87) to junction U.S. Highway 287, thence along U.S. Highway 287 (formerly U.S. Highway 87) to Denver, Colorado, thence along U.S. Highway 36 to the Colorado-Kansas State line, on the one hand, and, on the other, points in Iowa, Kansas, Missouri, Nebraska and Oklahoma.

No. MC 114552 (Sub-No. E184), (correction), filed September 18, 1975, published in the FEDERAL REGISTER July 21, 1976, and republished, as corrected, this issue. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories* used in the manufacture and installation of composition boards (except commodities in bulk), from points in Colorado, to points in Virginia, on and east of a line beginning at the Virginia-North Carolina State line and extending along U.S. Highway 501 to junction U.S. Highway 15, thence along U.S. Highway 15 to junction Virginia Highway 20, thence along Virginia Highway 20 to junction Virginia Highway 3, thence along Virginia Highway 3 to junction U.S. Highway 301, thence along U.S. Highway 301 to the Virginia-Maryland State line. The purpose of this filing is to eliminate the gateway of the plant site and warehouse facilities of the Abitibi Corporation near Roaring River, N.C. and the plant site and warehouse facilities of the Celotex Corporation in Wayne County, N.C. The purpose of this correction is to correct the origin description.

No. MC 119774 (Sub-No. E308), (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of February 11, 1976, and republished, as corrected, this issue. Applicant: EAGLE TRUCKING COMPANY, P.O. Box 471, Kilgore, Tex. 75662. Applicant's representative: Bernard H. English, 6270 Firth Road, Fort Worth, Tex. 76116. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Machinery, equipment, materials, and supplies*, used in, or in connection with the discovery development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and byproducts, and *machinery, equipment, materials, and supplies*, used in, or connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof, *earth drilling machinery and equipment*, and *machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling, of drilling machinery and equipment, (b) the connection of holes or wells drilled, (c) the production, storage and transmission of commodities resulting from drilling operations at well or hole sites and (d) the injection or removal of commodities into or from holes or wells, between Memphis, Tenn. (except those points in the Memphis Commercial Zones located in Mississippi and Arkansas), on the one hand, and, on the other, points in Indiana, Illinois and Kentucky.

The purpose of this filing is to eliminate the gateway of West Memphis, Ark.

NOTE.—The purpose of this correction is to indicate that the above letter-notice is No. MC 119774 (Sub-No. E308) which was previously published without a sub-number and to indicate the correct destination states.

VOL 41 NO 161 AUG 18 1976 UM

No. MC 119774 (Sub-No. E310), (correction), filed June 4, 1974, published, in the FEDERAL REGISTER issue of February 11, 1976, and republished, as corrected, this issue. Applicant: EAGLE TRUCKING COMPANY, P.O. Box 471, Kilgore, Tex. 75662. Applicant's representative: Bernard H. English, 6270 Firth Road, Fort Worth, Tex. 76116. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials, and supplies*, used in, or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, and *machinery, equipment, materials and supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof, and (2) *earth drilling machinery and equipment, and machinery, equipment, materials, supplies and pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites and (d) the injection or removal of commodities into or from holes or wells, between Counce, Tenn., on the one hand, and, on the other, points in Illinois on and north of a line beginning at the Missouri-Illinois State line and extending along U.S. Highway 24 to junction Illinois Highway 99, thence along Illinois Highway 99 to junction Illinois Highway 100, thence along Illinois Highway 100 to junction Illinois Highway 125, thence along Illinois Highway 125 to junction Illinois Highway 78, thence along Illinois Highway 78 to junction U.S. Highway 136, thence along U.S. Highway 136 to junction Illinois Highway 29, thence along Illinois Highway 29 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Illinois Highway 116, thence along Illinois Highway 116 to junction U.S. Highway 66, thence along U.S. Highway 66 to Gardner, thence along Illinois Highway 53 to junction U.S. Highway 66, thence along U.S. Highway 66 to Chicago, and points in Indiana on and north of a line beginning at the Illinois-Indiana State line and extending along U.S. Highway 30 to junction Indiana Highway 2, thence along Indiana Highway 2 to South Bend, thence along U.S. Highway 20 to the Indiana-Ohio State line. The purpose of this filing is to eliminate the gateway of West Memphis, Ark.

NOTE.—The purpose of this correction is to state that the above letter-notice is No. MC 119774 (Sub-No. E310) which was previously published under the incorrect sub-number E119.

By the Commission.

[Rule 19, Ex Parte No. 241, Third Revised Exemption No. 125; Amdt. 1]

EXEMPTION UNDER PROVISION OF MANDATORY CAR SERVICE RULES

To: All Railroads:

Upon further consideration of Third Revised Exemption No. 125 issued July 13, 1976.

It is ordered, That, under authority vested in me by Car Service Rule 19, Third Revised Exemption No. 125 to the Mandatory Car Service Rules ordered in Ex Parte No. 241 be, and it is hereby, amended to expire September 15, 1976.

This amendment shall become effective August 15, 1976.

Issued at Washington, D.C., August 9, 1976.

INTERSTATE COMMERCE COMMISSION,
LEWIS R. TEEPLE,
Agent.

[FR Doc.76-24239 Filed 8-17-76;8:45 am]

[Rule 19, Ex Parte 241; Twenty-fourth Revised Exemption No. 10]

EXEMPTION UNDER PROVISION OF MANDATORY CAR SERVICE RULES

It appearing, That the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 399 issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44 ft. 6 in. or less, regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

TRANSPORTATION OF "WASTE" PRODUCTS FOR REUSE OR RECYCLING

Special Certificate Letter Notice(s)

The following letter notices request participation in a Special Certificate of Public Convenience and Necessity for the transportation of "waste" products for reuse or recycling in furtherance of a recognized pollution control program under the Commission's regulations (49 CFR 1062) promulgated in "Waste" Products, Ex Parte No. MC-85, 124 MCC 583 (1976).

An original and one copy of protests against applicant's participation may be filed with the Interstate Commerce Commission within 20 days from the date of this publication. A copy must also be served upon applicant or its representative. Protests against the applicant's participation will *not* operate to stay commencement of the proposed operation.

If the applicant is not otherwise informed by the Commission, operations may commence on or before September 17, 1976 subject to its tariff publication effective date.

P-6-76 (Special certificate—waste products), filed August 11, 1976. Applicant: BHY TRUCKING, INC., 9231 Whitmore, El Monte, Calif. 91733. Applicant's representative: Milton W. Flack, 4311 Wilshire Blvd., Suite 300, Los Angeles, Calif. 90010. Authority sought to operate pursuant to a certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *waste products for recycling or reuse*, between points in the United States (except Alaska and Hawaii), in

[1] Addition.

furtherance of a recognized pollution control program sponsored by Century Enterprises, Denver, Colo.; Century Metal Recyclers, Denver, Colo.; and Prime Metal Trading, Denver Colo., for the purpose of recovery of scrap metal for recycling.

By the Commission.

FOREIGN-TRADE ZONES BOARD

COMMITTEE OF ALTERNATES

Procedures, Investigative Hearing

The procedures to be followed at the August 24, 1976 investigative hearing of the Committee of Alternates (the Committee) Foreign-Trade Zones Board (the Board) concerning the processing of foreign meat covered by TSUS 106.10 within Foreign Trade Zone No. 7 at Mayaguez, Puerto Rico are set forth below. In considering whether particular "goods or process of treatment is detrimental to the public interest, health, or safety," the Board is empowered to "cause such investigation as it may deem necessary." 15 CFR 400.807. Accordingly, by FEDERAL REGISTER notice published July 29, 1976 (See 41 FR 31618), the Board announced that it had ordered an investigation and that, upon request of a directly interested party, a hearing would be held. Timely requests for a hearing were filed by counsel for Bunker Hill Packing Corporation and Commonwealth Processing Corporation, Puerto Rico Industrial Development Corporation, and El Ganader, Inc.

This is the first occasion that the Board has determined, pursuant to its authority under 19 U.S.C. 81c(c) and 15 CFR 400.807, that such an investigative hearing, on request of an interested party, would be appropriate. To the extent that the Board determines in future cases that a similar type of hearing is the appropriate type of investigation, the procedures set forth below shall apply to all such investigative hearings.

The hearing in the above-referenced matter shall take place at 10:00 A.M., August 24, 1976 in Room 4833 of the Main Commerce Department, 14th Street and Constitution Avenue, NW., Washington, D.C. Inquiries may be directed to Mr. John J. Da Ponte, Jr., Executive Secretary of the Foreign-Trade Zone Board, Room 6886B, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-2862.

Committee—The hearing shall be conducted before the Committee, as defined in 15 CFR 400.1302, or their designees.

Participants.—Those parties deemed by the Committee to have a direct and immediate interest in the investigation shall be afforded an opportunity to participate in the hearing and to make oral and written presentations before the Committee, as set forth below. Such parties shall include the person or entity filing the initial complaint or report, if any. Other persons having an interest in the investigative hearing shall be afforded the opportunity to file written submissions, as described below.

Written Submissions.—Any person having an interest in the investigation may file a written submission with the Committee for its consideration. Such submission may contain statements, memoranda, correspondence, data, affidavits, or other documents relevant to whether the goods or process of treatment at issues is detrimental to the public interest, health, or safety. Such submissions shall be made a part of the record and will be available for public inspection and copying. Written submissions must be filed with the Committee no later than 5 P.M. the day before the day of the Committee's hearing, except for rebuttal submissions, which may be filed in response to written submissions or oral presentations before the Committee and which must be filed within five (5) calendar days of the conclusion of the Committee's hearing, unless the Committee determines that a longer period is appropriate. Submissions must be filed with the Executive Secretary of the Board.

Oral Presentations.—Oral presentations on behalf of participants may be made by counsel or other representatives. The party that filed the initial complaint or report shall make the first oral presentation to the Committee. The order of presentation of the remaining participants shall be as determined by the Committee. Questions of procedure shall be ruled on by the Committee or the legal officer advising the Committee, if any. The amount of time allotted each participant for oral presentation shall be within the discretion of the Committee, except that each participant shall be allowed no less than thirty (30) minutes for its oral presentation and except that time used for examining and cross-examining witnesses shall not be counted against such thirty (30) minutes.

Witnesses.—Any participant may present its own witnesses before the Committee for the purpose of furnishing testimony. All testimony given shall be given under oath. No later than three (3) days prior to the date of the hearing, participants must notify the Committee in writing of the names of the individuals it intends to call as witnesses and a bref description of the substance of their testimony. Such notification shall be a matter of record available to all participants. Witnesses shall be subject to questioning by the Committee and its legal advisor, if any. Every witness shall also be subject to cross-examination by other participants as to any matter relevant to the proceeding, without regard to the scope of the testimony on direct examination.

Evidence.—Formal rules of evidence shall not apply to the proceedings. The Committee may exclude any evidence, or restrict cross-examination, which it deems irrelevant or unduly repetitious but hearsay evidence shall not be inadmissible as such.

Record.—All written submissions made to the Committee, all correspondence with the Committee, and a transcript of the proceedings of the investigative hearing shall be made a part of the record. The record shall be kept open for a period of five (5) calendar days subsequent to the conclusion of the Committee hearing to allow interested persons to file rebuttal submissions, which shall also be made a part of the record.

The record shall be available for public inspection and copying.

Dated: August 17, 1976.

HAROLD E. STRAUSBAUGH,
Acting Executive Secretary,
Foreign-Trade Zones Board.

ENVIRONMENTAL PROTECTION AGENCY

EFFECTIVE HAZARDOUS WASTE MANAGEMENT (NON-RADIOACTIVE)

Position Statement

V41 1 161
AUG 18 76
UMI

ENVIRONMENTAL PROTECTION AGENCY

[FRL 600-7]

EFFECTIVE HAZARDOUS WASTE MANAGEMENT (NON-RADIOACTIVE)

Position Statement

BACKGROUND

In December 1975, the U.S. Environmental Protection Agency Office of Solid Waste Management Programs (OSWMP) conducted a series of four public meetings on hazardous waste management throughout the country. Over 70 speakers offered statements at those meetings with many additional written statements submitted for the record; the record of the meeting is now available for purchase.[1]

From the record of the meetings, it is clear that Federal guidance and technical advice on this topic is desired even in the absence of any regulatory requirements in existing Federal waste management legislation. Such guidance will be especially useful to the several States which are developing programs to control such wastes and are currently seeking technical and management counsel.

As a result, the Agency has decided to utilize the existing Solid Waste Disposal Act, as amended (42 U.S.C. 3251. et seq) as a means to make known to the waste management community (including States, local governments, industry, and Federal agencies) its position on various technical and policy issues which deserve widespread consideration.

Pursuant to section 204(b)(1) of the Solid Waste Disposal Act, as amended, the Administrator may issue advisory guidance and recommendations related to the disposal of waste materials. This issuance is one of a series to be published by the Agency. These guides represent the best technical and policy counsel of the Agency at the present time, and are based on work conducted over the past four years by the Agency. They will be brought up to date as significant new technological and policy developments occur. These guidance documents do not have regulatory or standard-setting status for anyone, including Federal agencies.

PURPOSE

The purpose of this position statement is to describe a preferred waste management strategy or set of priority pathways for hazardous waste control that adequately protects the public health and environment. The priority pathways are equally appropriate for routine (non-hazardous) waste management.

Responsibility for the controls over radioactive wastes covered by the Atomic Energy Act of 1954, as amended, has been assigned to the Environmental Protection Agency (EPA), Nuclear Regulatory Commission (NRC), and U.S. Energy Research and Development Administration (ERDA), by Reorganization Plan No. 3 of 1970, and the Energy Reorganization Act of 1974. Activities of the three agencies in this effort are being coordinated by an Interagency Task Force chaired by the Office of Management and Budget. Environmental criteria for the management of these wastes will be issued by EPA as Federal Guidance under authority of the former Federal Radiation Council. The NRC is responsible for issuing necessary licensing.

This position statement contains fundamental concepts which the Agency believes should govern the management of non-radioactive hazardous waste and should form the basic foundation for effective State programs addressing this subject. Although State and local government officials and Federal agencies are the primary audience for this position statement, it should be of interest to hazardous waste generators, the waste treatment and disposal industry and concerned citizens as well. Many of the principles contained in this statement may well be applicable to a comprehensive strategy at the State level to plan for and assure environmentally sound management of all wastes.

DEFINITIONS

Although several statements at the December public meetings urged specific definition of hazardous wastes for regulatory purposes, it is the Agency's view that, for purposes of this advisory position statement, a precise definition is not necessary. Hazardous wastes are those which may cause or contribute to adverse acute or chronic effects on human health or the environment when such wastes are not properly controlled. These wastes primarily consist of the by-products of industrial production, conversion, and extraction activities, and may be in the form of solids, sludges, slurries, liquids, or powders. They are not otherwise directly regulated under current EPA authority. Thus, hazardous waste may include residues from pollution control devices (e.g., electrostatic precipitator dusts) as well as production rejects, excess, or obsolete chemicals and substance (e.g., DDT). For purposes of this position statement only, radioactive wastes are excluded.

Wastes containing toxic chemicals, pesticides, acids, caustics, flammables, and explosives are often classified as hazardous wastes, although their properties may vary widely. Consequently the specific properties of each waste must be considered in determining needed control procedures. Although hospital and veterinary wastes are not the major focus of this position statement, they may contain pathological wastes which can be considered hazardous, and many of the same principles are applicable and desirable.

The Agency intends to address the question of a detailed definition more specifically later in this series of guides. In addition to the waste constituents and characteristics cited above, the definition of hazardous wastes will probably address longevity, biodegradation after disposal, compatibility, and leachate problems.

POSITION STATEMENT ON HAZARDOUS WASTE MANAGEMENT

Due to their high potential for public health and environmental damage, some hazardous wastes require special control procedures. Management of these wastes means awareness and control over them from the time of generation through their transportation, temporary storage, treatment, and disposal. The Agency believes that this comprehensive management of hazardous wastes should be conducted or coordinated at the State level so that wastes may reach environmentally sound treatment and disposal facilities. Several States have adopted waste transportation control systems involving manifests or "trip-tickets" to monitor the waste flows. Such systems in the opinion of the Agency are the most effective methods to assure proper handling and tracking of wastes from generation to ultimate disposal. Effective identification and labeling of wastes by the generators are essential to the effective operation of any manifest-based system.

In addition, management of hazardous wastes means more than careful disposal. It implies consideration of alternate methods and schemes, both institutional and technical, to reduce the amount of the wastes as well as their inherent hazards. Most States, when they do regulate, only specifically control waste transport, treatment and disposal. While it is likely that legislatures will continue to restrict regulation to these phases of waste management, opportunities to control hazardous waste at the point of generation should also be explored. This position statment offers a hierarchical structure of waste management options based primarily on environmental concerns, recognizing that, in the absence of regulatory authority, economics will play a major role in the waste generator's decision process.

The Agency believes that reuse, energy recovery and material recovery as well as treatment are desirable *prior* to ultimate disposal, especially land disposal. Thus, the desired waste management options are (in order of priority):

Waste Reduction
Waste Separation and Concentration
Waste Exchange
Energy/Material Recovery
Waste Incineration/Treatment
Secure Ultimate Disposal

Waste reduction. Reducing the amount of hazardous waste at the source, through process changes, is desirable. Restriction of hazardous chemicals used in operations, substitution of less hazardous materials, and better quality control to reduce production spoilage are all examples of possible actions which reduce the amount of hazardous waste requiring disposal. Also, the less hazardous waste which must be disposed, the less the risk of environmental damage. Material recovery, such as solvent reclaiming, is another alternative which reduces wastes within the industrial facility.

[1] In press, Record of Public Meetings on Hazardous Waste Management, U.S. Government Printing Office.

Waste separation and concentration. Even with the minimum amount of waste, opportunities exist to isolate the more hazardous or toxic waste streams from the mixtures in which they occur. Waste separation early in process stream flows as well as simple isolation of similar wastes into separate disposal containers can reduce waste handling and disposal costs.

Moreover, isolation of such hazardous wastes in separate storage areas would permit operating personnel to focus their attention on careful management of those wastes.

Concentration of wastes by de-watering (with appropriate air pollution controls) will reduce the amount of wastes that require treatment or disposal. This process not only reduces the costs of ultimate disposal but, more significantly, minimizes transportation costs, which are frequently the major variable in total waste management costs. A savings in transportation costs could well counter any added cost of de-watering and might even reflect true savings to the waste generator.

Waste exchange. The Agency approves of waste clearinghouses where pretreated or untreated hazardous wastes are transferred. These clearinghouses utilize the concept that one man's waste can be another man's feedstock. At least six waste exchanges in Europe and two formally organized waste exchanges in the United States testify to the feasibility of this concept under a variety of institutional arrangements. Such clearinghouses are desirable but may only be feasible at a State or multi-State level. An EPA report on this subject will be available this fall.

Energy/material recovery. Recovery of potentially useful substances, energy or materials from hazardous wastes is desirable. Many wastes contain valuable basic materials, some of which are in short supply, making material recovery logical from both resource conservation and environmental viewpoints. Extraction of materials from concentrated waste may require less energy, and generate far less air and water pollution, than the mining and processing operations required to produce the material from virgin resources. As materials shortages become more widespread, material recovery from hazardous waste will become more attractive.

Likewise, the combustion of such wastes to recover energy or heat value for other purposes is endorsed by the Agency. Such operations usually require special high temperature equipment with emission control systems and effluent monitors.

Other limitations are imposed by the "quality control" aspects of waste utilization for energy. The user facility must have an adequate supply of fuel with consistent heat-value on a regular or full-time basis. Also, some provisions for standby or emergency operations are necessary. These limitations must be carefully considered and integrated into the planning for any system using industrial wastes for fuel.

Incineration/treatment. Incineration even without energy recovery is desirable, in its proper order of priority, mainly to destroy organic wastes. Other non-burnable wastes should be detoxified and neutralized to the extent possible through physical, chemical, and biological treatment. Careful attention to environmental emissions with control equipment and monitoring devices is still required regardless of the process employed. Additional information on incinerators may be found in EPA publication, Incineration in Hazardous Waste Management (EPA/530/SW-141).[2]

Secure land disposal. For those hazardous wastes not amenable to recovery, treatment or destruction, volume reduction (to minimize land use requirements) prior to secure land disposal is endorsed. Secure land disposal either through encapsulation of small quantities of waste or the use, on a larger scale, of a chemical waste landfill is recommended.

In general terms, a chemical waste landfill provides complete long-term protection for the quality of the surface and subsurface waters from hazardous waste deposited therein, and prevents hazards to public health and the environment. Such sites should be located or engineered to avoid direct hydraulic continuity with surface and subsurface waters. Generated leachates should be contained, and surface and subsurface flow into and out of the disposal area eliminated. Monitoring wells should be established, and a sampling and analysis program conducted. Air emissions should be controlled and monitored, as well. Additional characteristics of a chemical waste landfill are described in EPA publication, Landfill Disposal of Hazardous Waste: A review of Literature and Known Approaches (EPA/530/SW-165).[3]

IMPLEMENTATION

The implementation of the concepts outlined above either in total or in part requires extensive policy and technical discussions prior to decisionmaking. The Agency through its Regional Offices (Appendix I) as well as through the Office of Solid Waste Management Programs, Hazardous Waste Management Division (AW-465), 401 M Street, SW., Washington, D.C. 20460 is prepared to provide technical assistance to interested parties.

Dated: August 10, 1976.

ROGER STRELOW,
Assistant Administrator for Air and Waste Management.

List of Public Laws

This is a continuing numerical listing of public bills which have become law, together with the law number, the title, the date of approval, and the U.S. Statutes citation. The list is kept current in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

H.R. 12169..... Pub. Law 94–385
"Energy Conservation and Production Act".
(Aug. 14, 1976; 90 Stat. 1125)

H.R. 13121..... Pub. Law 94–386
To direct the Law Revision Counsel to prepare and publish the District of Columbia Code through publication of supplement V to the 1973 edition, with the Council of the District of Columbia to be responsible for preparation and publication of such Code thereafter.
(Aug. 14, 1976; 90 Stat. 1170)

H.R. 14234..... Pub. Law 94–387
"Department of Transportation and Related Agencies Appropriation Act, 1977."
(Aug. 14, 1976; 90 Stat. 1171)

S. 1689..... Pub. Law 94–388
To amend the Pennsylvania Avenue Development Corporation Act of 1972 (Public Law 92–578), as amended.
(Aug. 14, 1976; 90 Stat. 1188)

H.J. Res. 738..... Pub. Law 94–389
Providing for Federal participation in preserving the Tule elk population in California.
(Aug. 14, 1976; 90 Stat. 1189)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202–523–5286. For information on obtaining extra copies, please call 202–523–5240.

To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202–523–5022.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month.

A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 541]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period August 20–26, 1976. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908. The quantity of Valencia oranges so fixed was arrived at after consideration of the total available supply of Valencia oranges, the quantity of Valencia oranges currently available for market, the fresh market demand for Valencia oranges, Valencia orange prices, and the relationship of season average returns to the parity price for Valencia oranges.

§ 908.841 Valencia Orange Regulation 541.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the respective quantities of Valencia oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Valencia oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Valencia oranges continues slow. Prices f.o.b. for the week ending August 12 were $3.45 a carton on 593 cars as compared with $3.50 per carton on 727 cars during the prior week. Track and rolling supplies at 315 cars were down 51 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Valencia oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on August 17, 1976.

(b) *Order.* (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period August 20, 1976, through August 26, 1976, are hereby fixed as follows:

(i) District 1: 292,000 cartons;

(ii) District 2: 358,000 cartons;

(iii) District 3: Unlimited.

(2) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 18, 1976.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 11412; Amdt. 36–5]

PART 36—NOISE STANDARDS: AIRCRAFT TYPE AND AIRWORTHINESS CERTIFICATION

Noise Type Certification and Acoustical Change Approvals

● The purpose of this amendment to Part 36 of the Federal Aviation Regulations (14 CFR Part 36) is to amend the procedures for measuring and evaluating the noise of subsonic transport category and turbojet engine powered airplanes. This amendment governs new type certificates and acoustical change approvals for which application is made after September 17, 1971, and is not approved by the Administrator before the effective date of this amendment. The primary basis of this amendment is § 611 of the Federal Aviation Act of 1958, as amended by the Noise Control Act of 1972 (Pub. L. 92–574). ●

This amendment is based on Notice 71–26 which was published in the FEDERAL REGISTER (36 FR 18584) on September 17, 1971. Three of the proposals contained in that notice (i.e. proposals concerning reduction in power or thrust during the takeoff and sideline noise tests, the use of the quietest airworthiness approved configuration during those tests, and the test airspeed that must be used during those tests) were previously adopted in Amendment 36–3 (39 FR 43830; December 19, 1974), with an effective date of January 20, 1975. That amendment was limited to acoustical change requirements for airplanes that are unable to comply with the noise limits of Appendix C of Part 36. As the preamble to that amendment stated, Notice

V 41 162
AUG 19 76
UMI

71–26 also contained "other proposals that are still under consideration by the FAA and that may result in additional rule making." This amendment disposes of the remaining proposals contained in that Notice 71–26 and adds requirements affecting all acoustical change demonstrations as well as those conducted for new type certificates.

Pursuant to § 611(b)(1) of the Federal Aviation Act of 1958, as amended, the Federal Aviation Administration has consulted with the Secretary of Transportation prior to the adoption of this amendment. Also, pursuant to that provision, as well as § 309 of the Clean Air Act, as amended (42 U.S.C. § 1857h–7), and § 1500.9(b) of the guidelines of the Council on Environmental Quality, contained in 40 CFR Part 1500, the FAA has consulted with the Environmental Protection Agency, and has submitted this amendment to that agency for review and comment, prior to adoption of this amendment.

Notice 71–26 proposed to add a new Subpart H to Part 36 containing all of the proposed modifications of Appendices A, B, and C of that Part, and other changes, that would apply after the date of publication of that notice (September 17, 1971). This amendment departs from that format, by adding each rule change directly to the portion of Part 36 that it modifies, rather than issuing a new subpart. For example, the amendments based on proposed § 36.1603 are added to Appendix A, the amendment based on proposed § 36.1605 is added to Appendix B, and the amendments based on proposed § 36.1607 are added to Appendix C. This change in format is editorial only.

Twenty comments in response to Notice 71–26 were received from citizens' groups, local governments, aviation trade associations, and foreign and domestic aircraft manufacturers. These comments addressed or affected the following proposals:

1. *Interference with sound field by obstructions.* The notice proposed to add a new § 36.1603(b) that would have required the applicant (instead of complying with the second sentence of § A36.1(b)(2)) to show that no obstructions that significantly influence the sound field from the aircraft exist (1) for takeoff and landing, within a conical space above the measuring position, defined by an axis normal to the ground and by half-angle 75 degrees from this axis, and (2) for sideline, above the line of sight between the measurement position and the aircraft. In response to public comments, and consistent with other provisions of this amendment limiting the testing and evaluation requirements to the 10 dB–down points, the FAA concludes that it is not necessary to require that noninterference with the sound field be shown beyond the 10 dB-down points. Accordingly, new § A36.7(b) (which contains the provisions in proposed § 36.1603(b)) provides that the required freedom from interference with the sound field must be shown "within the 10 dB-down points described in § B36.5."

During the FAA consultation with the U.S. Environmental Protection Agency (EPA), under § 611 of the Federal Aviation Act of 1958, as amended, the EPA recommended changes in the rule to conform with suggested text from the International Civil Aviation Organization (ICAO) Committee on Aircraft Noise. The FAA agrees that such conformity is desirable and has added a definition of "measuring point" to § A36.7(b)(1). The EPA also recommended expanding from 75 degrees to 80 degrees the half-angle of the conical space in which no obstruction may exist which significantly influences the sound field from the aircraft. However, since Notice 71–26 did not propose to increase the conical space required to be free from obstruction interference, such an amendment is beyond the scope of the notice. Thus, a proposal to expand the half-angle to 80 degrees will be included in a future notice of proposed rule making. In addition, the EPA recommended a clarifying change to specify the applicability of the conical space restriction to sideline noise measurement stations, as well as those for takeoff and landing. The FAA agrees, since it did not intend to narrow the scope of the current rule which prescribes the "conical space" restriction for all noise measurement stations. Thus, the rule adopted is revised to more clearly specify the continuation of that restriction, with the additional "line of sight" restriction as proposed in § A36.1603(b)(2) for sideline measurements only.

2. *Altitude/temperature accountability and weight limitations.* Notice 71–26 proposed requiring an applicant for type certification to demonstrate compliance for the entire range of takeoff and landing temperature and altitude conditions for which approval is requested. Under the proposal, rather than following the current procedure for correcting the test data to the standard test-reference day (i.e. sea level, 77 degrees F, 70 percent relative humidity and zero wind), the test data would be corrected to demonstrate noise level compliance across the wider range of temperatures and altitudes at which the aircraft would be permitted to operate. Further, in demonstrating compliance with Appendix C noise levels, the highest structural weight for which the airplane is approved would be required to be used. The test reference weight would be the highest weights (takeoff and landing) for each altitude and temperature condition for which approval is sought. Under the proposal, the reference weights would become limitations for each approved altitude and temperature condition.

The intent of these proposals was (1) to eliminate anomalous deviation in the certification test results by more closely approximating the conditions actually existing during flight operations, and (2) to discourage the development and application of specialized engines or nacelle designs that would provide significant noise reduction only at or near the standard test-reference day condition. However, after examination of the issues and technologies involved and of the comments submitted to the docket, the FAA has concluded that such specialized designs are not realistic possibilities and that the relatively simple corrective calculation procedure, which the FAA contemplated when it issued the proposal, has proved to be impractical. This is largely due to a lack of precise acoustic data and of an adequate means of employing it. The alternative means of implementing these proposals—actual flight testing under the variety of altitude/temperature combinations was not specifically addressed in Notice 71–26 because it would result in assessing economic penalties to certification applicants which would far outweigh the noise reduction that could be achieved. The FAA concludes that the proposed test correction requirements would significantly increase the testing burden and that they have not been shown to be economically reasonable and offer little, if any, demonstrable benefit in noise reduction. Therefore, the rule adopted does not include the testing requirements for altitude/temperature accountability proposed in the NPRM. Further, since the altitude/temperature accountability has been deleted, the test reference and structural weight considerations, together with airplane flight manual listings, based on the altitude/temperature proposal have no basis for retention and have also been deleted in the final rule.

One comment favored adoption of the altitude and temperature accountability proposal because of the importance of protecting the public from unnecessary aircraft noise in all communities and during all weather conditions. While sharing the objectives expressed by the commenter, the FAA concludes it cannot achieve these objectives unless it provides a rule which prescribes the means for assuring (1) that the calculations of noise with the variations of aircraft noise characteristics can be shown to provide noise values that are consistent with the basic laws and technology of acoustic physics; and, (2) that no anomalous characteristics are developed as a result of applying technology designed to satisfy the FAR 36 standard test-reference day. As many commenters pointed out, both the noise source data and the standard atmospheric attenuation data, which constitute the bases for the present test data correction procedures, have limited ranges of application and extrapolation. The FAA agrees with the commenters who suggested that it would be unlikely that sea level noise source corrections can be applied at all operational altitudes and temperatures without validation by additional testing at high altitude airfields. Extrapolative errors from currently available data to the higher altitudes and extremes of temperatures are simply too great to permit accurate correction by analytical methods alone. However, despite the deletion of the altitude/temperature accountability requirements, the FAA does not intend that the standard reference day for noise certification (sea level, 77 degrees F, and 70 percent relative humidity) should become a unique operating point, either aerodynamically or acoustically.

Several commenters complained that, while under the present test procedure, one can expect to produce corresponding reductions in overall noise exposure at any given airport condition, the result of the application of the proposed altitude and temperature accountability procedure represents an effective lowering of the permissible noise levels. Although, the FAA did not intend to lower the noise limits by proposing altitude/temperature accountability, it agrees with the first part of the commentor's statement and concludes that further altitude/temperature accountability is unnecessary.

Another commenter reasoned that, if altitude/temperature accountability is an attempt to define noise characteristics for all operating conditions, then the takeoff and approach test conditions should be changed to include those noise abatement operating techniques not currently specified in FAR 36. The use of operational rules to lower noise impact has merit and may be the subject of additional rule-making action. However, since the Notice 71–26 did not propose adoption of operating rules to achieve noise control or abatement, such action would be beyond the scope of the notice. The proposals in the NPRM were not intended to effect a lowering of existing noise level standards but to provide a means for avoiding anomalous deviations from established levels when flight conditions are other than those of the standard test-reference day.

One comment suggested that the testing rule should permit the use of not only the standard test procedure defined in FAR 36

but also any procedure authorized by the "navigability regulations." The FAA believes that a very important aspect of noise certification is the ability to compare test results among aircraft types. The change recommended by this commenter would make such comparisons extremely difficult and of questionable reliability. Further, the costs incident to the additional testing that would be needed make this suggestion economically unreasonable to implement at this time.

The lack of specific formulas or means of calculating the proposed altitude/temperature correction was objectionable according to several comments. They cited deficiencies in the proposal in the presentation of the appropriate correction factors and procedures. Several commentors noted that relative humidity as a consideration in establishing sound absorption parameters was not addressed, and that the FAA should provide "comprehensive, realistic influence coefficients for the atmospheric absorption of sound." It should be emphasized that the altitude/temperature accountability proposal did not prescribe a specific performance requirement as the means of compliance but only required applicants for certification to demonstrate by means of a test data correction that prescribed noise levels would be made within the "entire range of takeoff and landing altitude and temperature conditions for which approval is requested." In proposing such accountability, the FAA believed the necessary data and computational means were or would be available to show compliance. Since it has been found that this information does not exist with sufficient accuracy to justify adoption of the altitude/temperature accountability part of the proposed rule, that portion of the proposal is being withdrawn.

One commenter correctly observed that "[the] requirement that compliance be shown at the highest weight (takeoff and landing) for which the aircraft is certified is also necessary since this is the condition that creates the most noise." However, the FAA concludes that current paragraph 36.1581(c) is adequate to achieve this purpose.

As previously noted, Notice 71–26 proposed requirements regarding test reference and aircraft structural weights in the altitude/temperature accountability procedure to assure greater consistency between testing and operating conditions and to prevent artificial manipulation of the weight factors in certification testing and compliance levels comparisons. Many commenters who suggested deletion of the altitude/temperature accountability portions of the proposal also recommended not adopting the related weight factors and limitations used to establish test noise levels and to demonstrate compliance. The FAA agrees with those commenters who believed that using the highest structural weight of the aircraft in obtaining Appendix C levels could result in unreliable results due to the lack of precision in calculating the altitude/temperature correction. These potential problems are eliminated, however, by the deletion of the altitude/temperature accountability requirement. The needed protection is provided by the newly adopted provisions of FAR 36.1581(c). These considerations prompt withdrawing the weight consideration portions of the proposal.

3. *Flight manual listings.* The notice proposed to add new paragraphs 36.1609 (a) and (b) to require specific information in the airplane flight manual regarding the noise levels at each approved takeoff and landing altitude and temperature, how they were achieved, and the applicable Appendix C noise level standards. New paragraph 36.1609 (d) proposed to require that the highest takeoff and landing weight at which compliance is shown, for each altitude and temperature approved, must be furnished (in the airplane flight manual) as a takeoff or landing operating limitation for that altitude and temperature condition.

As indicated in the discussion above, the provisions of the proposed rule regarding altitude and temperature accountability are not being adopted for the reasons stated. Since the proposed flight manual listings were an integral part of the concept of altitude and temperature accountability, they are also being withdrawn from the rule making.

Several comments objected to the proposed flight manual listings, either as part of their objection to altitude/temperature accountability or for separate reasons. The FAA concurs with the reasons based upon the relationship to the altitude/temperature accountability.

4. *Flight path, performance, and noise source correction.* This amendment adopts the text of the rule proposed in paragraphs 36.1603(d) and (h) of Notice 71–26 with the deletion of the proposed requirement for altitude/temperature accountability. Rather than adding the proposed new paragraphs, these amendments are effected by adding a new § A36.7(d), which provides a description of the corrections required for aircraft flight path and performance and of the required relationship between the aircraft and sound (signal) and background noise levels within the 10 dB-down points. Under the amendment, instead of complying with the first two sentences of § A36.3(d)(2), the new provisions apply.

New paragraph A36.7(d)(1) clarifies the required correction between the applicant's predicted flight paths for type certification reference conditions and the measured flight paths at the test conditions. The new wording corrects the ambiguous requirement of the present provision.

New paragraph A36.7(d)(2) simply adopts and restates the language of the second sentence of present paragraph A36.3(d)(2) without substantive change or effect on the test correction procedure. The final rule does not retain the altitude/temperature accountability proposed in Notice 71–26.

Commentera to the flight path and performance corrections supported their adoption if the proposed altitude/temperature accountability were deleted. Since that accountability requirement is omitted in the final rule, the recommendation has been accepted.

New § A36.7(d)(3) prescribes the requirement that the source noise must be corrected from approved data for any differences between the measured and corrected engine conditions, together with appropriate allowances for sound attenuation with distance.

One commenter, while agreeing that there is a "very real need for source noise corrections," suggested that guidance as to the method of determination is required. An accurate and reliable method for the attenuation of sound with distance is considered essential by the commenter.

The FAA agrees that the method of demonstrating compliance must be accurate and reliable and that the language of proposed paragraph 36.1603(h)(3) can more clearly specify the required procedure for making the correction. Under the proposal, it was contemplated that whenever corrections for distance is appropriate, it would necessarily be accomplished under the sound attenuation procedures presented in § A36.5(a), which incorporates by reference SAE standard ARP 866: "Standard Values of Atmospheric Absorption as a Function of Temperature and Humidity for Use in Evaluating Aircraft Flying Noise." New § A36.7(d)(3), therefore, refers specifically to the applicability of § A36.5(a) for sound attenuation corrections.

Another comment argued that the proposed test data corrections were excessive and, in general, would inevitably lead to serious difficulties for international flights under the rule since it would be less stringent than that prescribed in ICAO Annex 16. As noted by the commenter, noise certification does not ensure that a certificated airplane will, when in operation, reproduce exactly the noise impact on the ground perceived at the time of its certification testing. Even the most precise, operationally oriented test procedures contain some uncontrollable factors which affect the data produced and which must be accounted for in developing the test results. Correction for sound attenuation for distance, like corrections for standard day, flight path deviation, duration, and thrust, is necessary to eliminate the distortion caused by inadvertent factors in performing the test procedure. The FAA concludes that the allowance for corrections of test data adopted by the rule is not excessive. Since ICAO has adopted sound attenuation for distance provisions similar to those adopted in this final rule, Part 36 is not less stringent than ICAO Annex 16.

Similarly, one commenter recommended not adopting the provision for allowing correction of sound attenuation for distance because the distance factor in sound attenuation is already adequately accounted for in the measured data. It should be noted that sound attenuation for distance is only one element of the required source noise correction based upon approved data prescribed in § A36.7 that accounts for differences between measured and corrected engine conditions. As such, the provision for sound attenuation for distance was included to assure that it is properly considered during each certification action whether or not it changes the test results. Noise source corrections are an appropriate part of the type certification and acoustical change test procedures.

5. *Cold day/hot day effects and aircraft weight corrections.* Present § A36.6(a) permits the takeoff test flight path to be higher or lower than the test reference altitude to account for meteorological effects of cold day or hot day conditions on aerodynamic performance characteristics; approach test flight path may be either higher or lower than the reference altitude without regard to meteorological conditions. These provisions were included in the original FAR Part 36 in an effort to account for the effects which cause a test aircraft to fly above or below the test reference flight path and to require appropriate corrections to be made. Proposed § 36.1603(k)(1) (which is adopted as § A36.7(f)(1)) provided for the elimination of that correction procedure. Certification test experience has demonstrated that this particular correction procedure is unclear and imprecise and that, in light of procedures for the correction of test flight path, it is unnecessary. However, the public comments received in the Rules Docket did not speak to this specific proposal.

Further, the FAA has found that "Figure A8," "Figure A9," and "Figure A10" in § A36.6 do not have current application or value in the prescription of correction procedures. As proposed in § 36.1603(k)(4), these illustrations are deleted from the test correction procedures by the terms of new § A36.7(f)(3). No public comment specifically addressed this proposal.

6. *Noise floor definitions.* In § A36.7(e)(1), the final rule adopts the noise floor defini-

V 41 I 162 AUG 19 76 UMI

tion proposed in the NPRM text of § 36.1603 (i). This amendment augments the present procedure stated in § A36.3(d)(3) by prescribing that the signal to noise ratio within the 10 dB-down points may not be less than 6 dB without approved special test or correction procedures.

This additional provision more clearly states the signal-to-noise limitation that must be applied to acoustic data generated in the testing environment. Correct delineation of the 10 dB-down points is essential to computation of the duration correction factor. The 6 dB signal-to-noise ratio limitation ensures the integrity of the test data. However, to avoid imposing unwarranted penalties upon an applicant when the 6 dB signal-to-noise ratio limitation cannot be satisfied (such as could be the case with an unusually quiet aircraft), the rule provides for the approval of special test or correction procedures to bring the test data within the required limits.

7. *Duration correction.* In Notice 71–26, the FAA proposed to adopt a new FAR paragraph 36.1605(b) to modify the procedure in § B36.5 for determining the duration correction factor in the EPNL equation for special circumstances. As approved, this amendment of the last unnumbered paragraph of § B36.5 modifies that procedure by eliminating the 90 EPNdB floor in computing duration.

The 90 EPNdB floor was originally adopted to limit the possible development of an unrealistically large positive duration correction under test conditions where the 10 dB-down points are obscured by exceptionally high levels of background noise at the test site. However, in proposing the amendment contained in Notice 71–26, the FAA believed that the rule needed reexamination of its ability to properly avoid the potential penalty that might result from ambient noise levels obscuring the 10 dB-down points. The FAA believed that because it was a somewhat artificial solution, erroneous results could accrue from its application. Therefore, the FAA proposed in the NPRM to limit the permissible correction factors, positive or negative, to not more than the value of 5. Upon careful consideration of the proposal and comments received on the issue, the FAA concludes that the proposed limitation is itself inadequate as the sole correction factor limitation for all cases. Under this amendment, the 90 EPNdB floor concept is eliminated for applications made after September 17, 1971, and the durational value must, therefore, include the 10 dB-down points in the flyover noise/time record. In those cases where high ambient noise levels obscure the 10 dB-down points, making them impossible to fix, the applicant may elect to change test sites or seek approval for relocating test measuring-recording points (within correctible margins) to achieve the necessary reduction in ambient noise and establish the 10 dB-down points in the test data.

Most of the comments received supported the elimination of the 90 EPNdB floor but objected to imposing an "arbitrary" limitation of the proposed correction factor to ±5. There was general agreement among the comments that there is no basis or justification for the proposed limitation. Several comments recommended that, if from a psychoacoustic basis the duration correction concept is valid, the test result, whatever it is, should be used as the starting point for the correction; however, if it is not valid, the calculation procedure should be changed rather than limiting the range of the incorrect result. One commenter argued that the replacement of the 90 EPNdB floor with the ±5 value range of duration correction "appears to be improper since there is no engineering basis for the limitation. Valid correction factors capable of being applied in a meaningful manner should be provided by the FAA." Similar statements were made in several other comments. In general, the FAA concurs. However, the 90 EPNdB floor was originally introduced into Part 36 to avoid a resultant penalty which the FAA believed might be caused by mathematically developing unrealistically large positive duration corrections in those cases where test conditions were such that the 10 dB-down points were difficult to determine. Based on type certification experience since the adoption of Part 36, the FAA does not believe that the elimination of the 90 EPNdB floor, together with the withdrawal of the proposed ±5 EPNdB correction limitation, will result in positive correction values greater than those that are obtained under the current regulation. In addition, with the experience of certification tests, the FAA has found no reliable calculation procedure covering the range of variations which properly and meaningfully reflects the 10 dB-down points when they are obscured by ambient noise levels. As a result, the FAA has determined that the aircraft testing procedures prescribed in § A36.1(c) should be adjusted by amending § B36.5 to make explicit that the required test data include the 10 dB-down points in the flyover noise/time record. The need to show the 10 dB-down points also results from the redefinition of the noise floor adopted in § A36.3 (d)(iii), as proposed in the NPRM and discussed above. The reason for this amendment is to provide uniformity in the method of data processing at all amplitudes while simplifying the correction procedure.

Several commenters, who observed that the proposed ±5 EPNdB correction limitation had no technological basis, believed that the negative component of the duration correction procedure prescribed in § B36.5 (when the 90 EPNdB floor is not invoked) should be retained. These commenters pointed out that the permissible negative correction factor provides a real incentive to strive for further beneficial subjective reductions in noise arising from aircraft characteristics such as airframe shielding, approach speed, etc. While the compliance test data corrections are not generally intended by themselves to prescribe penalties or confer benefits, the FAA recognizes that they may tend to have that effect in some cases. The duration correction factor does reflect the FAA's concern for achieving subjective psychoacoustic benefits and as such may provide an inducement to design aircraft with reduced noise duration characteristics. By eliminating the 90 EPNdB floor and not adopting the proposed ±5 EPNdB correction limitation, the final rule provides the potential for an unlimited negative correction factor for noise duration and, therefore, an increased incentive to develop reduced noise duration characteristics for airplanes. The commenters' suggestion is, therefore, accepted as an additional basis for eliminating the limitation on the duration correction factor entirely.

One commenter observed that some psychoacoustic studies suggest that the beneficial effects of short duration flyovers tend to increase to a rate of 6 dB for a halving of the duration time rather than the 3 dB value presently used. The commenter believes that incorporation of this feature would result in a better definition of the time dependent acoustic rate factor. However, the FAA does not consider the increased rate factor sufficiently technologically substantiated at this time to warrant its inclusion in the rule. Further, Notice 71–26 did not discuss or propose a change in the rate factor and it is, therefore, beyond the scope of the notice.

Arguing that to "arbitrarily limit the correction factor D to +5 and −5 has no justification whenever," two commenters recommended the maximum negative value of 10 dB for those cases when the 90 EPNdB floor is involved. While the FAA agrees that it now finds the proposed values of ±5 to be unfounded, there is equally no support for adopting a negative value of 10 dB. The FAA concludes that § B36.5 should be amended to require inclusion of the 10 dB-down PNLT values in testing data, if necessary, by modifying testing conditions in the limited number of cases where the problem arises.

Another comment requested that the FAA reexamine the proposed rule with respect to the duration correction so that it may be made identical to the one specified in ICAO Annex 16. The FAA recognizes the desirability of having consistency between FAR 36 and Annex 16. However, since this comment was received, ICAO has undertaken consideration of a duration correction factor amendment of Annex 16 similar to that proposed in Notice 71–26 and recommends its adoption. Whether or not ICAO subsequently adopts this change in the duration correction factor, FAA's statutory responsibility under § 611(d) of the Federal Aviation Act, as amended, requires that it consider whether proposed noise certification standards that are "economically reasonable, technologically practicable, and appropriate for the particular type of aircraft" to which it applies. This amendment is adopted pursuant to that requirement.

8. *Approach test airspeed; and takeoff and approach test airspeed tolerance.* In Notice 71–26, the FAA proposed to adopt a new paragraph 36.1607(f) which would amend the approach test airspeed requirements, contained in § C36.9(d), when applied to applications made after September 17, 1971, by prescribing the use of $1.3V_{s0}$ (the stalling speed or the minimum steady flight speed in landing configuration) +10 knots ±3 knots rather than the currently required 1.3 V_s (the stalling speed or the minimum steady flight speed at which the airplane is controllable) +10 knots without any specified airspeed tolerance. [Through a typographical error, the proposed airspeed factor was published as "1.33 V_{50}" rather than "1.3 V_{50}" as specified in the original FAA document.]

While no public comment discussed the proposed substitution of V_{ss} for V_s, after reconsidering the issues involved in the selection of the approach test airspeed, the FAA has determined that this portion of the proposal should not be adopted. Since V_{ss} is not currently required as part of the airworthiness certification of turbine powered aircraft, to require applicants to determine V_{ss} solely for noise certification purposes would result in an additional test burden in certificating turbine powered aircraft. Further, the FAA proposed in Notice 75–10 to amend FAR 25.75 to substitute V_s for the V_{ss} currently required in airworthiness test approach airspeed for reciprocating-engine-powered airplanes. In light of this proposal and the concern for basic consistency between airworthiness and noise certification test procedures, the FAA believes that V_s as the basis for the approach test airspeed in the noise certification procedure should be retained. This action will have the additional benefit of preserving the comparability of newly produced test data with that of the data compiled during the past 6 years under FAR Part 36. Since the FAA has experienced no problem arising from the use of V_s in approach test airspeed under Part 36, and since no comments addressed the proposal, that part of the approach test airspeed proposal is withdrawn.

In order to ensure a valid comparative testing procedure, Notice 71–26 also proposed in new paragraphs 36.1607 (d) and (f) to prescribe takeoff and approach test airspeed tolerances for the test conditions prescribed in Appendix C. These proposals are adopted without change in substance by amending paragraph C36.7(d) and adding a new paragraph C36.7(f). [Amendment 36–3 adopted the takeoff test airspeed proposed in Notice 71–26 applicable to acoustic change approvals.]

As amended, paragraph 36.7(d) refers to paragraph 36.7(f), which prescribes a takeoff speed of V_2 +10 knots ±3 knots rather than the minimum takeoff speed of V_2+10 knots with no upper limit. For the approach testing procedure, paragraph 36.7(f) prescribes a steady approach speed of either $1.3V_s$+10 knots or the speed used to establish the approved landing distance, whichever is greater, within a ±3 knot tolerance. These tolerances provide an appropriate means for controlling the inevitable variations from the prescribed basic airspeeds that occur during certification testing of noise characteristics.

A tolerance of ±3 knots was supported by commenters who recognized that such strict tolerances are appropriate and necessary in a noise testing procedure and do not constitute operational requirements. No operational limitations were intended on this subject by Notice 71–26.

Opposition to the proposed takeoff and approach test airspeed tolerances was frequently based upon beliefs that the noise test procedures were intended to be, or should be, procedures that are used operationally. The FAA disagrees. Noise certification tests do not necessarily coincide with any operational requirements but are prescribed to provide demonstrations that uniformly and fairly represent the noise characteristics of all aircraft subject to the test. Test factor tolerances, like data correction limitations, provide assurances that uncontrollable variations in executing the procedure will not introduce unacceptable errors in test data or results.

One commenter suggested that the "inevitable variations from these speeds during tests should be controlled only by a limitation on the dB corrections to which they give rise." The FAA concludes that, in this case, placing the limitation on the flight of the aircraft during the test will result in fewer factors, that require complex corrections, being introduced into the measured data. The test procedure being adopted is, therefore, preferable to that suggested by the commenter.

According to another comment, the fixing of noise certification test speeds (takeoff and approach) "is restrictive on the aircraft design and the development of improved noise abatement techniques." The FAA does not believe that requiring aircraft to be flown at the prescribed airspeeds during noise certification testing is itself restrictive on aircraft design or development of other noise abatement techniques. The test airspeed requirements, together with the ±3 knot tolerance, ensures a basis of noise comparisons by preventing manipulation of the speed factors that mask the actual noise emissions. It should be noted that the V_2+10 knot with the ±3 knot tolerance is identical to that adopted for acoustical changes in Amendment 36–3 (39 FR 43830; December 19, 1974). As stated in the preamble to that amendment, this change is "intended to ensure a valid comparative test by prohibiting the modified airplane from overflying the measurement point at [an] air speed markedly different from that of the unmodified airplane (since flyover time can affect recorded noise levels)." Although this amendment extends the test airspeed adopted in Amendment 36–3 to new type certificates, the FAA believes that comparability of noise test results among airplanes of the same category is equally beneficial in the entire noise certification program. The amendment assures the desirable uniformity of test procedures and comparability of noise emission test data.

While one commenter stated that any tolerance more restrictive than ±10 knots is overly restrictive and would result in the need for repeating tests or in the unnecessary omission of data, another commenter agreed that a test tolerance of ±3 knots is "most representative" and "appropriate." The FAA believes that a tolerance of more than ±3 knots may permit unnecessary correction errors to be introduced and that a larger tolerance has not been shown to be needed.

Some commenters to Notice 71–26 specifically questioned the flight safety of the proposed test airspeeds and tolerance limits. As stated in the preamble to Amendment 36–3, the FAA has concluded that the use of the required test airspeeds does not create problems of flight safety when conducted as prescribed. Since the issues raised by these comments were adequately addressed in the preamble to Amendment 36–3, they are not repeated here.

Several commenters objected to setting of airspeed restrictions beyond those prescribed by airworthiness requirements as being detrimental to the certification concept. These amendments deliberately adopt airspeeds based on airworthiness values to assure that they do not conflict with or override the airworthiness considerations. However, since the airworthiness procedure permits a wide range of airspeeds, the need for producing comparability in the noise data among tested airplanes requires the selection of specific airworthiness designated speeds for takeoff and approach noise testing. The FAA believes the final rule is conceptually consistent with those objectives.

Another comment argued that it would be "wrong to demand the use of an arbitrary approach speed of $1.3V_{ss}$+10 knots if this conflicts with the airworthiness regulations," or if "a manufacturer has designed his aircraft to meet airworthiness regulations with an approach speed lower than $1.3V_{ss}$+10 knots." The FAA does not believe that the prescribed airspeeds and tolerances are arbitrary or in conflict with airworthiness rules because they are representative of identified characteristics of the category of aircraft affected and they are based upon airworthiness considerations and the need for comparability of test data produced.

The FAA agrees with the comment suggestion that the way should be left open to allow and encourage research and development of favorable noise abatement flight techniques such as "decelerated approaches, steeper approach paths, and programmed flap movements." The FAA does not believe that the amendment of test procedures or data correction factors adopted by this rule making affects the development of improved operational techniques.

9. *Negative runway gradient.* New paragraph (f)(2) of § C36.7 adopts without substantive change, the text of proposed § 36.1607(e) to require the correction of performance and acoustic data to account for a negative runway gradient in the direction of takeoff.

While commenters generally agreed with the adoption of the proposal, one commenter stated that the "intent of this paragraph would be better expressed by specifying a level runway as one of the reference conditions." The FAA does not agree. The addition of another prescribed test-reference condition would serve no practical purpose since the correction procedure adopted in this amendment adequately accounts for a negative runway gradient. Therefore, this suggestion is not adopted.

10. *Effective date.* As noted by many commenters, the FAA proposed to make the regulations applicable to applications for new type certificates and acoustic change approvals received by the FAA on or after September 17, 1971 (the date the NPRM was published in the FEDERAL REGISTER). This proposal is adopted without substantive change in the final rule.

Notice 71–26 stated that the FAA was concerned with the timing of the effective date of the proposed rules because of the significant and enduring impact upon the noise abatement benefits the rules were intended to achieve. Thus, the FAA proposed to apply these proposals to applications received on or after the publication date of the NPRM. By adopting that proposal, the FAA avoids the possibility of a significant number of applications being submitted before the effective date of the final rule but for which FAA approval could not be given before the rule becomes effective. As stated in the NPRM, nothing in the proposal would affect applications for which approvals are issued prior to the effective date of the final rule or any approval issued on the basis of an application received before September 17, 1971. In effect, the NPRM announced the FAA's intention to apply the amended rules (when they become effective) to approvals even though the application was received during the period between the publication date of the NPRM and the effective date of the amended rules.

This proposal was commended by those commenters who share FAA's environmental concern. One commenter stated, in support of the timing of the regulations, that "We • • • fear that if the regulations were applied only to applications received after the effective date of the final rule, many applications would be filed before such effective dates and would thereby significantly retard public benefit which you intend."

However, another commenter feared that the proposal "would make it impossible for manufacturers to fix designs, start production and make final commitment until the certification requirements are finally established." The FAA agrees that absent a compelling justification, type certification rules should be made to apply only to applications received after the effective date of such rules. However, as previously stated, the FAA believes that sufficient reason exists in this case, since the effectiveness of the proposals could be compromised for many years into the future. Deferring the environmental benefits which will be achieved would not be in the public interest or consistent with FAA's responsibility under the Noise Control Act of 1972 to prescribe appropriate aircraft noise abatement regulations.

One commenter questioned whether compliance to the terms of the NPRM was appropriate since that may require showing compliance with a proposal that may be changed as a result of comments. The same commenter stated that "a possible strict interpretation of the NPRM would suggest that even though the NPRM has been published, comments from interested persons will not in fact be considered." It should be apparent from the modifications of the proposals in the final rule, that the public participate in this rule making has not been rendered ineffectual. However, it is not contrary to meaningful public proceedings to announce that the final rule, when adopted, will apply to applications received before the effective date of the rule, since as stated in the notice, the applicable rules are those in effect on the date of approval, not the date of application. This is consistent with sound rule-making practice.

11. *General comments.* Several comments were received which did not address specific issues or the substance of the proposed rules. These included one commenter who suggested that "the FAA should go further in requiring quiet engine retrofit and operational standards for airports." The merits of these recommendations are under consideration by the FAA in other regulatory proceedings but are outside the scope of the notice of Notice 71–26.

V 41 162 AUG 19 76 UMI

AUTHORITY: (Sections 313(a), 601, 603, and 611 of the Federal Aviation Act of 1958, as amended by the Noise Control Act of 1972 (Pub. L. 92-574) (49 U.S.C. 1354(a), 1421, 1423, and 1431); Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655 (c)); National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.); Executive Order 11514, March 5, 1970).

In consideration of the foregoing, Part 36 of the Federal Aviation Regulations (14 CFR Part 36) is amended, effective September 20, 1976, as follows:

§ 36.2 [Amended]

I. Paragraph (a) of § 36.2 is amended by adding the following sentence at the end of that paragraph immediately after the words "of this Part": "In addition, for applications for new type certificates made after September 17, 1971, compliance must be shown with the applicable provisions of this Part."

II. Paragraphs (a)(1) and (a)(2)(ii) of § 36.7 are amended to read as follows:

§ 36.7 Acoustical change.

(a) • • •

(1) If the airplane can achieve the noise limits prescribed in Appendix C of this Part, or lower noise levels, prior to the change in type design, it may not exceed the noise limits prescribed in Appendix C after the change in type design. For applications made after September 17, 1971, compliance with the applicable noise limits must be shown in accordance with §§ C36.7(f) and C36.9(f) of Appendix C.

(2) • • •

(i) • • •

(ii) For the noise levels measured and evaluated before and after the change in type design, compliance with §§ C36.7(f) and C36.9(f) must be shown.

III. Appendix A of Part 36 is amended as follows:

A. Paragraph (a) of § A36.1 is amended to read as follows:

Section A36.1 *Noise certification test and measurement conditions.*—(a) *General.* This section prescribes the conditions under which noise type certification tests must be conducted and the measurement procedures that must be used to measure the noise made by the aircraft for which the test is conducted. For applications made after September 17, 1971, compliance with § A36.7 of this Appendix must be shown in addition to the applicable provisions of this section.

B. Paragraph (a) of § A36.3 is amended to read as follows:

Section A36.3 *Reporting and correcting measured data.*—(a) *General.* Data representing physical measurements or corrections to measured data must be recorded in permanent form and appended to the record except that corrections to measurements for normal equipment response deviations need not be reported. All other corrections must be approved. Estimates must be made of the individual errors inherent in each of the operations employed in obtaining the final data. For applications made after September 17, 1971, compliance with § A36.7 of this Appendix must be shown in addition to the applicable provisions of this section.

C. Paragraph (a) of § A36.6 is amended by adding the following sentence at the beginning of the paragraph:

For applications made after September 17, 1971, compliance with § A36.7 of this Appendix must be shown in addition to the applicable provisions of this section.

D. A new § A36.7 is added to read as follows:

Section A36.7 *Applications made after September 17, 1971.*—(a) For applications made after September 17, 1971, compliance with this section must be shown in addition to the applicable provisions of §§ A36.1 through A36.6 of this Appendix.

(b) Instead of complying with the second sentence of § A36.1(b)(2), it must be shown that, during the period when the flight-time record indicates the noise measurement is within 10 dB of PNLTM, no obstruction that significantly influences the sound field from the aircraft may exist—

(1) For a takeoff, approach, or sideline noise measurement station, within a conical space above the measuring position (the point on the ground vertically below the microphone), the cone being defined by an axis normal to the ground and by a half-angle 75 degrees from this axis; and

(2) For a sideline noise measurement station, above a line of sight between the microphone and the aircraft.

(c) Instead of complying with § A36.1(d)(2), it must be shown that position and performance data are corrected as prescribed in § A36.3(d) as modified by paragraphs (d) and (e) of this section.

(d) Instead of complying with the first two sentences of § A36.3(d)(2), the following apply:

(1) The measured flight paths must be corrected by an amount equal to the difference between the applicant's predicted flight paths for the type certification reference conditions and the measured flight paths at the test conditions.

(2) Necessary corrections relating to the aircraft flight path or performance may be derived from approved data other than certification test data.

(3) The source noise must be corrected, from approved data, for the difference between measured and corrected engine conditions, together with appropriate allowances for sound attenuation with distance, as prescribed in § A36.5(a).

(e) Instead of complying with § A36.3(d)(3), compliance must be shown with the following:

(1) If the aircraft sound pressure levels do not exceed the background sound pressure levels by at least 10 dB in any one-third octave band within the 10 dB-down points described in § B36.5, approved corrections for the contribution of background sound pressure levels to observed sound pressure levels must be applied.

(2) The signal to noise ratio within the 10 dB-down points may not be less than 6 dB without approved special test or correction procedures.

(f) The following apply with respect to showing compliance with § A36.6:

(1) The provisions of the first two sentences in the first undesignated paragraph of § A36.6(a) permitting flight paths above and below the reference flight path because of "cold day" effect and "hot day" effect do not apply.

(2) The correction procedures in § A36.6(a) are not limited to one or more "of five" possible values, but require all values necessary to insure adequate correction procedures.

(3) The provisions of §§ A36.6 (f) and (g), including Figures A8, A9, A10, do not apply.

IV. Appendix B of Part 36 is amended by amending the last undesignated paragraph of § B36.5 to read as follows:

Section B36.5 *Duration correction.*

• • • • • •

If the value of PNLT(k) at the 10 dB-down points is 90 PNdB or less, the value of d may be taken as the time interval between the initial and the final times for which PNLT(k) equals 90 PBdB, except that, for applications made after September 17, 1971, the aircraft testing procedures must include the 10 dB-down points in the flyover noise/time record.

V. Appendix C of Part 36 is amended as follows:

A. § C36.7 is amended by amending paragraph (d), and adding a new paragraph (f), to read as follows:

Section C36.7 *Takeoff test conditions.*

• • • • • •

(d) Except as provided in paragraph (f) of this section, a speed of at least V_2+10 knots must be attained as soon as practicable after liftoff, and must be maintained throughout the takeoff noise test.

• • • • • •

(f) For applications made after September 17, 1971, the following apply:

(1) The test day speeds and the acoustic day reference speed must be the minimum approved value of V_2+10 knots, or the all-engines-operating speed at 35 feet (for turbine engine powered airplanes) or 50 feet (for reciprocating engine powered airplanes), whichever speed is greater as determined under the regulations constituting the type certification basis of the airplane. These tests must be conducted at the test day speeds ±3 knots. Noise values measured at the test day speeds must be corrected to the acoustic day reference speed.

(2) If a negative runway gradient exists in the direction of takeoff, performance and acoustic data must be corrected to the zero slope condition.

B. § C36.9 is amended by amending paragraph (d), and adding a new paragraph (f), to read as follows:

Section C36.9 *Approach test conditions.*

• • • • • •

(d) Except as provided in paragraph (f) of this section, a steady approach speed of not less than $1.30\ V_s+10$ knots must be established and maintained over the approach measuring point.

• • • • • •

(f) For applications made after September 17, 1971, the following apply:

(1) A steady approach speed, that is either $1.30\ V_s+10$ knots or the speed used in establishing the approved landing distance under the airworthiness regulations constituting the type certification basis of the airplane, whichever speed is greatest, must be established and maintained over the approach measuring point.

(2) A tolerance of ±3 knots may be used throughout the approach noise testing.

Issued in Washington, D.C. on August 10, 1976.

JOHN L. MCLUCAS,
Administrator.

[FR Doc.76-23929 Filed 8-18-76;8:45 am]

[Docket No. 76-CE-24-AD; Amdt. 39-2697]

PART 39—AIRWORTHINESS DIRECTIVES

Beech Models 58P and 58PA Airplanes

There have been reports of cabin windows cracking on Beech Model 58P airplanes. The window in question is located just forward of the cabin entrance door on the left side of the airplane. The cracking is caused by concentrated load paths created by the rigid structure around the door. This condition results in cabin decompression and could lead to an emergency situation. Since the condition described herein is likely to exist or develop in other airplanes of the same type design, an Airworthiness Directive (AD) is being issued, applicable to Beech Models 58P and 58PA airplanes, requiring inspection of the subject cabin window for cracks, and if not already accomplished the installation of a window frame reinforcement and thereafter repetitive inspections of the window for cracks. The AD will also provide that airplanes with the subject window cracked can be operated in this condition unpressurized until the window is replaced.

Since a situation exists which requires expeditious adoption of the amendment, notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new AD.

BEECH. Applies to Models 58P and 58PA (Serial Numbers TJ-2 and up) airplanes.

Compliance: Required as indicated, unless already accomplished.

To prevent cracking of the cabin window located just forward of the cabin entrance door on the left side of the airplane, with resultant loss of cabin pressurization, accomplish the following:

A. On Models 58P and 58PA (Serial Numbers TJ-2 thru TJ-19, TJ-21 thru TJ-45, TJ-47 thru TJ-54, TJ-56 thru TJ-58) airplanes that do not have the window frame reinforcement installed, as defined in Beechcraft Service Instruction 0828-110 or later approved revisions, accomplish the following in accordance with said service instruction:

1. Within 25 hours' time in service after the effective date of this AD and at the two next 50 hour time in service intervals thereafter, visually inspect the cabin window just forward of the cabin door on the left side of the airplane for cracks and if cracks are found during any inspection required herein, prior to any flight during which the cabin is pressurized, replace the window and install the window frame reinforcement.

2. If no cracks have been found during any inspection required in Paragraph A.1., within 100 hours' time in service after the initial inspection required by Paragraph A.1. install the window frame reinforcement and thereafter comply with the inspection and, if necessary, the replacement requirements required by Paragraph B.

B. On Models 58P and 58PA (Serial Numbers TJ-2 and up) airplanes that have the window frame reinforcement installed, as defined in Beechcraft Service Instruction 0828-110 or later approved revisions, accomplish the following in accordance with said service instruction:

Within 100 hours' time in service after the effective date of this AD, or within 100 hours' time in service after the installation of the window frame reinforcement specified in Paragraph A and at each 100 hours' time in service thereafter, visually inspect the cabin window just forward of the cabin door on the left side of the airplane for cracks and if cracks are found during any inspection required herein, replace the cracked window prior to any flight in which the cabin is pressurized.

C. On Models 58P and 58PA airplanes that are flown unpressurized following discovery of a window found cracked during any inspection required by Paragraphs A and B:

1. Fabricate a placard worded as follows "Do Not Pressurize In Flight" and

2. Install said placard near the cabin pressurization control switch, and

3. Operate the aircraft in accordance with the placard until the cracked window is replaced.

D. The inspection intervals set forth in Paragraph B of this AD may be extended 10 hours up to a maximum of 110 hours' time in service to allow compliance with Paragraph B in conjunction with regular scheduled maintenance or inspections.

E. Any equivalent method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This amendment becomes effective August 24, 1976.

This amendment is made under the authority of sections 313(a), 601 and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1423), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c).)

Issued in Kansas City, Missouri, on August 10, 1976.

C. R. MELUGIN, JR.,
Director, Central Region.

[Airspace Docket No. 76-RM-14]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration and Extension of VOR Airway

On June 17, 1976, a Notice of Proposed Rule Making (NPRM) was published in the FEDERAL REGISTER (41 FR 24608) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would realign and extend V-26 from Cherokee, Wyo., to Grand Junction, Colo., via Meeker, Colo., and eliminate that portion of V-26 presently established between Celia INT, Colo., and Hayden, Colo.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. No comments were received.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, November 4, 1976, as hereinafter set forth.

§ 71.123 (41 FR 307) is amended as follows:

In V-26 "From Hayden, Colo., via INT Hayden 310° and Cherokee, Wyo., 191° radials; Cherokee; 37 miles, 52 miles, 111 MSL," is deleted and "Cherokee, Wyo.; Meeker, Colo.; Grand Junction, Colo.;" is substituted therefor.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on August 11, 1976.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.76-23926 Filed 8-18-76;8:45 am]

[Docket No. 13235; Amdt. No. 137-6]

PART 137—AGRICULTURAL AIRCRAFT OPERATIONS

Agricultural Aircraft Operator Certificates

● The purpose of this amendment to Part 137 of the Federal Aviation Regulations is to permit the holder of a Part 133 rotorcraft external-load operator certificate to conduct an agricultural aircraft operation involving only the dispensing of water on forest fires by rotorcraft external-load means, without compliance with, among other things, the Part 137 operator certificate requirements. ●

This amendment is based on a Notice of Proposed Rule Making (Notice No. 75-7) issued on February 21, 1975, and published in the FEDERAL REGISTER (40 F.R. 8831) on March 3, 1975.

Interested persons were afforded an opportunity to participate in the making of this amendment and due consideration was given to all matters presented. Four comments were received in response to the notice. One commentator concurred with the notice; and two commentators generally agreed with the notice but objected to the exclusion of the operational use of fire retardant substances other than plain water as proposed.

The FAA does not agree that the dispensing of fire retardant chemicals other than water should be included in the amendment. The FAA is of the opinion that the dispensing of fire retardant chemicals requires a knowledge of the handling and dispensing of chemicals similar to that required of the holder of a Part 137 certificate. It would not, therefore, be in the public interest to permit rotorcraft external-load fire suppression operations dispensing fire retardant chemicals to be conducted without compliance with the requirements of Part 137.

However, the FAA is of the opinion that the holder of a Part 133 certificate is qualified to safely conduct rotorcraft external-load fire suppression operations, involving only the dispensing of water, by virtue of having met the Part 133

V 41 162 AUG 19 76 UMI

operating certificate requirement. Therefore, Part 137 is amended to permit the holder of a Part 133 rotorcraft external-load operator certificate to conduct an agricultural aircraft operation, involving only the dispensing of water on forest fires by rotorcraft external-load means, without compliance with the operator certificate requirements, among others, of Part 137. Specifically, this amendment excepts a Part 133 certificate holder from the requirement to obtain a Part 137 certificate, from compliance with the operating rules of Part 137 contained in §§ 137.31 through 137.35, 137.39, 137.41, and 137.51 through 137.59 and from compliance with the recordkeeping and reporting requirements contained in Subpart D. Under this amendment, a Part 133 certificate holder has to conduct operations in accordance with all of the rules of Part 133 governing rotorcraft external-load operations, and in compliance with the operating rules of Part 137 contained in §§ 137.29, 137.37, and 137.43 through 137.49.

This amendment is made under the authority of sections 313(a), 601, and 607 of the Federal Aviation Act of 1958 (49 U.S.C. 1354 (a), 1421, and 1427) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, Part 137 of the Federal Aviation Regulations is amended, effective September 20, 1976, as follows:

1. By amending § 137.11 by revising paragraph (a) and by adding a new paragraph (d) to read as follows:

§ 137.11 Certificate required.

(a) Except as provided in paragraphs (c) and (d) of this section, no person may conduct agricultural aircraft operations without, or in violation of, an agricultural aircraft operator certificate issued under this part.

* * * * *

(d) The holder of a rotorcraft external-load operator certificate under Part 133 of this chapter conducting an agricultural aircraft operation, involving only the dispensing of water on forest fires by rotorcraft external-load means, need not comply with this subpart.

2. By amending § 137.29 by revising paragraph (a), by redesignating paragraph (b) as parargaph (d), and reserving paragraph (b), and by adding a new paragraph (e) to read as follows:

§ 137.29 General.

(a) Except as provided in paragraphs (d) and (e) of this section, this subpart prescribes rules that apply to persons and aircraft used in agricultural aircraft operations conducted under this part.

(b) [Reserved]

* * * * *

(d) Sections 137.31 through 137.35, 137.41, and 137.53 through 137.59 do not apply to persons and aircraft used in agricultural aircraft operations conducted with public aircraft.

(e) Sections 137.31 through 137.35, 137.39, 137.41, 137.51 through 137.59, and Subpart D do not apply to persons and rotorcraft used in agricultural aircraft operations conducted by a person holding a certificate under Part 133 of this chapter and involving only the dispensing of water on forest fires by rotorcraft external-load means. However, the operation shall be conducted in accordance with—

(i) The rules of Part 133 of this chapter governing rotorcraft external-load operations; and

(ii) The operating rules of this subpart contained in §§ 137.29, 137.37, and 137.43 through 137.49.

Issued in Washington, D.C., on August 10, 1976.

JOHN L. MCLUCAS,
Administrator.

Title 17—Commodity and Securities Exchange

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

PART 150—LIMITS ON POSITIONS AND TRADING

Wheat

The Commodity Exchange Act, as amended ("Act"), 7 U.S.C. 1 et seq., provides that for the purpose of diminishing, eliminating or preventing excessive speculation the Commodity Futures Trading Commission ("Commission") may fix limits for an individual's positions and daily trading in any contract market. Positions and trading classified as bona fide hedging are exempt from such limits.

On June 3, 1976, a notice was published in the FEDERAL REGISTER[1] that the Commission was considering amendments to Part 150 of the regulations under the Act which would raise the speculative position and trading limits in wheat from two million bushels to three million bushels. The Commission proposed to adopt a separate section in Part 150 governing wheat position and trading limits and to delete wheat from the definition of those grains covered by the two million bushel limitation in § 150.1 of the regulations.

STATEMENT OF CONSIDERATION

Approximately 675 reprints of the Commission's notice were sent to interested persons in the futures market industry. Interested persons were given until July 5, 1976, to submit data, views or recommendations concerning the proposed revisions. Five written comments were received in response to the notice and all were considered. Four of the commentors supported the change while one opposed it.[2] The principal points raised by those supporting the change were that (1) the current wheat limits set by the Commodity Exchange Commission, which formerly established such limits, are outdated and arbitrary because of growth in the wheat marketing system, (2) outdated speculative position and trading limits may impair liquidity of the futures markets, and (3) speculative position and trading limits may not be particularly effective regulatory devices.

The Commission also considered conclusions reached by its Advisory Committee on the Economic Role of Contract Markets which was considering the role of speculation and hedging in futures markets. The Advisory Committee recommended that, in the long run, speculative limits should be de-emphasized and replaced by more flexible and effective regulatory measures. In the short run, the Committee recommended raising speculative position limits and relaxing the current restrictions on intra-day speculative trading. Concerning the current trading limits, the Committee's report notes that "the present flat numerical limit on the number of contracts a speculator may trade during the day actually cuts back participation of speculators at the very time when they are needed—on active trading days—reducing liquidity during the later hours of daily trading. These daily trading limits are probably more binding on market performance than the speculative position limits."

In view of the above, the Commission has determined to adopt its proposal to fix all trading and position limits for wheat at the level of three million bushels. The exchanges which are currently designated as contract markets in wheat are the Chicago Board of Trade, the Board of Trade of Kansas City, Missouri, the MidAmerica Commodity Exchange, and the Minneapolis Grain Exchange.

Therefore, pursuant to its authority under sections 4a(1) and 8a(5) of the Act, 7 U.S.C. 6a(1) and 12a(5), the Commission amends Part 150 in Chapter 1 of Title 17 of the Code of Federal Regulations by adopting a new § 150.12 of the regulations and by amending § 150.1(e) of the regulations as follows:

1. Section 150.1(e) is amended to read as follows:

§ 150.1 Limits on position and daily trading in grain for future delivery.

* * * * *

(e) *Definitions.* As used in this part the word "grain" includes oats, barley, and flaxseed, and the word "person" imports the plural or singular and includes individuals, associations, partnerships, corporations and trusts.

2. Section 150.12 is adopted to read as follows:

§ 150.12 Limits on position and daily trading in wheat for future delivery.

The following limits on the amount of trading under contracts of sale of wheat for future delivery on or subject to the rules of any contract market, which may be done by any person, are hereby proclaimed and fixed, to be in full force and effect on and after August 20, 1976.

(a) *Position limit.* The limit on the maximum net long or net short position which any person may hold or control in wheat on or subject to the rules of any one contract market is three million bushels in any one future or in all futures combined.

(b) *Daily trading limit.* The limit on the maximum amount which any person may buy, and on the maximum amount which any person may sell, of wheat, on or subject to the rules of any one contract market during any one business day is 3 million bushels in any one future or in all futures combined.

(c) *Bona fide hedging.* The foregoing limits upon position and upon daily trading shall not be construed to apply to bona fide hedging transactions or positions, as provided in regulations issued pursuant to section 4a(3) of the Commodity Exchange Act (7 U.S.C. 6a(3)) and section 404 of Pub. L. 93-463.

(d) *Manipulations; corners; responsibility of contract market.* Nothing contained in this section shall be construed to affect any provisions of the Act relating to manipulation or corners, nor to relieve any contract market or its governing board from responsibility under section 5(d) of the Act (7 U.S.C. 7(d)) to prevent manipulation and corners.

(e) *Definition.* As used in this part, the word "person" imports the plural or singular and includes individuals, associations, partnerships, corporations, and trusts.

(f) *Application of limits.* The foregoing limits upon positions and upon daily trading shall be construed to apply, respectively, to positions held by, and trading done by, two or more persons acting pursuant to an expressed or implied agreement or understanding, the same as if the positions were held by, or the trading were done by, a single individual.

Section 4a of the Act requires that the effective date for Commission action setting trading and position limits shall be within a reasonable time, not to exceed ten days. The Commission therefore finds that compliance with the public procedures specified in 5 U.S.C. 553(d) would be contrary to the mandate of the Act and contrary to public interest. Accordingly, the Commission has adopted the foregoing rule, which applies to positions and trading for future delivery in wheat on or after August 20, 1976, pursuant to the authority contained in sections 4a and 8a(5) of the Commodity Exchange Act, as amended, 7 U.S.C. 6a and 12a(5).

Issued in Washington, D.C., on August 13, 1976.

By the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

[FR Doc.76-24264 Filed 8-18-76;8:45 am]

[1] See 41 FR 22547 (June 3, 1976).

[2] The one commentor opposing the change felt that the change was not ". . . in the public interest, but in the interest of a few trade boards." This commentor did not provide reasons or an explanation supporting his opposition.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 76-233]

PART 1—GENERAL PROVISIONS

Ports of Entry

On June 25, 1976, there was published in the FEDERAL REGISTER (41 FR 26225) a notice of a proposal to establish a Customs port of entry at Battle Creek, Michigan, in the Detroit, Michigan, Customs district (Region IX). No comments were received in response to this proposal.

Accordingly, by virtue of the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR, 1949-1953 Comp., Ch. II), and pursuant to authority provided by Treasury Department Order No. 190, Rev. 11 (41 FR 20198), Battle Creek, Michigan, is hereby designated as a Customs port of entry in the Detroit, Michigan, Customs district (Region IX).

The geographical limits of the Battle Creek, Michigan, port of entry shall include the Metropolitan Area of the City of Battle Creek, Michigan, comprising the Townships of Bedford, Battle Creek, Pennfield, and Emmett, and the Cities of Battle Creek and Springfield, all in Calhoun County, Michigan.

§ 1.2 [Amended]

To reflect this change, the table in section 1.2(c) of the Customs Regulations (19 CFR 1.2(c)) is amended by inserting "Battle Creek, Michigan (T.D. 76-233)" directly below "Detroit" in the column headed "Ports of entry" in the Detroit, Michigan, Customs district (Region IX).

(Sec. 1, 37 Stat. 434, sec. 1, 38 Stat. 623, as amended (19 U.S.C. 1, 2).)

Effective date: This amendment shall become effective September 20, 1976.

Dated: August 13, 1976.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

[FR Doc.76-24333 Filed 8-18-76;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 76N-0058]

PART 460—ANTIBIOTIC DRUGS INTENDED FOR USE IN LABORATORY DIAGNOSIS OF DISEASE

Susceptibility Discs

The Food and Drug Administration (FDA) is amending the antibiotic drug regulations to specify the requirements for submitting samples of antibiotic susceptibility discs for certification; effective August 19, 1976.

Regulations published in the FEDERAL REGISTER of September 30, 1972 (37 FR 20525) amended the antibiotic drug regulations in 21 CFR Part 147 (now 21 CFR Part 460 pursuant to recodification published in the FEDERAL REGISTER of May 30, 1974 (39 FR 18992)) by providing for revised labeling and standardized testing procedures for antibiotic susceptibility discs and by deleting and adding provisions for certain antibiotic discs. The amendments revised § 147.2 (now § 460.1), but paragraph (d), which concerned samples for certification and which was not intended to be affected by the amendments, was inadvertently omitted when the text of the section was published in the FEDERAL REGISTER. It has therefore not appeared in issues of the Code of Federal Regulations published since 1972.

Because objections and requests for hearing that were filed in response to the September 30, 1972 amendments have not yet been ruled on, the regulations as amended have not been considered a requirement by FDA. Although a number of firms have adopted the provisions of the amendments, other firms are abiding by the regulations in effect before the amendments. Notwithstanding the procedures followed, it is necessary that manufacturers know what samples and test results are to be submitted with a request for certification. Therefore, the Commissioner of Food and Drugs concludes that paragraph (d) should be restored to § 460.1; also, the section heading, as issued below, reflects minor editorial corrections.

The Commissioner further concludes that good cause exists for publishing this amendment without a period for public comment pursuant to 5 U.S.C. 553 (b) and (d) and for making the amendment effective immediately because it merely corrects an error of omission in text and does not change existing practice.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), Part 460 is amended in § 460.1 by revising the section heading and adding paragraph (d) to read as follows:

§ 460.1 Certification procedures for antibiotic susceptibility discs.

* * * * *

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 431.1 of this chapter, a person who requests certification of a batch of antibiotic susceptibility discs shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, and, unless it was previously submitted, the date on which the latest assay of the antibiotic used in making such

V 41 162 AUG 19 76 UMI

batch was completed, the potency of each disc, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor by this section.

(2) Such person shall submit in connection with his request results of the tests and assays made by him on an accurately representative sample of the batch for potency.

(3) Such person shall submit in connection with his request an accurately representative sample of the batch consisting of one disc for each 5,000 discs in the batch, but in no case less than 36 discs collected by taking single discs at intervals throughout the entire time of packaging the batch so that the quantities packaged during the intervals are approximately equal.

Effective date: This amendment is effective August 19, 1976.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated: August 12, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

[FR Doc.76-24278 Filed 8-18-76;8:45 am]

[Docket No. 76N-0277]

PART 640—ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS

Labeling Requirements Regarding Testing for Syphilis and Hepatitis B Surface Antigen

The Food and Drug Administration (FDA) is amending certain labeling requirements for statements on testing for syphilis and hepatitis, effective August 19, 1976.

Specifically, FDA is amending the labeling requirements for human blood and blood products by permitting the use of the label statements "Nonreactive for syphilis by STS" and "Nonreactive for HB_sAg by FDA required test", as alternatives to label statements specifying the particular test method for syphilis and hepatitis B surface antigen (HB_sAg).

The biologics regulations in §§ 640.7 (b), 640.18(a) (by reference to § 640.7 (b)), 640.26(g) and (h), 640.51(c)(7), and 640.70(a)(8), 21 CFR 640.7(b) 640.18 (a), 640.26(g) and (h), 640.51(c)(7), and 640.70(a)(8)) require that blood labeling identify the method used for the serological test for syphilis (STS and/or the test for hepatitis B surface antigen (HB_sAg), and the results.

The Commissioner of Food and Drugs received a request from the American Blood Commission's Committee for Commonality in Blood Banking Automation to permit the labeling of the container of blood and blood products with general statements, i.e., "Nonreactive for syphilis by STS" and "Nonreactive for HB_sAg by FDA required test" in place of method-specific labeling. The Commissioner has also received a similar request from the American National Red Cross. Both organizations stated that the general statements would permit use of a standard label. This would result in greater safety by eliminating a source of labeling mix-ups. A standard label will also eliminate the need for multiple labels for different test methods and thus promote economy and efficiency. The American Blood Commission noted that their proposed standard label can be read by machine and will permit automation to be used in label applications.

The Commissioner has considered these requests and advises that § 610.40 *Test for hepatitis B surface antigen* (21 CFR 610.40) requires that each donation of blood, plasma, or serum for use in a biological product shall be tested for HB_sAg by a method of sufficient sensitivity to detect all the specified sera in the Reference Hepatitis B Surface Antigen Panel, which is distributed by the Bureau of Biologics. Label identification of the specific hepatitis test method used is unnecessary since the sensitivity of the test methods that will detect the specified sera in the Reference Hepatitis B Surface Antigen Panel are comparable and must meet FDA requirements. Similarly, the sensitivity of serologic test methods used in blood banks for screening purposes for syphilis are also comparable. Therefore, the Commissioner concludes that permitting the use of these general statements regarding hepatitis and syphilis will adequately describe the testing of the product and will not meaningfully reduce the information provided to the users of blood and blood products.

Therefore, under the Public Health Service Act (secs. 351 and 361, 58 Stat. 702 and 703 as amended (42 U.S.C. 262 and 264)) and under authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), Part 640 of Subchapter F of Title 21 of the Code of Federal Regulations is amended by permitting the use of the above-described label statements, as follows:

1. In § 640.7, by revising paragraph (b) to read as follows:

§ 640.7 Labeling.

* * * * *

(b) *Serological test and test for hepatitis B surface antigen.* Indication of the method used for serological test for syphilis and the test for hepatitis B surface antigen, and the results or the statements "Nonreactive for syphilis by STS" and "Nonreactive for HB_sAg by FDA required test", respectively.

* * * * *

2. In § 640.26 by revising paragraph (g) and (h) to read as follows:

§ 640.26 Labeling.

* * * * *

(g) Type of serologic test for syphilis used and the results, or the statement "Nonreactive for syphilis by STS".

(h) Type of test for hepatitis B surface antigen used and the results, or the statement "Nonreactive for HB_sAg by FDA required test".

* * * * *

3. In § 640.51, by revising paragraph (c)(7) to read as follows:

§ 640.51 General requirements.

* * * * *

(c) * * *

(7) Indication of test method for hepatitis B surface antigen used and the results, or the statement "Nonreactive for HB_sAg by FDA required test".

4. In § 640.70, by revising paragraph (a)(8) to read as follows:

§ 640.70 Labeling.

* * * * *

(a) * * *

(8) The test for hepatitis B surface antigen used and the results, or the statement "Nonreactive for HB_sAg by FDA required test".

* * * * *

Under the Administrative Procedure Act (5 U.S.C. 553(b) and (d)), the Commissioner concludes that notice, public procedure, and delayed effective date are unnecessary for these amendments because they do not impose an additional duty or burden on any person, but rather they relieve unnecessary restrictions and permit alternative labeling.

Effective date: This regulation shall become effective August 19, 1976.

(Secs. 351 and 361, 58 Stat. 702 and 703 as amended (42 U.S.C. 262 and 264).)

Dated: August 12, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-910]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Charter Township of Meridian, Mich.

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for the Charter Township of Meridian, Michigan under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Charter Township must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Town Hall, 5100 Marsh Road, Meridian, Michigan 48864.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Red Cedar River	Grand River Ave	852.7	40	[1] 100
	Van Atta Rd	850.8	800	410
	Dobie Rd	848.1	600	40
	Okemos Rd	844.0	750	30
	Nakoma Rd	842.8	700	1300
	G. T. W. RR	841.7	180	240
	Hagadorn Rd	839.7	[1] 100	720
Herron Creek	Bennett Rd	848.0	500	200
	C. & O. RR	842.6	160	200
	Mount Hope Rd	842.5	190	210
	Sequois Trail	842.5	350	300
Smith Drain	Bennett Rd	863.7	50	50
	Okemos Rd	860.0	200	200
	C. & O. RR. (north side)	850.9	100	120
Pine Lake Outlet	Marsh Rd	853.1	40	40
	Lake Lansing Rd	848.5	40	60
	Haslett Rd	848.5	20	100
	G. T. W. RR	845.5	180	1880
	Okemos Rd	842.5	500	280
	Grand River Ave	842.5	60	80
Mud Lake/Foster	Van Atta Rd	863.4	40	90
	Cornell Rd	853.5	190	580
	Tihart Rd. (east)	846.8	860	600
	Tihard Rd. (west)	846.0	270	600
	Marsh Rd	844.0	80	180

[1] Approximate distance in feet from bank of stream to township limits.

AUTHORITY: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.

Issued: July 22, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[FR Doc.76-23963 Filed 8-18-76;8:45 am]

[Docket No. FI-899]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Cook, Minn.

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for the City of Cook, Minnesota under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, Cook, Minnesota 55723.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

V 41 162 AUG 19 76 UMI

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Little Fork River	Range St	1,308	250	60
	River St	1,308	200	60
	Duluth, Winnipeg, and Pacific RR	1,308	40	20
	Minnesota Highway 1	1,309	330	130

Authority: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968; effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.

Issued: July 22, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-913]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Cedar City, Mo.

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§1917.10)), hereby gives notice of the final determinations of flood elevations for the City of Cedar City, Missouri under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, Cedar City, Missouri 65022.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Missouri River	City east of Highway 54–63	555	(1)	(1)
	City west of Highway 54–63	556	(1)	(1)

[1] Entire city inundated.

Authority: National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.

Issued: July 22, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-901]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Garwood, N.J.

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for the Borough of Garwood, New Jersey under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Borough Hall, Center Street, Garwood, New Jersey 07027.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Garwood Brook	Maple St	92	50	550
	West St	87	270	550
	Center St	85	530	170
	East	80	810	270
	Oak	78	440	470
	Willow	78	280	(1)
	South	77	(1)	770
Unnamed stream (10-28)	Oak	83	310	(1)

[1] Extends to corporate limits.

AUTHORITY: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.

Issued: July 22, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-902]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Washington, N.C.

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for the City of Washington, North Carolina under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, Washington, North Carolina 27889.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

V 41 162 AUG 19 76 UMI

Source of flooding	Location	Elevation in feet above mean sea level
Pamlico River	Hackney Ave.:	
	From shoreline to 50 ft west of West 2d St.	10
	From 80 ft east of West 3d St. to 80 ft west of Taylor St.	10
	From Harrington St. to 200 ft west of Carolina Ave.	10
	Wilson St.:	
	From 120 ft east of West 3d St. to 140 ft east of West 4th St.	10
	Pierce St.:	
	From shore to 80 ft west of West Main St.	10
	From 160 ft east of West 2d St. to West 7th St.	10
	From 180 ft west of West 12th St. to 330 ft east of West 13th St.	10
	Respess St.:	
	From shore to 110 ft east of West 7th St.	10
	From 310 ft west of West 9th St. to 510 ft east of West 9th St.	10
	From 210 ft west of West 13th St. to West 15th St.	10
	Boner St.:	
	From shore to East Main St.	10
	From 130 ft east of East 2d St. to 150 ft west of East 5th St.	10
	From 130 ft east of East 5th St. to 90 ft east of East 7th St.	10
	From 120 ft east of East 7th St. to 200 ft east of East 14th St.	10
	Hudnell St.:	
	From shore to 120 ft west of East 6th St.	10
	From 60 ft east of East 7th St. to 130 ft east of Pennsylvania Ave.	10

Authority: National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 F.R. 17804, Nov. 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, Feb. 27, 1969, as amended by 39 F.R. 2787, Jan. 24, 1974.

[Docket No. FI-901]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Town of Canton, N.C.

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for the Town of Canton, North Carolina under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Town must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Town Hall, Canton, North Carolina 28716.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank o stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Pigeon River	West Park St.	2,589	800	60
	Main St.	2,590	110	190
	Pigeon St.	2,593	410	210

Authority: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.

Issued: July 26, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 1-76-8R]

PART 127—SECURITY ZONES

Crowninshield Point, Seal Harbor, Maine

This amendment to the Coast Guard's Security Zone Regulations, establishes the waters adjacent to Vice President Nelson Rockefeller's summer home on Crowninshield Point, Seal Harbor, Maine as a security zone. This security zone is established to maintain waterside security of the area contiguous to the estate of the Vice President of the United States.

This amendment is issued without publication of a notice of proposed rule making and this amendment is effective in less than 30 days from the date of publication, because good cause exists and public procedures on this amendment are impracticable because of minimal prior notification of the Vice President's itinerary.

In consideration of the foregoing, Part 127 of Title 33 of the Code of Federal Regulations is amended by adding § 127.109, to read as follows:

§ 127.109 Seal Harbor, Maine.

The waters within the following boundary is a security zone: a line beginning at 44°17'18" N. latitude, 68°14'58.5" W. longitude; thence to 44°17'07" N. latitude, 68°14'45" W. longitude, (CG Mooring Buoy); thence to 44°17'16.8" N. latitude, 68°14'22.5" W. longitude, (Crowninshield Point Buoy Number One); thence to 44°17'22.5" N. latitude, 68°14'31" W. longitude, (Right tangent of Island off Crowninshield Point); thence to 44°17'23.5" N. latitude, 68°14'42" W. longitude, (A point on the mainland); thence to the beginning point.

(40 Stat. 220, as amended, Sec. 6(b), 80 Stat. 937; 50 U.S.C. 191, 49 U.S.C. 1655(b); E.O. 10173, E.O. 10277, E.O. 10352, E.O. 11249; 3 CFR 1949–1953 Comp. 356, 778, 873, 3 CFR 1964–1965 Comp. 349, 33 CFR Part 6, 49 CFR 1.46(b).)

Effective date: This amendment is effective from 0800 e.d.s.t. on Monday, 2 August 1976 to 2400 e.d.s.t. on Monday, 6 September 1976.

Dated: July 29, 1976.

J. B. EKMAN,
Commander, United States Coast Guard, Captain of the Port, Portland, Maine.

CHAPTER 7—AGENCY FOR INTERNATIONAL DEVELOPMENT, DEPARTMENT OF STATE

[AIDPR Notice 77-2]

PART 7-7—CONTRACT CLAUSES

Subpart 7-7.55—Clauses for Cost Reimbursement Contracts With Educational Institutions; Correction

This Notice reinstates a clause that was erroneously deleted by AIDPR Notice 76-1 (41 CFR 4918) and deletes the correct clause.

§ 7-7.5502-13 [Reserved]

1. Section 7-7.5502-13 is revoked and reserved.

2. New Section 7-7.5502-16 is added as follows:

§ 7-7.5502-16 Title to and care of property.

In lieu of the clause required by AIDPR 7-7.5501-18, insert the clause set forth in AIDPR 7-13.706.

This AIDPR Notice No. 77-2 is an interim procurement instruction and is issued pursuant to 41 CFR 7-1.104-4.

Effective date: This notice is effective on July 1, 1976.

Dated: August 11, 1976.

JOHN F. OWENS,
Deputy Assistant Administrator for Program and Management Services.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5600; WY-49110]

WYOMING

Withdrawal of National Forest Land From Mineral Entry

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

BIGHORN NATIONAL FOREST

SIXTH PRINCIPAL MERIDIAN

T. 51 N., R. 84 W.,
Sec. 12, NE¼, E½NW¼, NE¼SE¼.
T. 52 N., R. 84 W.,
Sec. 23, S½NE¼, E½SW¼, SE¼;
Sec. 26, NE¼, NE¼NW¼, N½SE¼, SE¼SE¼.
T. 53 N., R. 84 W.,
Sec. 14;
Sec. 15, NE¼NE¼;
Sec. 23, E½;
Sec. 26, NE¼.

The areas described aggregate 2,080 acres in Johnson and Sheridan Counties.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,
Assistant Secretary of the Interior.

AUGUST 11, 1976.

[FR Doc.76-24289 Filed 8-18-76;8:45 am]

[Public Land Order 5601; WY-15395]

WYOMING

Withdrawal for National Forest Historical Area

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 F.R. 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

BRIDGER NATIONAL FOREST

SIXTH PRINCIPAL MERIDIAN

Lander Cut-Off of the Oregon Trail Historical Area

A strip of land 100 feet on each side of the centerline of the Lander Cut-Off of the Oregon Trail through the following subdivisions:

T 29 N., R 115 W.,
Sec. 19, lots 3 and 4, E½SW¼, and part of the W½SE¼ lying outside the Middle Fork South Piney Roadside Zone withdrawal, PLO 2684.
T. 29 N., R. 116 W.,
Sec. 6, lot 4;
Sec. 7, lot 2, W½NE¼, SE¼NE¼, N½SE¼;
Sec. 8, W½SW¼, and part of the SE¼SW¼ lying outside the Greys River-LaBarge Creek Roadside Zone withdrawal, PLO 3020;
Sec. 16, part of W½NW¼, N½SW¼, lying outside the Greys River-LaBarge Creek Roadside Zone withdrawal, PLO 3020;
Sec. 17, part of E½NE¼, lying outside the Greys River-LaBarge Creek Roadside Zone withdrawal, PLO 3020;
Sec. 24, SE¼SW¼, SE¼;
Sec. 25, W½NE¼, E½NW¼, and part of the NE¼SW¼ and the NW¼SE¼ lying outside the Greys River-LaBarge Creek Roadside Zone withdrawal, PLO 3020.
T. 29 N., R. 117 W. (unsurveyed),
Sec. 1, NE¼SW¼, S½S½;
Sec. 10, SE¼SE¼;
Sec. 11, S½NE¼, SE¼NW¼, N½SW¼, SW¼SW¼, E½SE¼;
Sec. 12, W½;
Sec. 13, NW¼NW¼;
Sec. 14, NW¼NW¼;
Sec. 15, N½NE¼, NE¼NW¼, S½NW¼;
Sec. 16, SE¼NE¼, SW¼, N½SE¼;
Sec. 17, S½S½;
Sec. 18, SE¼SE¼;
Sec. 19, NE¼, NE¼SW¼, S½SW¼, W½SE¼.
T. 29 N., R. 118 W. (unsurveyed),
Sec. 4, W½E½, E½NW¼, NE¼SW¼;
Sec. 9, W½E½, SE¼NW¼, NE¼SW¼;
Sec. 14, S½NW¼, N½SW¼, SE¼SW¼, W½SE¼;
Sec. 15, NW¼, N½SW¼, SE¼SW¼, S½SE¼, NE¼SE¼;
Sec. 16, NE¼;
Sec. 23, NE¼, N½SE¼, SE¼SE¼;
Sec. 24, that part of the S½SW¼ lying outside the Smiths Fork Administrative Site withdrawal, PLO 2765.

The areas described aggregate approximately 442 acres in Lincoln and Sublette Counties.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,
Assistant Secretary of the Interior.

Title 49—Transportation

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 74-11, Notice 15; Docket No. 73-19; Notice 12]

PART 581—BUMPER STANDARD

Delayed Response to Petitions for Reconsideration

This notice delays by approximately one month the date by which the National Highway Traffic Safety Administration will respond to petitions for reconsideration of the Part 581 Bumper Standard (49 CFR Part 581) published March 4, 1976 (41 FR 9346).

It is the policy of the National Highway Traffic Safety Administration to respond to petitions for reconsideration within 120 days of the publication of a final rule, unless it is found to be impracticable to take action within that time (49 CFR Part 553, Appendix). Since the Part 581 Bumper Standard was published on March 4, 1976, response to petitions should, under agency policy, have been issued by July 2, 1976. The agency, however, found it impracticable to respond to the petitions by that date.

On July 6, 1976, the NHTSA published a notice stating that response to petitions for reconsideration of Part 581 would be delayed until August 1, 1976 (41 FR 27728). The agency now finds that a response to petitions by early August is impracticable and delays until September 15, 1976, the date by which it expects to take appropriate action on petitions for reconsideration of Part 581.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); sec. 102, Pub. L. 92-513, 86 Stat. 947 (15 U.S.C. 1912) delegation of authority at 49 CFR 1.51 and 501.8.)

Issued: August 16, 1976.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Fourth Revised S.O. No. 1234]

PART 1033—CAR SERVICE

Distribution of Freight Cars

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 13th day of August 1976.

It appearing, that there is an acute shortage of freight cars for transporting shipments of fertilizer,[1] fish meal, grain, grain products, and soybeans; that certain tariff provisions require the use of cars of specified cubic or weight carrying capacities; that the carriers are unable to furnish sufficient such cars to transport shipments of such weights; that cars of lesser capacity are available; that such cars cannot be used because of certain tariff provisions; that there is immediate need to use every available car for transportation of fertilizer and grain; that the inability of the carriers to furnish sufficient fertilizer and grain cars results in great economic loss; and that present regulations and practices with respect to the use, supply, control, movement, and distribution of fertilizer and grain cars are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1234 Distribution of freight cars.

(a) Subject to the concurrence of the shipper, carriers may substitute a sufficient number of smaller cars for larger cars ordered to transport shipments of fertilizer,[1] fish meal, grain, grain products or soybeans regardless of tariff requirements specifying minimum cubic or weight carrying capacity. (See paragraphs (b) of (c) of this section.)

(b) *Exception.* This order shall not apply to shipments subject to tariff provisions requiring the use of twenty-five or more cars per shipment.

(c) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(d) *Rates and minimum weights applicable.* The rates to be applied and the minimum weights applicable to shipments for which cars smaller than those ordered have been furnished and loaded as authorized by Section (a) of this order shall be the rates and minimum weights applicable to the larger cars ordered.

(e) *Billing to be endorsed.* The carrier substituting smaller cars for larger cars as authorized by Section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Car of ( ) cu. ft. and of ( ) lbs. or greater capacity ordered. Smaller cars furnished authority Fourth Revised ICC Service Order No. 1234.

(f) *Concurrence of shipper required.* Smaller cars shall not be furnished in lieu of cars of greater capacity without the consent of the shipper.

(g) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C., 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(h) *Rules and regulations suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(i) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(j) *Effective date.* This order shall become effective at 12:01 a.m., August 16, 1976.

(k) *Expiration date.* This order shall expire at 11:59 p.m., October 31, 1976, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Lewis R. Teeple, Thomas J. Byrne, and William J. Love.

ROBERT L. OSWALD,
Secretary.

[1] Fish meal added to commodity list.

Title 50—Wildlife

CHAPTER I—FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Puxico, Missouri

The following special regulations is issued and is effective on August 19, 1976.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

MISSOURI

MINGO NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Mingo National Wildlife Refuge, Puxico, Missouri, is permitted only on the area designated by signs as open to hunting. This open area, comprising 6,000 acres, is delineated on maps available at refuge headquarters located in Puxico, Missouri, and from the Office of the Area Manager, Fish and Wildlife Service, 601 East 12th Street, Kansas City, Mo. 64106. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following special conditions during the period of October 1, through December 31, 1976.

(1) Hunting with bows and arrows only is permitted.

(2) Minimum bow strength shall be 35 pounds.

(3) Hunters must register when entering and leaving the area.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1976.

GERALD L. CLAWSON,
Refuge Manager, Mingo National Wildlife Refuge, Puxico, Missouri.

AUGUST 5, 1976.

[FR Doc.76-24270 Filed 8-18-76;8:45 am]

PART 32—HUNTING

National Wildlife Refuges in Certain States

The following special regulations are issued and are effective on September 4, 1976.

§ 32.12 Special regulations; migratory birds; for individual wildlife refuge areas.

ALABAMA

EUFAULA NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves on the Eufaula National Wildlife Refuge, Alabama, is permitted only on those areas designated by signs as open to hunting. These open areas are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of mourning doves, subject to the following conditions:

(1) Hunting shall be permitted from 12 noon until sunset (central time) on the following dates:

(a) Houston Tract Unit—October 2, 9, and 16, 1976.

(b) Molner Tract Unit—October 23 and 30, 1976.

(2) Each hunter must have on his person a validated refuge hunting permit.

(3) No hunters will be permitted within hunting areas before 11:45 a.m. each day.

(4) All firearms must be encased and/or unloaded when outside the designated hunting area.

(5) Each hunter who successfully takes a limit of mourning doves must leave the hunting area immediately.

(6) Retrievers used by hunters shall be under the control of the owner at all times.

(7) All hunters must check in and out of the refuge at the designated checking station.

(8) Wounded or dead doves falling outside the hunting area may be recovered, but firearms must be left inside hunting area.

(9) Each hunter under age 17 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

(10) Vehicle parking will be limited to areas designated by refuge personnel.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 30, 1976.

ARKANSAS

HOLLA BEND NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves on the Holla Bend National Wildlife Refuge, Arkansas, is permitted only on the area delineated by public hunting signs. This open area, comprising approximately 500 acres, is delineated on a map available at refuge headquarters, Russellville, Arkansas 72801, and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves, subject to the following special conditions:

(1) Hunting dates: September 4 and 11, 1976.

V 41 162 AUG 19 76 UMI

(2) A special refuge permit is required.
(3) No alcoholic beverages will be allowed in the hunting area.
(4) Each hunter under age 17 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.
(5) All firearms must be cased and/or unloaded when outside designated hunting areas.
(6) Dogs used as retrievers must comply with State dog licensing requirements.
(7) Hunting shall be from 12 noon until sunset each day of the hunt.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 11, 1976.

WAPANOCCA NATIONAL WILDLIFE REFUGE

Dove hunting is suspended for the 1976–77 season.

MISSISSIPPI

YAZOO NATIONAL WILDLIFE REFUGE

Dove hunting is suspended for the 1976–77 season.

SOUTH CAROLINA

CAPE ROMAIN NATIONAL WILDLIFE REFUGE

Public hunting of rails on the Cape Romain National Wildlife Refuge, South Carolina, is permitted only on the area designated by signs as open to hunting. This open area, comprising approximately 12,000 acres, is delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of rails, and shall be subject to the following special conditions:

(1) Open season: September 18 through October 30, 1976, except Sundays.
(2) Guns must be unloaded and encased or otherwise rendered incapable of firing except when in the designated hunting area.
(3) The use of dogs is permitted.
(4) A special permit is required.
(5) Each hunter under age 17 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile, but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 30, 1976.

CAROLINA SANDHILLS NATIONAL WILDLIFE REFUGE

Dove hunting is suspended for the 1976–77 season as part of the on-going Carolina Sandhills Mourning Dove Research Project.

TENNESSEE

TENNESSEE NATIONAL WILDLIFE REFUGE

Dove hunting is suspended for the 1976–77 season.

KENNETH E. BLACK,
Regional Director,
U.S. Fish and Wildlife Service.

AUGUST 12, 1976.

[FR Doc.76-24271 Filed 8-18-76;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 16027; Amdt. Nos. 37-40 and 121-129]

PART 37—TECHNICAL STANDARD ORDER AUTHORIZATIONS

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

Ground Proximity Warning-Glide Slope Deviation Alerting System

● The purpose of this amendment to Parts 37 and 121 of the Federal Aviation Regulations (FARs) is to revise § 37.201 to provide a new Technical Standard Order (TSO), applicable to ground proximity warning-glide slope deviation alerting equipment, TSO–C92b, and to revise § 121.360 to permit the use of equipment that meets either the current standards of TSO–C92a or the new standards of TSO–C92b in airplanes required to have such equipment under the operating rules. ●

Section 37.201 of the FARs contains performance, environmental, marking, and data requirements that must be met in order to obtain a TSO-authorization for the manufacture of ground proximity warning-glide slope deviation alerting equipment under TSO–C92a. The performance standards of TSO–C92a are based on the Radio Technical Commission for Aeronautics (RTCA) Document No. DO–161, titled "Minimum Performance Standards, Airborne Ground Proximity Warning System" dated February 7, 1975, including Change Number 2, dated June 13, 1975, which are incorporated by reference in the TSO. Also included in the performance standard are certain exceptions to Document No. DO–161 as well as a number of additional requirements. As is pertinent here, § 121.360(f) prohibits the operation of certain large turbine-powered airplanes unless they are equipped with ground proximity warning-glide slope deviation alerting systems that meet the performance and environmental standards contained in TSO–C92a or incorporate TSO-approved equipment.

After the adoption of TSO–C92a and § 121.360(f) (Amdt. 37–38 and 121–122; 40 FR 42183, September 11, 1975), the FAA began to receive reports of numerous false and nuisance warnings being made by the required ground proximity warning-glide slope deviation alerting systems. These false and nuisance warnings, if allowed to continue, would have resulted in an erosion in pilot confidence in the system and the loss of system effectiveness. Based on further information received from certain air carriers and the Air Transport Association on this subject, the FAA concluded that a major reason for the number of undesired warnings related to the across-the-board application of certain of the standards contained in RTCA Document No. DO–161. Subsequently, the FAA requested that the RTCA Committee responsible for the development of Document No. DO–161, Special Committee 128, reconvene to reevaluate and refine the document.

Recently, the RTCA adopted a revised RTCA minimum performance standard (MPS) in Document No. DO–161A, dated May 27, 1976, for ground proximity warning-glide slope deviation alerting equipment. This MPS, in part, includes new optional warning envelopes (Envelope 3) for Modes 1 and 4 (Excessive Rates of Descent and Flight Into Terrain When Not in Landing Configuration) directed at reducing the number of undesired warnings. In addition, the revised MPS provides for the discontinuation of a warning enunciation cycle following the termination of an envelope penetration. Based on a review of the information currently available, the FAA believes that these changes will result in a greater degree of pilot confidence and more effective pilot utilization of the ground proximity warning-glide slope deviation alerting system. Therefore, § 37.201 is being amended to incorporate RTCA Document No. DO–161A. In this connection, it should be noted that equipment approved under TSO–C92a can be modified and approved under the new standard, TSO–C92b, without additional flight tests if the filtering and time delays in the equipment remain unchanged. In addition, § 121.360(f) is being amended to permit an operator to use equipment meeting either the current standard, TSO–C92a, or the new standard, TSO–C92b, to comply with the Part 121 requirements.

Current § 37.201(a)(2) contains a number of exceptions to RTCA Document No. DO–161. The exception in § 37.201(a)(2)(v) is not necessary under the new standard (TSO-C92b) since the exception has been incorporated into RTCA Document No. DO–161A.

Furthermore, based on data and information available to the FAA, the exceptions contained in current § 37.201(a)(2)(i) through (iv), that prohibit the use of two warning envelopes contained in RTCA Document No. DO–161, are not necessary if the equipment that incorporates these warning envelopes is used only on turbopropeller powered airplanes. Therefore, the exceptions contained in current § 37.201(a)(2) are being deleted and are not contained in TSO–C92b. However, a new § 121.360(i) is being added to limit the use of the pertinent warning envelopes (Envelope 2 of Modes 1 and 4 of RTCA Document No. DO–161A) to turbopropeller powered airplanes.

It should also be noted that § 37.201, as amended, (TSO–C92b) does not contain the current mean time between failure (MTBF) standard specified in § 37.201(c)(1) but does contain a new Mode 4 flap warning inhibition control provision. While the FAA continues to believe that a reliability requirement is desirable, the current MTBF standard has been difficult to administer. The FAA will continue to work for the development of an acceptable standard.

With respect to Mode 4 warnings based on flap position, numerous airplanes have more than one flap setting approved for landing. Only one of these settings need be set for Mode 4 of the system. However, when landings take place using other approved flap settings, undesired warnings will occur. In order to permit the pilot to eliminate these undesired warnings without deactivating the entire system, § 37.201(c), as amended, (TSO–C92b) allows a Mode 4 flap warning inhibition control and a provision is being added to § 121.360 to require the incorporation of procedures in the Airplane Flight Manual for the inhibition of Mode 4 flap warnings for those airplanes having a Mode 4 flap warning inhibition control.

As an interim measure, after the FAA began receiving reports of undesired warnings, §§ 121.303(d) and 121.360(d) were amended (Amdt. 121–126; 40 FR 55313, November 28, 1975) to permit, until September 1, 1976, pilots to deactivate ground proximity warning systems when those systems emit false or nuisance warnings. After September 1, 1976, the deactivation of these systems will be limited to abnormal and emergency conditions as specified in the Airplane Flight Manual. The FAA believes that false warnings are no longer a problem and that an extension of the September 1, 1976, date would further delay the benefits to be derived from the system and would not be in the interest of safety. Equipment can continue to be approved and manufactured under TSO–C92a and used by those operators who have found that equipment compatible with their aircraft and operating environment. In addition, this amendment provides a necessary alternate means of compliance for other operators by establishing a second set of standards for TSO approval of equipment. In view of the imminence of the September 1, 1976, date and the need for this equipment to be activated and used in operations without further delay, and since this amendment imposes no additional burden on any person, I find that notice and public procedure hereon are impracticable and contrary to the public interest and good cause exists for making the amendment effective in less than 30 days.

This amendment is made under the authority of sections 313(a), 601, and 604 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1424) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, Parts 37 and 121 of the Federal Aviation Regulations are amended as follows, effective August 19, 1976:

1. By revising the title of § 37.201 and by revising §§ 37.201 (a), (c), (g), and (h) to read as follows:

§ 37.201 Ground proximity warning-glide slope deviation alerting equipment TSO–C92b.

(a) *Applicability—Minimum performance standards.* This Technical Standard Order prescribes the minimum performance standards that ground proximity warning-glide slope deviation alerting equipment must meet in order to be identified with the applicable TSO marking. Equipment to be so identified must meet the minimum performance standards prescribed in Radio Technical Commission for Aeronautics (RTCA) Document No. DO–161A, titled "Minimum Performance Standards, Airborne Ground Proximity Warning System" (DO–161A), revised May 27, 1976, with the exception specified in paragraph (c)(4) of this section, and the additional standards contained in paragraphs (c)(1) through (c)(3) of this section.

• • • • • •

(c) *Additional standards and exception.* (1) *Fire protection.* Except for small parts (such as knobs, fasteners, seals, grommets, and small electrical parts) that the Administrator finds would not contribute significantly to the propagation of a fire, all materials used must be self-extinguishing when tested in accordance with the requirements of § 25.853 and § 25.1359(d), as applicable, and Appendix F to Part 25 of this chapter, effective May 1, 1972, except that the materials may be of a size and be mounted for the test in accordance with paragraph (b) of Appendix F or may be of a size and be mounted as used in the aircraft.

(2) *Aural and visual warnings.* The required aural and visual warnings must initiate simultaneously.

(3) *Deactivation control.* If the equipment incorporates a deactivation control other than a circuit breaker, the control must be a switch with a protective cover. The cover must be safety wired so that the wire must be broken in order to gain access to the switch.

(4) *Mode 4 flap warning inhibition.* A separate guarded control may be provided to inhibit Mode 4 warnings based on flaps being in other than the landing configuration.

• • • • • •

(g) *Availability of referenced documents.* RTCA Document Nos. DO–138, dated June 27, 1968, including Change Number 2, dated October 29, 1969, DO–160, dated February 28, 1975, and DO–161A, revised May 27, 1976, are incorporated herein in accordance with 5 U.S.C. 552(a)(1) and § 37.23 and are available as indicated in § 37.23. Additionally, RTCA Document Nos. DO–138, DO–160, and DO–161A may be examined at any FAA Regional Office of the Chief, Engineering and Manufacturing Branch (or, in the case of the Western Region, the Chief, Aircraft Engineering Division), and may be obtained from the RTCA Secretariat, Suite 655, 1717 H Street, N.W., Washington, D.C. 20006 at a cost of $16.00 per copy for Document No. DO–138, $20.00 per copy for Document No. DO–160, and $16.00 per copy for Document No. DO–161A.

(h) *TSO–C92a equipment.* TSO-authorizations for the manufacture of ground proximity warning-glide slope deviation alerting equipment may continue to be obtained under TSO–C92a and equipment approved under TSO–C92a may continue to be manufactured under its original approval.

2. By deleting the word "and" from the end of § 121.360(c)(1)(iii); by inserting a comma and the words "or TSO–C92b" between the words "in TSO–C92a" and "or" in § 121.360(f); and by adding new §§ 121.360(c)(1)(iv) and 121.360(i) to read as follows:

§ 121.360 Ground proximity warning-glide slope deviation alerting system.

• • • • • •

(c) • • •

(1) • • •

(iv) Inhibition of Mode 4 warnings based on flaps being in other than the landing configuration if the system incorporates a Mode 4 flap warning inhibition control; and

• • • • • •

(i) No person may operate a turbojet powered airplane equipped with a system required by paragraph (f) of this section, that incorporates equipment that meets the performance and environmental standards of TSO–C92b or is approved under that TSO, using other than Warning Envelopes 1 or 3 for Warning Modes 1 and 4.

Issued in Washington, D.C., on August 13, 1976.

The incorporation by reference in this document was approved by the Director of the Federal Register on April 16, 1969.

JOHN L. MCLUCAS,
Administrator.

Office of the Secretary

[7 CFR Part 16]

LIMITATION ON IMPORTS OF MEAT

Regulations With Respect to Meat Processed in Foreign-Trade Zones

Correction

In FR Doc. 76-24261 appearing in the FEDERAL REGISTER of August 17, 1976 on page 34778, the date in the second full paragraph and in the last sentence of § 16.20 should be corrected to read: August 17, 1976.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[46 CFR Part 180]

[CGD 75-042]

SMALL PASSENGER VESSELS

First Aid Kit

The Coast Guard is considering amending the regulations for small passenger vessels to require that a first aid kit be carried on board these vessels for use in an emergency. This proposal would require carriage of either a first aid kit that is approved by the Coast Guard under 46 CFR 160.041 of the Coast Guard lifesaving equipment specifications or a first aid kit that contains at a minimum the first aid items listed in 46 CFR 160.041.

The Coast Guard has determined that carriage of first aid equipment on board small passenger vessels is necessary to provide for the safety of crew and passengers. Minor accidents continually occur on these vessels in which first aid treatment if provided could prevent the injuries from becoming more serious in nature. The master or operator of each small passenger vessel has been previously tested in his knowledge of first aid as a condition to obtaining his license; and, therefore, he should have the necessary knowledge to provide first aid using the proposed first aid kit.

Certain small passenger vessels are required by section 666 of Title 46, U.S. Code, to carry a medicine chest on board. These vessels will be in compliance with the regulations contained in this proposal if the medicine chest contains the first aid items prescribed in the Coast Guard lifesaving equipment specifications.

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments to the Coast Guard (G-CMC/81), 400 Seventh Street, SW., Washington, D.C. 20590. Each person submitting a comment should include his name and address, identify the notice (CGD 75-042), and give reasons in support of his comment. Comments received before October 5, 1976 will be considered before final action is taken on the proposal. Copies of all written comments received will be available in room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. The proposal may be changed in light of comments received.

In consideration of the foregoing, it is proposed to amend Part 180 of Title 46, Code of Federal Regulations, as follows:

1. By adding to the list in § 180.05-1 (b) the following:

§ 180.05-1 Equipment of an approved type.

* * * * * * *

(b) * * *

(11) First Aid Kits ---------- 160.041.

2. By adding a new Subpart 180.45 to read as follows:

Subpart 180.45—First Aid Kits

§ 180.45-1 Carriage.

Each vessel must have at least one first aid kit that is approved under Subpart 160.041 of this chapter or a first aid kit that contains at least the same items listed in § 160.041-4 of this chapter.

§ 180.45-5 Stowage.

(a) The first aid kit required by this subpart must be stowed in a place that is readily accessible to persons on board the vessel.

(b) If a first aid kit is stowed inside an enclosure, the enclosure must be marked "FIRST AID KIT" in letters at least one inch high.

(46 U.S.C. 375, 390(b), 416, 481; 49 U.S.C. 1655(b); 49 CFR 1.46.)

Dated: August 4, 1976.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 76-WA-7]

ALTERATION OF AIRWAYS AND REPORTING POINTS

Notice of Proposed Rule Making

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would redesignate HAZZY and ZANDA reporting points and airways associated with the relocation of the Petersburg, Alaska, NDB.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Alaskan Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501. All communications received on or before September 20, 1976 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, S.W., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

Request for copies of this Notice of Proposed Rule Making should be addressed to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-230, 800 Independence Avenue, SW., Washington, D.C. 20591.

The proposed amendment to § 71.211 would redescribe the present position of the HAZZY and ZANDA reporting points as follows:

a. HAZZY: Lat. 56°19'14.3" N., Long. 134°17'19.2" W. (INT Sitka, Alaska, NDB 127°, Petersburg, Alaska, NDB 238° bearings).

b. ZANDA: Lat. 56°09'09.6" N., Long. 134°44'51.9" W. (INT Sitka, Alaska, NDB 148°, Petersburg, Alaska, NDB 238° bearings).

The Petersburg NDB is scheduled to be relocated to Lat. 56°48'04" N., Long. 132°55'37" W., on November 4, 1976. This action will move Amber 15 and Blue 37 airways westward approximately 9 NM. No amendment to § 71.105 and § 71.109 will be required since these airways will continue to be described as direct between NDBs. The HAZZY and ZANDA reporting points require redescription to remain near their present position.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on August 10, 1976.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.76-23927 Filed 8-18-76;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 76-SW-36]

ALTERATION OF VOR AIRWAY

Notice of Proposed Rule Making

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the airway width of V-13W in the vicinity of Harlingen, Tex.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76010. All communications received on or before September 20, 1976 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, S.W., Washington, D.C. 20591. An informal docket will be available for examination at the office of the Regional Air Traffic Division Chief.

Request for copies of this Notice of Proposed Rule Making should be addressed to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-230, 800 Independence Avenue SW., Washington, D.C. 20591.

The proposed amendment would reduce the airway width of the east side of V-13W to three miles, beginning at Harlingen, Tex., to a point 23 miles north on V-13W.

The current four mile airway width precludes simultaneous operations on the airway and the Harlingen ILS. Reduction of the airway width as proposed, would permit simultaneous operations and also enhance airspace utilization in this area.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on August 11, 1976.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

NELLIS AFB SPECIAL AIR TRAFFIC RULE

Reopening of Comment Period

On March 4, 1976, a Notice of Proposed Rule Making (NPRM) was published in the FEDERAL REGISTER (41 FR 9372) stating the Federal Aviation Administration (FAA) was considering an amendment to Part 93 of the Federal Aviation Regulations that would establish special air traffic rules for proposed operating areas adjacent to Nellis Air Force Base (AFB) and Energy Research and Development Administration (ERDA) restricted areas located generally north of Las Vegas, Nevada. In accordance with the terms of the notice, the time for public comment expired on June 4, 1976.

Because of a correction to the proposal published in the FEDERAL REGISTER May 10, 1976, (41 FR 19127), and the interest apparent in the public comments received, it is felt that the public was not given adequate time to comment on the corrected proposal prior to the comment period closing date. For this reason, the comment period is hereby reopened until October 1, 1976. All comments received on or before that date will be considered before final action is taken on the proposal.

AUTHORITY: Sections 307 and 313(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348 and 1354(a)) and Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on August 6, 1976.

RAYMOND G. BELANGER,
Director, Air Traffic Service.

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 9]

PRIVACY ACT REGULATIONS

Notice of Proposed Exemptions

Notice is hereby given that the Nuclear Regulatory Commission is proposing exemptions as provided under the Privacy Act of 1974 (5 U.S.C. 552a(k)). These proposed exemptions are in addition to the exemptions presently set forth in 10 CFR 9.95.

The proposed amendment of § 9.95 of 10 CFR Part 9 would exempt from certain requirements of the Privacy Act portions of the NRC systems of records NRC-1, "Appointment and Promotion Certificate Records—NRC." The proposed exemptions are intended to protect investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under a promise of confidentiality, as provided by 5 U.S.C. 552a(k)(5).

An appropriate exemption, pursuant to 5 U.S.C. 552a(k)(5), of the NRC System of Records NRC-1 to conform with this amendment of 10 CFR 9.95 will be published when final action is taken on the proposed amendment of 10 CFR 9.5 set forth below.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552, 552a and 553 of Title 5 of the United States Code, as amended, notice is hereby given that adoption of the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 9 is contemplated. All interested persons who desire to submit written comments or suggestions for consideration in connection with the proposed amendments should send them to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by September 20, 1976. Copies of comments received will be available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C.

1. Section 9.95 of 10 CFR Part 9 is amended by adding a new paragraph (m) to read as follows:

§ 9.95 Specific exemptions.

Pursuant to 5 U.S.C. 552a(k), portions of the following NRC systems of records are exempted from 5 U.S.C. 552a(c)(3); (d); (e)(1); (e)(4)(G), (H) and (I) and (f) and are subject to the provisions of § 9.61 of this part:

* * * * * *

(m) Appointment and Promotion Certificate Records

AUTHORITY: Sec. 161, Pub. L, 83-703, 68 Stat. 948 (42 U.S.C. 2201); Sec. 201, Pub. L. 93-438, 88 Stat. 1242 (42 U.S.C. 5841); 5 U.S.C. 552a.

Dated at Bethesda, Maryland this 14th day of July 1976.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

[FR Doc.76-24186 Filed 8-18-76;8:45 am]

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

[Release No. 34-12693; File No. S7-650]

SECO BONDING RULE

Minimum Fidelity Bonding Requirements

The Securities and Exchange Commission today announced proposals to amend § 240.15b10-11 (the "SECO Bonding Rule"), which contains minimum fidelity bonding requirements for registered brokers and dealers which are not members of the National Association of Securities Dealers, Inc. ("NASD"). The proposed amendments would exempt, among others, certain exchange members which would otherwise become subject to the Rule upon registering with the Commission pursuant to section 15 of the Act, as recently amended. In addition, the proposed amendments would specifically require a broker or dealer subject to the SECO Bonding Rule to review and adjust its bonding coverage initially upon issuance of a replacement bond and thereafter annually as of the anniversary date of the bond's issuance. Moreover, the proposed amendments

V 41 162 AUG 19 76 UMI

would require qualified "SECO" broker-dealers electing to use the Alternative Net Capital Requirement set forth in paragraph (f) of § 240.15c3–1, as recently amended, as the basis for determining the amount of minimum bonding coverage required by the Rule.

THE PROPOSED AMENDMENTS

1. *Proposed exemption for exchange-only members.* The Commission recently adopted amendments to certain of its SECO requirements (§ 240.15b8–1 through 240.15b10–7) to exempt from these requirements members of exchanges, such as specialists, floor traders, floor brokers, etc., ("exchange-only members"), which effect transactions primarily on registered securities exchanges.[1] As a result of the Securities Acts Amendments of 1975, such broker-dealers are now required to register with the Commission, and, if they did not become NASD members, they would thereby have become subject to the SECO requirements.[2] Specifically, the Commission has revised; among others, § 240.15b8–1, which relates to qualification standards, §§ 240.-15b9–1 and 240.-15b9–2, which relate to fees, and § 240.-15b10–7 (which provides an exemption from §§ 240.15b10–1 through 240.15b10–6).[3] Similar revisions were not made in the SECO Bonding Rule because of special circumstances applicable to that rule.[4]

Sections 240.15b8–1, 240.15b9–2, and 240.15b10–7 previously contained provisions which exempt broker-dealers who carry no accounts of customers and derive no more than $1,000 annual gross income from transactions otherwise than on a national securities exchange. The Commission has amended these provisions by substituting the phrase "otherwise than on a national securities exchange of which he is a member" for the phrase "otherwise than on a national securities exchange." Therefore, this amendment, which has been made to conform the scope of the SECO requirements to the Commission's broadened authority under new §§ 15(b)(8), 15(b)(9) and 15(b)(10) of the Act, subjects broker-dealers who effect transactions on exchanges other than those of which they are members to the SECO requirements. However, the Commission also has amended the existing SECO exemptions to exclude, from the limitation on gross income derived by a broker-dealer from transactions otherwise than on the exchange of which he is a member, income derived from transactions for the broker-dealer's own account which are effected with or through another registered broker-dealer. A similar exemption has been added to § 240.15b9–1.

The SECO Bonding Rule presently exempts, among others, those broker-dealers which are "members in good standing *and subject to*" (emphasis added) the fidelity bonding requirements of the seven national securities exchanges listed in paragraph (a) thereof (the "paragraph (a) exchanges").[5] Thus, a SECO broker-dealer who is a "member in good standing" of any one of these exchanges and who is "subject to" the bonding requirements of that exchange (i.e., not exempt from those requirements) would qualify for an exemption from the SECO Bonding Rule. The theory underlying the exemption is that these SECO broker-dealers are already subject to exchange fidelity bonding requirements which are at least comparable to the requirements of the SECO Bonding Rule. However, because exchange-only members of the paragraph (a) exchanges which are now required to register with the Commission for the first time are generally exempt from the fidelity bonding rules of those exchanges,[6] they will, arguably, be subject to the SECO Bonding Rule—a result not strictly intended when the Commission adopted the SECO Bonding Rule in its present form (prior to the 1975 Amendments).

In addition, the major purpose underlying the adoption of the SECO Bonding Rule as well as the NASD's Bonding Rule[7] was to limit potential exposure of SIPC funds[8] to firm losses resulting from employee theft and dishonesty, particularly losses of "catastrophic" proportions. Similarly, while the bonding rules of the paragraph (a) exchanges for the most part were adopted prior to the enactment of the Securities Investor Protection Act of 1970, it may be said that these rules were adopted with the same concerns in mind, i.e., to prevent impairment of firm capital through substantial losses of this kind and to protect firm creditors, including customers, against such losses. Thus, since the kind of exposure intended to be covered by fidelity bonds for brokers and dealers generally arises only where a firm has contact with members of the public (i.e., handles customer funds and/or securities) a broker-dealer which deals only with other professionals on the floor of the exchange of which he is a member and does not otherwise engage in a public business is exempt from the existing exchange fidelity bonding requirements.[9] Accordingly, the Commission proposes specifically to exempt those exchange members from the SECO Bonding Rule. The Commission proposes to accomplish this by substituting the phrase "members in good standing of * * *" for the phrase "members in good standing and subject to * * *" in paragraph (a) of the SECO Bonding Rule.[10]

The Commission notes that, unlike the recent revisions to the other SECO requirements, its proposed amendment to the SECO Bonding Rule would exempt from its provisions exchange-only members which also engage in transactions on exchanges of which they are not members as well as over-the-counter. Those members would thus be subject only to the applicable exchange bonding requirements. Since the imposition of the SECO Bonding Rule on exchange-only members engaging in such activities could result in unnecessary duplication in the area of fidelity bonding, the Commission has detemined to defer to exchange bonding requirements in this respect and the proposed amendments to paragraph (a) would have this effect. While permitting these exchanges to apply their bonding requirements in this way may have an indirect impact on some of their members' activities in other markets, the Commission believes that any such impact would be insubstantial and would not have an anti-competitive effect.

2. *Proposal to Require Review of Coverage Upon Issuance of a Replacement Bond.* The Commission has assumed that when a SECO broker-dealer acquires a replacement bond the SECO Bonding Rule requires that the firm review and adjust, if necessary, its minimum bonding coverage once upon the new bond's issuance and thereafter annually, as of the anniversary date of the new bond's issuance. The Commission is of the opinion that this is the proper interpretation of present paragraph (c)(5) in this situation. However, the Commission believes that the SECO Bonding Rule should be amended to clarify its provisions in this respect.

A registered broker-dealer subject to the SECO Bonding Rule may acquire a replacement bond, for the most part, in two situations: (1) where the insurance carrier cancels the previous bond, or (2) where the firm decides to terminate its existing bond in order to obtain a replacement bond through another insurance carrier at less cost. In either case, the previous bond is normally cancelled or terminated as of the renewal date, which usually occurs at one-year intervals from the date of issuance of a bond. Thus, the date of issuance of a replacement bond is likely to coincide with the annual anniversary date of the previous bond's issuance. However, in the event that such action does occur prior to the next annual review date, a question has arisen as to the applicability of the term "anniversary date of the issuance of the bond" in present paragraph (c)(5) to the replacement bond situation; that is will the next review date be determined by reference to the date of the original (or previous) bond's issuance or to the date of the replacement bond's issuance? It is possible that a SECO broker-dealer may acquire a replacement bond that is equivalent to his minimum required coverage as determined as of the former date and feel justified in deferring his next review until the first annual anniversary date of the replacement bond's issuance. This could result in delaying its review of adequacy of coverage for longer than the one year period presently required by paragraph (c)(5) of the SECO Bonding Rule. This interpretation is inconsistent with the purpose of the Rule.

Accordingly, the Commission proposes to amend the Rule so as to provide expressly that SECO broker-dealers subject to its provisions which obtain a replacement bond for any reason must redetermine their bonding coverage once upon issuance of the replacement bond and thereafter at least once annually, as of the anniversary date of the replacement bond's issuance. Proposed new paragraph (c)(7) would set forth this requirement.[11]

3. *Proposal to Require Use of the Alternative Net Capital Requirement as the Basis for Determining Minimum Bonding Coverage.* The Commission recently adopted amendments to Section 240.15c3–1, the Uniform Net Capital Rule, including an alternative net capital requirement ("Alternative Requirement") for certain broker-dealers which is set forth in new paragraph (f) of Section 240.15c3–1.[12] This Alternative Requirement (if elected) eliminates the traditional standard of limiting obligations of broker-dealers (i.e., the ratio of aggregate indebtedness to net capital) and substitutes the aggregate dollar amount of firm assets which have as their source transactions with customers (i.e., items includible in the Formula for Determination of Reserve Requirements for Brokers and Dealers set forth in § 240.15c3–3) as the basis for determining the maximum permissible level of the broker-dealer's customer-related business. The general purpose of the Alternative Requirement is to ensure the continued protection of customers as well as to enhance the ability of broker-dealers to meet the needs of corporate issuers to raise capital in the evolving central market.

The present minimum bonding coverage prescribed by the SECO Bonding Rule is based on a broker-dealer's minimum required net capital as computed pursuant to Section 240.15c3–1.[13] Thus, if a SECO broker-dealer's minimum required net capital is adjusted, as through utilization of the Alternative Method, then his minimum required bonding coverage should be adjusted accordingly. The Commission's Uniform Net Capital Rule and the SECO Bonding Rule are financial responsibility rules whose primary concern is protecting customer funds and securities in the custody of broker-dealers. In view of this similarity of purpose, therefore, the Commission believes that the policy underlying the implementation of the Alternative Requirement warrants a corresponding flexibility in fidelity bonding requirements for those SECO broker-dealers operating under it.

Accordingly, the Commission also proposes to amend the SECO Bonding Rule so as expressly to provide that, subject to the conditions discussed below, a broker-dealer which is subject to the Rule and operates under the Alternative Requirement must use this computation in determining its minimum bonding requirements pursuant to the Rule. The Commission proposes to accomplish this by including proposed new paragraph (c)(6) in the SECO Bonding Rule.[14]

The Commission notes that under the proposed paragraph it has specified that broker-dealers availing themselves of the Alternative Requirement would still be required to determine their minimum required bonding coverage in the manner provided in present paragraph (c)(5), i.e., by reference to the highest required net capital, but only for those months during which they have operated under the Alternative Requirement. However, the new paragraph would provide that an affected broker-dealer which has operated in the past under the traditional method of computing net capital and effects a transition to the Alternative Requirement must calculate its minimum net capital under the Alternative Requirement for at least three consecutive months before it can redetermine its minimum bonding coverage based on these computations.[15] The Commission believes that any shorter period would not afford a proper basis for determining a broker-dealer's minimum bonding needs consistent with the intent and purpose of the SECO Bonding Rule.

Proposed paragraph (c)(6) would require a broker or dealer to redetermine and adjust its bonding requirements once it has operated under the Alternative Requirement for at least three months even though such adjustment may take place in advance of the issuance its bond.[16] However, on the next

---

[1] See Securities Exchange Act Release No. 12160 (March 3, 1976).

[2] Ibid. at pp. 2–3.

[3] Ibid. at p. 3, et seq.

[4] However, in its release announcing adoption of the revisions to the exemptive provisions to the other SECO requirements, the Commission stated that it was considering further revision of the SECO Bonding Rule and might amend the exemptive provisions of that rule sometime in the future. See note 4, Securities Exchange Act Release No. 12160 (March 3, 1976).

[5] The seven exchanges are: the New York Stock Exchange, Inc. ("NYSE"), the American Stock Exchange, Inc. ("ASE"), the Midwest Stock Exchange, Inc., the Boston Stock Exchange, the Philadelphia Stock Exchange, Inc. (formerly the PBW Stock Exchange, Inc. ("PBW")), the Pacific Stock Exchange, Inc. ("PSE"), and the Chicago Board Options Exchange, Inc. ("CBOE"). The Commission has made a technical adjustment to paragraph (a) of the SECO Bonding Rule so as to reflect the new title of the successor organization to the PBW. See text of the proposed amendments to paragraph (a) of the SECO Bonding Rule, infra.

[6] One exception is the PSE. The PSE's fidelity bonding requirements apply to every member and member organization. See Rule IX, Sections 7 and 8 of the PSE Rules (CCH PSE Manual, Paragraph 4775 and Paragraph 4780).

[7] The NASD's fidelity bonding requirements for its members are set forth in Article III, Section 32 (and Appendix "C" thereto) of the NASD Rules of Fair Practice (CCH NASD Manual, Paragraph 2182).

[8] The Securities Investor Protection Act of 1970, which is designed to provide certain financial protections for the accounts of customers of broker-dealers, created the Securities Investor Protection Corporation ("SIPC"), a non-profit membership corporation, to administer the protective provisions of the Act. The Act authorizes SIPC to maintain a fund to protect customers against losses of their funds and securities (up to certain statutory amounts) in the event of financial failure of a member firm.

[9] It should be noted that many of these exchange-only members would be exempt from the bonding requirements of the paragraph (a) exchanges on another basis as well. For example, since many of them are sole proprietorships or one-man business entities they would not be able to acquire a fidelity bond in any exent because of insurance industry practice; and therefore the paragraph (a) exchanges have exempted members in this category by administrative interpretation. For the same reason, both the SECO Bonding Rule and the NASD Bonding Rule exempt one-man business entities having no employees. (See paragraph (a) of the SECO Bonding Rule and paragraph (a) of the NASD's Bonding Rule).

[10] See the text of the proposed amendments to paragraph (a) of the SECO Bonding Rule, infra.

[11] See the text of proposed paragraph (c)(7), infra. In addition, the Commission understands that within the insurance industry the term "anniversary date" relates only to the date of issuance of a bond or any other insurance contract. Thus, in order to be consistent with insurance practice in this regard, the annual review dates should be tolled from either the date of issuance of the original (or previous) bond or from the date of issuance of a replacement bond. Proposed paragraph (c)(7) would make this clear.

Furthermore, the Commission does not believe that this requirement will impose an undue or unnecessary burden on affected SECO broker-dealers. As noted above, a broker-dealer is likely to have its coverage cancelled, or to terminate its coverage and acquire a replacement bond, as of the previous bond renewal date which normally coincides with the annual anniversary review date specified in paragraph (c)(5) of the SECO Bonding Rule. Moreover, even if the cancellation or tremination occurs prior to the next review date an affected broker or dealer will have a burden of reviewing its coverage "prematurely" on that one occasion but thereafter it will be required to conduct its review only once annually, consistent with the review periods presently specified in the Rule for all SECO broker-dealers subject to the bonding requirement.

[12] See Securities Exchange Act Release No. 11497, dated June 26, 1975. These amendments became effective September 1, 1975. The Alternative Reqirement is applicable only to broker-dealers which have not elected to operate pursuant to an exemption from Section 240.15c3–3 through either paragraphs (k)(1) or (k)(2)(i). Broker-dealers which meet the criteria specified in paragraph (k)(2)(ii) of Section 240.15c3–3 and introduce all customer transactions on a fully disclosed basis are also eligible to operate under the Alternative Requirement, if they maintain minimum net capital of at least $100,000.

[13] See paragraph (c) of the SECO Bonding Rule, infra.

[14] See the text of proposed paragraph (c)(6), infra.

[15] As noted above, the SECO Bonding Rule presently allows review and adjustment, if necessary, of a broker-dealer's existing bonding coverage only once annually, as of the anniversary date of the bond's issuance.

This new requirement, however, is not intended to apply to a new registrant which utilizes the Alternative Method since it is required to have a bond that complies with the Rule once it commences business. The Commission also proposes technical revisions to paragraphs (c)(1) and (c)(5) of the SECO Bonding Rule to clarify this matter. See the text of the proposed amendments to paragraphs (c)(1) and (c)(5), infra.

[16] This minimum three month period, of course, would commence with that first month when a broker-dealer begins to calculate its capital requirements in accordance with the Alternative Requirement.

V 41 162 AUG 19 76 UMI

annual anniversary date the broker-dealer must review and further adjust, if necessary, his bonding coverage again based on the net capital computations made during those months when it was operating under the Alternative Requirement. Thereafter, of course, the firm would be permitted to review and adjust its coverage only once annually as provided in present paragraph (c)(5) of the SECO Bonding Rule. Proposed new paragraph (c)(6) would incorporate all these considerations.

STATUTORY BASIS

The Securities and Exchange Commission, acting pursuant to the provisions of the Securities Exchange Act of 1934, 15 U.S.C. 78a, et seq. (as amended by the Securities Acts Amendments of 1975, Pub. L. No. 94-29 (June 4, 1975)), and particularly Sections 15(c) and 23(a) thereof, hereby proposes certain amendments to Section 240.15b10-11, as stated below.

ATTENTION

The texts of the following proposed amendments are using ►◄ arrows to indicate additions and [ ] brackets to indicate deletions.

TEXT OF THE RULE AS PROPOSED TO BE AMENDED

Section 240.15b10-11 would be revised to read as follows:

§ 240.15b10-11 Fidelity bonds.

(a) Every non-member broker or dealer which is a member of the Securities Investor Protection Corporation and has employees shall carry a blanket fidelity bond covering officers and employees of such broker or dealer in the form, amount and type of coverage hereinafter prescribed. The provisions of this rule shall not apply to any member in good standing [and subject to the fidelity bonding requirements] of the American Stock Exchange, Inc., the Boston Stock Exchange, the Midwest Stock Exchange, Inc., the New York Stock Exchange, Inc., the Pacific Stock Exchange, Inc., the [PBW] ►Philadelphia◄ Stock Exchange, Inc., or the Chicago Board Options Exchange, Inc.: *Provided, however*, That the exemption as to the members of any exchange may be suspended or withdrawn by the Commission at any time, by sending ten (10) days written notice to such exchange, if it appears to the Commission to be necessary or appropriate in the public interest or for the protection of investors so to do.

(b) Every non-member broker or dealer subject to the rule must carry either the Stockbroker's Blanket Bond, Standard Form No. 14 of the Surety Association of America with such riders as may be required by this rule, as revised to the effective date of this rule, or an equivalent bond, covering the officers and employees of such broker or dealer, which provides against loss and has insuring agreements covering at least the following:

(1) Fidelity;
(2) On Premises;
(3) In Transit;
(4) Misplacement;
(5) Forgery and Alteration (including check forgery);
(6) Securities Loss (including securities forgery); and
(7) Fraudulent Trading (by employees).

(c)(1) Minimum monetary coverage for each of the Fidelity, On Premises, In Transit, Misplacement, and Forgery and Alteration insuring agreements shall be the greater of $25,000 or such other amount as shall be determined by reference to minimum required net capital ►for such broker or dealer◄ computed under Rule 15c3-1 under the Act as follows:

(i) Each non-member broker or dealer whose required net capital does not exceed $600,000 must maintain minimum coverage of not less than 120% of such requirement.

(ii) Each non-member broker or dealer whose required net capital exceeds $600,000 must maintain minimum coverage as indicated in the following table:

Net capital requirements under rule 15c3-1:	*Minimum coverage*
Over $600,000, up to $1,000,000	$7,000,000
Over $1,000,000, up to $2,000,000	1,000,000
Over $2,000,000, up to $3,000,000	1,500,000
Over $3,000,000, up to $4,000,000	2,000,000
Over $4,000,000, up to $6,000,000	3,000,000
Over $6,000,000, up to $12,000,000	4,000,000
Over $12,000,000	5,000,000

(2) Minimum monetary coverage for the Fraudulent Trading insuring agreement shall not be less than $25,000 or 50% of the coverage required in paragraph (c)(1) of this section, whichever is greater.

(3) Minimum monetary coverage for the Securities Forgery insuring agreement shall not be less than $25,000 or 25% of the coverage required in paragraph (c)(1) of this section, whichever is greater.

(4) Every non-member broker or dealer subject to this rule may have a deductible provision included in his bond of up to $5,000 or 10% of the minimum insurance requirement established hereby, whichever is geater, for any individual loss.

(5) ►Except as provided in (c) paragraph (6) of this section◄, the minimum required coverages prescribed hereinabove shall be determined ►by such non-member broker-dealer◄ initially on issuance of the bond by reference to [the] ►its◄ highest required net capital computed [under] ►pursuant to◄ Rule 15c3-1 under the Act for the 12-month period immediately preceding such issuance or, if the non-member broker or dealer was subject to Rule 15c3-1 for less than 12 months, for such lesser period immediately preceding such issuance as such broker or dealer was subject to that rule. Thereafter, such coverage shall be redetermined annually, as of the anniversary date of the issuance of the bond, by reference to the highest required net capital for the immediately preceding 12-month period, which amount shall be used to determine the minimum required coverage for the succeeding 12-month period. Any necessary adjustments shall be made within 30 days after the anniversary of the bond.

►(6) A non-member broker or dealer which becomes eligible to elect and does elect to compute its minimum required net capital under the alternative net capital requirement set forth in paragraph (f) of Rule 15c3-1 instead of under the requirement set forth in paragraph (a) thereof, and has operated under such alternative requirement for at least three consecutive months, shall, prior to the next anniversary date of the issuance of its bond, redetermine and adjust (if necessary) the amount of its coverage based on such alternative requirement for the period during which it has so operated; *provided, however*, That such non-member broker or dealer shall redetermine and further adjust (if necessary) the amount of its coverage in this manner on the next anniversary date of the issuance of its bond and thereafter annually, in accordance with the provisions of paragraph (c)(5) of this section. Any necessary adjustments shall be made within 30 days after such redetermination.◄

►(7) A non-member broker or dealer subject to this rule which acquires a replacement bond shall redetermine and adjust (if necessary) its minimum required bond coverage upon issuance of such bond by reference to the highest required net capital for those months since such broker or dealer last determined its required coverage in accordance with paragraphs (c)(5) and (c)(6) of this section, which amount shall be used to determine the minimum required coverage for the succeeding twelve month period. Thereafter, such coverage shall be redetermined annually, as of the anniversary date of the issuance of the replacement bond. Any necessary adjustments shall be made within 30 days of such redetermination.◄

[6] ►(8)◄ The bond shall provide that it shall not be cancelled, terminated, or substantially modified except after written notice given by the acting party to the affected party and to the Commission not less than sixty days prior to the effective date of such cancellation, termination or modification; ►*provided,*◄ *however*, That in the event the non-member broker or dealer elects to cancel, terminate or modify the provisions of the bond upon notice of less than sixty days such non-member broker or dealer may do so on the condition that such non-member broker or dealer shall so notify the Commission not less than ten days prior to the effective date of such notice by providing the Commission with either a copy of the replacement insurance contract or a copy of the binder for such contract. Any bond issued pursuant to this rule shall include a cancellation rider providing that the insurance carrier will use its best efforts to comply with the applicable reporting requirements of this paragraph.

(d) Definitions—For the purpose of this rule:

(1) The term "non-member broker or dealer" shall mean any broker or dealer registered under Section 15 of the Act which is not a member of a national securities association registered with the Commission under Section 15A of the Act.

(2) The term "substantial modification" or "substantially modified" shall mean any change in the type or amount of fidelity bonding coverage, or in the exclusions to which the bond is subject or any other change in the bond such that it no longer complies with the requirements of this rule.

Interested persons are invited to submit in writing their views and comments on the proposed amendments to the SECO Bonding Rule before September 3, 1976. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All submissions should refer to File No. S7-650, and will be available for public inspection in the Commission's Public Reference Room, 1100 "L" Street, NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

Agency for International Development

ADVISORY COMMITTEE ON VOLUNTARY FOREIGN AID

Meeting

Pursuant to Executive Order 11769 and the provisions of section 10(a)(2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the meeting of the Advisory Committee on Voluntary Foreign Aid which will be held on September 14, 1976, from 9:30 a.m. to 12:30 p.m., in Room 1107, New State Building, 21st and Virginia Avenue, N.W.

The purpose of the meeting is to consider and finalize recommendations regarding foreign disaster response cooperation and coordination and to consider such other matters related to the foreign assistance advisory concerns of the Committee as may be appropriate.

The meeting will be open to the public. Any interested person may attend, appear before, or file statements with the Committee in accordance with procedures established by the Committee and to the extent time available for the meeting permits. Written statements may be filed before or after the meeting.

Dr. Fred O. Pinkham will be the A.I.D. representative at the meeting. Information concerning the meeting may be obtained from Mr. Robert S. McClusky, Telephone: AC 202-632-1892. Persons desiring to attend the meeting should enter the New State Building through the Diplomatic Entrance, 22nd and C Streets.

Dated: August 13, 1976.

FRED O. PINKHAM,
Assistant Administrator for Population and Humanitarian Assistance.

Comptroller of the Currency

FIRST NATIONAL BANK OF JEFFERSON PARISH, GRETNA, LOUISIANA

Suspension of Trading

It appearing that the summary suspension of trading in the common stock of the First National Bank of Jefferson Parish, Gretna, Louisiana, on the over-the-counter market is required in the public interest and for the protection of investors;

Therefore, pursuant to sections 12(1) and 12(k) of the Securities Exchange Act of 1934, trading in the common stock of the First National Bank of Jefferson Parish, Gretna, Louisiana, on the over-the-counter market is hereby suspended for the three-day period commencing at midnight (EDT) on August 15, 1976, and terminating at midnight (EDT) on August 18, 1976.

Dated: August 13, 1976.

ROBERT BLOOM,
Acting Comptroller of the Currency.

Office of the Secretary

[Public Debt Series—No. 21-76]

TREASURY NOTES OF SERIES Q-1978

Department Circular

AUGUST 13, 1976.

Dated and bearing interest from August 31, 1976. Due August 31, 1978.

I. INVITATION FOR TENDERS

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites tenders on a yield basis for $2,500,000,000, or thereabouts, of notes of the United States, designated Treasury Notes of Series Q-1978 (CUSIP No. 912827 FX 5). The interest rate for the notes will be determined as set forth in Section III, paragraph 3, hereof. Additional amounts of these notes may be issued at the average price of accepted tenders to Government accounts and to Federal Reserve Banks for themselves in exchange for maturing Treasury securities held by them and as agents of foreign and international monetary authorities for new cash only. Tenders will be received up to 1:30 p.m., Eastern Daylight Saving time, Thursday, August 19, 1976, under competitive and noncompetitive bidding, as set forth in Section III hereof. The 5¾ percent Treasury Notes of Series L-1976, maturing August 31, 1976, will be accepted at par in payment, in whole or in part, to the extent tenders are allotted by the Treasury.

II. DESCRIPTION OF NOTES

The notes will be dated August 31, 1976, and will bear interest from that date, payable semiannually on February 28, 1977, August 31, 1977, February 28, 1978, and August 31, 1978. They will mature August 31, 1978, and will not be subject to call for redemption prior to maturity.

2. The income derived from the notes is subject to all taxes imposed under the Internal Revenue Code of 1954. The notes are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer notes with interest coupons attached, and notes registered as to principal and interest, will be issued in denominations of $5,000, $10,000, $100,000 and $1,000,000 Book-entry not will be available to eligible bidders in multiples of those amounts. Interchanges of notes of different denominations and of coupon and registered notes, and the transfer of registered notes will be permitted.

5. The notes will be subject to the general regulations of the Department of the Treasury, now or hereafter prescribed, governing United States notes.

III. TENDERS AND ALLOTMENTS

1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to the closing hour, 1:30 p.m., Eastern Daylight Saving time, Thursday, August 19, 1976. Each tender must state the face amount of notes bid for, which must be $5,000 or a multiple thereof, and the yield desired, except that in the case of noncompetitive tenders the term "noncompetitive" should be used in lieu of a yield. In the case of competitive tenders, the yield must be expressed in terms of an annual yield, with two decimals, e.g., 7.11. Fractions may not be used. Noncompetitive tenders from any one bidder may not exceed $500,000.

2. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Government securities and borrowings thereon, may submit tenders for account of customers provided the names of the customers are set forth in such tenders. Others will not be permitted to submit tenders except for their own account. Tenders will be received without deposit from banking institutions for their own account, Federally-insured savings and loan associations, States, political subdivision or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Government securities and borrowings thereon, and Government accounts. Tenders from others must be accompanied by payment (in cash or 5⅞% Treasury Notes of Series L-1976, which will be accepted at par) of 5 percent of the face amount of notes applied for.

3. Immediately after the closing hour tenders will be opened, following which public announcement will be made by the Department of the Treasury of the amount and yield range of accepted bids. Those submitting competitive tenders will be advised of the acceptance or rejection thereof. In considering the acceptance of tenders, those with the lowest yields will be accepted to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be determined at a ⅛ of one percent increment that translates into an average accepted price close to 100.000 and a lowest accepted price above 99.500. That rate of interest will be paid on all of the notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each succesful competitive bidder will be required to pay the price corresponding to the yield bid. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders, in whole or in part, including the right to accept tenders for more or less than the $2,500,000,000 of notes offered, and his action in any such respect shall be final. Subject to these reservations, noncompetitive tenders for $500,000 or less without stated yield from any one bidder will be accepted in full at the average price [1] (in three decimals) of accepted competitive tenders.

IV. PAYMENT

1. Settlement for accepted tenders in accordance with the bids must be made or completed on or before Tuesday, August 31, 1976, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt. Payment must be in cash, 5⅞% Treasury Notes of Series L-1976 (interest coupons dated August 31, 1976, should be detached), in other funds immediately available to the Treasury by August 31, 1976, or by check drawn to the order of the Federal Reserve Bank to which the tender is submitted, or the United States Treasury if the tender is submitted to it. which must be received at such Bank or at the Treasury no later than: (1) Thursday, August 26, 1976, if the check is drawn on a bank in the Federal Reserve District of the Bank to which the check is submitted, or the Fifth Federal Reserve District in case of the Treasury, or (2) Tuesday, August 24, 1976, if the check is drawn on a bank in another district. Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at a Federal Reserve Bank. Payment will not be deemed to have been completed where registered notes are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. In every case where full payment is not completed, the payment with the tender up to 5 percent of the amount of notes allotted shall, upon declaration made by the Secretary of the Treasury in his discretion, be forfeited to the United States. When payment is made with notes, a cash adjustment will be made to or required of the bidder for any difference between the face amount of notes submitted and the amount payable on the notes allotted.

V. ASSIGNMENT OF REGISTERED NOTES

1. Registered notes tendered as deposits and in payment for notes allotted hereunder are not required to be assigned if the notes are to be registered in the same names and forms as appear in the registrations or assignments of the notes surrendered. Specific instructions for the issuance and delivery of the notes, signed by the owner or his authorized representative, must accompany the notes presented. Otherwise, the notes should be assigned by the registered payees or assignees thereof in accordance with the general regulations governing United States securities, as hereinafter set forth. When the new notes are to be registered in names and forms different from those in the inscriptions or assignments of the notes presented the assignment should be to "The Secretary of the Treasury for Treasury Notes of Series Q-1978 in the name of (name and taxpayer identifying number)." If notes in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon Treasury Notes of Series Q-1978 to be delivered to _____." Notes tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The notes must be delivered at the expense and risk of the holder.

VI. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make such allotments as may be prescribed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of notes on full-paid tenders allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

GEORGE H. DIXON,
Acting Secretary of the Treasury.

DEPARTMENT OF DEFENSE

Corps of Engineers

ILLINOIS

Application

AUGUST 6, 1976.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 USC 185), Northern Illinois Gas Company has applied for a fuel-carrying pipeline right-of-way in, through, and across the following U.S. Government-owned lands, said lands being a part of USAR Joliet Outdoor Training Area, Illinois:

WILL COUNTY, ILLINOIS

T 34 N., R 9 E.,
Sec. 23 and 14

The pipeline, in its entirety, will convey propane from the Mobil Refinery located at the junction of Interstate 55 and the Illinois River to Matteson, Illinois.

The purpose of this notice is to inform the public that the Corps of Engineers will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Those persons who desire to make comments or objections should state their views in detail and send them to the District Engineer, Omaha District, Corps of Engineers, 6014 U.S. Post Office & Courthouse, Omaha, Nebraska 68102, within 30 days of the date of publication of this notice.

JAMES W. RAY,
Colonel, Corps of Engineers, District Engineer.

Department of the Navy

COMMANDANT'S ADVISORY COMMITTEE ON MARINE CORPS HISTORY

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is given that the Commandant's Advisory Committee on Marine Corps History will meet on September 7-10, 1976, in Room 1110, Navy Annex (Federal Office Building No. 2), Columbia Pike, Arlington, Virginia. Sessions of the meeting will commence at 9:00 a.m. and terminate at 4:30 p.m.

The agenda will consist of the following topics: development of priorities for major historical projects; actions to encourage the study of Marine Corps history; and revision of the scope and content of current programs. Any person desiring further information about this meeting or the Committee may write to the Commandant of the Marine Corps (Code HD), Headquarters, U.S. Marine Corps, Washington, DC 20380.

Dated: August 11, 1976.

JOHN S. JENKINS,
Assistant Judge Advocate General (Civil Law).

V 41 162 AUG 19 76 UM

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

CONTROLLED SUBSTANCES IN SCHEDULES I AND II

Proposed 1976 Revised Aggregate Production Quota Dihydrocodeine

Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On July 8, 1976, a notice of the final aggregate production quota for Dihydrocodeine was published in the FEDERAL REGISTER (41 FR 27980). This notice established the quota for 1976 for this substance at 460,000 grams (expressed in terms of anhydrous base).

The Drug Enforcement Administration continually monitors the manufacture and distribution of each of the substances for which quotas are established in relationship to the medical needs of the United States. This review of data has caused the Drug Enforcement Administration to conclude that the previously finalized aggregate production quota for Dihydrocodeine for 1976 is insufficient to meet the legitimate medical, research, export and inventory needs of the United States for 1976.

Therefore, the Administrator of the Drug Enforcement Administration under the authority vested in the Attorney General by section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) and delegated to the Administrator by § 0.100 of Title 28 of the Code of Federal Regulations does hereby propose the following change of the aggregate production quota for 1976 for Dihydrocodeine, expressed in grams in terms of anhydrous base:

Basic class	Previously finalized 1976 aggregate production quota	Proposed revised 1976 aggregate production quota	Net change
Dihydrocodeine	460,000	593,000	+133,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. The comments or objections should state with particularity the issues concerning which the person desires to be heard. Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by September 20, 1976. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should so state and summarize the reasons for his belief. In the event that comments or objections to this proposal raise one or more issues which the Administrator finds, in his sole discretion, warrants a full adversary-type hearing, the Administrator shall order a public hearing in the FEDERAL REGISTER summarizing the issues to be heard and setting the time for the hearing (which shall not be less than 30 days after the date of publication).

Dated: August 12, 1976.

PETER B. BENSINGER,
Administrator.

CALIFORNIA STATE ADVISORY BOARD

Meeting

The California State Multiple-Use Advisory Board to the U.S. Bureau of Land Management will hold a meeting in Bishop, California, September 20, 1976, and a joint meeting with the California Advisory Committee to the U.S. Forest Service, September 21 and 22 at Bishop and at various field locations on National Forest Lands and National Resource Lands in the adjacent area.

The Bureau of Land Management Advisory Board will make a field review of the Eureka Sand Dunes management plan and environmental analysis record on Monday morning, departing from the Bishop Westerner Motel at 8 a.m. The Board will hold a public meeting at the Bank of America Conference Room, 536 N. Main, Bishop, beginning at 1 p.m. Agenda items will include a report by the State Director on Bureau response to Board recommendations during the past year and status of Bureau programs including proposed rulemaking on grazing administration and off-road vehicles; a detailed report on operation of the Bureau planning system; and final reports of the Board's ad hoc committees on geothermal energy and off-road vehicles. The federal representative will be Ed Hastey, California State Director of the Bureau of Land Management, or his authorized representative.

The joint meeting agenda includes reports and discussions of mineral and geothermal energy programs involving the Bureau of Land Management and the Forest Service, land use planning and management in areas where National Resource Lands and National Forest Lands are intermingled, and such interagency efforts as the Lone Pine Visitor Center. The joint field review will include the Long Valley geothermal area and Mammoth Visitor Center. The joint meeting will be at 1 p.m., September 21, at the Mammoth Visitor Center, U.S. Forest Service, Mammoth Lakes, California.

Field reviews covering wildlife, recreation and range management programs in the Owens Valley will conclude the meeting September 22. Members of the public may participate in the field reviews but must provide their own transportation.

The meetings will be open to the public, and participation is invited. Time will be made available at the BLM Advisory Board meeting for brief statements relating to subjects on the agenda. Such statements may not exceed five minutes in length and should be reduced to writing. Persons wishing to make oral statements should contact State Director, Bureau of Land Management, 2800 Cottage Way, Sacramento, CA 95825, by the close of business September 15, 1976.

Dated: August 11, 1976.

ED HASTEY,
State Director.

LAS CRUCES DISTRICT MULTIPLE USE ADVISORY BOARD

Meeting

Notice is hereby given in accordance with Public Law 92-463, that a meeting of the Las Cruces District Multiple Use Advisory Board will be held on September 14 and 15, 1976 beginning at 8:00 a.m. at the Holiday Inn, 1401 S. White Sands Blvd., Alamogordo, New Mexico.

The Advisory Board was established to advise the District Manager on matters relating to the use, management, protection and disposition of lands and resources administered within the Las Cruces District.

The purpose of this meeting is to inform the Board of the status of the Gila Unit Resource Analysis and Management Framework Plan, and on proposed changes in agreements with Department of The Army (Ft. Bliss) for management agreements on McGregor Range, and a discussion of the proposed grazing regulations as published in the July 28th FEDERAL REGISTER. In addition, the meeting will include a field tour of the Godfrey Hills (east of Three Rivers, New Mexico) and a discussion of management problems and alternatives associated with wild burros now using the area. The Board may make a recommendation on this subject.

The meeting and tour will be open to the public; however, the public must provide their own transportation on the tour. Anyone wishing to make a presentation to the Board or submit a written statement should contact the official

listed below at least five days prior to the meeting.

Further information concerning this meeting may be obtained from the District Manager, Bureau of Land Management, Las Cruces, New Mexico 88001, (505-523-5571). Minutes of the meeting will be available for public inspection and copying by December 1, 1976 at the District Office in Las Cruces.

JOHN E. PROVINE,
Acting District Manager.

MONTANA, NORTH DAKOTA, SOUTH DAKOTA

Modification of Administrative District Office Boundaries and Jurisdictions; Correction

In FR Doc. 76-19625 appearing at pages 27980 and 27981 in the FEDERAL REGISTER of Wednesday, July 7, 1976, the following changes should be made:

1. On page 27980, the last sentence in paragraph title *1. Lewistown District* is corrected to read as follows:

"The Lewistown District consists of the following counties: Blaine, Carbon, Chouteau, Daniels, Fergus, Glacier, Golden Valley, Hill, Judith Basin, Liberty, Musselshell, Petroleum, Phillips, Roosevelt, Sheridan, Stillwater, Sweetgrass, Toole, Valley, Wheatland, Yellowstone, and all of Big Horn County except that portion which lies southeast of the Northern Cheyenne and Crow Indian Reservations."

2. On page 27981, the third sentence of paragraph title *3. Mile City* is corrected to read as follows:

"The Miles City District consists of the following counties in Montana: Carter, Custer, Dawson, Fallon, Garfield, McCone, Powder River, Prairie, Richland, Rosebud, Treasure, Wibaux, and that portion of Big Horn County which lies southeast of the Northern Cheyenne and Crow Indian Reservations, and all of the counties in North and South Dakota.

Dated: July 29, 1976.

EDWIN ZAIDLICZ,
State Director.

Approved: August 10, 1976.

GEORGE L. TURCOTT,
Associate Director.

SOCORRO DISTRICT MULTIPLE-USE ADVISORY BOARD

Meeting

Notice is hereby given that the Socorro District Multiple-Use Advisory Board of the Bureau of Land Management will meet in the Zimmerman Building at the Socorro County Fairgrounds one (1) mile south of Socorro, New Mexico, on September 21, 1976, at 9:00 A.M.

The agenda for the meeting will include a discussion and making recommendations on the proposed revised grazing regulations, amendments to off-road vehicle regulations, District Advisory Board charter and memberships, and a summary of the District's on-going program.

The meeting will be open to the public. Time will be made available for public statements starting at 3:00 P.M. Statements should be limited to the items set forth in the agenda. Those wishing to make an oral statement should inform the District Manager prior to the meeting. Written statements may be filed for the Board's consideration by submitting them at the meeting or mailing, in advance, to the Bureau of Land Management at the address listed below. Further information concerning the meeting may be obtained from Arlen P. Kennedy, District Manager, Socorro District Office, 200 Neel Avenue, N.W., Socorro, New Mexico 87801. Telephone (505) 835-0412.

Minutes of the meeting will be available at the Socorro District Office for public inspection and copying thirty days after the meeting.

ARLEN P. KENNEDY,
District Manager.

AUGUST 12, 1976.

UTAH

Application

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northwest Pipeline Corporation has applied for a 4½-inch natural gas pipeline right-of-way across the following lands:

SALT LAKE MERIDIAN, UTAH

T. 19 S., R. 23 E.,
Sec. 29, NW¼SE¼, NE¼SE¼, SE¼NE¼;
Sec. 28, SW¼NW¼.
T.20 S., R. 23 E.,
Sec. 5, lot 3.

The needed right-of-way is for a portion of applicant's gas gathering system located in Grand County, Utah.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Moab District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532.

WILLIAM G. LEAVELL,
Associate State Director.

5. IF "APPLICANT" IS A BUSINESS CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING

EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.

IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED

LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED

Collect feathers on cattle grazing grounds in California, with permission of owners.

Possess and store at University of California.

Research and study at University of California.

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? [X] YES [ ] NO
(If yes, list license or permit number(s))

1-SC-717

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? [ ] YES [ ] NO
(If yes, list jurisdictions and type of document)

Application to California, 3-3-76, has been referred to you by them. Would be contingent on your permit.

CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF

10. DESIRED EFFECTIVE DATE: Soon as possible

11. DURATION NEEDED: Indefinite. At least 5 years.

ATTACHMENTS: THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT PROPOSED [illegible] ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR [illegible] WHICH [illegible] PROVIDED.

Study of the fine structure of the feathers.
Provide feather bank of this species for future research.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (Sign in ink) James G. Miller

DATE 8-2-76

FWS Form 3-200-1 (Feb 1974)

December 3, 1975.

B. E. FAIST,
Chief, Wildlife Protection Branch, Department of Fish and Game, Sacramento, Calif.

DEAR SIR: Thank you for the "Permit to Possess Specimens of Wild Life," issued to the Chairman of our Department of Biology.

This permit specifies that a separate permit is required for each specimen of a rare or endangered species or fully protected species. For this reason I wish to know if it is possible for you to arrange a permit so that a cooperator with us may pick up condor feathers shed on his property.

The cooperator I would propose has a large cattle ranch and condors come there every year during calving season to clean up the stillborn and afterbirths. While there, they have been observed to sit on trees and preen, sometimes shedding feathers.

We would be pleased to receive these feathers for researchers who may wish to study the fine structure of the feathers, the mercury and heavy metal content, and future questions they may answer.

We have adequate facilities to portect and store such specimens.

If you can make such a permit possible, I would be glad to receive it before the next calving season the coming summer.

Yours very truly,

JAMES G. MILLER,
Senior Museum Scientist, University of California, Collections of Birds and Mammals.

Documents and other information submitted in connection with this application are available for public inspection during normal busness hours at the Service's office in Suite 600, 1612 K Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. This application has been assigned File Number PRT 2-209-07; please refer to this number when submitting comments. All relevant comments received on or before September 20, 1976 will be considered.

Dated: August 13, 1976.

C. R. BAVIN,

National Park Service

OGLALA SIOUX CEDAR PASS CONCESSION ENTERPRISE

Intention To Extend Concession Contract

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on or before September 20, 1976, the Department of the Interior, through the Director of the National Park Service, proposes to extend a concession contract with Oglala Sioux Cedar Pass Concession Enterprise, authorizing it to continue to provide concession facilities and services for the public at Badlands National Monument for a period of two (2) years from January 1, 1976, through December 31, 1977.

As assessment of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the environment, and that it is not a major Federal action having a significant impact on the environment under the National Environmental Policy Act of 1969. The environmental assessment may be reviewed in the Office of the Superintendent, P.O. Box 72, Interior, South Dakota 57750.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1975, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. However, the Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 20, 1976.

Interested parties should contact the Assistant Director, Concessions Management, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract extension.

Dated: August 12, 1976.

JOHN E. COOK,
Associate Director, National Park Service.

[FR Doc.76-24312 Filed 8-18-76;8:45 am]

OVERTON BEACH RESORT, INC.

Intention To Extend Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on or before September 20, 1976, the Department of the Interior, through the Director of the National Park Service, proposes to extend a concession contract with Overton Beach Resort, Inc., authorizing it to continue to provide concession facilities and services for the public at Overton Beach, Lake Mead National Recreation Area, for a period of one (1) year and ten (10) months from January 1, 1977, through October 31, 1978.

An assessment of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the environment, and that it is not a major Federal action having a significant impact on the environment under the National Environmental Policy Act of 1969. The environmental assessment may be reviewed in the Office of the Superintendent, Lake Mead National Recreation Area, 601 Nevada Highway, Boulder City, Nevada 89005.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1976, and, therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the extension of the contract. However, the Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 20, 1976.

Interested parties should contact the Assistant Director, Concessions Management, National Park Service, Washington, D.C., 20240, for information as to the requirements of the proposed contract extension.

Date August 11, 1976.

JOHN E. COOK,
Acting Director, National Park Service.

Office of the Secretary

OIL SHALE ENVIRONMENTAL ADVISORY PANEL

Meeting

Notice is hereby given in accordance with Public Law 92-463 that a meeting of the Oil Shale Environmental Advisory Panel will be held on September 9, 1976, at the Denver Downtown Holiday Inn, 15th Street and Glenarm Place, in Denver, Colorado. The meeting will begin at 8:30 a.m. on Thursday, September 9, in the Silver Heels and Cripple Creek rooms and conclude at 5:00 p.m. that afternoon.

The Panel was established to assist the Department of the Interior in the performance of its functions in connection with the supervision of oil shale leases issued under the Prototype Oil Shale Leasing Program. The purpose of this meeting is to adopt summary panel advice on the Detailed Development Plan for Utah least tracts U-a and U-b, review seventh quarterly summary data reports for lease tracts C-a, C-b, and U-a and U-b (combined), to receive reports from Interior officials, and to consider any other matters which have come before the panel.

The meeting is open to the public. It is expected that space will permit at least 150 persons to attend the meeting in addition to the panel members. Interested persons may make brief presentations to the panel or file written statements. Requests should be made to Mr. William L. Rogers, Chairman, Office of the Secretary, Department of the Interior, Room 688, Building 67, Denver Federal Center, Denver, Colorado 80225.

Further information concerning this meeting may be obtained from Mr. Henry O. Ash, Office of the Oil Shale Environmental Advisory Panel, Room 690, Building 67, Denver Federal Center, Denver, Colorado 80225, Telephone No. (303) 234-3275. Minutes of the meeting will be available for public inspection 30 days after the meeting at the Panel office.

CHRIS FARRAND,
Deputy Assistant Secretary of the Interior.

AUGUST 16, 1976.

[FR Doc. 76-24300 Filed 8-18-76;8:45 am]

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Notice of Designation Number A361]

NORTH CAROLINA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Bladen County, North Carolina, as a result of a hard freeze April 10, 1976.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Revelopment Act, as amended by Pub. L. 94-68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor James E. Holshouser Jr., that such designation be made.

Applications for emergency loans must be received by this Department no later than October 5, 1976, for physical losses and May 9, 1977, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 12th day of August 1976.

FRANK B. ELLIOTT,
Administrator, Farmers Home Administration.

[FR Doc.76-24298 Filed 8-18-76;8:45 am]

Forest Service

ALPINE PLANNING UNIT

Availability of Draft Environmental Statement

The review period for the draft environmental statement and land use plan on the Alpine Planning Unit, Toiyabe National Forest, Nevada, has been extended. The new extension date is October 9, 1976; rather than August 9, 1976, as originally reported.

The Forest Service report number for these documents is USDA-FS-DES (Adm) R4-76-17.

Dated: August 12, 1976.

D. A. SCHULTZ,
Acting Director, Regional Planning and Budget.

[FR Doc.76-24314 Filed 8-18-76;8:45 am]

HUMBOLDT NATIONAL FOREST LIVESTOCK ADVISORY BOARD

Meeting

The Humboldt National Forest Livestock Advisory Board will meet at 10:00 A.M., P.d.t. at the Van Norman Ranch near Tuscarora, Nevada, on October 4, 1976. The Board will then tour the Schmidt Creek Allotment. The meeting is open to the public. The public is requested to furnish their own lunch and 4-wheel drive transportation.

The purpose of this meeting is to:

1. Review and discuss intensive grazing systems.

2. Discuss grazing problems and complaints.

3. Discuss Sorensen land exchange proposals.

Dated: August 11, 1976.

JOE L. FRAZIER,
Acting Forest Supervisor.

[FR Doc.76-24262 Filed 8-18-76;8:45 am]

LAKEVIEW PLANNING UNIT

Notice of Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for Lakeview Planning Unit, Forest Service Report Number USDA-FS-FES (Adm) R1-76-10.

The environmental statement concerns the proposed implemenation of a revised land use plan for the Lakeview Planning Unit, Bonner County, Idaho. Approximately 63,060 acres are included in the planning unit of which 57,120 acres are National Forest land. The management plan allocates resources and specifies land use prescriptions for National Forest land only. Resource information for lands in other ownership also is included for owners to use as they wish.

V 41 162 AUG 19 76 UMI

With the exception of private holdings generally located along the lake face and several streams, most of the National Forest ownership in this planning unit is continuous. On most of the planning unit the selected plan emphasizes management for the high scenic quality of the lake face along Lake Pend Oreille, fisheries, domestic water, recreation, and wildlife uses. Timber and domestic livestock forage would be provided to the extent to which they would not degrade or detract from these emphasized uses

This final environmental statement was transmitted to CEQ on _____.

Copies are available for inspection during regular working hours at the following locations:

USDA Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., SW., Washington, D.C. 20250.
USDA Forest Service, Northern Region, Federal Building, Missoula, MT 59801.
USDA Forest Service, Idaho Panhandle National Forests, P.O. Box 310, Coeur d'Alene, ID 83814.
USDA Forest Service, Sandpoint Ranger District, P.O. Box 490, Sandpoint, ID 83864.

A limited number of single copies are available upon request to Forest Supervisor Ralph Kizer, Idaho Panhandle National Forests, P.O. Box 310, Coeur d'Alene, ID 83814.

Copies of this final environmental impact statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

RALPH D. KIZER,
Forest Supervisor.

AUGUST 12, 1976.

[FR Doc.76-24284 Filed 8-18-76;8:45 am]

MANTI DIVISION GRAZING ADVISORY BOARD

Meeting

AUGUST 13, 1976.

The Manti Division Grazing Advisory Board will hold a summer tour on Monday, September 13, 1976. The tour will begin at the junction of U.S. 50 and 89 and Diamond Fork Canyon at 10:00 a.m.

The Advisory Board will tour the Diamond Fork Cattle Allotment.

After lunch, a short formal meeting will be held to discuss the following topics:

1. Work impact from accelerated Comprehensive Land Use Planning on Ferron and Price Districts to provide input to coal mining Environmental Impact Statement.
2. Central Utah Coal Mining Environmental Impact Statement.
3. Controls and need for State license for use of pesticides on National Forest land.
4. Requirements for use of M-44 device to control animal damage (coyotes) on National Forest administered land.

The tour and meeting will be open to the public. Written statements concerning specific topics of discussion may be filed with the committee before or after the meeting. Public comments and discussion concerning agenda topics will be permitted to the extent time permits.

Persons wishing to attend the tour and meeting should furnish their own lunch. Mr. Vail Neilson, Advisory Board Chairman, Ephraim, Utah, telephone 801-283-4398, may be contacted for further information.

Dated: August 9, 1976.

REED C. CHRISTENSEN,
Forest Supervisor.

GEOLOGICAL SURVEY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00309. Applicant: U.S. Geological Survey, Hawaiian Volcano Observatory, Hawaii National Park, Hawaii 96718. Article: VLF Electromagnetic Unit EM16, and (Attachment) Direct Reading Ground Resistivity Meter EM16R. Manufacturer: Geonics Ltd., Canada. Intended use of article: The article is intended to be used for monitoring of molten rock movement in order to predict pending eruptions of volcanoes. Experiments to be conducted will include: (a) Location and delineation of ponded molten lava bodies to be used as possible sources of thermal energy for generating electrical power.

(b) Detection of the subterranean flow path of molten lava in order to assess the possible threat of lava breakouts in populated areas.

(c) Detection of hidden pools or tubes of lava within recent lava flows where they have covered existing roads prior to any attempt to reopen road.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the capability of using no ground contact in making measurements, short readout time (10-40 seconds), and one man portability. The National Bureau of Standards advises in its memorandum dated July 19, 1976 that (1) the capability described above is pertinent to the applicant's intended purposes (2) it knows of no practical way to accomplish the applicant's intended purpose by the use of a combination of domestic instruments and (3) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

LOYOLA U. STRITCH SCHOOL OF MEDICINE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00381. Applicant: Loyola University Stritch School of Medicine, Physiology Dept., 2160 South First Avenue, Maywood, Illinois 60153. Article: Veterinary equipment, consisting of stainless steel rods, clamps, pelvis clamps, spinal cord holders, electrode holders and positioners. Manufacturer: Elektro-Mechanik-Rockenberg, West Germany. Intended use of article: When assembled the articles is a frame used to hold a cat in a rigid position for the introduction of electrodes in the spinal column to study the mechanisms of neurological control of respiration in cats.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article is a unique assembly of stainless steel rods, and clamps, as well as, specially designed pelvis clamps, spinal cord holders, electrode holders and positioners designed to accurately position and hold both cats and electrodes. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated July 16, 1976 that the characteristics of the article described above are pertinent to the applicant's intended use in neurophysiological studies of respiration in cats. HEW further advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.76-24304 Filed 8-18-76;8:45 am]

RENSSELAER POLYTECHNIC

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00164-65-46040. Applicant: Rensselaer Polytechnic Institute, Materials Engineering Department, Troy, New York 12181. Article: Electron Microscope, Model JEM 100C. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in research concerned with the investigation of the austenite variables of composition, defect structure, stacking fault energy, process history, and properties as coupled phenomena, and the relationship of these variables to the structure, transformation kinetics, and properties of the resultant martensite. Studies will be carried out in the area of corrosion fatigue of aluminum alloys and copper alloys requiring extensive transmission electron microscopy to determine changes in deformation substructures which accompany corrosive reactions. It is also planned to study phase separation in glasses and the graphite layer structure at the surface of high performance graphite fibers. Other studies to be carried out include: (1) The effects of localized strain fields on the mechanical behavior of two phase alloys, and (2) grain boundary precipitation studies. The article will also be used for demonstration to students taking course in which electron microscopy is an important instrumentation technique as it provides significant data for the course content.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article is equipped with a eucentric side entry goniometer stage with ±60° tilt, 360° rotation holder and a guaranteed resolution of 5 Angström (point-to-point). The most closely comparable domestic instrument is the Model EMU-4C electron microscope supplied by the Adam David Company. We are advised by the National Bureau of Standards (NBS) in its memorandum dated July 15, 1976 that the characteristics of the article described above are pertinent to the applicant's intended purposes. NBS further advised that domestic instruments do not provide an equivalent eucentric goniometer stage. We, therefore, find that the EMU-4C is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used. The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

SALK INSTITUTE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00228-33-77040. Applicant: The Salk Institute for U.S. Govt. Contract # (AID/csd-2785), PO Box 1809, San Diego, California 92112. Article: Mass Spectrometer System, Model CH-5. Manufacturer: Varian, West Germany. Intended use of article: The article is intended to be used for research in population control. Intended application of the article will mainly be structural studies of peptides, particularly those derived from the hypothalamus. These studies can be grouped into four major areas:

I. Direct Sequence Determination of Peptides.
II. Precision Mass Determination.
III. GC-MS Analysis of the PTH Derivatives of Amino Acids.
IV. Direct Evaporation Analysis of the PTH Derivatives.

Comments: Comments dated January 21, 1974 have been received from E. I. DuPont De Nemours and Company (DuPont) which state *inter alia* the Mass Spectrometer DuPont Type 21-492, in combination with Data Acquisition/Processing System (DuPont Catalogue Number 21-094) are of equivalent scientific value to the foreign article. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, could have been made available to the applicant without excessive delay within the meaning of § 301.11(c) of the regulations at the time the foreign article was ordered (May 12, 1970). Reasons: This application is a resubmission of Docket Numbers 71-00060-33-77040, 72-00050-33-77040, and 73-00337-33-77040 which were denied without prejudice to resubmission on April 26, 1971, October 18, 1972, and June 19, 1973, respectively, for informational deficiencies. Excessive delivery time is described in § 301.11(c) of the regulations as follows:

Excessive delivery time. Duty-free entry of the article shall be considered justified without regard to whether there is being manufactured in the United States an instrument, apparatus, or accessory of equivalent scientific value for the purposes described in response to question 7 of the application form, if the delay in obtaining such domestic instrument, apparatus, or accessory (as indicated by the difference between the delivery times quoted by domestic manufacturer and foreign manufacturer) will seriously impair the accomplishment of the purposes. In determining whether the difference in delivery times is excesive, the Deputy Assistant Secretary shall take into account the relevancy of the applicant's program to other research programs with respect timing, the applicant's need to have such instrument, apparatus, or accessory available at the scheduled time for the course(s) in which the article is intended to be used, and other relevant circumstances.

The applicant sent a request for quotation to several domestic firms. One firm, Bell and Howell, a Division of CEC/Analytical Instruments, now doing business as E. I. DuPont De Nemours & Company (DuPont), submitted a quotation on March 20, 1970 for a Bell and Howell/CEC Data Acquisition and Processing System (Model 21-492 Mass Spectrometer and accessories) as meeting the applicant's specifications, with a total delivery time of nine months if ordered by April 15, 1970. On March 18, 1970, the foreign manufacturer submitted an oral quotation for the article (a complete system) with a delivery time of 60 days (2 months). The article was actually delivered on July 24, 1970 two months and 10 days after the order was placed and approximately two days prior to the specified delivery date. The applicant states that the planned research would require prompt delivery of the foreign article because a delay of approximately 7 months would seriously impair the accomplishment of all the intended purposes. The Department of Health, Education, and Welfare advises in its memorandum dated February 12, 1976 that timely delivery of an instrument was a prerequisite for timely performance of

V 41 162 AUG 19 76 UMI

the applicant's studies under its contract.

Accordingly, we find that the difference between the delivery time of the article and that of the equivalent domestic instrument to be "excessive" within the meaning of § 301.11(c) as it would seriously impair the accomplishment of the applicant's purposes at the time the article was ordered.

UNIVERSITY OF PENNSYLVANIA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00315. Applicant: University of Pennsylvania Department of Physiology, School of Medicine, 37th & Hamilton Walk (A303 Richards G4) Philadelphia, Pennsylvania 19174. Article: Coherent NMR Spectrometer, Model CPS-2 & Probe Head. Manufacturer: Spin-Lock Electronics Ltd., Canada. Intended use of article: The article is intended to be used to measure T_1, T_2, $T_{1\rho}$ for 39K within a variety of cells, including those from human lymphocytes, the urinary bladder of the toad, frog striated muscle and rat lymphocytes. The relationship of the NMR properties of potassium to physiologically significant changes in tissue activity will be studied.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: This application is a resubmission of Docket Number 76-00089-33-77030 which was denied without prejudice to resubmission on December 19, 1975 for informational deficiencies. The foreign article provides the capability for measurement of all three nuclear magnetic resonance relaxation times T_1, T_2 and T_{1rho}. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated July 2, 1976 that the capability described above is pertinent to the applicant's intended purposes. HEW also advises that it knows of no domestic instrument that provides the pertinent capability.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF WISCONSIN—OSHKOSH

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00413. Applicant: University of Wisconsin-Oshkosh, Dept. of Physics and Astronomy, Oshkosh WI 54901. Article: Spectrometer, Nuclear Magnetic Resonance Pulsed-including power supplies, Model CPS-2. Manufacturer: Spin-Lock Ltd., Canada. Intended use of article: The article is intended to be used for the study of slow molecular motion in tissues, protein water systems, liquid crystals and hydrogen-bonded and other nonmetallic solids by employing pulsed nuclear magnetic resonance techniques. Depending on the material under study, some or all of the following nuclear relaxation times will be measured:

(a) T_1, the spin-lattice relaxation time in the laboratory frame.

(b) T_2, the spin-spin relaxation time, using either Carr-Purcell or Gill-Meiboom techniques.

(c) T_{1D}, the spin-lattice relaxation time in the rotating frame.

(d) T_{1D}, the dipolar spin-lattice relaxation time, using the three-pulse Jeener Broekhart technique.

The article will also be used in the following physics courses to introduce students to current research techniques in physics as well as for student research investigations:

82-391	Intermediate Laboratory II.
82-519	Graduate Laboratory.
82-401	and 405 Independent Study.
82-792	Research Techniques in Physics.
82-795	Thesis.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article is a coherent nuclear magnetic resonance spectrometer which provides pulsed sequences for relaxation times, such as, T_{1rho} and Carr-Purcell. The National Bureau of Standards (NBS) advises in its memorandum dated July 22, 1976 that specification described above is pertinent to the applicant's intended purposes.

NBS also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended purposes.

V.A. CENTER, DAYTON, OHIO

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00352. Applicant: Veterans Administration Center, 4100 West Third Street, Dayton, Ohio 45428. Article: Electron Microscope, Model EM 400. Manufacturer: Philips Electronics Instruments NVD, The Netherlands Intended use of article: The article is intended to be used for studies of the effects of virus infections on sensitive tissue culture cell lines. These studies will encompass the use of sophisticated techniques at the electron microscope level such as autoradiography, immunocytochemistry and histochemistry. The effects of toxic pharmaceuticals on neural tissues particularly on glial cells of the central nervous system will be studies and entail the use of the same techniques. In addition, the articles will be used to teach medical and graduate students as well as residents in various programs in fine structural techniques.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the capability for scanning transmission electron micrographs in a high resolution transmission electron microscope. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated July 15, 1976 that the capability described above is pertinent to the applicant's research studies.

The most closely comparable domestic instrument is the Model EMU-4C electron microscope produced by the Adam David Company. HEW further advises that the EMU-4C does not provide the pertinent scanning capability. We, therefore, find the EMU-4C is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

V.A. CENTER, DAYTON, OHIO

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00353. Applicant: Veterans Administration Center, 4100 West Third Street, Dayton, Ohio 45428. Article: Scanning Electron Microscope, Model PSEM 500 and accessory, Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used in the general areas of surgical pathology, particularly in the diagnosis of tumors of uncertain histogenesis. In the diagnostic viral laboratory, the article will be used for viewing and diagnosing diseases of bacterial and viral origin. Projects in the areas of cancer will also be conducted in which tissue culture cells will be infected with oncogenic viruses. Other studies will involve the effects of toxic pharmaceuticals on neutral tissues particularly on the glial cells of the central nervous system. Another planned use of the article is in the training and teaching of resident physicians.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a motor driven fully-eucentric goniometer stage with a stage position reproducibility of 0.2 micron. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated July 15, 1976 that the stage position reproducibility described above is pertinent to the applicant's intended use. HEW further advises that domestic instruments do not provide, equivalent specimen position reproducibility.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

National Oceanic and Atmospheric Administration

PRELIMINARY MANAGEMENT PLANS/ ENVIRONMENTAL ASSESSMENT

Public Meeting

The Fishery Conservation and Management Act of 1976 (P.L. 94-265, 16 U.S.C. § 1801; "the Act") requires the Secretary of Commerce to prepare a preliminary fishery management plan if an application is submitted by a foreign government to fish in a fishery for which no fishery management plan had been prepared by a Regional Council established by the Act. Any preliminary fishery management plan prepared by the Secretary of Commerce would apply only to foreign fishermen.

The National Marine Fisheries Service (NMFS) is presently working in a number of areas so that it may be prepared to act expeditiously should such a request be received. Among these, NMFS is studying billfishes and sharks in the Atlantic, Caribbean, and Gulf of Mexico areas.

In order to allow officials of interested States to orally comment on NMFS' efforts in regard to billfishes and sharks in the Atlantic, Caribbean, and Gulf of Mexico areas, and to provide sufficient information for the public to later submit written comments, the following public meeting will be held:

Date: September 2, 1976
Place: Holiday Inn—Airport, Atlanta, Georgia
Time: 9 a.m. to 12 p.m.; 2 p.m. to 5 p.m.

PROPOSED AGENDA

9 to 12: Discussion of Fishery Management Plan Preparations by NMFS personnel/environmental assessments

2 to 5: Comments from State officials

This meeting will be open to the public. Because of the Act's requirements for State-Federal cooperation, State officials responsible for the management of marine fisheries in the areas under consideration, including Puerto Rico and the Virgin Islands, will be given an opportunity to comment orally during the afternoon session. Comments of other interested persons should be submitted in writing to: Regional Director, National Marine Fisheries Service, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702. Additional information concerning this meeting may be secured by writing to that address or by calling: 813-893-3141.

Dated: August, 1976.

JACK W. GEHRINGER,
Deputy Director, National Marine Fisheries Service.

[FR Doc.76-24447 Filed 8-18-76;8:45 am]

Office of Telecommunications

TELECOMMUNICATIONS SERVICE CENTER

Cessation of Activities

Notice is hereby given that all activities of the Telecommunications Service Center will cease after September 30, 1976. The activities to be discontinued include ionospheric telecommunications forecasts and warnings distributed by announcements over radio station WWV, and by telephone, teletype and weekly mailings.

It is our understanding that ionospheric predictions are available to private parties, including radio amateurs, from a commercial source.

As other areas of radio communication technology become increasingly important, they require more of the Office's attention and resources. As a result, budgetary, personnel, administrative and technical considerations compel the termination of the above services.

DOUGLASS D. CROMBIE,
Associate Director for Telecommunication Sciences.

Travel Service

TRAVEL ADVISORY BOARD

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that the Travel Advisory Board of the U.S. Department of Commerce will meet on September 21, 1976, at 9:30 a.m., in Room 4830, of the Main Commerce Building, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230.

Established in July, 1968, the Travel Advisory Board consists of senior representatives of 15 U.S. travel industry segments who are appointed by the Secretary of Commerce to serve two year terms.

Members advise the Secretary of Commerce and Assistant Secretary of Commerce for Tourism on policies and programs designed to accomplish the purposes of the International Travel Act of 1961, as amended. A detailed agenda for the meeting will be published in the

V 41 162 AUG 19 76 UMI

FEDERAL REGISTER in advance of the meeting.

A limited number of seats will be available to observers from the public and the press. The public will be permitted to file written statements with the Committee before or after the meeting. To the extent time is available the presentation of oral statements will be allowed.

Melinda Carr, Acting Director of Media Services Division, of the United States Travel Service, Room 1519, U.S. Department of Commerce, Washington, D.C. 20230 (telephone 202–377–4987) will respond to public requests for information about the meeting.

CREIGHTON HOLDEN,
Assistant Secretary for Tourism,
U.S. Department of Commerce.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

DIAGNOSTIC PRODUCTS ADVISORY COMMITTEE

Renewal

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), the Food and Drug Administration announces the renewal of the Diagnostic Products Advisory Committee by the Secretary, Department of Health, Education, and Welfare for an additional period of 2 years beyond August 9, 1976.

Authority for this committee will expire August 9, 1978, unless the Secretary formally determines that continuation is in the public interest.

Dated: August 12, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

[FR Doc.76–24280 Filed 8–18–76;8:45 am]

Health Resouces Administration

NATIONAL ADVISORY COUNCIL ON NURSE TRAINING

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of September 1976:

Name: National Advisory Council on Nurse Training.

Date and Time: September 27–29, 1976, 10:30 a.m.

Place: Conference Room 6, Building 31, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014.

Open 10:30 a.m. to 12:15 p.m.
Closed remainder of meeting.

Purpose: The Council advises the Secretary and Administrator, Health Resources Administration, concerning general regulations and policy matters arising in the administration of the Nurse Training Act of 1971. The Council also performs final review of grant applications for Federal Assistance for capitation, construction and special projects for the improvement of nurse training, and research grants and makes recommendations to the Administrator, HRA.

Agenda: Agenda items for the open portion of the meeting will cover announcements; consideration of minutes of previous meetings; discussion of future meeting dates; and administrative and staff reports. The remainder of the meeting will be closed to the public for the review of grant applications for Federal assistance in accordance with the provisions set forth in section 552(b)(5) and (6), Title 5, U.S. Code and the Determination by the Administrator, Health Resources Administration, pursuant to Public Law 92–463.

Anyone wishing to obtain a roster of members, minutes of meeting, or other relevant information should contact Dr. Mary S. Hill, Room 6008, Federal Building, 9000 Rockville Pike, Bethesda, Maryland 20014, Telephone (301) 496–6985.

Agenda items are subject to change as priorities dictate.

Dated: August 16, 1976.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

[FR Doc.76–24343 Filed 8–18–76;8:45 am]

Office of Education

NATIONAL ADVISORY COUNCIL ON VOCATIONAL EDUCATION

Public Meeting

Notice is hereby given, pursuant to Pub. L. 92–463, that the next meeting of the National Advisory Council on Vocational Education will be held on September 8, 1976 from 4 p.m. to 5:30 p.m., local time and on September 9, 1976 from 9 a.m. to 5 p.m., local time and on September 10, 1976 from 9 a.m. to 12 Noon, local time at the Hyatt Regency Hotel, 400 New Jersey Avenue, NW., Washington, D.C.

The National Advisory Council on Vocational Education is established under section 104 of the Vocational Education Amendments of 1968 (20 U.S.C. 1244). The Council is directed to advise the Commissioner of Education concerning the Administration of preparation of general regulations for, and operation of, vocational educational programs, supported with assistance under the act; review the administration and operation of vocational education programs under the act, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations to the Secretary of HEW for transmittal to the Congress, and conduct independent evaluation of programs carried out under the act and publish and distribute the results thereof.

The meeting of the Council shall be open to the public. The proposed agenda includes:

SEPTEMBER 8, 1976

4 p.m. to 5:30 p.m.—Welcome and Introduction of New Council Members; Chairman's Report.

7 p.m. to 9:30 p.m.—Review Program of Work.

SEPTEMBER 9, 1976

9 a.m. to 12 Noon—Report from the U.S. Office of Education. Legislative Report. Report on OE Management Evaluation Review Teams. Status report on National Bicentennial Conference on Vocational Education.

1:30 p.m. to 5 p.m.—Presentation by Members of National Advisory Council on Adult Education. Discussion of NACVE Work Plans. Appointment of Task Force.

SEPTEMBER 10, 1976

9 a.m. to 12 Noon—Task Force organizational meetings.

Records shall be kept of all Council proceedings and shall be available for public inspection at the office of the Council's Executive Director, located in Suite 412, 425–13th Street, NW., Washington, D.C. 20004.

Signed at Washington, D.C. on August 16, 1976.

REGINALD PETTY,
Executive Director.

[FR Doc.76–24340 Filed 8–18–76;8:45 am]

NATIONAL TRANSPORTATION SAFETY BOARD

[N–AR 76–34]

ACCIDENT REPORTS; AIRCRAFT ACCIDENT BRIEFS; SAFETY RECOMMENDATIONS AND RESPONSES

Availability and Receipt

Aircraft Accident Report.—According to the National Transportation Safety Board, the loss of directional control during taxi as a result of ice on the taxiway and strong, direct crosswinds probably caused a Japan Air Lines Boeing 747, Flight 422, to skid off the taxiway and slide backward down a snow-covered embankment. The accident occurred last December 16 at Anchorage International Airport in Alaska. As noted in the report, No. NTSB–AAR–76–12, contributing to the accident were (1) the captain's decision to take off from runway 6R after receiving reports that taxiing conditions were deteriorating, and (2) failure of airport management to anticipate predictable unsafe icing conditions on the airport. This failure to anticipate these conditions resulted in delayed and insufficient preventive action. The report was released August 12.

Although the evacuation of Flight 422 was successful, some of the problems identified in the Safety Board's special study, "Safety Aspects of Emergency Evacuations from Air Carrier Aircraft" (No. NTSB–AAS–74–3, released January 5, 1975), were present in this accident. Under slightly different circumstances of a greater passenger load and a postcrash fire, lives may been lost. Accordingly, recommendations A–74–105 through A–74–114 from that study and the Federal Aviation Administration's response of May 9, 1975, with updated information as of April 1, 1976, merited repeating in the Anchorage accident report.

Pipeline Accident Report.—A report of the investigation of the May 12, 1975, rupture of an 8-inch pipeline near Devers, Texas, was released by the Safety Board on August 5. The report, No. NTSB–PAR–76–5, indicates that natural gas liquids at 1,425-psig pressure erupted from a fracture near the top of the pipe; the liquids vaporized, mixed with air, and formed a cloud which drifted to the southwest over U.S. Highway 90. An automobile entered the vapor cloud and ignited the ethane-propane vapors. The resulting explosion and fire killed the four persons in the automobile, melted telephone and electric power lines, warped railroad tracks, burned and scorched adjacent woodlands, and interrupted rail and highway traffic. The Safety Board determined that the probable cause of the accident was the rupturing of the pipe where it had been gouged by a backhoe during installation of the pipeline's valve assemblies. The 70-inch-long rupture was caused by a combination of reduction in wall thickness, residual bending and tensile stresses, and fatigue due to the cyclic loading of the pipe, the Board held.

As a result of its investigation of the explosion, the Safety Board by letter of August 5 recommended that Dow Chemical U.S.A., owner of the pipeline, (1) initiate necessary equipment changes to provide data necessary for safe operation of the pipeline continuously to the dispatch centers (recommendation P–76–39); (2) review periodically with local fire departments and other interested agencies the pipeline location, basic pipeline operations, materials transported, hazards encountered, and procedures to follow during leaks (P–76–40); and (3) use the total system concept to review day-to-day operations, new projects, and maintenance operations in order to assist in recognizing and controlling potentially hazardous conditions (P–76–41). The recommendations are designated Class II, for priority followup.

Also on August 5, the Safety Board by separate recommendation letter asked the American Petroleum Institute to implement on a priority followup basis a 1972 recommendation to develop system safety guidelines for liquid pipeline operators; the recommendation, No. P–72–21, was directed to the Institute in the Board's special study, "A Systematic Approach to Pipeline Safety," report No. NTSB–PSS–72–1. In noting that the Devers explosion was the type of accident which the 1972 recommendation was intended to prevent, the Board stated that utilization of the techniques of system safety would have pointed out the problems which led to this accident. The request for implementation was made by recommendation P–76–42.

Aircrafts Accident Briefs.—Issue No. 5, "Aircraft Accident Reports, Brief Format, U.S. Civil Aviation—1975," was released August 6. This volume, report No. NTSB–BA–76–4, contains the synoptic, computer-printed reports of the findings and probable cause(s) of 509 general aviation accidents and 15 air carrier accidents which occurred in the United States last year. In press release No. SB 76–61 announcing the availability of this publication, the Board indicates that encounters with vortex turbulence generated by preceding aircraft, particularly large multi-engine prop or jet types, can cause involuntary loss of control in smaller and lighter following aircraft. The Safety Board, the Federal Aviation Administration, and the industry have issued repeated warnings to pilots, particularly general aviation pilots, on the potential dangers inherent in such situations, the press release noted.

The brief reports in this publication contain essential information concerning the accidents reported; more detailed data may be obtained from the original factual reports on file in the Washington Office of the Safety Board. Upon request, factual reports will be reproduced commercially at an average cost of 23¢ per page for printed matter, $1.25 per page for black and white photographs, and $4.00 per page for color photographs, plus postage. Minimum reproduction charge is $2.00; an additional $4.00 user-service charge will be made for each order. Requests should be directed to the Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. The requester must provide this information concerning the accident: (1) Date and place of occurrence, (2) type of aircraft and registration number, and (3) name of pilot.

The 1975 Issue No. 5 volume may be purchased from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

Aviation Safety Recommendations.—Last March 28, near Pullman, Washington, a Piper PA23–250–C struck the ground in a high-speed spiral. During its investigation of the crash, the Safety Board discovered that a major structural alteration had been approved and accomplished without proper engineering evaluation. The major alteration was an extension of the fuselage nose by installing P/N 32958–00—section assembly-fuselage nose. In the belief that Federal Aviation Administration inspectors should thoroughly investigate the extent of an alteration so that approval is based on approved technical data, the Safety Board by letter issued August 10 recommended that FAA (1) review fuselage nose alteration approvals on all PA 23 aircraft and determine that the modifications are based on approved technical data (A–76–116); (2) review applicability of AD 72–21–07 for PA 23 models other than the –250 and extend the applicability as necessary (A–76–117); (3) alert GADO inspectors and holders of Inspection Authorizations to the interrelationship between configuration modifications, possible associated stability problems, and weight and balance changes which can require control system changes—Ref. 8310.4A, Paragraph 68, e (A–76–118); and (4) remind the holders of Inspection Authorizations of FAR Part 43.5(a)(4) which requires recording of weight and balance changes resulting from aircraft alterations (A–76–119). Recommendations A–76–116 and A–76–117 are Class I, asking urgent followup; A–76–118 and A–76–119 are Class II, for priority followup.

A Class I recommendation, A–76–120, was issued to the FAA by letter of August 13, after the Safety Board learned that the provisions of 14 CFR 121.318, which require an operational public address system aboard airplanes with a seating capacity of more than 19 passengers, are being negated by modifications to aircraft master minimum equipment lists. The Safety Board urges that the master minimum equipment lists of passenger-carrying airplanes be standardized to require that the public address system be operable from the cockpit and from at least one flight attendant station at all times.

Pipeline Safety Recommendations.—Four recommendations—two, Nos. P–76–43 and P–76–44, to Lehigh Utilities, Inc., of Lehigh Acres, Florida, and two, Nos. P–76–45 and P–76–46, to the U.S. Department of Transportation—were issued on August 11 by the Safety Board following investigation of the rupture of a 1,000-gallon liquefied petroleum gas (LPG) tank owned by Lehigh Utilities. The accident occurred last March 23 in a residential neighborhood of Lehigh Acres. The Safety Board's investigation disclosed that a truck had backed over the buried LPG tank and had struck the tank's manhole, which extended 12 to 14 inches above ground level. The impact ruptured the tank's fill pipe, its relief valve, and its liquid-level gauge. The escaping liquid vaporized, formed a white, fog-like cloud near the ground, and ignited. The ensuing fire and explosion killed one person, destroyed one truck, and damaged another. The Safety Board's recommendations are that Lehigh Utilities, on an "urgent followup basis," (1) mark the location of all buried LPG tanks, which may be damaged by vehicles, to alert drivers that they are driving near a buried tank (P–76–43), and (2) protect the manhole of and piping connections to all LPG tanks which may be damaged by vehicles (P–76–44).

In the letter to the Secretary of Transportation, the Safety Board noted that the Department's Office of Pipeline Safety Operations (OPSO) has not determined whether OPSO has jurisdiction over LPG tanks which are connected to pipeline systems. This jurisdictional problem might be detrimental to the safety of persons who live adjacent to these systems since operators of the systems may be unsure whether 49 CFR 192 applies to their systems. The Board stated that the impact of this problem is great since there are hundreds of such systems in Florida and thousands in the Nation. Accordingly, the Board recommended that OPSO (1) clarify its jurisdiction with respect to LPG tanks which are connected to a pipeline system that transports LPG vapor (P–76–45), and (2) modify the exemption from 49 CFR 192 for pipelines with less than 10 customers to include systems that have pipeline facilities which expose a substantial

V 41 162
AUG 19 76
UMI

part of a community or neighborhood to a potential hazard. (P–76–46). Priority followup is asked for both recommendations.

Letters in Response to Safety Board Recommendations.—Addressees of earlier Board recommendation letters in the aviation, marine, highway, and railroad transportation modes have recently supplied responses as follows:

Federal Aviation Administration letter of August 2 is in response to recommendations A–76–20 through A–76–28 concerning chemically generated, passenger emergency supplemental oxygen systems. (See 41 FR 18730, May 6, 1976.) FAA does not concur with recommendation A–76–20 which asked that supplemental oxygen systems have readily discernable means to indicate that oxygen is flowing. FAA states that a flow detector to be recognizable to passengers would need to be very sensitive and reliable to indicate the extremely low oxygen flow rate of the lower cabin altitudes. Regardless of flow indicators, according to FAA, at low cabin altitudes, lay passenger may not be aware that they are receiving a normal flow of oxygen, and the current reservoir bag will give a good flow indication as the cabin altitude is increased to the higher levels where the need for supplemental oxygen is greatest. FAA suggests that as an alternative, means may have to be developed to acquaint passengers regarding oxygen flow by way of cabin crew briefing/or briefing cards/or placards.

Concerning A–76–21 and A–76–22, FAA does not concur that the absence of headband adjustment tabs is a hazardous condition. The FAA does feel that the proposal to "AD" all masks with adjustable tabs, now in service and in stock, is essential to safety in view of the fact that the proper procedure for mask use is to first, handhold the mask over the nose and mouth; then, for comfort, place the headband over one's head and adjust. FAA is working with the Society of Automotive Engineers in the revision of TSO–C64, and will consider inclusion of adjustable tabs on those masks where applicable.

Concerning A–76–23, FAA notes that service life and periodic inspection requirements for oxygen mask reservoir bans are now being met. FAA indicates that action is being taken to determine what inspection procedures are being used by the airline for the total fleet, since the plastic reservoir bag is common to other aircraft as well as the DC–10 and L–1011. FAA concurs in recommendations A–76–24 through A–76–26, noting that an Air Carrier Operations Bulletin will be issued and incorporate guidance material relative to: Crewmember training in the operational characteristics of chemically generated passenger supplemental oxygen systems on DC–10 and L–1011 aircraft; improved passenger briefings and printed instructions on the use of the subject system; and review and evaluation of oral briefings and passenger safety information cards to assure the incorporation of clear, factual data on the use of the subject system. FAA plans to issue an operations bulletin covering these recommendations.

Specific to A–76–27, FAA indicates that it is not clear as to what the Safety Board expects as an end product in recommending development of standards for using "accepted human factors engineering principles and system design concepts in the design of passenger supplemental oxygen systems." FAA states, "Human factors are the prime consideration in the design of systems such as oxygen systems. We cannot see that these considerations were neglected in the DC–10 or L–1011 systems." Regarding A–76–28—to develop standards for type certification demonstration tests—FAA does not believe that there is a need for any additional demonstration since this is covered at the time of aircraft certification under provisions of 25.1301(d). "If a system is new and novel, then we will consider whatever additional tests may be required in the form of special conditions," FAA stated.

FAA letter of August 3 relates to recommendations A–76–71 and A–76–72 concerning surveillance of certificated repair stations. (See 41 FR 22427, June 3, 1976.) FAA states, re A–76–71, that it is currently revising the procedures used for certification and surveillance of certificated repair stations, and that review of the random sampling findings in the program now being conducted indicates need for improvement of surveillance techniques and inspection procedures used by certificated repair stations. According to FAA, a complete revision of its order, used by field inspectors during certification and surveillance of repair stations, is in progress. Regulatory changes are also being considered to improve repair station inspection systems. Re A–76–72, calling for FAA review of policies relative to users' compliance with manufacturers' service bulletins which may have safety of flight implications and issuance of AD's soon after service difficulties are discovered, FAA states that it continually monitors and evaluates service difficulties. According to FAA, as soon as it has been determined that an unsafe condition exists in a particular product and if this condition is likely to exist or develop in another product of the same type, it is current FAA practice to implement corrective action through the issuance of an airworthiness directive.

United States Coast Guard letter of August 6 provides an update on recommendation 71–M–20 which was issued as a result of the Safety Board's special study, "Effectiveness of Investigation of Recreational Boating Accidents" (NTSB–MSS–71–7, released August 24, 1971). The letter indicates that Coast Guard and State officials investigating boating accidents are according high priority to developing information which will be useful in formulating preventive measures. Such information includes: Detailed description of the boat and its equipment; weather and sea conditions, including wave length and height, forecasted weather, if weather forecast was known or sought, and methods of dissemination of weather forecast; and the operator's experience in boating and boating safety courses completed by the operator, swimming ability of persons involved, the reason for the boating trip, physical condition of occupants, and maintenance of an adequate lookout. The Coast Guard's Boating Accident Investigator's Manual (CG–472) has been completed and was distributed for use on June 25, 1976.

Coast Guard letter of August 6 addresses recommendation 72–M–20 which was issued as a result of the Board's special study "Analysis of the Safety of Transportation of Hazardous Materials on the Navigable Waters of the United States" (NTSB–MSS–72–2, released May 22, 1972). The recommendation asked for revision of regulations concerning qualifications of tankerman and licensed officers who handle extremely hazardous materials to require special qualifications and endorsements for these specific materials. Coast Guard indicates that the notice of proposed rulemaking spoken to in its response of last November 24 (40 FR 57726, December 11, 1975) is in its final drafing stages, publication expected by the end of this year.

National Highway Traffic Safety Administration letter of August 6 concerns recommendations H–76–25 and H–76–26 resulting from the Board's special investigation of the Metropolitan Coach Corporation charter bus accident last October 12 in Bethesda, Maryland. (See 41 FR 30215, July 22, 1976.) NHTSA concurs with recommendation H–76–25, stating that its programmed research effort for FY 77 includes the initiation of traction evaluation of commercial type tires, and that its FY 78 research budget indicates that traction has the highest priority within NHTSA's tire research program. NHTSA states, "The elimination of poor traction and safety-related subsystem parameters that may cause or contribute to motor vehicle accidents is the ultimate objective of this research effort." But, NHTSA adds, "Unfortunately, the current state-of-the-art of traction testing for vehicle tires other than passenger car types has not progressed as well as passenger care tire methodology." NHTSA also concurs with recommendation H–76–26, calling for a Federal Motor Vehicle Safety Standard to require a minimum frictional coefficient for all commercial motor vehicle tires. The letter indicates that amendment of NHTSA's Federal Motor Vehicle Safety Standard 119, "New Pneumatic Tires for Vehicles Other than Passenger Cars," will be the first major upgrading since the effective date of March 1975. The research program will be the pacing item for the promulgation of minimum traction requirements, according to NHTSA.

Massachusetts Bay Transportation Authority (MBTA), letter of August 5, and *Port Authority Trans-Hudson Corporation* (PATH), letter of July 30, concern automatic train control—recommendations R–76–42 through R–76–44. (See 41 FR 34125, August 12, 1976.) MBTA said that, although it has an automatic train operation-automatic train control (ATO–ATC) operation on its South Shore extension, the operation is strictly "manual block operation," and it is not necessary to remove trains from service with ATO–ATC or cab signal failures en route, as the manual block operation provides adequate protection. MBTA presently has an adequate radio communication system for operational control and all rapid transit trains are equipped with two-way radio communication. MBTA states that procedures for radio communications have been developed and employees are periodically instructed in these procedures.

PATH's letter states that as its trains are not operated with automatic train control or cab signals, the recommendations are not applicable to the Corporation.

Safety Board Letters in Reply to Recommendation Responses.—

To Coast Guard, Board letter of August 11 is in reply to Coast Guard's letter of July 20, and indicates that recommendations M–74–7 and M–74–8 will be continued in open status until Coast Guard advises the Board of publication of standards and "A Guide to Safety in Towing." (See 41 FR 32796, August 5, 1976.)

To Materials Transportation Bureau, Board letter of August 10 is in reply to MTB's letter of July 19, and indicates that recommendations P–75–7 and P–75–8 which related to the June 9, 1974, pipeline accident near Bealeton, Virginia, will be held in open status by the Board pending MTB's evaluation.

The accident reports, the safety recommendation letters, and the press release herein referred to are available to the general public; single copies may be obtained without charge. Copies of the letters responding to recommendations, and Safety Board replies thereto, may be obtained at a cost of $4.00 for reproduction. All requests must be in writing, identified by report or recommendation number and date of publication of this FEDERAL REGISTER notice. Address inquiries to: Publications Unit, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of the accident reports may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93–633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1907)).)

MARGARET L. FISHER,
Federal Register Liaison Officer.

National Highway Traffic Safety Administration

NATIONAL HIGHWAY SAFETY ADVISORY COMMITTEE

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I), notice is hereby given of a meeting of the National Highway Safety Advisory Committee to be held on September 8, 9 and 10, 1976, at the DOT Headquarters Building, 400 Seventh Street, SW., Washington, D.C.

The agenda for this meeting is as follows:

On September 8, 1976, at 8:30 a.m., in room 2230, there will be a briefing for new members on the organization and structure of the Department and the highway safety programs and standards, followed at 9:40 a.m., with a general session for the full Advisory Committee with the following agenda:

Briefings on the proposed National Data Center
Briefing on Highway Safety Standards Revision
Briefing on Evaluation of Standards under Section 402, Title 23

Also on September 8, 1976, from 10:45 a.m. until 12:30 p.m., and from 1:30 p.m. until 2:30 p.m., in room 6200, there will be a meeting of the Adjudication and Alcohol Subcommittee, with the following agenda:

Status of April 1 Adjudication Task Force Report
Report of July 16 Meeting with Deputy Secretary John Barnum on April 1 Task Force Report
Alcohol Safety Adjudication and Referral Plan
Subcommittee's Long-Range Plans
New Business—Old Business

Further, on September 8, 1976, from 2:30 p.m. until 5:00 p.m., in room 2230, there will be a meeting of the Driver Subcommittee, with the following agenda:

Report on Pedalcyclist Standard
Briefing on Driver Behavior Research
Review of April Subcommittee Resolutions
New Business—Old Business

On September 9, 1976, from 8:30 a.m. until 12:30 p.m., in room 2230, there will be a meeting of the Highway Environment Subcommittee, with the following agenda:

Briefing on Rail-Highway Grade Crossing Problem
Discussion of Plans for Site Visit to Division Safety Coordinators
Long-Term Safety Issues—Subcommittee Positions
New Business—Old Business

Also on September 9, 1976, from 1:30 p.m. until 5:00 p.m., in room 6200, there will be a meeting of the Vehicle Subcommittee, with the following agenda:

Update on Proposed Standard on Motorized Bicycles
Discussion of International Laws on Motorized Bicycles
Discussion of 55 MPH Speed Limit—Committee Contribution to Achieving Compliance
Status of Standards Revision—Specifically PMVI and Motor Vehicle Registration
Presentation on Severity of Heavy Truck Accidents (1971–75 Data)
New Business—Old Business

On September 10, 1976, beginning at 9:00 a.m. and adjourning at noon, in room 2230, the full Committee will meet with the following agenda:

Swearing in of New Members
Report of Adjudication and Alcohol Subcommittee
Report of Driver Subcommittee
Report of Highway Environment Subcommittee
Report of Vehicle Subcommittee
New Business—Old Business

The meeting is subject to the approval of the Secretary of Transportation. Attendance is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Additional information may be obtained from the NHTSA Executive Secretary, Room 5215, 400 Seventh Street, SW., Washington, D.C. 20590, telephone 202–426–2872.

Any member of the public may present a written statement to the Committee at any time.

The National Highway Safety Advisory Committee is composed of 35 members appointed by the President in accordance with the Highway Safety Act of 1966 (23 U.S.C. 401 et seq.). The Committee consists of representatives of State and local governments, State legislatures, public and private interests contributing to, affected by, or concerned with highway safety, other public and private agencies, organizations, and groups demonstrating an active interest in highway safety, and research scientists and other experts in highway safety.

The Advisory Committee advises, consults with, and makes recommendations to the Secretary of Transportation on matters relating to the activities of the Department in the field of highway safety. The Committee is specifically authorized (1) to review research projects or programs, and (2) to review, prior to issuance, standards proposed to be issued by the Secretary under the national highway safety programs. Issued in Washington, D.C. on August 13, 1976.

WM. H. MARSH,
Executive Secretary.

[FR Doc.76–24177 Filed 8–18–76;8:45 am]

FEDERAL RESERVE SYSTEM

DAKOTA BANCORPORATION

Acquisition of Bank

Dakota Bancorporation, Rapid City, South Dakota, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 80 percent or more of the voting shares of First National Bank of Crosby, Crosby, North Dakota, a proposed new bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Dakota Bancorporation is also engaged in the following nonbank activities: general insurance agency activities. In addition to the factors considered in section 3 of the Act (banking factors), the Board will consider the proposal in the light of the company's nonbanking activities and the provisions and prohibitions in section 4 of the Act (12 U.S.C. 1843).

V 41 162
AUG 19 76
UMI

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than September 7, 1976.

Board of Governors of the Federal Reserve System, August 13, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-24326 Filed 8-18-76;8:45 am]

M & D HOLDING CO.

Formation of Bank Holding Company

M & D Holding Company, Spring Lake Park, Minnesota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 92 percent or more of the voting shares of First State Bank of Spring Lake Park, Spring Lake Park, Minnesota. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 9, 1976.

Board of Governors of the Federal Reserve System, August 13, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-24327 Filed 8-18-76;8:45 am]

TENNESSEE NATIONAL BANCSHARES, INC.

Order Approving Acquisition of Banks

Tennessee National Bancshares, Inc., Maryville, Tennessee, a bank holding company within the meaning of the Bank Holding Company Act, has applied in two separate applications for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of Citizens State Bank, McMinnville, Tennessee ("McMinnville Bank") and Bank of Cannon County, Woodbury, Tennessee ("Woodbury Bank").[1]

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired and the Board has considered the applications and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the fourteenth largest banking organization in Tennessee, controls two banks with aggregate deposits of $77.7 million, representing 0.6 percent of the total deposits in commercial banks in the State.[2] Acquisition of McMinnville Bank (deposits of $9.0 million) and Woodbury Bank (deposits of $4.3 million) would not result in a significant increase in the concentration of banking resources in the State.

Woodbury Bank is the second largest of four banks located in the Cannon County banking market, and controls 14 percent of market deposits. McMinnville Bank is the third largest of four banks located in the Warren County banking market, which is southeast of Cannon County, and controls 9 percent of market deposits. Applicant's nearest subsidiary is in Maryville, 130 miles from Woodbury Bank and 155 miles from McMinnville Bank. Although Woodbury Bank and McMinnville Bank are 21 miles apart and operate in contiguous markets, neither derives a significant amount of loans or deposits from the service area of the other. In view of the substantial distances involved and the number of other banks in the relevant markets, it is the Board's judgment that approval of these applications would not have any significant adverse effects on competition in any relevant area.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, Woodbury Bank and McMinnville Bank are regarded as satisfactory, particularly in view of Applicant's commitment to provide additional capital to McMinnville Bank and to strengthen the managements of each of the banks. Therefore, banking factors are regarded as being consistent with approval. As a result of affiliation with Applicant, Banks will be able to expand and improve the services offered to the public. Therefore, factors relating to the convenience and needs of the community to be served lend weight for approval. It is the Board's judgment that the proposed acquisitions would be in the public interest and that the applications should be approved.

On the basis of the record, the applications are approved for the reasons summarized above. The transactions shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[3] effective August 13, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-24325 Filed 8-18-76;8:45 am]

[1] Banks were subsidiaries of Hamilton Bancshares, Inc., Chattanooga, Tennessee, which is now in bankruptcy.

[2] Unless otherwise indicated, all banking data are as of December 31, 1975.

[3] Voting for this action: Chairman Burns and Governors Wallich, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Governor Gardner.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COTTON, WOOL AND MAN-MADE FIBER APPAREL FROM HONG KONG

Export Visa Requirement

AUGUST 16, 1976.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of July 25, 1974, as amended, between the Governments of the United States and Hong Kong, the Government of Hong Kong has undertaken to limit the export of cotton, wool and man-made fiber textile products to the United States to certain designated levels. Pursuant to Paragraph 13 of this agreement, the Governments of the United States and Hong Kong have established an administrative mechanism intended to preclude circumvention of the licensing system for exports to the United States of cotton, wool and man-made fiber apparel, produced or manufactured in Hong Kong. The purpose of this notice is to announce the implementation of the administrative mechanism.

Effective on September 6, 1976, entry into the United States for consumption and withdrawal from warehouse for consumption of any cotton, wool and/or man-made fiber apparel in Categories 39–63, 111–125, and 214–240, produced or manufactured in Hong Kong and exported from Hong Kong on and after that date, for which Hong Kong has not issued a visa, will be prohibited. Shipments of cotton, wool and/or man-made fiber apparel in Categories 39–63, 111–125, and 214–240 which have been exported from Hong Kong before September 6, 1976 will not be denied entry until December 6, 1976.

The export visa requirement will not apply to shipments that are valued at $250 or less.

The visa will be a signed copy of the Hong Kong Export License (Textiles), Forms 4 or 5, stamped on the front side, "Approved for Export to the U.S.A." Facsimiles of both forms accompany this notice.

Interested parties are advised to take all necessary steps to insure that cotton, wool and man-made fiber apparel, produced or manufactured in Hong Kong, which is to be entered into the United States for consumption or withdrawn from warehouse for consumption, will meet the stated requirement.

There is published below a letter of August 16, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs implementing the administrative mechanism.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS
August 16, 1976.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of July 25, 1974, as amended, between the Governments of the United States and Hong Kong, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on September 6, 1976 and until further notice, entry into the United States for consumption of cotton textile products in Categories 39–63; wool textile products in Categories 111–125; and man-made fiber textile products in Categories 214–240, produced or manufactured in Hong Kong and exported to the United States on and after that date for which Hong Kong has not issued an appropriate visa. Cotton, wool and/or man-made fiber textile products in the categories specified, produced or manufactured in Hong Kong and exported to the United States before that date, shall not be denied entry until December 6, 1976.

The export visa requirement will not apply to shipments that are valued at $250 or less.

The visa will be a signed copy of a Hong Kong Export License (Textiles), stamped on the front side, "Approved for Export to the U.S.A."

You are directed to permit entry into the United States for consumption and withdrawal from warehouse for consumption of designated shipments of cotton, wool and man-made fiber textile products, produced or manufactured in Hong Kong and exported to the United States, notwithstanding the designated shipment or shipments do not meet the aforementioned visa requirements, whenver requested to do so in writing by the Chairman of the Committee for the Implementation of Textile Agreements.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), as amended on December 31, 1975 (40 FR 60220).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Hong Kong and with respect to imports of cotton, wool and man-made fiber textile products from Hong Kong have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 602-2]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Proposed Revision of the New Jersey State Implementation Plan

On June 8, 1976 New Jersey submitted to EPA a proposed revision to the New Jersey State Implementation Plan. The revision request was submitted in accordance with all applicable EPA requirements as contained in 40 CFR Part 51 and consists of:

1. Amendments to State regulation, N.J.A.C. 7:27–8 "Permits and Certificates," and

2. A Public Hearing Report which evaluates testimony submitted by interested parties at the State public hearings held on August 11 and 12, 1975.

The amendments to N.J.A.C. 7:27–8 accomplish the following:

1. They clarify by modification the definition of two terms contained in Subsection 8.1, "Definitions." The existing and proposed definitions of these terms are as follows:

Existing Definition	*Proposed Definition*
"Particles" means any material, except uncombined water; which exists in finely divided form as liquid particles or solid particles at standard conditions.	"Particles" means any material, except uncombined water, which exists as liquid particles or solid particles at standard conditions.
"Stack or chimney" means a flue, conduit or opening designed and constructed for the purpose of emitting air contaminants into the outdoor air.	"Stack or chimney" means a flue, conduit or opening designed constructed, and/or utilized for the purpose of emitting air contaminants into the outdoor air.

2. They add to Subsection 8.1 definitions for three new terms as follows:

"Alteration" means any change made to equipment or control apparatus or the use thereof, or in a process; including but not limited to any physical change, change in material being processed or a change in the rate of production except where such a production rate change does not increase the quantity of air contaminant emitted or does not change the quality or nature of the air contaminant emitted.

"Equivalent stack diameter" means the diameter of a circular cross section having the same area as the non-circular cross sections at the point of emission discharge.

"Stack diameter" means the internal diameter of a circular stack at the point of emission discharge.

3. They clarify by modification the wording found at subparagraph (a)(5)(ii) of Subsection 8.2, "Permits and Certificates Required." The existing and proposed wording is as follows:

Existing Wording	*Proposed Wording*
Solid particles in finely divided or powdered form including, but not limited to, binders, fillers, foodstuffs, detergents, fluxes, catalysts, mineral wools, resins, plastics, pigments, construction materials and solid fuels; and having a capacity in excess of 2,000 cubic feet.	Solid particles including, but not limited to, binders, fillers, foodstuffs, detergents, fluxes, catalysts, mineral wools, resins, plastics, pigments, construction materials and solid fuels; and having a capacity in excess of 2,000 cubic feet.

4. They modify the wording found at subparagraph (e) of Subsection 8.3, "General Provisions." The existing and proposed wording is as follows:

Existing Wording	*Proposed Wording*
(e) No person shall use or cause to be used any equipment or control apparatus unless all components connected or attached to, or serving the equipment and/or control apparatus are functioning properly and are in use in accordance with the "Permit to Construct, Install or Alter Control Apparatus or Equipment" and "Certificate to Operate Control Apparatus or Equipment."	(e) No person shall use or cause to be used any equipment or control apparatus unless: 1. all conditions and provisions of the "Permit to Construct, Install or Alter Control Apparatus or Equipment" and "Certificate to Operate Control Apparatus or Equipment" are fulfilled, and 2. all components connected or attached to, or serving the equipment and/or control apparatus are functioning properly and are in use in accordance with the "Permit to Construct, Install or Alter Control Apparatus or Equipment" and Certificate to Operate Control Apparatus or Equipment."

The Region II Office of EPA has reviewed the State's rationale for this proposed revision, as presented in the Public Hearing Report, and has made the preliminary determination that it should be included as part of the New Jersey State Implementation Plan.

This notice is issued, as required by section 110 of the Clean Air Act, to advise the public that comments may be submitted on or before September 20, 1976 as to whether the proposed revision of N.J.A.C. 7:27–8 should be approved or disapproved. Only comments received during the 30-day public comment period hereby established will be considered. The Administrator's decision to approve or disapprove the proposed plan revision will be based on whether the revision meets the requirements of section 110 (a)(2)(A)–(H) of the Clean Air Act and EPA regulations in 40 CFR Part 51,

V 41 162 AUG 19 76 UMI

Copies of the proposed plan revision are available for public inspection during normal business hours at the Air Branch, EPA, Region II, 26 Federal Plaza, New York, New York 10007, and at the New Jersey State Department of Environmental Protection, Bureau of Air Pollution Control, John Fitch Plaza, Trenton, New Jersey 08625. Additional copies are available for inspection at the Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460. All comments should be addressed to the Regional Administrator, Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10007.

Dated: August 9, 1976.

ERIC B. OUTWATER,
Acting Regional Administrator,
Environmental Protection Agency.

[FRL 601-5; PP5G1627/T76]

PESTICIDE PROGRAMS

Extension of a Temporary Tolerance for the Pesticide Chemical Paraquet

On September 3, 1975, the Environmental Protection Agency (EPA) announced (40 FR 40574) that in response to a pesticide petition (PP 5G1627) submitted by Chevron Chemical Co., 940 Hensley St., Richmond CA 94804, a temporary tolerance was established for residues of the desiccant, defoliant, and herbicide paraquat (1,1'-dimethyl-4,4'-bipyridinium) derived from application of either the dichloride or the bis(methyl sulfate) salt, calculated in both cases as the cation, in or on the raw agricultural commodity dry beans at 05 part per million (ppm). This temporary tolerance is scheduled to expire August 28, 1976.

Chevron Chemical Co. has requested a nine-week extension of this temporary tolerance both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of an experimental use permit that is being extended concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act.

The scientific data reported and all other relevant material having been evaluated, it has been determined that an extension of the temporary tolerance will protect the public health, and it is concluded, therefore, that the temporary tolerance be extended on condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Chevron Chemical Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires October 31, 1976. Residues not in excess of 0.5 ppm remaining in or on dry beans after this expiration date will not be considered to be actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health.

Statutory Authority: Section 408(j) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346a(j)].

Dated: August 10, 1976.

JOHN B. RITCH, Jr.,
Director, Registration Division.

[FRL 601-8; OPP-50055A]

PERMIT TO CLEMSON UNIVERSITY

Issuance of Experimental Use

On January 28, 1976, the Environmental Protection Agency (EPA) announced in the FEDERAL REGISTER (41 FR 4063) the receipt of an application from Clemson University, South Carolina, for an experimental use permit allowing the use of a DDT formulation to evaluate the effectiveness of the formulation in controlling the cotton bollworm and the tobacco budworm (*Heliothis* spp.). Since the Administrator, EPA, determined that issuance of the permit might be of regional or national significance, interested parties were invited to submit written comments regarding the application. Approximately 30 comments were received; it was determined that no public hearing was necessary (40 CFR Part 172.11 (b)).

The comments were received from farmers, industrial organizations, State agencies, one Federal agency, non-profit organizations, and others. A concern common to all commenters was that sound scientific information must be developed to support sound pest management concepts. It was the consensus that the proposed program would generate data which might be useful; in fact, such data may provide both favorable and unfavorable comparisons regarding the use of the DDT/toxaphene/methyl parathion formulation. Since the cancellation of the use of DDT, there has been essentially no new information generated comparing DDT with insecticide formulations in current use.

A number of commenters objected to the proposed program on the grounds that it did not protect either man or the environment; the program has been modified to satisfy these objections, subsequently minimizing adverse effects. In addition, the program will allow only certified applicators in the State of South Carolina to apply the formulation.

Based on the comments received and other available information, and pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), an experimental use permit has been issued to Clemson University, Clemson, South Carolina 29631. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 38158-EUP-1) allows the use of DDT formulated in a mixture with toxaphene and methyl parathion (2:4:1). The quantity of material authorized is as follows: 95 pounds DDT; 190 pounds toxaphene; and 47.5 pounds methyl parathion. A total of 4 acres is involved; the program is authorized only in the State of South Carolina. The experimental use permit is effective from May 28, 1976, to May 28, 1977. Permanent tolerances for residues of the active ingredients in or on cottonseed have been established (40 CFR 180.121; 180.138; and 180.147). This permit is being issued solely for the purpose of using the subject insecticide formulation as a base line against which to evaluate the effectiveness of alternative pesticides for the control of the cotton bollworm and the tobacco budworm.

Interested parties wishing to review the experimental use permit are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., S.W. Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. This file will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: August 12, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

[FRL 601-7; OPP-30119]

PESTICIDE PROGRAMS

Receipt of Application To Register a Pesticide Product Containing a New Active Ingredient

Ottawa Chemical Div., Ferro Corp., 100 N. Wheeling St., Toledo OH 43605, has submitted to the Environmental Protection Agency (EPA) an application to register the pesticide product OTTAFORM 204 (EPA File Symbol 4026-A), containing 33.4% of the new active ingredient 1,3-di(hydroxyethyl)-5-(3-methoxypropyl)- s-hexahydrotriazine 1-(hydroxyethyl)-3,5-di (3-methoxypropyl)-s-hexahydrotriazine, and 23.5% of the new active ingredient 1,3,5-tris (3-methoxypropyl)-s-hexahydrotriazine which have not been included in any previously registered pesticide products. The application received from Ottawa Chem. Div., Ferro Corp. proposes that the product be classified for general use as a cutting oil preservative PM34

Application was made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 7 U.S.C. 136 et seq.), and the regulations thereunder (40 CFR 162). Notice of receipt of this application is made in accordance with the provisions of Section 3(c)(4) of FIFRA [40 CFR 162.2(b)(6)] and does not indicate a decision by the Agency on the application.

Any Federal agency or other interested persons are invited to submit written comments on this application to the Federal Register Section, Technical Services Division. (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. The comments must be received on or before September 20, 1976, and should bear a notation indicating the EPA File Symbol "4026-A." Comments received within the specified time period will be considered before a final decision is made with respect to the pending application. Comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific questions concerning this application should be directed to the designated Product Manager (PM), Registration Dvsiiion (WH-567), Office of Pesticide Programs, at the above address or by telephone at 202/426-9490.

Notice of approval or denial of this application to register OTTAFORM 204 will be announced in the FEDERAL REGISTER. The label furnished by Ottawa Chemical Div., Ferro Corp., as well as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4:30 p.m. Monday through Friday.

Dated: August 12, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

PESTICIDE PROGRAMS

Receipt of Application To Register a Pesticide Product Entailing a Changed Use Pattern

Thompson-Hayward Chemical Co., P.O. Box 2383, Kansas City KS 66110, has submitted to the Environmental Protection Agency (EPA) an application to register the pesticide product DIMILIN W-25 FOR SOYBEANS (EPA File Symbol 148-REAE), which contains 25.0% of the active ingredient N-[[(4-chlorophenyl) amino]-carbonyl]-2,6 - difluorobenzamide. The application received from Thompson-Hayward Chemical Co. proposes that the use pattern of this pesticide be changed from forest control of gypsy moth larvae to agricultural use to include control of velvetbean caterpillar, green clovermoth, and Mexican bean beetle larvae on soybeans. The application also proposes that the product be classified for general use. PM17

Application was made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 136 et seq.) and the regulations thereunder. Notice of receipt of this application is given in accordance with the provisions of section 3(c)(4) of FIFRA [40 CFR 162.2(b)(6)] and does not indicate a decision by this Agency on the application.

Any Federal Agency or other interested persons are invited to submit written comments on this application to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Room 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. The comments must be received on or before September 20, 1976, and should bear a notation indicating the EPA File Symbol "148-REAE." Comments received within the specified time period will be considered before a final decision is made with respect to the pending application. Comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific questions concerning this application should be directed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address or by telephone at 202/426-9425.

Notice of approval or denial of this application to register DIMILIN W-25 FOR SOYBEANS will be announced in the FEDERAL REGISTER. The labeling furnished by Thompson-Hayward Chemical Co. as well as all written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: August 12, 1976.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

[FRL 602-8; OPP-42022A]

VIRGIN ISLANDS

Approval of Territorial Plan for Certification of Pesticide Applicators

Section 4(a) (2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136b) and the implementing regulations of 40 CFR Part 171 require each State desiring to certify applicators to submit a plan for its certification program. Any State certification program under this section shall be maintained in accordance with the State Plan approved under this section.

On June 3, 1976, notice was published in the FEDERAL REGISTER (41 FR 22414) of the intent of the Regional Administrator, Environmental Protection Agency (EPA) Region II, to approve, on a contingency basis, the Virgin Islands Territorial Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides (Virginia Islands Territorial Plan). Contingency approval was requested by the Virgin Islands pending approval of implementing regulations Complete copies of the Virgin Islands Territorial Plan were made available for public inspection at the Bureau of Pesticides, Division of Natural Resources Management, Department of Conservation and Cultural Affairs, St. Thomas, U.S. Virgin Islands; Pesticides Branch, Environmental Programs Division, EPA Region II, New York, New York and the Federal Register Section, Technical Services Division, Office of Pesticide Programs, EPA Headquarters, Washington, D.C.

There were no comments received concerning the State Plan during the thirty (30) day public comment period.

The Virgin Islands Territorial Plan will remain available for public inspection at the Bureau of Pesticides, Division of Natural Resources Management, Department of Conservation and Cultural Affairs, Building 129, Subbase, Charlotte Amalie, St. Thomas, U.S. Virgin Islands.

It has been determined that the Virgin Islands Territorial Plan will satisfy the requirements of section 4(a)(2) of the amended FIFRA and of 40 CFR Part 171 if necessary implementing regulations are promulgated by the Department of Conservation and Cultural Affairs in accordance with and as prescribed in the Virgin Islands Territorial Plan. Accordingly, the Virgin Islands Territorial Plan is approved contingent upon approval of implementing regulations.

This contingency approval shall expire one (1) year from its effective date if these terms an dconsidtions are not satisfied by that time. On or before the expiration of the period of contingency approval, a notice shall be published in the Federal Register concerning the extent to which these terms and conditions have been satisfied, and the approval status of the Virgin Islands Territorial Plan as a result thereof.

Effective date, Pursuant to section 4(d) of the Administrative Procedure Act, 5 U.S.C. 553(d), the Agency finds that there is good cause for providing that the one year contingency approval granted herein to the Virgin Islands Territorial Plan shall be effective immediately. Neither the Virgin Islands Territorial Plan itself nor this Agency's contingency approval creates any direct or immediate obligations on pesticide applicators or other persons in the Virgin Islands. Delays in starting the work necessary to implement the plan, such as may be occasioned by providing some later effective date for this contingency approval, are inconsistent with the public interest. Accordingly, this contin-

V 41 162 AUG 19 76 UMI

gent approval shall become effective immediately.

Dated: August 12, 1976.

GERALD M. HANSLER,
Regional Administrator, U.S. Environmental Protection Agency, Region II.

[FCC 76-774]

FEDERAL COMMUNICATIONS COMMISSION

TARIFF FILINGS

Temporary Procedures

AUGUST 13, 1976.

On August 4, 1976, the President signed Pub. L. 94-376. This legislation, sponsored by the Commission, amends sections 203 and 204 of the Communications Act which involve the regulation of communications common carriers. In general the new legislation: 1) Establishes a 90 day period for public notice of proposed tariff changes: 2) extends the period for suspension of new or revised tariff provisions from three to five months; 3) authorizes the Commission to allow part of a tariff filing to go into effect; and 4) gives the Commission authority to allow tariff filings to go into effect temporarily pending a further order.

Although this legislation became effective upon the President's signature, it would be appropriate to allow the carriers a short period of time in which to adjust to this increase in the period for public notice of proposed tariff changes. Substantial confusion could result from the failure to allow for such a period of adjustment. Thus, in order to ensure the orderly transaction of the Commission's business, the carriers are hereby authorized to continue the use of the periods for public notice specified in Part 61 of the Commission's rules through August 31, 1976. Tariff filings made on or before this date will not be rejected as unlawful for failure to provide for 90 days public notice. However, the Commission reserves the right, through the Chief, Common Carrier Bureau, to require the extension, in individual cases, of the effective date of tariff filings made during this interim period so as to allow 90 days public notice. All tariff changes filed after August 31, 1976 are to provide for 90 days public notice until the Commission has an opportunity to revise its Rules to specify appropriate periods of public notice for various types of tariff filings. During this period Special Permissions will continue to be granted, as provided in Part 61 of the Commission's rules, to allow the carriers to file tariff changes on less than the full statutory notice for good cause shown. In all other respects, the Commission will begin to exercise immediately the new authority granted to it by this legislation.

Our action in this regard is consistent with section 203(b)(2) of the Communications Act, as amended by Pub. L. 94-376 which states that

[t]he Commission may, in its discretion and for good cause shown, modify any requirement made by or under the authority of this section either in particular instances or by general order applicable to special circumstances or conditions except that the Commission may not require the notice period specified in paragraph (1) to be more than ninety days.

Action by the Commission August 13, 1976. Commissioners Wiley (Chairman), Lee, Hooks and Washburn.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

CONSTRUCTION ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Construction Advisory Committee will meet Wednesday, September 8, 1976, at 10 a.m., Room 5041B, FEA Headquarters, 12th and Pennsylvania Avenue, NW., Washington, D.C.

The Committee was established to advise the Administrator, FEA, with respect to the interests and problems of the construction industry as they relate to the policy and implementation of programs to meet the current and continuing national energy shortage.

The agenda for the meeting is as follows:

1. FEA EPCA Programs
   a. Materials Allocation
   b. Conservation Programs
   c. Energy Supply & Environmental Coordination Act
2. Impact of Clean Air Act Amendments
3. NSF/ERDA/FEA Model of Projected Construction Resources
4. Solar Heating and Cooling
5. Socio-Economic Impact Financing
6. Reports by Subcommittees
   a. Energy Conservation
   b. Oil and Gas Regulation
   c. Construction Labor Availability
   d. Construction Material Availability
   e. Central Clearinghouse for Construction Projects

Subcommittees may meet informally in Washington, D.C. the preceding evening, at the discretion of the Subcommittee Chairmen; the meetings will be open to the public. For further information on Subcommittee activities, call Lois G. Weeks, Director, Advisory Committee Management, at (202) 961-7022.

The Committee meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform the Director, Advisory Committee Management, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection in the Freedom of Information Office, Room 2107, Federal Energy Administration, 12th and Pennsylvania Avenue, NW., Washington, D.C.

Issued at Washington, D.C., on August 16, 1976.

MICHAEL F. BUTLER,
General Counsel.

[FR Doc.76-24337 Filed 8-16-76;3:53 pm]

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Extension of Comment Period Concerning Draft Environmental Impact Statement on Coal Conversion at Schiller Generating Station

The Federal Energy Administration (FEA) announced by notice in the FEDERAL REGISTER of July 1, 1976 (41 F.R. 27127), the availability to the public of a draft environmental impact statement concerning the issuance of a Notice of Effectiveness to powerplants number 4 and 5 of the Schiller Generating Station, owned by the Public Service Company of New Hampshire and located in Portsmouth, New Hampshire. The Notice of Effectiveness would make effective a prohibition order issued to the powerplants on June 30, 1975, under the authority of Section 2 of the Energy Supply and Environmental Coordination Act of 1974. The order would prohibit the burning of petroleum products or natural gas by the powerplants as their primary energy source.

The notice invited the submission of written data, views, or arguments concerning the draft impact statement, but stipulated that they should be received by FEA by August 15, 1976, in order to receive full consideration. The FEA hereby extends the period of comment to August 31, 1976; all comments received by that date will receive full consideration in the drafting of the final environmental impact statement.

Persons desiring to submit comments with respect to the draft statement should direct them to Executive Communications, Room 3309, Federal Energy Administration, Box HT, Washington, D.C. 20461. Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation "Draft EIS—Schiller Generating Station." Fifteen copies should be submitted.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., August 16, 1976.

MICHAEL F. BUTLER,
General Counsel,
Federal Energy Administration.

[FR Doc.76-24283 Filed 8-16-76;11:44 am]

DISTRIBUTION AND TRANSPORTATION SUBCOMMITTEE OF THE FOOD INDUSTRY ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Distribution and Transportation Subcommittee of the Food Industry Advisory Committee will meet Friday, September 10, 1976, 1:30 p.m., Room 5041B, FEA Headquarters, 12th & Pennsylvania Avenue, NW., Washington, D.C.

The objectives of this Subcommittee are to make recommendations to the parent Committee with respect to matters concerning food industry aspects of FEA policies and programs falling within the interests of this Subcommittee.

The agenda for the meeting is as follows:

1. Discussion of cost justified backhaul issue
2. Review of ICC Mitre Study, "Preliminary Assessment of Empty Miles Traveled by Selected Regulated Motor Carriers," January 1976
   a. Relationship to section 382(a)(3) of EPCA
   b. General outline and time schedule
3. Progress report on ICC "Motor Carrier Empty/Loaded Survey"
4. Proposed recommendations to FEA
5. General discussion—public comment

The meeting is open to the public. The Chairman of the Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management (202) 961-7022, at least 5 days prior to the meeting and reasonable provisions will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection in the Freedom of Information Office, Room 2107, Federal Energy Administration, 12th and Pennsylvania Avenue, NW., Washington, D.C.

Issued at Washington, D.C. on August 16, 1976.

MICHAEL F. BUTLER,
General Counsel.

[FR Doc.76-24338 Filed 8-16-76;3:45 pm]

[Docket OFU-047, Edge Moor Powerplant No. 4]

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT OF 1974

Issuance of Order Modifying Prohibition Order

On June 1, 1976, the Federal Energy Administration (FEA) published in the FEDERAL REGISTER (41 F.R. 22132) a notice of its intention to modify the prohibition order issued to powerplant No. 4 at the Edge Moor Generating Station, which is owned and operated by the Delmarva Power and Light Company, located in Wilmington, Delaware. The notice invited interested persons to submit written data, views and arguments regarding the proposed order of modification.

After evaluating the comments received, the FEA has determined to issue the order of modification substantially as proposed, and such order was issued on August 16, 1976. The modification will permit the burning of petroleum products by powerplant No. 4 to the extent necessary to permit the undertaking of a solid waste energy and materials recovery project, known as the Delaware Reclamation Project, designed to demonstrate the feasibility of co-firing processed solid waste with fuel oil in existing steam-electric boilers.

Issued at Washington, D.C., August 16, 1976.

MICHAEL F. BUTLER,
General Counsel.

GOVERNMENT POLICIES & REGULATIONS SUBCOMMITTEE OF THE LP-GAS INDUSTRY ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Government Policies and Regulations Subcommittee of the LP-Gas Industry Advisory Committee will meet Wednesday, September 15, 1976, at 9 a.m., in the Founders Room, Mayo Hotel, 115 West 5th Street, Tulsa, Oklahoma.

The Subcommittee was established to make recommendations to the parent Committee with respect to policy and implementation of programs that affect the LP-Gas industry.

The agenda for the meeting is as follows:

1. Organizational Structure of Government Policies and Regulations Subcommittee of the LP-Gas Industry Advisory Committee
2. Review of Current Allocation and Pricing Regulations on Propane, Butane, and Natural Gas Liquids and Recommended Changes—Administrative and Legislative
3. Selective Exemption of Controlled Products in Item 2 Above From Pricing and/or Allocation Regulations

The meeting is open to the public. The Chairman of the Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management (202) 961-7022, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection in the Freedom of Information Office, Room 2107, Federal Energy Administration, 12th and Pennsylvania Avenue, NW., Washington, D.C.

Issued at Washington, D.C., on August 16, 1976.

MICHAEL F. BUTLER,
General Counsel.

[FR Doc.76-24336 Filed 8-16-76;3:53 p.m.]

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

NOTICE OF COMMITTEE MEETINGS

Pursuant to the provisions of section 10 of Public Law 92-463, effective January 5, 1973, notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on: Thursday, September 2, 1976, Thursday, September 9, 1976, Thursday, September 30, 1076.

The meetings will convene at 10 a.m. and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street NW., Washington, D.C.

The committee's primary responsibility is to study the prevailing rate system and from time to time advise the Civil Service Commission thereon.

At these scheduled meetings, the committee will consider proposed plans for implementation of Public Law 92-392, which law establishes pay systems for Federal prevailing rate employees.

The meetings will be closed to the public on the basis of a determination under section 10(d) of the Federal Advisory Committee Act (Public Law 92-463) and 5 U.S.C., section 552(b)(2), that the closing is necessary in order to provide the members with the opportunity to advance proposals and counter-proposals in meaningful debate on issues related solely to the Federal Wage System with the view toward ultimately formulating advisory policy recommendations for the consideration of the Civil Service Commission.

However, members of the public who wish to do so, are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the committee's attention. Additional information concerning these meetings

V 41 N 162 AUG 19 76 UMI

may be obtained by contacting the Chairman, Federal Prevailing Rate Advisory Committee, Room 1338 1900 E Street, NW., Washington, D.C. 20415.

DAVID T. ROADLEY,
Chairman, Federal Prevailing Rate Advisory Committee.

AUGUST 16, 1976.

FEDERAL POWER COMMISSION

[Docket No. CP70-196; CP73-135, et al.]

DISTRIGAS CORP. AND DISTRIGAS OF MASSACHUSETTS

Hearing

In accordance with the Commission's Order in the above captioned proceeding issued August 12, 1976, a hearing session is hereby scheduled to commence at 9:30 a.m. on September 3, 1976 at the U.S. Tax Court, U.S. Customs House, 2 India Street, Boston, Mass. 02109.

This session will cover submittals • • • "concerning the LNG tanks proposed to be constructed in Docket No. CP74-137, and related activities proposed in Docket Nos. CP70-196, CP73-135, and CP74-227 • • •"

Interested parties may make submittals in the form of unsworn statements of position or opinion which may be read or copied into the record in order to reflect the concerns of local citizens with the safety and environmental impacts of the project. However, the unsworn statements will be considered as opinions, but not as evidence in the proceeding, unless the submittals are made under oath and an opportunity is accorded all parties for cross-examination thereon. Sworn submittals, if any, should be mailed to the parties in the Distrigas case by August 27, 1976.

This notice is to be published in the FEDERAL REGISTER.

Dated this 13th day of August 1976 at Washington, D.C.

NAHUM LITT,
Presiding Administrative Law Judge.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt and Approval of a Proposed Report

A request for clearance of a proposed report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on July 23, 1976. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice is to inform the public of such receipt and the action taken by GAO.

FEDERAL ENERGY ADMINISTRATION

FEA requests emergency clearance of a new form FEA-P112-M-1: No. 2 Heating Oil Supply/Price Monitoring Report. This report is in response to a commitment made to Congress by the FEA to monitor price movements of No. 2 heating oil in the event decontrol of middle distillates was effected by Congress. Decontrol became effective July 1, 1976.

This report will be mailed to and required to be filled by a scientifically selected sample of 600 firms chosen from a universe consisting of refiners, retailers, resellers and reseller/retailers of No. 2 heating oil. The average response time is expected to be six hours per monthly report.

A detailed cover letter and the FEA-P112-M-1 form and instructions will be mailed to every selected firm. June data, which will establish the base month, will initially be reported telephonically to FEA. This data includes certain items from the cover page and Schedule A-1. During July, August and September the selected firms will report to FEA by telephone the estimated unit price for sales to residential customers and rack sales to other than ultimate consumers from Schedule A-1. During the same months and for June these firms will file the completed FEA-P112-M-1 according to the instructions. Beginning on approximately September 15, 1976, and ending April 1, 1977, FEA will conduct weekly telephonic surveys of the selected firms to determine the change in price of No. 2 heating oil during the winter heating season.

This information is collected under the authority vested in the Federal Energy Administration by Public Laws 93-159, 93-225, 93-319, and 94-163.

GAO accepted and reviewed FEA's emergency request and found no unnecessary duplication or excessive burden. Clearance was provided on August 5, 1976, under number B-181254 (RO388). The clearance expires June 30, 1979.

NORMAN F. HEYL,
Regulatory Reports, Review Officer.

[FR Doc.76-24320 Filed 8-18-76;8:45 am]

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following request for clearance of reports intended for use in collecting information from the public were received by the Regultory Reports Review Staff, GAO, on August 10, 1976. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC forms are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed form, comments (in triplicate) must be received on or before September 7, 1976, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, Room 5216, 425 I Street, NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-376-5425.

INTERSTATE COMMERCE COMMISSION

ICC requests clearance of a new confidential annual report supplement to the railroad annual report in accordance with the order of the Interstate Commerce Commission in Docket No. 36216 approved April 9, 1976. The disclosure of Federal income tax information will be filed by the following carriers:

Railroads (class I)
Electric railways
Express companies
Pipeline carriers
Refrigerated car lines
Motor carriers of property (class I)
Motor cariers of passengers (class I)
Inland and coastal waterways carriers (class A and B)
Maritime carriers
Freight forwarders (class A)

The annual report supplement will be filed by all carriers with annual operating revenues of $10 million, or more, subject to sections 20, 220, 313 and 412 of the Interstate Commerce Act. The supplemental report will enable the Commission to effectively evaluate and interpret the financial condition of the responding carriers. The tax information requested is readily available from tax returns and supporting information, therefore, any additional burden incurred will be insignificant. Reports are mandatory and shall be of a confidential nature and not available for public inspection. ICC estimates there are approximately 517 respondents and that the burden is four hours annually for each respondent.

ICC requests clearance of a revision of Railway Tax Accruals, railroad annual report Form R-1. ICC Order in Docket No. 36126 approved April 9, 1976, provides for the reinstatement of Schedule 350(c), Railway Tax accruals, Analysis of Federal Income Taxes. The additional information includes the distribution of tax expense and the method elected by carriers as provided in the Revenue Act of 1971, to account for the investment tax credit. The information will be available for public inspection in the annual report. ICC estimates there are 105 respondents and that the burden on the reinstated Schedule 350(c) will be 5 minutes per response.

NORMAN F. HEYL,
Regulatory Reports Review Staff.

[FR Doc.76-24318 Filed 8-18-76;8:45 am]

REGULATORY REPORTS REVIEW

Receipt and Approval of a Proposed Report

A request for clearance of a proposed report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on July 27, 1976. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice is to inform the public of such receipt and the action taken by GAO.

FEDERAL ENERGY ADMINISTRATION

Request for clearance on an emergency basis for a new form, P128-S-O, Reporting Form on Passthrough of Nonproduct Costs. The form will gather information to determine the extent to which deviations for the period January 1, 1975, through January 31, 1976, have occurred from the sequential recovery of non-product costs specified in the refiners passthrough rules contained in §§ 212.83(c), 212.87(b) and 212.83(d) of Title 10, Code of Federal Regulations of the EPCA (Pub. L. 94-163). The data collected will determine the cost consequences to purchasers of a proposed FEA class exception which would authorize the proportional cost recovery approach for refiners not constrained by FEA's profit margin limitation rule. The FEA estimated that there would be 141 respondents and the burden would average 2 hours per response.

According to FEA an emergency clearance of the form was necessary in order to prevent apparent serious adverse effects on the refinery and inventory levels of petroleum products. If refiners must continue to wonder if reductions in "banked costs" (or price rollbacks) will occur, they will be assuming tremendous risk if they now set prices based on thoses "banked costs." If a refiner is unwilling to assume the risk of using the "bank," its only alternative would be to cut back production, thus possibly causing shortages of gasoline during this peak demand period or increasing gasoline imports which is directly contrary to national policy.

GAO accepted FEA's emergency request and found no unnecessary duplication or excessive burden. Clearance was provided on August 3, 1976, under number B-181254 (S76032). The clearance expires September 30, 1976.

NORMAN F. HEYL,
Regulatory Reports, Review Officer.

[FR Doc.76-24319 Filed 8-18-76;8:45 am]

NATIONAL COMMISSION ON ELECTRONIC FUND TRANSFERS

PROVIDERS, REGULATORS AND USERS COMMITTEES

Change of Meeting Place

The Providers Committee, the Regulators Committee and the Users Committee of the National Commission on Electronic Fund Transfers, which were previously scheduled to meet in Philadelphia on August 25, 26 and 27, 1976, respectively, will meet instead at the Hunt Valley Inn, Shawan Road, Cockeysville, Maryland, which is near Baltimore. The dates of the meetings are unchanged. Each meeting begins at 9:30 a.m.

The Providers Committee will examine issues concerning access, use, ownership, and control of automated clearing house and point-of-sale switches. The Regulators Committee will begin an examination of the legal, technological, and operational questions that surround the issue of the potential competitive impact of electronic terminal devices in the delivery of financial services. The Users Committee will examine the major types of concerns that individual consumers may have regarding EFT systems and services.

Each meeting will be open to public attendance on a first-call basis to the extent that limited space permits. Any person interested in attending should first call Ms. Janet Miller at 202/254-7400 to check on the availability of space.

Dated: August 17, 1976.

HENRY POLMER,
Acting Advisory Committee Management Officer.

NATIONAL ENDOWMENT FOR THE HUMANITIES

ADVISORY COMMITTEE EDUCATION PANEL

Meeting

AUGUST 11, 1976.

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463) notice is hereby given that a meeting of the Education Panel will meet in Room 1025, 806 15th Street, N.W., Washington, D.C. at 9 A.M. to 5 P.M., on September 28 and 9 A.M. to 1 P.M., on September 29, 1976.

The purpose of the meeting is to review Institutional Grant applications submitted to the National Endowment for the Humanities for grants to educational institutions and non-profit organizations.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation on the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, N.W., Washington, D.C. 20506, or call area code (202) 382-2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

[FR Doc.76-24275 Filed 8-18-76;8:45 am]

ADVISORY COMMITTEE FELLOWSHIPS PANEL

Meeting

AUGUST 11, 1976.

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463) notice is hereby given that meetings of the Summer Seminars for College Teachers Panel will be held at 806 15th Street, N.W., room 314, Washington, D.C. on September 10, 11, 13, 15, 17, 18, 20, 24, and 25, 1976.

The purpose of the meetings is to examine dossiers of individuals recommended to the Endowment as possible seminar directors in the Summer Seminar program.

Because the proposed meetings will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meetings would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meetings to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, N.W., Washington, D.C., 20506, or call area code 202-382-2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-10]

COMMONWEALTH EDISON CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 17 to Facility Operating License No. DPR-2, issued to the Commonwealth Edison Company (the licensee), which revised Technical Specifications for operation of Unit No. 1 of the Dresden Nuclear Power Station (the facility) located in Grundy County, Illinois. The amendment is effective as of its date of issuance.

This amendment consists of changes to the Technical Specifications regarding the requirements for primary containment integrity.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 11, 1976, (2) Amendment No. 17 to License No. DPR-2, and (3) the Commission's concurrently issued Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 9th day of August, 1976.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.76-23979 Filed 8-18-76;8:45 am]

[Docket Nos. 50-237 and 50-249]

COMMONWEALTH EDISON CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 23 and 20 to Facility Operating License Nos. DPR-19 and DPR-25, respectively, issued to the Commonwealth Edison Company (the licensee), which revised Technical Specifications for operation of the Dresden Nuclear Power Station Units 2 and 3 (the facilities), located in Grundy County, Illinois. The amendments are effective as of their date of issuance.

These amendments revised the Technical Specifications to change the operating environment temperature limit for main steam isolation valve pilot valves from 150° F to 170° F.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for the amendments dated April 22, 1976, (2) Amendment No. 23 to License No. DPR-19, (3) Amendment No. 20 to License No. DPR-25, and (4) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Morris Public Library, 604 Liberty Street, Morris, Illinois 60451. A single copy of items (2) through (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this ninth day of August, 1976.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No 2, Division of Operating Reactors.

[Docket Nos. 50-254 and 50-265]

COMMONWEALTH EDISON CO. AND IOWA-ILLINOIS GAS & ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 29 and 28 to Facility Operating License Nos. DPR-29 and DPR-30, respectively, issued to the Commonwealth Edison Company (acting for itself and on behalf of the Iowa-Illinois Gas and Electric Company) which revised Technical Specifications for operation of the Quad Cities Nuclear Power Station Unit Nos. 1 and 2 (the facilities), located in Rock Island County, Illinois. The amendments are effective as of their date of issuance.

These amendments revised the Technical Specifications to change the operating environment temperature limit for main steam isolation valve pilot valves from 150° F to 170° F.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for the amendments dated April 22, 1976, (2) Amendment No. 29 to License No. DPR-29, (3) Amendment No. 28 to License No. DPR-30, and (4) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Moline Public Library, 504 17th Street, Moline, Illinois 60265. [Docket Nos. 50-254 and 50-265]

COMMONWEALTH EDISON CO. AND IOWA-ILLINOIS GAS AND ELECTRIC CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 26 and 27 to Facility Operating License Nos. DPR-29 and DPR-30, respectively, issued to Commonwealth Edison Company (acting for itself and on behalf of the Iowa-Illinois Gas and Electric Company), which revised Technical Specifications for operation of the Quad Cities Station Unit Nos. 1 and 2 (the facilities) located in Rock Island County, Illinois. The amendments are effective as of their date of issuance.

The amendments changed the surveillance frequency of the core and containment cooling system logic system functional tests from once each six months to once per each refueling outage.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for the amendments dated January 9, 1976, (2) Amendment Nos. 26 and 27 to License Nos. DPR-29 and DPR-30, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Moline Public Library, 504 17th Street, Moline, Illinois 60625. [Docket No. 50-335]

FLORIDA POWER & LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 7 to Facility Operating License No. DPR-67, issued to Florida Power & Light Company (the licensee), which revised Enclosure 1 of the license for operation of the St. Lucie Plant Unit No. 1 (the facility) located in St. Lucie County, Florida. The amendment is effective as of its date of issuance.

The amendment permits removal of the shutdown cooling system from operation for periods up to 4 hours in duration for inspections within the reactor vessel while the reactor is in the refueling mode. The authority is granted only through August 31, 1976, and is restricted by provisions of the amendment.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 30, 1976, and supplement dated August 3, 1976, (2) Amendment No. 7 to License No. DPR-67, and (3) the Commission's concurrently issued Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida 33450. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 5th day of August, 1976.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket No. 50-250]

FLORIDA POWER AND LIGHT CO.

Proposed Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-31 issued to Florida Power and Light Company (the licensee) for operation of the Turkey Point Nuclear Generating Unit No. 3, located near Dade County, Florida.

In accordance with the licensee's application for license amendment dated July 30, 1976, the proposed amendment would allow the installation of temporary fuel storage racks within the Turkey Point Nuclear Genreating Unit No. 3 spent fuel storage pool. The installation of these racks would increase the spent fuel storage pool capacity from 217 to 235 fuel assemblies. The temporary racks are expected to be needed for a period of less than one year.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By September 20, 1976, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the

V 41 162 AUG 19 76 UMI

proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Mr. Jack R. Newman, Esquire, Lowenstein, Newman, Reis & Axelrad, 1025 Connecticut Avenue, NW., Washington, D.C. 20036, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated July 30, 1976, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental & Urban Affairs Library, Florida International University, Miami, Florida 33199. The license amendment and the Safety Evaluation, when issued, may be inspected at the above locations and a copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 16th day of August 1976.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[Docket Nos. 50-516, 50-517]

LONG ISLAND LIGHTING CO. (JAMESPORT NUCLEAR POWER STATION, UNITS 1 AND 2)

Order Relating to the Evidentiary Hearing

Before the Atomic Safety and Licensing Board.

The evidentiary hearing will begin on August 24, 1976 at 9:30 a.m. in the Holiday Inn of Riverhead, Exit 72, Long Island Expressway, Riverhead Long Island, New York, to receive evidence regarding the application of the Long Island Lighting Company for a license to construct the proposed Jamesport Nuclear Power Station, Units 1 and 2. The hearing will proceed on successive week days, and will resume on August 31 and on September 7. No hearing will be held during the week of September 13th, but will be resumed, if necessary, on September 21st and on such other subsequent dates as may be ordered by the Atomic Safety and Licensing Board.

The public is invited to attend. Limited appearance statements will be accepted after opening statements by the parties have been concluded. Oral statements will be limited to ten (10) minutes each but written statements may be submitted without limitation on length.

Dated at Bethesda, Maryland, this 3d day of August 1976.

For the Atomic Safety and Licensing Board.

SHELDON J. WOLFE,
Chairman.

[Docket No. 50-289]

METROPOLITAN EDISON CO. ET AL.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 18 to Facility Operating License No. DPR-50 issued to Metropolitan Edison Company, Jersey Central Power and Light Company, and Pennsylvania Electric Company which revised Technical Specifications for operation of the Three Mile Island Nuclear Station, Unit 1, located in Dauphin County, Pennsylvania. The amendment is effective as of its date or issuance.

This amendment authorizes miscellaneous changes to the Environmental Technical Specifications. These changes involve (a) correction of typographical errors; (b) wording changes for clarification of intent; (c) administrative changes and titles; (d) location of radiological monitoring stations; (e) monitoring conditions; and (f) sensitivity of radiological analyses.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment submitted by letters dated January 31, July 31, August 21, September 4, and October 29, 1975, and (2) Amendment No. 18 to License No. DPR-50. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the State Library of Pennsylvania, Government Publications Section, Education Building, Harrisburg, Pennsylvania.

A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[Docket No. 50-245]

NORTHEAST NUCLEAR ENERGY CO. ET AL.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 29 to Provisional Operating License No. DPR-21 issued to Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company, which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 1, located in Waterford, Connecticut. The Amendment is effective as of its date of issuance.

The amendment will (1) delete the "Extended Maintenance" provision from the Technical Specifications and (2) revise the Limiting Conditions for Operation and License Restriction for the Isolation Condenser.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated April 6, 1976 and June 9, 1976, (2) Amendment No. 29 to License No. DPR-21, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 6th day of August 1976.

[Dockets Nos. 50-259 and 50-260]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 26 to Facility Operating License No. DPR-33 and Amendment No. 23 to Facility Operating License No. DPR-52 issued to Tennessee Valley Authority (the licensee) which revised the Technical Specifications of the Browns Ferry Nuclear Plant, Units Nos. 1 and 2, located in Limestone County, Alabama. The amendments are effective as of the date of issuance.

These amendments revise the Technical Specifications to allow the withdrawal of one control rod at a time to perform functional testing of the control rod drive or control rod drive maintenance. The NCR staff has been authorized to issue these amendments by the August 4, 1976 Order of the Atomic Safety and Licensing Board presiding in the ongoing Browns Ferry, Units Nos. 1 and 2 proceeding.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, negative declaration, or environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated July 23, 1976, and (2) Amendment No. 26 to License No. DPR-33 and Amendment No. 23 to License No. DPR-52. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Athens Public Library, South and Forrest, Athens, Alabama 35611. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 5th day of August 1976.

For the Nuclear Regulatory Commission.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.108, "Periodic Testing of Diesel Generators Used as On-site Electric Power Systems at Nuclear Power Plants," describes a method acceptable to the NRC staff for complying with the Commission's regulations with regard to periodic inspection and testing of diesel electric power units to ensure that the diesel electric power systems will meet their availability requirements.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 1.108 will, however, be particularly useful in evaluating the need for an early revision if received by October 18, 1976.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland this 10th day of August 1976.

For the Nuclear Regulatory Commission.

[License No. 04/05-0086]

MARKET CAPITAL CORPORATION

Filing of Application for Approval of Conflict of Interest Transaction

Notice is hereby given that Market Capital Corporation (MCC), 1102 N. 28th Street, P.O. Box 22667, Tampa, Florida 33622, a Federal Licensee under the Small Business Investment Act of 1958, as amended, (Act), has filed an application with the Small Business Administration (SBA) pursuant to Section 312 of the Act and covered by Section 107.1004 of the SBA Rules and Regulations, governing Small Business Investment Companies (13 CFR 107.1004 (1976)) for approval of the Conflict of Interest Transaction falling within the scope of the above Section of the Act and Regulations.

Subject to such approval, MCC proposes to invest $100,000 in Supermarket Development, Inc. (Supermarket), which was incorporated in the State of Florida in 1975. The purpose of the corporation was to acquire leases on retail grocery locations abandoned by A&P, purchase the existing equipment in the locations from A&P, stock the stores with fresh inventory, and operate the stores as independent retail grocery supermarkets. The small business concern operates three (3) retail grocery supermarkets within the State of Florida. The addresses of the stores are:

1. Inverness Foodway, 104 South Pine Street, Inverness, Florida 32650.
2. Punta Gorda Foodway, 915 Taylor Street, Punta Gorda, Florida 33950.
3. Monticello Foodway, 575 South Jefferson Street, Monticello, Florida 32344.

The proposed financing is brought within the purview of Section 107.1004 of the SBA Regulations since, seven of the stockholders in Supermarket are members of the Board of Directors of Affiliated of Florida, Inc. (Affiliated). The Officers and Directors of Affiliated have been determined by SBA to be "Associates" of MCC since, when MCC finances a small firm the funds are frequently passed through Affiliated to various wholesalers to purcahse store equipment and groceries in order to obtain discounts from suppliers. Also, Mr. Burton Polk, a member of the Board of Directors of MCC, is the sole owner of Whiting & Polk, Inc. a corporation which presently owns 10 percent of Supermarket. Therefore, eight of the nine owners of Supermarket are "Associates" of MCC as defined by SBA.

The following is a list of the present stockholders of Supermarket:

	Percent
James A. Sapp	13.33
Robert Hitchcock, Jr.	13.33
Loy L. Carroll	6.66
Edward Lawhon	6.66
Arnold Stanaland	10.00
J. A. Alge	13.33
Whiting & Polk, Inc.	10.00
Lee M. Shackleford	13.33
Joe L. Davis	13.33

The following is a list of members of the Board of Directors of Affiliated:

Robert Hitchcock, Jr.	President
J. A. Alge	Vice President
James A. Sapp	Secretary
Lee M. Shackleford	Assistant Secretary
Loy L. Carroll	
Edward Lawhon	
Arnold Stanaland	

Notice is hereby given that any interested person may, not later than ten days from the date of publication of this Notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

[Docket No. 76-2]

TRADE POLICY STAFF COMMITTEE

Notice of Hearing on Proposed Duty Increase on Certain Brandy

By FEDERAL REGISTER notice of Monday, August 2, 1976 (41 FR Page 32298) notice was given of a proposed action increasing the duties on certain brandy and giving an opportunity for requests for a public hearing. That notice tentatively set the date of the proposed hearing for September 1, 1976. In response to requests for a public hearing on the proposed duty increase on certain brandy, and after taking into consideration the views of various interested parties, the public hearing date has been changed. The public hearing will now be held at 10:00 a.m. on September 21, 1976 in Room 730, Office of the Special Representative for Trade Negotiations, 1800 G Street N.W., Washington, D.C., 20506.

This action is proposed pursuant to section 125 of the Trade Act of 1974 (19 U.S.C. 2135), to restore the balance of benefits of trade agreement concessions.

By Proclamation No. 3564 of December 4, 1963 the United States suspended the application of certain trade agreement concessions on certain brandy valued over $9 per gallon (TSUS items 168.20 and 168.22). The action resulted in the placing of an additional duty on such brandy, raising the tariff from $1.25 and $1.00 per gallon, respectively, to $5.00 per gallon. This action was one of a group of actions taken in response to unreasonable restrictions maintained by the European Community (EC) on imports of poultry from the United States.

On July 16, 1974, in order to encourage the resolution of trade disputes between the European Community and the United States, and to obtain the removal of unreasonable import restrictions maintained by the EC on poultry imported from the United States, the United States provisionally restored prior trade agreement concession rates of duty on imports of brandy valued at over $9 but not more than $17 per gallon (Proclamation No. 4304 of July 16, 1974). It was the intention of the United States to provide a temporary adjustment for a limited period of time during which a satisfactory solution to the problem of EC poultry import restrictions could be found.

No solution having been reached on this problem in the intervening period, it is proposed that the $17/gallon price-break (above which the $5/gallon duty has applied) be changed to $9, the level set when the concessions were suspended in 1963. It is proposed that the tariff on brandy (provided for in TSUS items 168.28 and 168.32) valued at over $9, per gallon be increased to not less than $5.00 per gallon.

PROCEDURES FOR TESTIMONY AND SUBMISSION OF WRITTEN BRIEFS

A request by an interested party to present oral testimony at the public hearing on September 21 must be submitted in writing before the close of business September 13, 1976 and shall state briefly the interest of the applicant and the position to be taken by the applicant. Written briefs accompanying oral testimony shall state clearly the position taken and shall describe with particularity the evidence supporting such position. Written briefs accompanying oral testimony must be submitted in 20 copies which should be legibly typed, printed or duplicated to the Chairman, Trade Policy Staff Committee, Office of the Special Representative for Trade Negotiations, 1800 G Street, NW., Room 729, Washington, D.C. 20506 before the close of business Monday, September 13, 1976.

Written briefs may also be submitted in addition to or in lieu of testimony. To be fully considered by the Committee written briefs not accompanying oral testimony should be received by September 17, 1976. Written briefs should be addressed to Chairman, Trade Policy Staff Committee, 1800 G Street, NW., Room 729, Washington, D.C., 20506.

In order to assure each party an opportunity to contest the information provided by other interested parties in the written briefs and in the public testimony, the Committee will entertain rebuttal briefs filed by any party. To be fully considered by the Committee rebuttal briefs must be received in the Office of the Special Representative for Trade Negotiations on or before the close of business on Monday, September 27. Rebuttal briefs should be addressed to the Chairman, Trade Policy Staff Committee, Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Room 729, Washington, D.C., 20506.

After receipt and consideration of a request to present oral testimony at the public hearing on September 21, the Secretary of the Committee shall notify the applicant whether the request conforms to the requirements of the regulations of the Office of the Special Representative for Trade Negotiations and if so, the time and amount of time allotted for his oral testimony and, if not, the reasons why the request does not conform to the requirements.

In presenting testimony the interested party should supplement the information contained in the written brief and should be prepared to answer questions relating to such information.

The rules and regulations for hearings held by the Trade Policy Staff Committee are included in full in the FEDERAL REGISTER of Monday, April 28, 1975 (40 FR 18421).

RICHARD HEIMLICH,
Acting Chairman,
Trade Policy Staff Committee.

RAILROAD RETIREMENT BOARD

RAILROAD RETIREMENT SUPPLEMENTAL ANNUITY PROGRAM

Determination of Quarterly Rate of Excise Tax

In accordance with directions in section 3221(c) of the Railroad Retirement Tax Act (26 U.S.C. 3221(c)), the Railroad Retirement Board has determined that the excise tax imposed by such Section 3221(c) on every employer, with respect to having individuals in his employ, for each man-hour for which compensation is paid by such employer for services rendered to him during the quarter beginning October 1, 1976, shall be at the rate of twelve cents.

In accordance with directions in section 15(a) of the Railroad Retirement Act of 1974, the Railroad Retirement Board has determined that for the quarter beginning October 1, 1976, 12.8 percent of the taxes collected under sections 3211(b) and 3221(c) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Account and 87.2 percent of the taxes collected under such sections 3211(b) and 3221(c) plus one hundred percent of the taxes collected under section 3221(d) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Supplemental Account.

Dated: August 12, 1976.

By Authority of the Board.

R. F. BUTLER,
Secretary of the Board.

[Sec. 5b Application No. 3]

EASTERN RAILROADS
Agreement

AUGUST 9, 1976.

The Commission is in receipt of the above-entitled and numbered application for approval of an agreement under the provisions of Section 5b of the Interstate Commerce Act.

Filed, as Amended, June 20, 1976, by: Charles L. Smith, Chairman, Traffic Executive Association, Eastern Railroads, Suite 500, Two Pennsylvania Plaza, New York, NY 10001 (Attorney-in-Fact).
Andrew C. Armstrong, 171 Main Street, Hyannis, MA 02601 (of Counsel).

Agreement involves: Organization, practices and procedures between and among rail common carrier members of the Presidents Traffic Conference—Eastern Railroads and the Traffic Executive Association—Eastern Railroads for the joint consideration, initiation, or establishment of rates, classifications, divisions, allowances, or charges, or rules and regulations, pertaining thereto, applicable to the transportation of property in interstate or foreign commerce, from, to, and between points in Eastern Territory.

The complete application may be inspected at the Office of the Commission in Washington, D.C.

Any interested person desiring to protest and participate in this proceeding shall notify the Commission in writing within 30 days from the date of publication of this notice in the FEDERAL REGISTER. As provided by the General Rules of Practice of the Commission, persons other than applicants should fully disclose their interest and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application, without further or formal hearing.

ROBERT L. OSWALD,
Secretary.

[FR Doc.76-24345 Filed 8-18-76;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

AUGUST 16, 1976.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before September 3, 1976.

FSA No. 43214—*Joint Water-Rail Container Rates—Barber Blue Sea Line.* Filed by Barber Blue Sea Line, (No. 2), for itself and interested rail carriers. Rates on general commodities, from rail stations on the U.S. Gulf Seaboard, to ports in The Federation of Malaysia and the Republic of Singapore. Grounds for relief—Water competition.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[Notice No. 13]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before September 20, 1976. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-76561, filed July 15, 1976. Transferee: TACKNEY'S EXPRESS, INC., 274 Great Road, Action, Mass. 01720. Transferor: Robert J. Daigle, doing business as Tackney's Express, 274 Great Road, Action, Mass. 01720. Applicants' Representative: Dean E. Nicholson, P.O. Box 433, 19 Muzzey St., Lexington, Mass. 02173. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate of Registration No. MC 75654 (Sub-No. 2), issued January 10, 1964, to Robert J. Daigle, doing business as Tackney's Express, Action, Massachusetts, evidencing a right to engage in transportation in interstate commerce corresponding in scope to Irregular Route Common Carrier Certificate No. 1056, dated January 28, 1958, issued by the Massachusetts Department of Public Utilities; and Certificate No. MC 75654 issued November 4, 1958, authorizing the transportation of general commodities between Boston, Mass., and Maynard, Mass., serving all intermediate points.

Transferee presently holds no authority from this Commission. Application has not been filed for temporray authority under Section 210a(b).

No. MC-FC-76605, filed July 23, 1976. Transferee: M. L. HATCHER PICK UP AND DELIVERY SERVICES, INC., P.O. Box 7362, 3818 Patterson Street, Greensboro, N.C. 27407. Transferor: F & B Truck Line, Inc., P.O. Box 4258, High Point N.C. 27263. Applicants' Representative: Ralph McDonald, P.O. Box 2246, Raleigh, N.C. 27602. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate of Registration No. MC 98817 (Sub-No. 1), issued September 7, 1967, evidencing a right to engage in transportation in interstate commerce corresponding in scope to Common Carrier Certificate No. C-415 dated July 12, 1951, transferred and reissued May 2, 1966, by the North Carolina Utilities Commission authorizing the transportation of *general commodities*, except those requiring special equipment and except leaf tobacco, between all points and places within a radius of 75 miles of Spray; and between Leaksville, Spray and Draper on the one hand and Charlotte on the other; and *bagging*, from Leaksville, Spray and Draper to Henderson. Transferee is presently authorized to operate as a common carrier under Certificate No. MC 126574. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-76629, filed June 13, 1976. Transferee: STEINWAY VAN & STORAGE CORP., 42-45 12th Street, Long Island City, N.Y. 11101. Transferor: Columbia Moving & Storage, Inc., 6 Chivalry Lane, Nesconset, N.Y. 11767. Applicant's representative: Arthur J. Piken, Esq., Piken & Robbins, One Lefrak City Plaza, Flushing, N.Y. 11368. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC 118945, issued July 12, 1973, as follows: Household goods, as defined by the Commission, between New York, N.Y., on the one hand, and, on the other, points in Delaware, Maryland, and the District of Columbia. Transferee is presently authorized to operate as a common carrier under Certificate No. MC 19878. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-76663, filed July 14, 1976. Transferee: TRANSPORT EXPRESS, INC., 211 Yacht Club Way, No. 153, Redondo Beach, Calif. Transferor: Dockside Transportation, 4311 Wilshire Blvd. No. 300, Long Beach, Calif. 90813. Applicants' representative: Milton W. Flack, 4311 Wilshire Blvd., No. 300, Los Angeles, Calif. 90010. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-138790, issued April 12, 1974, as follows: *General commodities* with the usual exceptions between Los Angeles, Calif., on the one hand, and, on the other, Los Angeles Harbor and Long Beach, Calif.; *Non-alcoholic beverages and waste paper materials*, from Vernon, Calif., to Los Angeles Harbor and Long Beach, Calif.; and *Fibre boxes*, from South Gate, Calif., to Los Angeles Harbor and Long Beach, Calif. Transferee presently holds no authority from this Commission. Applicant has not filed for temporary authority under Section 210a(b).

No. MC-FC-76674, filed July 26, 1976. Transferee: LOUISIANA - PACIFIC TRUCKING COMPANY (a corporation), P.O. Drawer AB, New Waverly, Tex. 77358. Transferor: Louisiana-Pacific Trucking Company, Southern Division, a division of Louisiana Pacific Corporation, P.O. Drawer AA, New Waverly, Tex. 77358. Applicant's Representative: Harold R. Ainsworth, 2307 American Bank Building, New Orleans, Louisiana 70130. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 136749 (Sub-No. 1), issued March 6, 1975, as follows: *Lumber*, from the plant site of Boise Southern Company near DeQuincy, La., to points in Texas, with no transportation for compensation on return except as otherwise authorized. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

ROBERT L. OSWALD,
Secretary.
